SUBJECT INDEX

KEY

In using this index the following should be borne in mind:

1. **Subjects**, not words, have been indexed.
2. **Abstracts,** not merely their titles, have been considered in indexing.
3. The small **superior numeral** which accompanies each page number designates the fraction of the page in ninths in which the subject being indexed is first considered. The printed matter only, exclusive of page **headings,** has been thus subdivided.
4. "P" before a page number indicates that the abstract is of a **patent.**
5. The **alphabeting of index headings** has been done on the basis first of that part which comes before the comma in such headings as *Copper, metallurgy of* and *Phenol, p-nitro-*. *E. g.*, these headings come before the headings *Copper compounds* and *Phenol condensation products,* respectively.
6. **Organic compounds** are indexed on the basis of "parent compounds," or more accurately, "index compounds" (see Introduction), the names of substituent radicals following in alphabetical order. The system of naming organic compounds which has been used is outlined in the Introduction below. Esters and salts of organic acids are, in general, indexed under the names of the acids; notes in the index under the appropriate headings explain the few exceptions.
7. An **asterisk** (*) following the name of an organic compound entered in the index signifies that the name, or numbering, or both, are the author's own and may not conform to the system of nomenclature used in this index. This sign is used where it has seemed inadvisable, owing to incomplete information, to attempt to make the name conform to the system, or where the author's name, differing widely from the one given to the compound by the indexer, is given as an extra entry.
8. A **dagger** (†), which follows the names of a few compounds, signifies that the entry is an extra one, the name being only slightly less favored than the one chosen for the other entry. The preferred name can be determined by reference to the Formula Index.

The desirability of making the index readily usable without the need of reference to an elaborate introduction has been held constantly in mind. Although an introduction seems desirable and should be helpful, nevertheless the index is dependent neither on the Key nor on the Introduction. Numerous cross-references are given throughout the index, and notes appear in connection with certain headings. An examination of the Introduction, which follows, should be especially helpful to those interested in looking up organic compounds.

INTRODUCTION

General policy The indexing of subjects, as opposed to word-indexing, has been emphasized. This avoids omissions, scattering and unnecessary entries; with the abundant cross-references used it means that one should be able to find all of the references on any subject with certainty and with a minimum of effort. The words used as subject headings or in modifying phrases are not necessarily to be found in the abstracts but an expression of the idea suggested will be found within or beginning in the ninth of the page designated by the small superior numeral following the page number. Chemical compounds have been named and entered systematically; the system used is outlined below. All new compounds and all elements, compounds and other substances for which new data are given have been indexed, with the single exception of new compounds for which no name or structure has been given. Such compounds are entered only in the Formula Index. The Subject Index is in no other respect altered because of the Formula Index.

Modifying phrases In writing such phrases for the entries under any heading the words have been arranged so that the idea considered to be the most important is expressed at the beginning whenever feasible and this procedure, as well as the selection of the words for this purpose, has been governed by numerous formulated general principles and specific rules. *E. g*, "detection of" has been used consistently whenever correct at the beginning of the modifications in indexing subjects treated from a qualitative analytical point of view, instead of permitting a scattering under such additional phrases as "test for," "reaction for," etc., regardless of what words may have been used in the text. In the case of appropriate headings the selection of first words for modifications has been made on the basis of a definite system of classification. Under a few large headings two or more entires have been made on indexing a subject in a single abstract in case two or more ideas could be used equally well to start the modifying phrase. In alphabeting modifying phrases prepositions at the beginning have been ignored.

References to fractions of the page. One can readily estimate ninths of a page with considerable accuracy by placing the fore or middle finger one-third of the distance from the top of the printed matter on the page and the thumb one-third of the distance from the bottom, a procedure very easily carried out.

Inorganic compounds. Simple inorganic compounds are entered under the usual names. In indexing compounds of iron, gold, copper and tin such headings as *Iron sulfates*, under which both the "ous" and "ic" salts are entered, have been used rather than headings beginning with "ferric(ous)," "auric(ous)," "cupric(ous)," or "stannic(ous)." Acid salts, such as NaH_2PO_4, are entered under such headings as "*Sodium phosphates*." With the exception of a few very common compounds, such as carbon dioxide and carbon monoxide, compounds of a given element with another or with a definite radical, which differ only in valence relations, are grouped. *E. g.*, the various oxides of nitrogen are grouped under the heading "*Nitrogen oxides*" and classified there. Complex inorganic compounds which cannot be given definite names satisfactory for indexing are usually indexed under the heading which represents the class of compounds concerned and under a heading of the type *Nickel compounds*, depending on what the significant element is. *E. g.*, dichlorotetraamminecobaltic chloride would be indexed under "*Ammino compounds*" and under "*Cobalt compounds*." The Formula Index, which follows the Subject Index, should be particularly helpful in locating complex compounds.

Organic compounds. The system used for naming and indexing organic compounds is the same as that in use starting with the 1916 volume. An explanation of it by

Austin M. Patterson and Carleton E. Curran, who are its originators, has appeared in another journal of the Society.[1] The system is based on existing usage and follows this as far as is practicable, so that a great many familiar names are unaffected. Only the general principles will be given here, but in the index itself will be found abundant cross-references and also notes under *Alcohols*, *Ketones*, etc., indicating how compounds of these classes are named.

1. The chief function of a compound is expressed *in the main part of the name* wherever possible, and not as a substituent, thus: Pyrrolecarboxylic acid, not carboxypyrrole; ethyl alcohol or ethanol, not hydroxyethane; pentanone, not ketopentane.

2. In compounds of mixed function, the chief function is determined from the following order of precedence: *"onium" compounds*,[2] *acid* (carboxylic first), *acid halide, amide, imide, aldehyde, nitrile, ketone, alcohol, phenol, mercaptan, amine, imine, ether, sulfide* (and *sulfoxide* and *sulfone*). Thus, hydroxybenzonitrile, not cyanophenol; aminophenol, not hydroxyaniline.

3. A multiple chief function is expressed where feasible as -diol, -dicarboxylic acid, etc , rather than as hydroxy—ol, carboxy—acid, etc. But amino and imino groups attached to cyclic bases are treated as substituents; as, aminopyridine.

4 The parent compound should be as large, and the substituents as small, as is practicable in conformity with the above rules; as, ethylbenzene, not phenylethane. But such names as diphenylethane and triphenylcarbinol are exceptions. When the chief function is in a side chain attached to a complex nucleus, "additive" names are preferred in order to harmonize 1 and 4; thus, naphthaleneacetic acid, not naphthylacetic acid (with the result that the compound is indexed with other naphthalene derivatives instead of under acetic acid; see 5).

5. The main part of the name with its functional ending, if any, is placed *first* in the index, the names of substituents following; thus, chloroacetic acid would appear in the index as *Acetic acid, chloro-* and dihydroxyanthraquinone as *Anthraquinone, dihydroxy-*. The part thus placed first is called the "index compound," it may or may not be the "parent compound" (in the second example the parent compound is anthracene).

6. Names in which two functions are expressed in the index compound, as propanolone, cyclopentanonecarboxylic acid, are avoided, except that a few very common ones, such as phenolsulfonic acid, are used (indicated by cross-references).

7. The names of the substituent radicals in the name of a compound are arranged *in alphabetical order;* as, *b*enzyl*e*thyl*m*ethyl*p*henylammonium chloride The number of radicals of each kind does not affect the order (*e. g.*, *benzyl* precedes *ethyl* no matter how many of each are present); but the compound name of a substituted radical is treated as a unit with its own alphabetic position; thus *dimethylamino*, Me_2N-, follows *benzyl* but precedes *ethyl*. When the complete name has been formed, it is alphabeted as any other word.

8. Parentheses, brackets and even braces are used where necessary to mark off complex radical names.

9. Familiar methods of numbering are employed (Greek letters for acids, alcohols, etc., and for side chains; arabic numerals for Geneva names and rings). The numbering of complex nuclei is shown in the index under the parent compounds; it is practically identical with that of Richter's "Lexikon" so far as that work goes

10. When two or more numberings are possible that one is chosen which gives the smallest number or numbers for the *chief function*, then for double bonds if these

[1] Patterson and Curran, *J. Am. Chem. Soc.* **39**, 1623–38(1917).
[2] Though "onium" does not designate a function in the strict sense, compounds of this type are often, though not always, named as though it were a chief function.

must be regarded, then for triple bonds, then for point of attachment (doubled molecules), then for substituents

11. Unnecessary numbers are avoided: thus, in Δ^3-1-cyclohexanol the 1 is not needed because by the rules in paragraph 10 the OH group is assumed to be in position 1.

12. Numbers in parentheses are used to indicate the position of entering hydrogen necessary to the existence of the compound; thus, 4(3)-quinolone is equivalent to 3,4-dihydro-4-ketoquinoline.

13. Doubled molecules or radicals are indicated by names commencing with *bi-* (as, *o,o'*-biphenol, biphenyl, $\Delta^{4,4'}$-bipiperidine). *Bis-* is used for like molecules united by a bivalent radical, as, methylenebisphenol.

In using the *cross-references*, the *general* nature of many of them should be kept in mind; thus, the reference "*Benzene, ethoxy-.* See *Phenetole*" is applicable not only to this compound itself but to derivatives, which are indexed under it rather than under *Benzene.*

ORGANIC RADICALS

An extensive list of preferred names for organic radicals was given in the 1916 Index in a place corresponding to this and also in the Introduction of the Decennial Subject Index. With few exceptions they are the ones in common use. Attention is here called merely to the preferred names for some radicals having more than one name in the literature and to some radical names recently adopted.

acenaphthenyl $C_{12}H_9$–
acetyl CH_3CO–
acridyl $C_{13}H_8N$–

RING INDEX

The following index of *ring complexes* is arranged as shown by the bold-face figures: Class I, with single figures indicating simple rings of 3, 5, etc., members; Class II, two figures denoting double rings of 3 and 4, 3 and 5, etc., members; then the triple and still more complex rings. Under each combination of figures the kind and number of atoms in the ring or rings are expressed in formulas. These formulas are arranged so that their initial rings are in the same order as in the Formula Index (see Key at the beginning of it). If the initial rings are alike the second rings of the formula are considered, and so on. By this means the reader will be able to learn the name used in the index for the simplest parent compound containing any particular ring or combination of rings and by turning to this name in the index he will find the compounds listed and, perhaps, cross-references to names of derivatives. Rings which are united but which have no atoms in common (*e. g.*, biphenyl) and "spiro" compounds[1] which are characterized by two rings having but one atom in common are not regarded as ring complexes nor included in this index.

To illustrate: **6,6,6,** C_4N_2-C_6-C_6 Benzoquinoxaline
Phenazine

(1) This designates a complex ring of three components, each of six members; (2) the first is heterocyclic, containing four carbon atoms and two nitrogen atoms and the other two are carbocyclic rings of six atoms each; (3) parent compounds of this configuration will be found in the index under the two names given. If derivatives are indexed a structural formula will be found with the proper numbering and also appropriate cross-references to derivs. having other common names, if any such are in the index.

It should be noted that the classification is made with reference to the smallest rings which, placed together, will constitute the plane formula. Thus hexamethylenetetramine is treated as a 6,6,6 complex although a fourth six-membered ring (composed of atoms from the three six membered rings) is also present.

Violanthrone

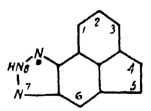
X

C_5-C_5-C_5-C_6-C_6-C_6-C_6-C_6-C_6-C_6. Decacyclene

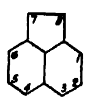
Abderhalden reaction, dependence on digestive enzymes, 1452^{9}.
  interferometric method in, 3472^{8}
  technic of, 3173^{9}.
Abel, John Jacob, biography, 3315^{1}
Aberration, in ultramicroscopy, 3592^{1}.
Abies. See *Fir*.
Abietic acid, 512^{4}.
  detection of, 2341^{5}.
  detn. of, in resins, 2165^{7}.
  and isomer, from American rosin, $3012^{8,9}$.
  photoactivation by ultra violet light, 1654^{1}
  reactions of, $421^{5,8}$
  reaction with glycerides, 117^{6}.
  from rosin, 2419^{1}.
  from rosin, constitution of, 2756^{9}
  in rosins of France and America, 832^{7}.
  salts, $2165^{7,9}$, 2166^{1}.
Abietic acid, dihydro-, 766^{9}
Abrasion, testing app., 1505^{4}
Abrasives. (See also *Polishing materials*.) P 1310^{9}, P $1505^{7,8}$, P 2236^{2}
  adhesive for, P 483^{9}
  alumina for, P 650^{9}.
  aluminous, P 2056^{1}
  articles of, P 488^{1}
  cement, P 3548^{6}
  disks of, P 650^{9}
  in metal finishing, 1700^{1}
  mixing, with asphalt, P 272^{5}
  resources of U. S. in 1924, 1894^{5}
  sheet, P 1895^{7}, P 3068^{3}.
  wheels, formation of, P 465^{2}
Absolute zero. See *Zero absolute*
Absorbents, agglomeration of, P 3786^{7}.
  apolar, siloxene as, 3140^{7}.
  in culture media, growth-inhibiting changes produced by, 2311^{5}.
  fibrous compn., P 1722^{6}.
  fireproofing, P 3216^{3}.
  gas absorption by, app. for, P 1924^{4}.
  for gases, protecting from penetration by liquids, P 484^{8}, P 1478^{9}.
  for gasoline, P 3216^{3}, 3232^{4}.
  for gas-washing, satn. curves of mixed, 788^{4}
  for waste combustion gases, P 1307^{4}.
Absorption. (See also *Absorption (of rays)*, *Resorption*, *Sorption*; and such headings as *Carbon dioxide*; *Carbon monoxide*; *Oxygen*; etc.)
  anomalous, of elec. waves, 2940^{1}
  of asphalt in mineral oils or their residue by fuller's earth contg. hydrosilicates, 3229^{0}
  of calcium salts by blood, effect of acidity in intestine on, 3489^{9}.
  by choroid plexus, 2008^{7}.
  by clays, 269^{2}.
  of copper ions by wheat, 1426^{9}.
  detn. in soils, 3201^{9}.
  of dust, 2712^{4}.
  of electrons in gases, 2782^{3}
  of electrons in Hg vapor, 1025^{4}.
  of electrons, ionization in air during, 2784^{8}
  of esters by skin, 2370^{5}.
  of fats, effect of vitamin A on, 2187^{9}.
  of fertilizers by Ceylon soils, 3768^{4}.
  of gases, P 3522^{7}
  of gases by a liquid drop, 1543^{7}.
  of gases by colloidal solns., 1739^{1}.
  of gases by nitrocellulose, 583^{6}.
  of gases by skin, 71^{8}.
  of gases in milk of lime, 3620^{8}.
  of gases, rectification and, 1476^{6}.
  of glucose, increase in blood and lymph sugar during, 2194^{1}.
  of hemoglobin in organism, relation to deposition of Fe pigment, 1416^{3}.
  of hydrochloric acid gas and SO_2 in H_2SO_4 and AcOH, 3781^{7}.
  of hydrochloric acid gas by H_2SO_4, 3781^{5}.
  of hydrogen ions, effect of electrolytes on, 2714^{1}.
  of incompletely digested proteins, 2697^{8}.
  of inorg. elements by plants, effect of CO_2 content of soil air on, 641^{8}
  of insulin, 2881^{8}.
  intestinal. See *Intestines*.
  of iodine by casein, 686^{8}.
  of ions by plants, 1648^{9}.
  of ions by seeds selectively, 774^{3}.
  of lead, 455^{8}
  of liquids by fibrous sheet materials, app. for testing, P 111^{6}.
  of methylene blue from buffered solns. by cotton, 1909^{2}
  of mist, 1289^{1}.
  of narcotics in cold blooded animals, 1864^{7}
  of nitrous gases in water, P 1306^{7}
  of nutrients by young rye plants, effect of light on, 1426^{1}.
  of oxygen by alk. pyrogallol, 5^{2}.
  of oxygen by polluted waters, effect of Cl on, 3763^{9}
  from peritoneal cavity of hexoses and pentoses, 3720^{9}
  of phosphate by Pasteur-Chamberlain filters, 641^{4}
  of phosphoric acid and of K by plants, effect of light on, 2521^{1}.
  of phosphoric acid by soils, 1484^{8}
  of phosphorus and Ca compds. by gastro-intestinal canal, 1841^{9}
  in plants, effect of ions on, 2181^{6}
  of potassium by plants, 220^{6}
  of potassium iodide by skin, 1091^{7}.
  of potassium ion in colloids of clay, 2890^{2}.
  of salts by vegetable cells, 220^{6}
  by seeds, effect of salt solns. on, 773^{8}
  of sodium hydroxide by cellulose, P 2247^{8}
  of sodium hydroxide by sulfate pulp from caustic soda solns. and black liquor, 2745^{9}.
  of sodium nitrate by oats and cotton, 1681^{7}
  by soil, 3203^{8}
  by soils, detn. of capacity, 1482^{6}.
  in soils of P and K in presence of phosphatic fertilizers, influence of soil reaction on, 470^{5}
  in solid dielectrics, theory of, 1478^{2}.
  of strophanthin and digitoxin, influence of saponin on, 456^{1}.
  of undigested protein, 3505^{1}.
  of vapors from gaseous mixts., P 81^{7}.
  variations in power of, 1739^{2}
  of water by barley seeds, 3715^{3}.
    by brain tissue, effect of adrenaline and thyroxin on, 3505^{4}.
    by central nervous system tissue, 1839^{8}.
    by cotton of various origins, 1326^{6}.
    by fibers, 2747^{2}
    by rubber, 842^{8}, 2092^{7}.
    by soils, 639^{4}, 3766^{7}.
    by stretched and relaxed muscle, 3499^{1}.
  by yeasts, 1829^{3}, 2559^{4}.
Absorption apparatus, continuous, P 3592^{7}.
  for gases, P 523^{7}, $1731^{7,8}$, P 1924^{4}.
  for gasoline from natural gas, P 662^{8}.
  for hydrochloric acid, 1890^{7}.

for nitrous fumes in HNO_3 manuf., etc., P 1306[7].
spray head for, 522[6]
for vapor recovery, P 1541[6]
Absorption bands See "absorption" under *Spectrum*
Absorption (of rays). (See also *Spectrum*, and the various specific kinds of rays, as *Light, infra-red, Light, ultra-violet, β Rays; Rays, cathode; Rays, positive, Rays, Rontgen*)
in anthracene, 711[6]
Beer's law, validity in dil electrolytic solns., 3620[5]
by bromine (wet and dry), 2123[6]
by cesium vapor, 1351[7]
coeff for light and for photoelectrons of cathodically dispersed Pt, 2456[1]
coeff for slow electrons in vapors of Hg, Cd and Zn, 332[3].
coeff. of, dependence on thickness of absorbing layer of color, 1759[5].
coeffs. of, estn. of max., 143[6].
in colored alkali halides, 2456[7].
colors of the 2nd order, 3161[6]
of cosmic rays, detn of coeff. of, 2457[8].
curves, types of, 3635[2]
by electrolyte solns., 136[9], 548[4].
by excited gases, 867[1].
by fluorescent substances, measurement of coeffs. of, 1562[4].
glass softening and, 2732[6].
by graphite particles, 3353[9].
by graphite suspensions, no and size of particles and, 2929[2].
in helium, 2115[4].
by hematoporphyrin, 2508[3].
of high-frequency radiation in H_2O, 2790[2].
J phenomenon in scattered x rays, 146[4].
by leaves, 2518[7].
limits of, apparent shape of x-ray lines and, 700[8].
of penetrating radiation of actinium in equil with its products, 2784[4]
photography of transmission curves, app for, 1925[6].
by powd materials, 3127[8]
by quanta in solid bodies, 1759[6].
refraction and, 3130[7]
of resonance in x-ray region, measurement of, 1949[4].
in salt solns, relation to contraction and light refraction, 699[5].
in sodium vapor, 1555[7].
true, of light, 1952[9].
by tungsten and Mo, 2619[5].
Absorption spectra. See *Spectrum*.
Abura. See *Mitragyna macrophylla*.
Acacatechol, oxidation of, 2489[3].
Acacetin, and dibenzoate, 2162[5].
——, **dibromo-***, 2162[5]
Acacia. (See also *Gum arabic; Wattle bark.*)
arabica, 1535[8].
nodule formation in, 774[1].
Acaciin, and derivs., 2162[4].
spectrum of, 1991[3].
Acanthias vulgaris, pancreatic ext. of, 451[4].
Acanthine, from animal organism, 2025[4].
——, **hydroxy-***, and derivs., 1085[6,7,8], 2502[9], 2503[6,7].
Accelerators. See *Catalyzers; Enzymes;* and "vulcanization of" under *Rubber*.
Accidents, in chem. industry, records for, 249[3].
prevention of, 81[4].
Acclimatization, 2191[9]
in adsorption, 3110[8]
Accum, Frederick, biography of, 849[2]
Accumulators (All secondary cells are indexed under this heading See also *Anodes, Cathodes; Depolarizers, Electrodes.*) (*Patents.*) 21[8,9], 151[3], 340[7,8], 553[5], 714[5,6], 875[6,7], 1181[7], 1360[1], 1568[2], 1762[2,3], 1957[4,5,6], 2125[8,9], 2162[3], 2957[7], 3396[8,9], 3650[1,2].
acids, table of wts. and ds. of, 2623[1].
"alk," P 2125[9]
charged with vacuum tube rectifiers, 1035[7]
charging, d.-c generators for, 2955[7]
charging, electrolytic rectifier for, P 3650
charging from d. c mains, 1359[5]
condition of, app. for indicating, P 3270[7]
containers for, P 22[1], P 341[1], P 1568[2]
containers, plastic molding compn. for, P 2678
control, 1565[7].
with cooling coil above electrolyte, P 2290[1]
corrosion of terminals of, preventive for, P 340[6], P 341[1].
Edison, 1565[9].
efficiency of, catalysis and, 2271[8].
electrode protection in, P 3649[6]
electrolyte for, P 1957[6], P 2125[7], P 3650[1]
electrolyte level and sp. gr of, device for indicating, P 3136[5]
electrolyte level indicator for, P 22[1], P 553[6], P 714[7]
electromotive force of, dependence on amt of acid present, 2267[3]
filling cells with electrolyte, app for, P 341[1]
gas, P 2462[4].
gases from, app for neutralizing and removing moisture from, P 2290[1]
history of, 1181[2]
with hydrometer, P 340[8], P 3270[7]
iron detn in acid of, 3661[6]
lead oxide type, P 3396[8]
lead, secondary reaction in discharge of, 1181[1].
lead, theory of, 3135[4].
lead wire cables for, P 2126[1]
manuf. of, lead poisoning in, 1761[7].
polarization in lead, effect of current and concn on, 339[8]
separators for, P 21[8,9], P 151[1], P 340[9], P 553[5], P 1360[6], P 1568[2], P 2957[7,8]
separators for, from wood, 3396[5]
testing, auxiliary Cd electrode for, P 875[9].
testing with Hg_2SO_4 electrode, 3648[6]
theory of, 1761[7].
utilizing old plate material from lead, P 340[9]
weight efficiency of, 3396[4]
zinc-Pb, P 2125[9]
Acenaphtha - 1,2,4,5 - heptatetrazine, 3-thioketo-*, 1810[7].
2-Acenaphthenamine, reactions of, 411[1]
——, **3-(*p*-nitrophenylazo)-**, 411[2].
3 - Acenaphthenamine, 2 - (*p* - bromophenylazo)-, 1081[5]
——, **2-(*p*-chlorophenylazo)-**, 1081[5].
——, **2-(*p*-nitrophenylazo -**, 1081[5].
——, **2-phenylazo-**, 1081[1]
——, **2-*s*-pseudocumylazo-**, 1081[4].
——, **2-*m*-(*o* and *p*)-tolylazo-**, 1081[4].
7-Acenaphthenamine, and salts, 410[8,9].
Acenaphthene, book: Some Derivs. of, 1630[8].
compds. with *s* trinitrobenzene, *m*-dinitro-

benzene and picric acid, dissocn. consts. of, 859[6].
oxidation of, 3010[6].
reaction with quinolinic anhydride and $AlCl_3$, 764[7].
——, 3-benzoyl-†, 1075[7].
——, 3-benzyl-, 1075[7].
——, 2-chloro-, and picrate, 411[1].
——, 7,8-diketo-. See *Acenaphthenequinone.*
——, hexahydro-, 1405[1].
3-Acenaphthenecarbinol, α-phenyl-, 1075[8].
Acenaphthenediol, tetrahydro-, and diacetate, 1405[1,4].
7,8-Acenaphthenedione See *Acenaphthenequinone.*
2,4-Acenaphthenedisulfonic acid, 3-amino-, disodium salt, 411[3].
Acenaphthenequinone, cyclic thiocarbohydrazone, 1810[6].
reaction with $NaNH_2$, 2491[7].
reduction of, 2852[1]
——, 3-benzoyl-, 1076[2]
Acenaphthene series, 410[8], 411[2].
1-Acenaphthenesulfonic acid, 3-amino-, sodium salt, 411[3]
——, 3-benzamido-, sodium salt, 411[4]
3-Acenaphthenesulfonic acid, 4-amino-, sodium salt, 411[1]
——, 4-nitro-, sodium salt, 411[2]
7-Acenaphthenol, and carbanilate, 2852[1], 3010[6]
7-Acenaphthenone, 3010[7].
Acenaphthotriazole,



——, 8-(p-bromophenyl)-4,5-dihydro-, 1081[5]
——, 8-(p-chlorophenyl)-4,5-dihydro-, 1081[5]
——, 4,5-dihydro-8-phenyl-, 1081[3]
——, 4,5-dihydro-8-s-pseudocumyl-, 1081[4].
——, 4,5-dihydro-8-*m*(*o* and *p*)-tolyl-, 1081[4].
4,5-Acenaphthotriazoledione, 8-phenyl-, and phenylhydrazone, 1081[3,4].
Acenaphthylene,



–, 7,8-dihydro-. See *Acenaphthene.*
Acetal (*1,1-diethoxyethane*)
dispersion of elec. double refraction of, 2612[5].
prepn. of, 40[8], 3087[6].
Acetaldehyde. (See also *Metaldehyde; Paraldehyde.*)
azine, hydrogenation of, 3282[6].
in blood normally and in diabetes, 3725[2].
condensation and polymerization products of, P 2333[2].
detection of, 3733[1].
diethyl acetal—see *Acetal.*
effect on anesthetic ether, 3747[8].
on carbohydrate content of plants, 2872[6].
on oxidation in muscle, 440[1].
electrolytic reduction of, 2622[9].
in fermentation of EtOH to AcOH, 2867[7].
formation of, from C_2H_2 and H_2O with Al_2O_3 as catalyst, 691[9].
in animal organism, effect of insulin on, 3742[9].
during bacterial fermentation, 218[3].
during fermentation and respiration of yeast, 3307[9]
by plant cells in relation to concn. of O and CO_2, 1830[4].
heat of soln of, 211[1].
as intermediary product in anaerobic respiration of higher plants, 1095[6].
in germination of seeds which contain fats, 3715[6].
in plant respiration, 2519[8].
manuf. of, P 1243[2], P 1630[9], P 1813[5], P 1995[5,6].
from acetylene, P 3397[7].
from C_2H_2, catalysis in, 463[9].
from sulfite liquor, P 823[2].
metaldehyde from, P 2333[2].
oxidation in reversible systems, 2611[4].
oxidation of, P 3696[5].
oxidation reduction potentials of, and of EtOH + AcOH + MeCHO, 328[8].
oxime, light scattering of, 329[2]
oxime, thermochemistry of, 1978[3].
phlorhizin expts. with, 1858[1].
photolysis of, 3390[5].
polymerization of, in presence of H_2S, 2657[3].
reaction with NH_3 and HCN, 3260[5].
with cinnamaldehyde, 738[5].
with fused caustic alkalies, 1588[2].
with HCN, 3260[1].
sepn. from EtOH, 1050[8].
thermal decompn of gaseous, 2774[9].
Acetaldehyde, benzoyl-, derivs., 760[6,7], 761[1].
——, cyclohexyldiphenyl-, and derivs., rearrangement of, 1988[8], 1989[1].
——, dibromo-, diethylacetal, 1590[8].
——, diphenyl-, 3000[2].
rearrangement of, 2844[6].
——, di-p-tolyl-, rearrangement of, and semicarbazone, 2844[5,6].
——, phenyl-. See *α-Tolualdehyde.*
——, trichloro-. See *Chloral.*
——, trimethyl-. See *Pivalaldehyde.*
——, triphenyl-, rearrangement of, 1988[6].
——, trithio-*, rearrangement of, and derivs, 578[4].
Acetals (*Individual acetals are ordinarily entered as derivatives under the names of the corresponding aldehydes or ketones. See also* Acetal.)
hydrolysis of, of HCHO, velocity of, 3621[5].
manuf. of, P 423[4].
of pentaerythritol, hydrolysis of, 2108[9].
Acetamide, decompn. of, 1054[9].
as fertilizer, 1881[9].
hydrolysis of, measurement of contraction during, 2108[8].
mobilizing effect of, 1439[2].
prepn. of, 42[9].
soln. in $PhNO_2$, d.-temp. curves of, 3117[1].
system: salicylic acid–, "thaw"-m.-p. diagram for, 693[9].
utilization in man, 1439[9].
——, α-acetamido-*N*-ethyl-, 1624[1].
——, *N*-acetyl-. See *Diacetamide.*
——, *N*-(5-amino-2-pyridyl)-†, 764[2].
——, benzal-. See *Cinnamamide.*

——, **α - benzamido - α - benzoyl - N - ethyl-**, 1623[4].
——, **N-benzyl-**, 2979[6].
——, **α-benzyl-**. See *Hydrocinnamamide*.
——, **N, N - bis(2 - hydroxycyclohexyl)-**, diacetate, 2831[8].
——, **N, N-bis(p-nitrophenyl)-**, 2834[6].
——, **N-bromo-**, reaction with ethylene compds., 2979[1].
——, **α-bromo-N-vanillyl-**, 404[9].
——, **N-butyl-**, 2979[6].
——, **α - chloro - N - (3,6 - dibromo - 1-carbazyl)-†**, 1079[7].

app., accidents caused by, 825^2.
calorific value of, 104^4.
chem. behavior in mixt. with Rn, 1031^8.
condensation and polymerization products of, P 2333^{2,8}.
condensations of, 1384^7.
containers for, P 2433^8, 2749^5.
containers for, filling mass for, P 484^1, P 1153^1, P 3216^9.
cooling with liquid air, explosion in, 1716^8
cryoscopic measurements of solns in liquids, 2267^1.
derivs., 1401^7.
derivs., detection of, 2626^9.
detonation by, prevention of, 1510^3
dimagnesium derivs., reaction with acrolein, 1978^1.
effect of α-particles on, 1556^6.
effect on explosibility limits of CO and air, 989^3
effect on luminescence of P, 3391^6.
explosions of, in welding, 112^2.
flow through a porous wall, rate of, 3601^5.
hydration to AcH, catalysis in, 463^9
from hydrocarbons, 3230^9.
hydrogenation of, effect of gaseous ions on, 2459^7.
ketenes from monohalogen derivs., 1782^9.
from lubricant of liquid O app., 788^8.
manuf. of, 2897^3.
manuf. of, from Roumanian natural gas, 276^4
oxidation of, effect of gaseous ions on, 2459^7.
polymerization of, catalysis by ions of inert gases, 702^4.
effect of gaseous ions on, 2459^{7,9}.
under influence of α-particles, 540^9
ions of inert gases and CO_2 as catalysts for, 1760^4.
purification of, P 3697^5.
reaction with org. compds., P 607^1.
soly. in certain org. solvents, 853^8.
spectrum of, 14^8
storage of, P 804^{3,4}, P 3522^9.
susceptibility to, metallic activity and, 2706^1.
systems: acetone–air–, and satd. hydrocarbons–, 1549^5.
transportation of, accidents from, 1716^1.
Acetylene, *p*-anisylbromo-*, 1783^2.

heating, P 2215[7].
of *Hevea* rubber, 3099[9].
hydrogenation of aromatic, and their salts, 1798[9].
hydroxamic, rearrangements of, 591[3].
hydroxy, autoxidation of, 582[9].
hydroxycarboxylic, acetylation of aromatic, 1613[5].
hydroxy, configurational relation of amino acids, sugars, sugar acids and, 921[2]
hydroxy, configuration of, 2980[6], 3688[1]
α-hydroxy, crystal structure of, 3597[1]
imino-, hydrogenation of, 56[6]
inner frictions and ds. of mixed aq salts and solns. of, 1935[6].
as intermediate stages in oxidation of sugars by fungi, 3713[7]
intoxication—see *Acidosis*.
ionization consts. of, in presence of H_3BO_3, 2980[4].
ionization consts. of multivalent, 2774[5, 6].
ionization consts. of weak, 3620[3]
ionization of, 2932[3].
ionization of dibasic, 3372[7].
iso-unsatd. solid, formation during hydrogenation of fatty oils, 834[5].
α keto-, addn. reactions of unsatd., 3164[5]
ketones (cyclic) contg. 10- to 18 membered rings from di-CO_2H, 1792[1].
α-keto, reaction with NH_3, 56[7].
β-keto-, reaction with $CH_2ClCHClOEt$, 757[9]
β-keto-, sapon. of esters of higher aliphatic, 2660[6].
in leather, deterioration of cellulose-fiber threads by, 3246[2].
melting ps. of dibasic, 2602[9].
metabolism of aromatic, 2354[1].
methyl esters of highly unsatd., hydrogenation of, 834[1].
mixed, in explosives manuf., safety in use of, 504[7].
mixed, reaction with $(ClCH_2)_2O$, and with $ClCH_2OMe$, 1588[6].
in muscle (excised), effect of changes in concn of ions on, 2527[4].
nitrating, calcns. for regeneration of, 2412[8]
nitric acid recovery from waste, P 1891[5]
in oils, removal of, P 283[2].
in oranges, effect of Pb arsenate spray on, 88[6].
from oxidation of gaseous hydrocarbons, P 2583[1].
oxidative splitting of unsatd., 301[5].
in ox-liver oil, 833[3].
penetrability of cells to, 2691[4].
photolysis of ethylene dibasic acids, 369[2].
pipet for, 1731[9].
poisoning of stomach by, 1666[6].
poisoning, treatment of, 2215[1].
potentiometric titrations of oxidizing, 2471[2]
precipitation in sugar manuf. by liming and carbonation, 2592[3].
pseudo, 1072[2].
pumps for, 1[8].
purification of aromatic, P 3698[1].
reaction of, contg. labile H with HCHO and secondary amines, 1413[8].
reaction of org., with Be carbonate, 1396[8].
reaction of weak bases with weak, 2604[3].
reactions of soil with dil., 1878[1]
reaction velocity with amalgams of Na and Zn, 1017[2].
reaction with bases, 1162[6].
with collagen, effect of vegetable tanning on, 517[9].
with metals, 2627[6]
with thallium and with Na, 2111[2].
with tungsten, 2102[8].
recovery from waste waters from metallurgical plants, 3440[5].
reduction of, 1593[9].
removal from oils, 118[8].
rotatory power of, effect of salts on, 3125[6].
salts of org., utilization by colon aërogenes group, 2869[4].
sepn. from beetroot molasses, P 3359[3]
sepn. of aliphatic and oxy, from albumin, peptone and carbohydrates, 1641[5]
sepn. of mono- and polybasic, 534[8].
sludge—see *Petroleum refining*
soly. of some org., influence of electrolytes on, 689[2].
soln. of amalgams in, rate of, 2649[8]
sorption on MnO_2, nitroalizarin and starch, 2268[7].
sulfur—see *Sulfur acids*
surface films of org., kinetic theory of, 2605[9]
swelling in presence of org., in connection with their structure, 3116[2].
synthesis of org., P 424[6]
systems of optically active org., with aldehydes and with ketones, 1051[6]
systems of, with amines and with azobenzene, 1224[5, 7]
tar—see *Tar acids*
taste, 2335[5]
testing of, for use in celluloid manuf., 3810[9]
thallium salts of org., crystalline liquid, 2817[3]
theory of, 4[1]
therapy with, 783[6]
thiocarboxylic, reactions of esters with Grignard reagents, 3693[9].
in tobacco resins, 967[5]
toxicity towards yeast, 3481[6].
transportation of, accidents from, 1715[8].
treatment of imitation-silk yarns, etc., with, app. for, P 115[6].
unsatd. aliphatic, carbohydrate esters of, P 2167[4].
compds. with H_2SO_4, 303[2].
reaction with $(CNS)_2$, 882[9].
unsatd., in bile, action of pneumococcus on, 614[2].
from corn starch, 2310[9].
from hydroxystearic acids, 1591[2, 3].
ozonization of Me esters of, 1590[1].
synthesis of higher, 1331[3].
urinary org., of growing children, effect of orange juice on, 1435[6].
in urine, acetamide effect on, 1440[1].
waste, concg. HNO_3 from, P 3064[9].

Acridinecarboxylic acid, 1,2,3,4 - tetrahydro - 2 (or **4**) **- methyl-,** 1628[6]
5-Acridinecarboxylic acid, prepn. of, 1239[1].
Acridine dyes. See *Dyes.*
5-Acridineëthanol, and derivs., 1239[2]
5-Acridinepropionic acid, hydrazide, and its di-HCl, 2501[6].
Acridinium compounds, as antiseptics, P 1692[9].
10 benzyl-2,8-dimethoxy— chloride, P 480[2].
2,8 - diamino - 10 - methyl-- chloride, monohydrochloride—see *Acriflavine.*
2,8 - dimethoxy - 10 - methyl— chloride, P 480[2].
10-ethyl-2,8-dimethoxy— **chloride, P 480[2].**
10 - hydroxyethyl - 2,8 - dimethoxy— chloride, P 480[2].
sol in fats and oils, P 95[8].
3(5) - Acridone, 7 - acetamido - 5,5 - diphenyl-, 1801[7].
——, **9-acetamido-5,5-diphenyl-,** 1801[7].
——, **7-amino-5,5-diphenyl-,** 1801[7].
effect of solvents on color and fluorescence of, 1802[2].
——, **9-amino-5,5-diphenyl-,** 1801[7].
——, **diamino-5,5-diphenyl-,** effect of solvents on color and fluorescence of, 1802[2].
——, **7,9-diamino-5,5-diphenyl-,** 1801[8].
——, **1,7,9 - triacetamido - 5,5 - diphenyl-,** 1801[8].
——, **1,7,9 - triamino - 5,5 - bis(aminophenyl)-,** and acetyl deriv., 1801[9].
——, **1,7,9 - triamino - 5,5 - diphenyl-,** 1801[8]
5(10) - Acridone, 1 (and **3**) **- chloro - 10 -** [*o* (and *p*)**-chlorophenyl]-,** 1992[3].
——, **2** (and **3**) **- chloro - 10 - phenyl-,** 1992[1,2].
Acridonium compounds. See *Acridinium compounds.*
5 - Acridyl, 1 (and **3**) **- chloro - 10 -** [*o* (and *p*)**-chlorophenyl] - 5,10 - dihydro - 5-phenyl-,** 1992[3,4].
——, **3 - chloro - 5,10 - dihydro - 5,10-diphenyl-,** 1992[2].
——, **5 -** [*m* (*o* and *p*) **- chlorophenyl] - 5,10-dihydro-10-phenyl-,** 1991[9], 1992[1].
Acriflavine, bactericidal action of, 1827[3], 2345[3].
disinfection with, effect of H-ion concn. on, 2688[8].
in dysentery treatment, 3740[3].
effect on bacterial infections, 1869[1].
on *Endamoeba gingivalis,* 3748[4].
on exudation and edema, 448[8].
on local suppuration, 1271[8].
on sepsis, 2019[7].
Acrolein (*acrylaldehyde*), crit. soln. temp. of mixts. of water and, 3121[3].
and diethyl acetal, prepn. of, 3692[9].
prepn of, 3280[6].
reaction with di-Mg deriv. of C_2H_2, 1978[1].
reaction with halogens, 1054[3].
reduction of, 1594[1], 1977[9].
Acrolein, β-ethyl-. See *α-Pentenaldehyde.*
——, **β-2-furyl-.** See *2-Furanacrolein.*
——, **α-iodo-,** 1054[4]
Acromegaly, glucosuria in, 2202[1].
protein requirements in, 2364[2].
Acrorus gramineus, oil of, constituents of, 2725[9].
Acrylaldehyde. See *Acrolein.*
Acrylic acid, metabolism of, 2010[9].
reaction with sulfite, 1165[6].
——, **β-acetyl-.** See *α-Pentenic acid, γ-keto-.*
——, **α-cyano-β-ethoxy-,** ethyl ester, condensation with amidines, 206[4]
——, **β-ethyl-.** See *α-Pentenic acid.*
——, **imidazolyl-.** See *Imidazoleacrylic acid.*
——, **β - p - phenoxybenzoyl-,** and derivs., and isomers, 593[4,5].
——, **α-phenyl-.** See *Atropic acid.*
——, **β-phenyl-.** See *Cinnamic acid.*
——, **β-pyrryl-.** See *Pyrroleacrylic acid.*
——, **triphenyl-,** reaction with sulfite, 1165[6].
1-Acrylonaphthone, β-anilino-, 1590[9].
——, **β-p-anisyl-2-ethoxy-, 1617[5].**
——, **β - (4 - ethoxy - 1 - naphthyl) - 2-hydroxy-, 2159[2],**

——, **2-ethoxy-β-phenyl-**, 1617[5].
——, **β-hydroxy-**, and copper deriv., 1590[9].
——, **2-methoxy-β-phenyl-**, 1616[8].
2-Acrylonaphthone, 3-methoxy-β-phenyl-, 1616[9].
Acrylophenone, β-anilino-p-methoxy-, 1590[9].
——, **β-anilino-p-methyl-**, 1590[8].
——, **β-furyl-p-hydroxy-**, glucoside, 593[2].
——, **β-hydroxy-**, and benzoate, condensation with N_2H_4 derivs., 3006[1].
——, **β-hydroxy-p-methoxy-**, and copper deriv., 1590[8].
——, **β-hydroxy-p-methyl-**, and copper deriv, 1590[8].
——, **β-phenyl-**. See *Chalcone*.
Actinism. See *Light, Photochemistry*.
Actinium, absorption of penetrating radiation of, in equil. with its products, 2781[1]
book: Ueber d. Verhaltnis von, zu Radium in Uranerzen, 711[9].
properties of, 1352[7].
Actinium A, decay const. of, detn. of, 703[2].
Actinium series, and lead ratios in rocks, 2450[2]
origin of, 3379[9], 3380[2].
Actinium X, and active deposit, β-ray spectrum of, 1943[4].
beta rays of, energy relations for secondary, 1943[5].
Actinometers, electrochem, 1005[8].
Actinomycosis, treatment with I in milk, 1850[5].
Actinon, discovery of, 1927[9].
α-particles from, and its next disintegration product, 1556[5].
Activated sludge. See *Sewage*.
Activation. (See also *Heat of activation*)
ionization of gases as type of, 2952[2].
optical —see *Optical rotation*.
potential of, 10[8].
Active deposits, actinium X and, β-ray spectrum of, 1943[4].
of radium and Th, alpha-particle emanation from, 1756[6].
of radium and Th, mobilities of ions of, 333[1].
of radium of slow rate of evolution, extn. and purification of, 868[2].
thorium, α-rays from, 3380[4,6].
Activin. See *Chloramine-T*.
Activity coefficients, of barium bromide, 2440[5].
of electrolytes calcd. from f. p. data, 1347[9].
of electrolytes from vapor pressure of solvent, 3617[5].
of hydrochloric acid, 3617[9].
of hydrochloric acid in electrolytes, 1162[7].
of hydrochloric acid in glycerol-water mixts., 1347[4].
of hydrochloric acid in methanol, 136[6].
of hydrogen-ion and mercurous ion, 1746[1].
of lithium hydroxide in water and in aq. LiCl solns., 859[3].
from measurements of cells, 1935[8].
of potassium hydroxide and of HBr, 3372[2].
of soap solns., 3617[6].
of sodium ion in aq. solns. of Na silicates, 3372[6].
of tervalent ions in dil. solns., 3117[7].
for vapor in equil. with condensed phase of system of condensed phases, 2111[9].
Acylamines. See *Amides*.
Acyl chlorides. See *Chlorides*, acid.
Acyl group, migration from N to O, 1073[4].
migration of, in acylated hydroxybenzoic acids, 2488[8].
Adaline [(*α-bromo-α-ethylbutyryl)urea*], identification of, 477[5].
Addition compounds. See *Chemical compounds*.
Addition reactions. See *Reactions*.
Additivity, of crit. temps., 696[1].
in mixed photochem. reactions, 1954[4].
of mol. vols. of cryst. inorg. compds, law of, 2923[8].
of mol. vols. of metal salt hydrates, 2924[7].
specific heat of solns. and, 1345[1].
of stability of explosives, 3237[6].
Adenine, nucleotide, prepn. from tea leaves, 2514[6]
sulfate, effect on blood sugar, 1852[1].
Adenylic acid*, brucine and strychnine salts, 767[9].
Adhesion, 3605[2].
forces in soln., 3605[4].
of mercury in highly evacuated capillaries, 1544[8].
of metal plates, preventing, P 1383[3].
of rubber, controlling, P 3247[5].
in solns, 531[3], 1009[1], 3615[9].
Adhesive plasters, rubber, testing of, 843[2].
Adhesives. (See also *Cement; Glue; Mucilage; Tape*) P 3544[8].
for abrasives, P 483[9]
aktivin in manuf. of, 1497[8]
book: 2nd Rept. of the, Research Comm, 3337[2].
for Bordeaux mixt, 1883[6]
casein waterproof glue, P 1003[6].
chemistry of, 1002[9].
from corn starch, P 484[1].
films of, 1149[2].
library paste, P 2052[7]
for paper, P 3786[7].
review, 265[7].
from rubber and cellulose derivs, P 3567[7].
rubber compn, P 2262[6], 3839[1]
from soy bean protein substance, P 3544[1].
from starch, P 98[1]
for varnished or paraffined surfaces, P 3216[8].
Adipamide, β-methyl-, *d*-, phys consts. of, 2990[1].
Adipic acid, cyclopentanone from, 2151[5].
disilver salt, reaction with I, 409[5].
esters, 3689[6,7].
esters of, hydrolysis by lipase of liver, 2335[7]
heat of combustion of, 2937[4]
ionization of, effect of H_3BO_3 on, 2933[2].
nephropathic action of, 1871[5].
prepn. of, 48[7]
——, **γ-carbethoxy-β-keto-α,α-dimethyl-***, diethyl ester, 2490[8]
——, **γ-carboxy-α,α-dimethyl-***, 2490[8].
——, **β-carboxymethyl-β-methyl-**, 172[8].
——, **α,δ-dibromo-**, *d*, and *l*, 581[6]
——, **α-keto-**, nephropathic action of, 1871[5].
——, **β-methyl-**, degradation of, 2989[9], 2990[4].
Adipocere, 427[2]
and origin thereof, 3703[6]
Adiponitrile, β,γ-diketo-. See *Ketiponitrile*.
——, **β-methyl-**, 2990[3]
Adipyl chloride, β-methyl-, phys consts. of, 2990[1].
Adlay, vitamin B content of, 1285[2].
Adnephrine. See *Adrenaline*.
Adonis vernalis, convulsion-arresting action of, 1470[1].

drug from, 3209[4].
Adrenalectomy, blood pressure after, effect of choline and choline esters on, 1280[4].
effect on blood and urine, 2531[5,6].
on muscles, 2534[4].
on salt content of blood, 1109[1].
Adrenal glands, adrenaline content of, 1438[1]
adrenaline content of, during beriberi, 1843[6].
in diphtheritic intoxication, 69[7].
in early stages of mouse, 2025[6].
effect of $CHCl_3$ anesthesia on, 1856[9].
adrenaline output of, effect of nicotine on, 1278[9]
adrenaline secretion by, effect of insulin on, 1670[6].
effect of stimulation of sensory nerves on, 2195[1].
effect of variations in arterial pressure on, 1843[2].
in blood sugar regulation, 443[1].
bromine content of, 3726[9].
cholesterol content of, with scorbutic diet, 1654[6]
cholesterol of, effect of avitaminosis C on, 437[1]
disease of, ochronosus in, 627[3].
effect of poisons on, 3040[8].
effect on ovary, 1439[1].
on secondary sex characteristics, 1658[8].
on toxicity of morphine, 457[9].
equil. between pancreas and, effect of irradiation on, 452[5]
fluid from, effect on sensibility of blood vessels, 3039[9].
hormone of, 3172[3]
insufficiency, 2190[4], 2531[5,6], 3314[1].
insulin effect on, 1868[7].
in insulin intoxication, central stimulation of, 3195[5].
lipoid changes in, in adrenalinemia, 1844[6].
medulla, adrenaline discharge from injection of substances into, 1862[5].
metabolism and, 935[4].
prevention of edema of *p*-phenylenediamine by drugs acting on, 2024[2].
reflex secretion of, 943[1].
relation to blood sugar after asphyxia in decapitate cats, 1838[7].
secretion by, effect of muscle-metabolites on, 2017[4].
effect of Röntgen rays on, 2876[5].
effect of salts of alkalies and alk. earths on, 3040[7].
from muscular activity, 943[2].
secretory function of isolated, 1840[9].
thyroid gland and, 3489[7].
in vitamin insufficiency, 776[4].
Adrenaline (*adnephrine; adrenine; adrine; epinephrine; suprarenaline; suprarenine; 3,4-dihydroxy-α-(methylaminomethyl)-benzyl alcohol*).
absorption from peritoneal cavity, 1868[6].
in adrenal gland, 1438[1].
in adrenal glands during beriberi, 1843[6].
from adrenal glands, effect of nicotine on output of, 1278[9].
adrenaline discharge from injection into adrenal medulla, 1862[5].
in adrenal medulla, development in early stages of mouse, 2025[6].
in adrenals, effect of $CHCl_3$ anesthesia on, 1856[9].
in adrenals in diphtheritic intoxication, 69[7].
albuminuria from, 628[6].
antagonism between insulin and, 448[6].
antagonism to insulin with regard to autonomous nervous system, 1670[6].
blood-pressure curves in essential hypertension, 945[6].
in blood serum in tuberculosis, 3501[3].
calorigenic action of, locus of, 3495[4].
cardiovascular action antagonistic of insulin, 1271[2].
chem. properties of, 477[6].
detection of, 965[6].
detn of, 3306[9]
effect on absorption of water by brain tissue, 3505[4]
on acid production of excised muscle, 2527[4]
on activity and on electrolyte content of saliva, 457[1].
on arteries (coronary), 3314[6]
on bacterial growth, 142[6]
on bile flow, 1273[8]
on blood Ca, 3040[4]
on blood pressure, 1259[2], 2014[1], 3509[4].
on blood pressure and blood sugar, 3508[9].
on blood pressure in sleep, 2357[9].
on blood sugar, 457[8]
on blood sugar after injection of *B. coli* toxin or atropine, 235[1].
on blood vessels, 239[9], 240[2], 1840[1].
on blood vessels of brain, 3514[8]
on blood vessels of frog tongue, 453[7]
on calcium metabolism, 1271[7].
on carbohydrate metabolism, antagonism to insulin, 1276[3].
on carbohydrate metabolism in skeletal muscle, 941[1]
on catalase of blood, 2337[1]
on cerebral blood vessels, 2209[4].
on cholesterolemia, 67[7].
on circulation, 3044[4].
on excretion of N, of creatinine, and of creatine, 1470[8]
on fat mobilization, 3499[4,5]
on fermentation of yeast, 1829[4].
on gall bladder, 1855[5].
on glomerular circulation in kidney, 2016[9].
on glycogenase action, 3029[8].
on heart, 1864[2], 3042[4]
on heart and blood vessels, 2206[5].
on heart response to stimulation of accelerator nerve, 3045[7]
on heart response to stimulation of cardioinhibitory nerve, 3045[8].
on hexosephosphoric acid concn. in blood, 234[2]
on hyperglucemia, 3185[1].
on intestines, 1861[7].
on intestines, modification by atropine or strychnine, 1468[9].
on involuntary muscle, antagonism by ultra-violet radiation, 1273[1].
on iris, uterus and intestine, 3046[4,5].
on irritability of frog heart, 452[9].
on isolated muscles, 1840[9]
on isolated vein ring, 457[5]
on ketone bodies and on pituitrin reaction on blood fat, 3029[2].
on local anesthesia, 3192[1].
on luminescence of fireflies, 2708[7].
on lymph of thoracic duct, 1867[8].
on melanophores and xanthophores of minnows, 1472[3].
on metabolism during hunger, 1441[8].

on mineral metabolism of lymph, 2369^{8}.
on muscle, 3047^{5}
on nerve stimulation by means of condenser charges, 2020^{7}.
on oxygen metabolism, 241^{6}.
on pancreatic secretion after secretin injections, 2368^{7}.
on perfused heart, 3746^{7}.
on phosphoric acid hydrolysis during autolysis of muscle and liver, 3707^{1}.

on plexus free prepns. of small intestine, 2707^{6}.
on premature contractions of heart, 3509^{5}
on rate of disappearance of *d* glucose in blood, 621^{3}
on respiration, 3038^{5}.
on respiration and min vol during heat puncture hyperthermia, 1279^{3}
on respiration of animal tissue, 1277^{3}.
on respiration of normal and thyroidectomized mice, 1470^{9}.
on respiration of organs, 2534^{1}.
on respiratory center, 3508^{2}
on saliva secretion, 1448^{3}
on sensibility of blood vessels, 3039^{9}.
on shivering reflex, 3191^{1}
on silk worms, 3749^{4}
on small intestine, 2707^{3}.
on stomach muscles, 2702^{9}.
on urine excretion, 1858^{7}
on uterus, 458^{1}, 1166^{5}, 2204^{9}
on uterus, influence of nicotine on, 1863^{1}.
on uterus in pregnancy, 2367^{7}.
on vagus, 458^{9}.
glucemia, 778^{1}, 3041^{8}
glucemia from, reducing substances in, 242^{2}.
glucemia, in newborn, 616^{8}.
glucemia treatment with, effect of glycocoll and of peptone on, 1863^{2}.
glucosuria, C and N in urine in, 3193^{9}.
history of, 3172^{5}.
hydrochloride, effect on coagulation of blood, 2203^{9}
hypertensive action of, hypotensive action of pancreatic ext. and, 1858^{1}.
hypo epinephrinism, 1849^{2}
intradermal and subcutaneous injections of insulin in presence of, 1852^{2}.
metabolic quotient of, 1864^{4}.
mobilizing effect of acetamide, urethan and, 1439^{3}.
oxidation of, and effect of products having biol. property of reinforcing this substance, 1863^{1}.
peripheral effects of, induced by organ exts, 2705^{6}.
pharmacodynamics of, 1466^{8}.
pharmacol. action and chem. constitution of, 2208^{3}.
physiol. action of, effect of Ca and of K on, 2370^{4}.
effect of ovarian fluid on, 231^{3}.
given by mouth, 3743^{3,4}.
relation to Ca and K content of blood, 233^{8}.
promoter action of, on pytalin, 3020^{3}.
radiophysiol. equil. shifting by, 1089^{2}.
reflex secretion of, 943^{1}.
secretion of, during asphyxia, 1862^{4}.
effect of ammonia bases on, 1862^{4}.
effect of anaphylaxis on, 2366^{3}.
effect of burns on, 3495^{8}.
effect of concd. salines on, 2206^{7}.
effect of insulin on, 1670^{6}.
effect of salts of alkalies and alk. earths on, 3040^{7}.
effect of stimulation of sensory nerves on rate of, 2195^{1}.
effect of variations in arterial pressure on, 1843^{2}
effect of various substances on, 2703^{5}.
from injection of substances into adrenal medulla, 1862^{5}.
from ligature of cerebral vessels, cardiac arrest, aortic ligature, cerebral thrombosis and cerebral compression, 1862^{5}.
from muscular activity, 943^{2}
secretory effect of centrifugal stimulation of vagus of neck on, 1864^{1}
skin reaction to, effect of menstruation and menopause on, 2358^{3}.
synthesis of, 2843^{5}.
transfer from blood vessels to tissues, 1469^{5}.
vasoconstrictor effect of, on isolated tissues, 1840^{8}.
vasodilating action of, 1116^{7}.

Adsorbed substances, in colloidal solns, thickness of layer of, 1738^{6}.
diffusion on surfaces of solids, 2268^{4}.
elec. moment of mol. of, 531^{6}.
equation of state for, 134^{9}.
water on surface of metals and of their oxides, rate of evapn. of, 3111^{6}.
Adsorbents. (See also *Carbon; Charcoal*) P 2233^{1}.
adsorption by basic, acidic and neutral inorg., constitution and, 1931^{7}.
for benzene recovery from gas, 2740^{3}.
from carbonization of waste sulfite liquor, 2747^{7}.
cellulose compds as, 3368^{5}
chem. nature of, effect on adsorption, 3367^{7}.
colloidal, P 1696^{6}.
effect on dextrinizing and saccharifying action of amylase, 53^{8}.
on resorption of trypan blue in peritoneum, 3466^{4}.
on surface tension, 3367^{6}.
hydroxides of Yt and La as, 3111^{2}.
impermeable, P 2552^{4}.
mineral, 3337^{1}.
for oils or other liquids, P 3544^{2}.
for purifying liquids, testing of, P 974^{1}.
reactivating, P 2232^{9}, P 3785^{9}.
siliceous, P 3786^{4}.
superficial energy of, 531^{6}.
in therapy, 2104^{1}.
wool as, for H_2S and halogens, 2078^{2}.
Adsorption. (See also *Heat of adsorption; Sorption*.)
acclimatization in, 3110^{8}.
of acids and alkalies by cotton fabrics, 2770^{3}.
of acids by filter paper, 686^{6}.
of acids by purified silica, 5^{4}.
of acids (org.) by active C, 2929^{1}.
of alkalies by cellulose, 2771^{3}.
of ammonia by Al_2O_3, Fe_2O_3 and Cr_2O_3, 3615^{4}.
of ammonia from $(NH_4)_2SO_4$ in soils, 85^{6}.

of ammonium chloride on Cu, 347[9].
analysis, shaking *vs.* filtering in, 3255[5].
of arsenious acid by saccharated Fe, effect of NaOH on, 1686[2].
of barium chloride by colloidal hydrous MnO_2, 856[7].
by binary mixts., 2437[9].
in bleaching, 955[7].
capillary, 3110[7].
of carbon dioxide by activated coconut charcoal, 2105[2].
of carbon dioxide by coal, 2404[6].
of carbon dioxide, CO and O by MnO_2, Cu_2O_3 and their mixts., 2413[7].
of carbon dioxide-H mixts. on wood charcoal, 2104[4].
by carbon, theory of, 3255[6]
in catalysis, 608[1].
catalysis and enzyme actions in relation to, 3614[5].
cataphoresis and, 2101[2]
by charcoal, 2609[7], 3527[6], 3615[4].
charcoal capacity for, 3615[7].
by charcoal, effect on poisoning and detoxication, 3714[7]
by charcoal from soln., 3615[1].
by charcoal (medicinal), 91[7].
by charcoal prepns., 1009[1]
chem. constitution and, 1931[7], 2609[3]
chem. forces and, 857[1].
chem. nature of, 3367[7]
chem. processes and, 3614[1].
chem. reactions and, differentiation of, 1636[7].
by clays and its influence on their content of alkalies and other substances, 1892[6].
by coconut charcoal from alc.-C_6H_6 and acetone-C_6H_6 mixts., 530[9]
by coconut charcoal of satd. vapors of pure liquids, 1545[4]
colloidal, in quant. analysis, 2629[9]
in colloid chemistry, 1932[4].
by colloids, effect of H ions on, 2437[8]
of complex compds., 531[3].
concn. effect on, 321[2].
by cotton and wood pulp fibers, 281[2].
by decolorizing carbons, 1918[1].
of diastase, 3705[7].
of diastases and antidiastases, 3707[2]
from dil. aq. solns., 3605[4].
of dissolved substances, 531[9], 3367[9].
double refraction expressions in, 3634[9].
in dyeing, 293[6]
of dyes by clays, 2054[5].
of dyes by clays and its relation to their behavior in rubber compds., 310[3].
of dyes by hydrated Cr_2O_3, 2752[1].
of dyes by SiO_2, kieselguhr, asbestos and cotton, effect of NaCl on, 2928[7].
of dyes, physicochem. properties and, 2604[5].
effect of temp. and pressure on, lecture expt. for, 856[6]
effect on color of sols and of ppts., 686[5].
elec. nature of, 531[6].
of electrolytes by normal and pathol. tissue, 1844[6].
of electrolytes, soly. and, 3615[9].
electropic, 2608[1].
of ethylene and C_2H_2 on Al_2O_3, 691[8,9]
of ethylene and H by ZnO, Fe_2O_3, Ni and Cu, 1545[2].
of gas by solid combustibles during drying, 654[1].
of gases and vapors by charcoal, 1931[5].
of gases by activated charcoal at very low pressures, 1346[4].
of gases by charcoal, 856[4], 2604[5], 3111[6], 3368[7], 3615[3].
of gases by glass and by Ag powder, 3111[3].
of gases by glass walls, 2928[8].
of gases by Pt black, 2927[9].
of gases on water surface, rates of, 2605[8].
of gases, theory of, 1009[1].
gas sepn. by, P 1678[2].
Gibb's equation, verification of, 2104[8].
of *d*-glucose by animal charcoal and erythrocytes, 925[2].
of glucose by blood corpuscles, altering by narcotics and lipoids, 1471[3].
of glucose by bovine blood corpuscles, 610[8].
of hemolysins, 1446[9]
by hide powder, 3369[1].
of hydrogen and CO_2 by pyrophoric Fe, Ni and Co, 3255[8]
of hydrogen by Pt, 5[8].
of hydrogen by Pr and Nd, 1158[7].
hydrolytic, 1739[6].
in industry, 3201[5].
of iodine, 3368[7]
of iodine by pptd. MgC, 3111[8].
of iodine by starch, 686[8].
of ionium-Th by $BaSO_4$, 9[1].
of ions by $Al(OH)_3$ and by its mixt. with $BaSO_4$, 3614[7].
of ions by sols of same kind of charge, 3608[9]
of ions in comparison with their coagulating power, 3614[3]
of ions, mechanism of, 1515[3]
of ions on colloidal particles, detn. of, 1346[5].
of ions on Hg, 855[9]
isotherms and isosteres, interpretation of, 2928[2].
isotherms, derivation of, 1168[8]
isotherms of colloidal solns., 3[1]
layers on solid surfaces, 3604[9]
of lime from sugar solns. by boneblack, 306[5].
in mechanism of formation of e.m.f., 2939[1].
mechanisms, 2268[9]
of methylene blue by dispersoids within disperse phase, 1739[4].
of methylene blue by ZnO, 3086[8].
from mixed solvents, 1009[1]
mol. assocn., dielec. const. and, 2105[1]
of mols., constancy on any surface, 687[1].
on mols. in soln., 3368[4].
negative, 855[7], 1158[5]
of neutral mols., effect of elec. field on, 1932[5], 2928[5].
of nitrogen by hemoglobin, 1999[5].
of oxalic acid and arsenic acid by metallic oxides, 2604[3]
in partition between 2 phases, 2604[7].
of pepsin, 3706[2]
phenomena, classification of, 688[6].
of poisons on charcoals, 1132[8], 3509[8].
of potassium ion in colloids of clay, 2890[2].
of protein decompn. products by form elements of blood, 1276[5].
by radium D and Ra E, 2450[3]
of resins by paraffin wax, 3075[6].
review, 1476[6].
of salts by Kambara earth, 3525[3].
of salts through corrosion- and rust-protective color films, 2080[7].
in saponification by alkalies, 1147[2].
Schulze-Hardy law and, 2268[1].
sepn. by sp., 1641[4].

by silicic acid gel, 2727[7].
of soap at benzine-soap interface, 2770[7].
of sodium hydroxide by cellulose, 820[2].
from solns., 2104[1].
sorption and, 2926[9].
of sulfides by colloidal $Cr(OH)_3$, 1346[3].
superficial energy of interfacial boundaries and, 135[1].
surface activity and, 2770[6].
surface tension lowering by, relation to heat of adsorption, 1022[6].
of tannin and quebracho tannides by skin, 1727[8].
theories of, and its measurement, 2268[3].
of vapors by alumina gel, 320[4].
of vitamins B and D by colloidal $Fe(OH)_3$, 1652[4].
of water vapor on quartz surfaces, 3367[8].
Adsuki bean. See *Beans*.
Aegirine, biotite-tinguaite-, 2474[3].
Aenigmatite, compn. of, 29[8].
Aeration, app. for, P 316[5].
of milk and cream, app. for, P 634[2].
Aerolites. See *Meteorites*
Aeronautics. See *Aircraft; Airplanes; Balloons*.
Aerosols. See *Colloids*.
Aerugo. See *Copper acetate*.
Afara. See *Terminalia superba*.
Affinity. (See also *Valency*.)
atomic arrangement and, 1055[3]
consts. of org bases, effect of substitution on, 756[4].
detn. of, 1602[6].
electron, of hydrogen, 3389[1,3].
electron, of oxygen, 3390[3].
electron, org. reactions and, 37[7].
in enzymes, 2169[7,9].
forces of, 2114[1].
in hydrolysis, 3120[2].
of invertase, 3175[2].
invertase, relations, 769[4].
of iodine atom for electron, 2915[9].
magnetic forces and, 1752[5]
between metals and S, 3420[4].
of radicals, effect on rearrangements of olefin oxides, 1610[7], 2850[3].
in radicals (org.), 3683[9].
of radicals (org.), theory of, 3157[9].
reaction velocity and, in gases and vapors, 853[6].
residual, 326[4].
coördination and, 716[5], 2465[9], 3400[9], 3401[4].
of org. compds , 1785[2].
review, 2767[1].
systematic, principle, 139[4,6,8], 140[2,3].
Afterdamp, carbon monoxide detection in, 3145[6].
Agalma black 10B. See *Dyes*.
Agalmatolith, 3547[6].
Agar acid, prepn. of, 534[6].
Agar-agar. (See also *Culture mediums*.)
bacterium which splits, 219[4].
blood and symptomatic changes following intravenous injection of, 1855[7].
blood-, plates, Liesegang's rings in, 3706[1].
detection of, 2720[3].
electrodialysis of, 534[6].
toxicity of serum treated with, 1468[5].
Agaric acid, pharmacodynamic action of, 1862[9].
Agaricic acid. See *Agaric acid*.
Agaricus campestris, vitamin C tests on, 3312[2].
Agaves, alc. from, 473[8], 3058[7].
Age, effect on chem. constitution of body, 924[9].
"Agerite," stabilization of petr. oil with, 3801[6].
Agglomeration. (See also *Ores, treatment of*.)
of fuel, P 2243[5].
of sawdust and of wood shavings, 2403[4].
of sawdust or other absorbent materials, P 3786[7].
temp. of, relation to m p , 324[9].
Agglutinant, for paper or other materials, P 2073[9].
Agglutination. (See also *Hemagglutination*.)
in amebocyte tissue, effect of ion combinations on, 3461[9]
of *Bacillus coli*, 1257[5].
by blood serum, effect of arc-light irradiation on, 1845[8]
of *Brucella*, 3308[3].
in differentiating bacteria causing soft rot of potatoes and other vegetables, 3481[2].
effect of electrically charged dyes on, 627[9].
electrophoretic potential effect on, 1457[1,8,9].
of fat globules, 2709[1].
fermentation by meningococci and, 2003[4].
of pneumococci in presence of Na oleate, 1458[2].
of spermatozoa, 3193[7]
of tubercle bacilli, 1414[1]
Agglutinins. (See also *Hemagglutinins*.)
in blood following typhoid vaccination, 1453[4].
blood group, behavior of, 947[8].
in blood of mother and child compared, 3733[7].
formation of, effect of elec charged dyes on, 627[9]
effect of salts on, 1269[3]
effect of substances that affect parasympathetic system on, 781[8]
secretion effect on blood, 1446[7].
in typhoid fever isoelec. zone of, 2366[9].
in typhus fever, blood serum, thermostability of, 1459[4].
Aggressins, anthrax, 1454[5].
Aging See *Senescence*.
Agitators (See also *Stirring apparatus*.)
for cyanide plant, 1048[6].
mammoth, 1540[3].
for soap manuf., 304[2].
Agmatine, from animal organism, 2025[4].
arginine and, 213[4].
Agricultural chemistry, analysis, 1040[1].
books: 1683[7], Principles and Practice of Agr. Analysis. Vol. I. Soils, 1128[4]; chimie végétale, 1491[3]; Lehrgang der Chemie fur Land- und Gartenbauschulen, 1554[9], A Manual of, 1884[1,2], Notions de, 2277[6], Laboratoriumsbuch für Agrikulturchemiker, 2385[9]; Scheikunde voor land- en tuinbouwwintercursussen, 2385[9]; Leçons de, 2556[8].
broadening, 1679[6].
history of, in America, 3251[3].

Agriculture, book: Géologie agricole pratique, 1884[2].
increasing crops with explosives, 3206[8].
tropical, botanic problems of, 2180[6].
Agrostemma githago, seeds as feeding stuff, 3200[4].
"Ahibalala" oil, 2048[1].

Ailanthus glandulosa, oil of, 2718^{8}.
Air. (See also *Atmosphere; Blast; Nitrogen; Nitrogen fixation; Oxygen; Ventilation.*)
acetone detection in expired, 1824^{8}.
adsorption by powd. glass and by powd. Ag, 3111^{3}.
adsorption by solid combustibles during drying, 654^{2}.
alpha rays traversing, app. for counting scintillations produced by, 1756^{4}.
ammonia in, removal of, P 84^{9}.
argon sepn. from, rectification system for, P 249^{6}.
in boiler furnaces, limiting factors in reducing excess, 2904^{3}.
book: Fresh, and Ventilation, 2889^{4}.
carbon dioxide detn. in, 3613^{8}.
carbon dioxide tension in expired, app for detn. of, 2514^{3}
carbon monoxide and CO_2 in, detn of, 1192^{1}
carbon monoxide in, detn of, 60^{4}.
chlorine detn. in, 2800^{2}.
chlorine removal from, P 1696^{3}.
circulation in drying and solvent recovery, P 316^{5}.
circulation in elec. furnaces, P 1567^{8}.
colloids of, industrial explosions from, 112^{3}.
colloids of, in industry, 3349^{5}.
compressed, app. for measurement of flow of, 846^{8}.
economizer for, 846^{9}.
explosions in outfits for, 3814^{9}
filter for, P 3592^{8}.
meter for, 522^{3}
sealing compn for containers for, P 268^{1}.
compressibility of, 853^{4}.
conditioning for refrigeration, app for, 1289^{4}.
cooling, with Raschig rings in, 2214^{3}.
currents, measurement of, 3201^{6}
delta rays produced by α-particles in, 1173^{8}.
detn. in gas, 3796^{7}.
diffusion in stomach and intestines, 2509^{2}.
diluting, pump for, P 2098^{9}.
drying app. for, P 2^{6}
drying with warm, 2885^{3}.
dust in, detn. of, 160^{2}, 635^{4}, 2217^{9}, 2885^{2}.
dust removal from, metal filter for, 1923^{8}.
dust removal from, scrubber for, P 848^{1}.
effect of baths of dry hot, on body wt, metabolism, respiration, pulse and body temp., 230^{7}.
effect of dissolved, on freezing points, 855^{2}.
elec. breakdown of, 874^{8}.
elec. glow discharge in, in high-frequency fields, 9^{7}.
expired, effect of heat on water content of, 2361^{8}.
explosive or combustible gases in, app. for detection of, P 1732^{6}.
filter for P 2^{3}, P 2433^{8}.
filters, washing and charging, P 1541^{2}.
flow from radiators, etc., thermoregulator for, P 848^{7}.
flow in pipes, 3757^{4}.
flow through engine radiators, anemometer for, 315^{9}.
heat-exchange device for, P 3592^{9}.
heating in steam boiler plant, 3553^{8}.
hot, effect on germination of potatoes, 2350^{9}.
humidification by falling drops, 1543^{7}.
humidity of—see *Humidity.*
ionization by Röntgen and cathode rays, 2943^{4}.
ionization in, during complete absorption of slow electrons, 2784^{9}.
ionizing action of Röntgen rays of diff. wave lengths, energy and, 2117^{7}.
ions in, mobilities of, 2279^{4}, 2280^{4}.
ions in org. vapors mixed with, mobility of, 3383^{8}.
isotherms and crit. consts. of Et_2O mixt. with, detn. of, 2111^{5}.
krypton and Xe content of, 2923^{1}.
krypton and Xe detn. in, 3252^{9}.
krypton and Xe sepn. from, P 973^{8}.
liquefaction and rectification of, 788^{6}, P 3757^{9}.
liquefaction and rectification of, app. for, P 316^{8}.
liquefaction and rectification system and app. for, P 1152^{7}, P 1732^{5}.
liquefaction app. for, P 3364^{3}.
liquid—see also *Explosives.*
liquid, blasting cartridge for use with, P 292^{2}.
cooling app. contg., P 1732^{7}.
cooling baths from org. materials and, 1716^{9}.
explosion of CS_2 and, in cooling-bath prepn, 824^{6}.
explosions of cooling baths of inflammable compds. and, 1324^{9}.
sepg. constituents of, P 1478^{8,9}.
measuring, app. for, 522^{8}.
of mines—see *Mines.*
mixts with CO_2 and H, velocity of sound in, 865^{7}.
mixts with vapor, app. for prepn. of, 2921^{8}.
mobility of A and H ions in, 145^{9}.
moist, properties of, 1737^{5}.
oxygen-enriched, in foundry practice, 890^{5}.
ozone detn. in, 685^{7}.
ozonizing—see *Ozone.*
pollution of, measurement of, 3526^{3}.
positive ions in, distribution of, 3639^{5}.
preheater, 1151^{8}.
preheater, operation of Ljunstrom, 3796^{5}.
pressure, app. for measuring, 3250^{3}.
purifying, vitiated with NH_3, P 2552^{8}.
reaction with C_6H_6 produced by β- and γ-rays of Ra, 3638^{4}.
removal from boiler feed-water, etc., app. for, P 791^{1}.
from ceramic ware, effect on drying, 2234^{7}.
from pottery clay, etc., app. for, P 1309^{9}.
from water, app. for, P 316^{8}.
sepg. constituents of, P 3202^{1}.
sepn. into N, O and A, app. for, 788^{8}.
sulfur dioxide detn., 2800^{2}.
system: C_2H_2–acetone–, 1549^{5}.
systems: CO–N–, H–C_2H_4–, CO–CCl_4–, CO–$CHCl_3$–, CO–CH_2Cl_2–, CO–CH_3Cl–, and C_2H_2–acetone–, 1549^{5}.
temp. of, elec. app. for measuring, 1540^{2}.
thermal cond. of, 1166^{9}, 3601^{8}.
viscosity of, 1007^{1}.
viscosity of, effect of temp. on, 3601^{5}.
vital property of, 1088^{8}.
washing and conditioning, app. for, P 1732^{4}.
in water (pure and alk.), 3613^{8}.
Aircraft. (See also *Airplanes; Balloons; Dopes.*)
aluminum-alloy castings for, 733^{7}.
development of, metallurgy and, 2651^{3}.

fuselages, molding from phenolic condensation products, P 1307[5].
gaseous fuel for, 3556[6]
metals for, testing of, 732[1].
propellers, alloy for, P 2145[5].
textile for, P 2254[1].
welding of C and alloy steel tubing for, 1212[5].
Airplanes. (See also *Aircraft; Balloons, Dopes.*)
doping and varnishing systems, durability of, 2755[9].
motor valves, selection of steels for, 1205[7].
Ajkaite, org. mineral from Hungary, 3013[1].
Ajowan (*Carum copticum*), seed cake as fertilizer, 1486[4].
Ajuga chamaepitis, 222[5], 2017[6,8].
effect on metabolism of P, 1854[5].
effect on metabolism of uric acid and urea, 1854[3].
Åkermanite, 1045[4]
Akrit, disruption of, 3149[8].
Aktivin. See *Chloramine-T*.
Alabaster, in Marathon fold, Texas, 1778[2].
Alanine (*α-aminopropionic acid*), decarboxylation of, 1629[1].

muscle, 429[1].
in muscle fibers of hibernating frogs, breaking-up of, 2025[1].
of organs, 1250[2].
ovalbumin, amino acids from hydrolysis of, 59[5].
anaphylaxis production by, effect of stage of artificial digestion on, 1849[4]
crystn. and sp. rotation of, 607[7].
precipitation with $FeCl_3$, 3609[5].
recovery from slaughter house by-products, 632[6].
removal by alums, 1249[7].
sapon. of mixt. with fat, P 3830[8].
sensitization with, from normal and immune sera, 1847[1].
sepn. from globulin, 2343[2].
sepn. from peptone, carbohydrates, aliphatic acids and oxyacids, 1641[6]
soly. in fats, 926[3].
in urine, 2196[6].
viscosity in presence of electrolytes, 1158[6].
Albuminemia, in animals painted with tar before development of cancer, 3735[7].
Albuminous substances, by autolysis of animal and vegetable substances, P 1332[7].
precipitation reactions of, 3303[1].
Albumin preparations, albumose silver, 796[1].
bismuth, pharmacol. action of, 448[1].
water-sol., P 3332[9].
Albuminuria, effect on protein requirements in nephritis, 1450[9].
hydrogen-ion concn. in blood and urine and, 2699[8].
of infants, 1438[6].
lipoid nephrosis and, 2358[1]
in nephritis, source of protein in, 67[8].
of pregnancy, 1109[4].
in pregnancy, acetone body concn. in blood in, 235[7].
proteins in, sepn. of, 2343[2].
renal efficiency tests in, 238[6].
by renal vasoconstriction, 628[5].
toxicity of urine during, 2195[8].
Albumoses. (See also *Proteoses*.)
prot-, effect on epileptic attacks and on insulin convulsions, 2537[2].
silver prepn. contg., 796[1].
toxicity of, 3035[1].
Alcamines. See *Alcohols*, amino.
Alcaptonuria. See *Alkaptonuria*.
Alcement, 651[2].
Alchemy, in the Arabian Nights, 2100[8].
books: Arabische alchemisten, 1754[2]; The Secret Tradition in, Its Development and Records, 3379[7].
manuscript book from library of Joseph Priestley, 1006[5].
nomenclature in, 2766[9].
signs in, 2390[9].
theory of, 849[5].
Alcoholates, alkali, addn. compds. with esters, 737[8].
alkali, of polyhydric alcs., prepn. of,
aluminum, as catalyst for oxidation-reduction reactions of aldehydes or ketones and alcs., 1611[2].
as catalyzers in the prepn. of alcs. and aldehydes, 2321[3].
in indanthrene prepn., P 1814[1].
magnesium, in synthesis of alcs., 1384[9], 2480[9].
reaction with α,α-dihalo-*m*-nitrotoluene, 2833[5].
Alcoholism. See *Ethyl alcohol*.
Alcohols. (☛*Entries referring to* Ethyl alcohol, Methanol *and other simple alcohols will be found under these common names. Complex aliphatic alcohols are indexed under the Geneva names (see* Ethanol, Propanediol, etc.). *Aromatic alcohols containing one or two aromatic radicals will be found under* Benzyl alcohol *and* Benzohydrol, *respectively, rather than under* Carbinol. *Alcohols containing three aromatic radicals, however, will be found under* Carbinol)
acetylenic, aldehydes from, 3443[7].
acetylenic, prepn. of, 3444[1].
acylamino, relation between constitution and pharmacol. effect of, 2368[4].
aldehydes from, catalytic app. for manuf. of, P 1814[2].
amino-, deamination of, 2324[8].
deamination of tertiary, 588[9].
heat action on tertiary, 588[8].
prepn. of, 2658[1].
amino derivs. (tertiary) of derivs. of tertiary, 3451[8].
attraction for C_6H_6 and EtOH, 535[6].
carbamyl chloride derivs. decompd. by, 1798[3].
carbon dioxide formation from, 2975[4].
catalytic actions of Cu on, 3375[9].
chem. constitution and reactivity of, 1798[4]
colloidal $Cu_2Fe(CN)_6$ pptn. by, 2269[4].
colloid systems in $PhNO_2$ and, 320[6].
constitution of, dependence of velocity of alk. hydrolysis of esters on, 536[6].
crystal structure of, 3597[3].
decompn. of tertiary, 1602[2].
dehydration and dehydrogenation of, over ZnO catalyst, 2308[6].
dehydration of, 2481[4].
dehydration of, and detn. of a mixt. of satd., unsatd., and tricyclic hydrocarbons, 1397[5].
dehydration of, catalysis of, 463[9].
denatured, diethyl phthalate detn. in, 3779[7].
detection of aliphatic, 2227[1].
detection of, 1-naphthyl isocyanate as reagent for, 1232[8].
detn. of, 2802[6].
detn. of, in aq. and in cottonseed oil solns., 1742[8].
dihydric—see *Glycols*.
effect on foaming power of water, 3110[5].
ethers of aromatic, prepn. of, 1985[4].
halogenated, from halogenated aldehydes, P 1243[1].
halo-, prepn. of, P 917[1].
homologous, effect on sugar formation by liver, 3492[9].
homologous series of aliphatic, mobility-vapor pressure curve of ions in air mixed with vapor of, 3384[1].
identification of, 2815[9].

from ketones, 41[3].
manuf. and uses of aliphatic tertiary, 2975[6].
manuf. of, P 424[2], P 1995[7], P 2504[2], P 3171[8,9].
manuf. of aliphatic, Cl in, 1512[5].
mixt. with hydrocarbons, P 3799[7].
narcotic and toxic potency of aliphatic, 1851[9].
neutralization curves of mixts. of boric acid and polyhydric, 1014[7].
nitro aliphatic, 1052[1].
oxidation of, P 1814[1], 2996[1].
oxidation of, catalyst for, P 3786[2].
oxidation of primary and secondary, mechanism of, 1977[4].
phosphoric esters of multivalent, P 3461[5].
photochem. decompn. of, 3133[4].
poisoning of spores of *Phytophthora colocasiae* by aliphatic, 2716[1].
polyhydric, P 3171[1].
acetonization of, 2659[1].
effect on elec. cond. of H_3BO_3 solns., 3158[2].
nitration of, P 917[1].
reaction with aliphatic-aromatic ketones, P 1243[1].
prepn. of, 2321[3].
prepn. of, from Mg alcoholates, 1384[9], 2480[9].
prepn. of primary from sec., 360[8].
prepn. of secondary wax, 2819[1].
pressure-temp. charts for, 686[3].
purification of, P 2168[2], P 3161[4], P 3698[1].
purification of aromatic, P 3698[1].
reaction (reversible) of primary and secondary, with aldehydes and ketones, 1611[2].
reaction with Al_2Se_3, Al_2Te_3, Al_2As_2 and Mg_3As_2, 3273[7].
with $NaHSO_4$, 3686[5].
with Tl and with Na, 2111[2].
reduction of, 1593[8].
review for 1925, 955[4].
sepn. of, P 2333[3].
sesquiterpene, from camphor blue oil of Japan, and their reaction with S, 2999[1].
sesquiterpene, of camphor oil, 1987[7].
spectrum of, 15[9], 2455[1], 2950[4].
spectrum of, CH group in, effect on absorption coeffs, 2950[7].
spectrum of, in relation to no. and to position of OH groups in mol., 2950[6].
synthesis of, P 424[6].
synthesis of higher, 310[6].
systems with naphthols, dehydration of, 385[1].
taste of, relation to chem. structure, 2170[1].
terpenic, acid phthalates of, 1014[9].
thiobisalkyl, manuf. of, P 768[4].
in tobacco resin, 967[5].
Walden inversion of sec., 577[3].
Alcoholysis, of salts of weak bases with weak acids in EtOH and MeOH, 3622[2].
Aldazines, reduction of, 899[9], 2309[4].
Aldehyde. See *Acetaldehyde*.
Aldehyde-ammonia, manuf. of, P 210[2].
Aldehydes. (See also *Phenol condensation products*.)
bisulfites, constitution of, 2816[9], 2977[9], 3156[5].
from cacti, P 795[6].
compds. with amino acids and their preparative application, 1815[3].
condensation of aliphatic, with salicylamide, 2673[9].
condensation of aromatic, with 4-methoxyquinaldine, 1626[1].
condensation products with urea, P 2052[9], P 2233[2].
condensations with, 1810[7].
condensation with $\Delta^{2,2'}$-biindan-1,3,1'-trione, 911[5].
condensation with 3-phenyl-2 phenylimino-4-thiazolidone, 1980[5].
detection of, 160[5], 1774[7].
detn., 561[5], 1604[2].
detn. in alc. liquors, 2893[2].
in ethyl alc., 2893[1].
in ethyl ether, 1692[2].
in urine, 3478[4].
effect on dextrinizing and saccharifying action of amylase, 53[9]
in ethyl alc. soln, action of birch charcoal on, 2816[8].
fermentation of, 929[8].
Friedel-Crafts reaction and, 587[4].
halogenated, alcs. from, P 1243[1].
heterocyclic, prepn. of, 416[7], 2856[9], 2857[3].
hydrogenation of, 739[1], 1218[2]
hydroxy—see also *Aldols*
manuf. of, 1995[7], P 2167[8]
manuf. of aromatic, 3161[1].
manuf. of, catalytic app for, P 1814[2].
oxidation of, catalyst for, P 3786[2].
catalytically, P 1814[1].
mechanism of, 1977[6]
from oxidation of gaseous hydrocarbons, P 2583[1].
of peppermint oil, 1301[6]
poisoning of spores of *Phytophthora colocasiae* by, 2716[1]
prepn. of, 2321[3], 2671[1].
from acid chlorides, solvents for catalytic, 1390[1,3].
from alcs, 2996[1]
prepn. of aliphatic, 899[8]
reaction (reversible) with primary or secondary alcs, 1611[2]
reaction with o-aminophenyl mercaptan, 386[6].
with di-Mg derivs. of C_2H_2, 3111[1].
with Grignard reagents, 180[2].
with ketones, 1985[8].
with piperitone, 3457[7].
with rhodanine, 600[3]
reactivity of, from standpoint of apparent e.m f., 2977[6].
rearrangement of trisubstituted, 1231[9].
rearrangement to ketones, 1988[5], 2844[4].
reduction of, 1593[8], 2622[9].
spectrum of, 14[3].
spectrum of, and of derivs, 870[5].
synthesis, app for, 2765[9]
synthesis of, P 424[6].
synthesis of higher aliphatic, 2310[2].
synthesis of, orienting influence of alkyloxy groups in, 382[3].
systems with optically active org. acids, 1054[6].
ultra-violet light absorption by, 2456[6].
ultra-violet light and, 1396[6].
unsatd, from acetylene alcs., 3443[7].
Aldehydrases, 1820[9].
Alder, bark of black, chemistry of, 3022[9].
tannin content of British Columbia, 2426[9].
Aldol, crotonaldehyde from, P 3696[7].
Aldols, manuf. of, P 3461[3].

Aldoses, compds. with urea, 1595^{6}.
Aldoximes. See *Oximes*.
Aleurites, *moluccana* and *fordi*, analyses of, 3319^{2}.
Alexin. See *Complement*.
Alfalfa. (See also *Legumes*.)

colloidal solns. of, 3112^5.
soly. in aq. hydroxylamine soln., 2773^3.
Alkaline earth compounds (See *Calcium compounds*, etc., as well as definite alkaline earth compounds, as *Barium carbonate.*)
acetato, 719^9.
ammino-, work of adding NH_3 to, or removing it from, 692^8.
with casein, transport nos. of, 1638^3.
soaps, colloid chemistry of, 2930^2.
Alkaline earth ferrocyanides, photochem. reactions in presence of $HgCl_2$, 2797^8.
Alkaline earth halides, spectrum of ionized, 148^7.
Alkaline earth hydroxides, effect on paper-making properties of pulp, 1518^4.
Alkaline earth metal ions, antagonism to plant plasma, 2518^8
heat of adsorption on charcoal, 3609^6.
Alkaline earth metals. (See also *Barium*, etc.)
biochemistry of, 449^9.
combining, with refractory metals, P 266^7.
detn. of, crucibles for, 679^6.
electrolytic sepn. from alkali metals, 1564^5.
spectrum of, 1560^2.
Zeeman effect in, 2618^9.
Alkaline earth molybdates, isomorphism with rare-earth metal molybdates, 2601^6
Alkaline earth oxides, adsorption by Al_2O_3 and Fe_2O_3, 3368^2.
reactions with sulfide, carbides, silicides and phosphides in solid phase, 3623^8.
reactions with sulfides, carbides, silicides, phosphides, silicates and spinels, 3404^9.
Alkaline earth permanganates, manuf. of, P 3214^3.
Alkaline earth phosphates, decompn. of, by alkali carbonates, 719^8
Alkaline earth and rare earth sulfates, 3401^7.
Alkaline earth salts, detn. in org. acids, 1688^5.
effect on adrenaline secretion, 3040^7.
hydrolytic action of low-pressure superheated steam on, 2466^8.
physiol. and pathol. properties of, 2001^1.
sepn. from salts of NH_4 and alkali metals, P 3784^2.
Alkaline earth sulfates, decompn. of, 3142^5.
Alkalinity. (See also *Hydrogen-ion concentration.*)
detn. in presence of alk. earths, 2964^2.
in soaps, 3829^9.
in sodium hydroxide and KOH, 3406^8.
in water used in spinning, 3524^1.
expression of, 321^7, 1742^7.
of flotation pulp, recording, 1376^2.
indicating app. for, P 3650^6.
Alkali reserve. See *Blood.*
Alkali salts. See *Alkali metal salts.*
Alkaloids. (See also *Apomorphine alkaloids; Belladonna; Cinchona alkaloids; Ipecac alkaloids; Opium alkaloids; Quinine;* etc.)
in *Aconitum napellus*, 2388^7.
alkali in, indicator for detn. of, 722^8.
analysis of, potentiometer in, 2391^7.
of animal organism, 2025^2.
basic strength of, detn. of, 3776^8.
book: Reagenzien und Reaktionen der gebräuchlichen Elemente und, 1775^7.
of calumba root, 603^9, 3294^7.
of *Ceanothus americanus*, 1688^4.
of *Cocculus diversifolius*, 2560^1.
in *Cocculus laurifolius*, 604^6.
from Congo tree belonging to species of nitragyne, 964^9.
of *Corydalis cava*, 765^2, 915^9, 3295^5.
in *Datura stramonium*, 3536^2.
in *Datura stramonium* and *Conium maculatum*, 2388^9.
definition, 1240^3.
detection of, 2227^1.
detection of, in viscera, 2175^5.
detection of secondary, in quinine salts, 646^2.
detn. of, 1302^3, 1496^3.
in cinchona bark, 3536^9.
in drugs and alkaloidal prepns., 1688^5.
iodoeosin as indicator in, 2563^3.
in lupines, 3774^8.
dissocn. consts., soly. product and titration of, 2108^4.
effect on rubber vulcanization, 1730^1.
extn. of, 1685^1.
extn. of, app. for, 2895^6.
fluorescence of, 545^5.
history of, 966^6.
identification of, 94^4.
isoquinoline, synthesis of, 2330^7.
from lobelia, 1302^6.
of *Lupinus luteus* during vegetation, 1649^1.
of *Lupinus luteus*, effect of light on, 1095^9.
in *Nandina domestica*, 420^5.
of phenanthrene group, synthesis of, 3458^1.
in plants, formation and role of, 3486^5.
reactions with nitro compds., 2894^8.
reactions with nitroso derivs., 3404^4.
reaction with blood serum, 3020^2.
reaction with furfural-H_2SO_4, 1687^8.
in Senecioneae, 2046^4.
in Solanaceae, 1688^7, 2389^1.
solvent for, methylene chloride as, P 3757^6.
solvents for, C_6H_6 and $CHCl_3$ as, 3208^9.
spectrography of, 1130^8.
storage in liver, 947^7.
in *Strychnos nux vomica* during germination, 2691^7.
synthesis in *Lupinus luteus*, effect of CH_2O on, 2184^6.
titration (electrometric) of, and reaction of alkaloid salts, 561^4.
titration (electrometric) of, with quinhydrone electrode, 2048^3.
titrations of, indicators for, 1493^6.
transfer from blood vessels to tissues, 1469^5.
of tropine group, detection in putrefied org. matter, 1640^4.
ultra-violet spectrum of, effect of solvent on, 1178^1.
Alkalosis, acid urine in, 3500^8.
in anemia, 1848^2.

of blood from duodenal fistula, 948^{8}.
effect on chronaxy of skeletal and cardiac muscle, 1842^{7}.
of epilepsy, 3187^{4}.
from ethyl ether anesthesia, 3743^{6}.
from Röntgen-ray therapy, 67^{9}.
of tissue juice, 3493^{6}.
from urea ingestion, 2527^{2}.
Alkalysol, disinfecting sputum with, 3773^{3}.
Alkamines. See "amino" under *Alcohols*
Alkanet, fluorescence of ext. of, 337^{4}.
Alkaptonuria, metabolism in, effect of protein on, 945^{9}.
Alkoxides. See *Alcoholates*.
Alkylaluminum iodides. See *Aluminum compounds*.
Alkylamines. See *Amines*.
Alkylammonium compounds. See *Ammonium compounds, substituted*.
Alkylation, of aliphatic nitriles, 2656^{9}.
of org. compds. with esters of aromatic sulfonic acids, 1795^{2}.
of phenols, 906^{8}.
with thallium org compds., 2310^{8}
of unsatd ketones, 3287^{3}.
Alkyl bromides, detection of, 362^{1}.
Alkyl chlorides, manuf. of, P 51^{4}, P 918^{1}.
Alkyl compounds, periodic system and, 2435^{5}.
Alkylenediamines, acylated, P 424^{1}.
Alkylenes. See *Olefins*.
Alkyl groups, effect of secondary, on dissocn. of substituted bixanthyl, 2328^{1}
effect on hydrolysis of malonic esters, 1056^{3}.
introduction into polyphenol nucleus, 3163^{5}.
introduction into straight-chain aliphatic aldehydes, 2310^{2}.
Alkyl halides, addn. compds. with quinoline, 3695^{7,8,9}, 3696^{1}
manuf. of, P 3170^{9}.
Alkyl iodides, detection of, 362^{1}.
reaction with org. thallium compds., 2310^{8}.
reaction with sodium benzyloxides, 2670^{4}.
Alkyl nitrites, reaction with mercaptans, 2976^{1}.
Alkyl oxides. See *Ethers*.
Alkyloxy groups, orienting influence in aldehyde synthesis, 382^{2}.
Alkyl selenides. See *Selenides*.
Alkyl tellurides. See *Tellurides*.
Allanite, from Japan (Ishikawa), 562^{9}.
from Japan (Iyo, Shikoku), 3409^{5}.
Allantoic acid, in haricot beans, 2182^{6}.
——, **di-9-xanthyl-**, 2182^{7}.
Allantoin, 8-alkyl derivs., attempted prepn. of, 1386^{8}.
detn. in presence of uric acid, creatinine and amino acids, 431^{7}.
detn. in urine, 3710^{1}.
excretion of, effect of vitamin A deficiency on, 1434^{8}.
in haricot beans, 2182^{6}.
prepn. of, 2825^{9}
tautomerism of, 1981^{2}.
"uricolytic index" in diabetes, 445^{9}.
Allantoinase, in poikilothermal vertebrates, 2353^{2}.
Allene. (For derivs. see under *Propadiene*.)
prepn. of, 3685^{4}.
Allergy, irritability in, 1111^{8}.
Alligator pear. See *Avocado*.
Allium cepa. See *Onion*.
Allocholanic acid, constitution of, 2167^{1}.
——, **3,13 - dihydroxy-***, and methyl ester, 2166^{6}.
Allocryptopine, α-, from berberine, 1629^{4}.
Allolithobilianic acid*, and trimethyl ester, 2166^{9}.
——, **keto-***, trimethyl ester, 2167^{1}.
Allomucic acid, 900^{7}.
Allonal, as hypnotic, 458^{7}.
localization and elimination of, 1850^{7}.
Allophanamide. See *Biuret*.
Allophane, crystal structure of, 29^{4}.
Allophanic acid (*carbamylcarbamic acid*), 2,5-dimethylcyclohexyl ester, isomers, 2149^{5}.
ester of 1,3-dichloro-2-propanol, 50^{8}.
ester of α-vinylcyclohexanecarbinol, 2666^{3}.
esters, 2481^{4,6}.
ethyl ester, K deriv , 717^{3}.
2-methylcyclopentanol ester, *cis*-, and *trans*-, 1790^{8,9}.
——, **γ-(carbamylmethyl)-**, ethyl ester, 2160^{9}.
——, **acid, γ - (carboxymethyl)-**, ethyl esters, 2160^{9}.
Allotelluric acid, acid nature of, 694^{6}.
Allotropy. (See also *Isomerism*.)
of chromium, 2600^{6}
of iron, 2970^{4}, 3427^{5}.
of lead, 3366^{7}
of manganese, 317^{7}
of mercuric iodide, 3120^{9}.
of mercuric sulfide, 3123^{9}.
of zinc, 1344^{3}.
Alloxan (*hexahydrotetraketopyrimidine*), cyclic thiocarbohydrazone, 1810^{8}
reaction with Hg salts, 2984^{1}.
Alloxan - 1,2,4,5 - heptatetrazine, 3 - thioketo-*, 1810^{8}.
Alloxanic acid, derivs , 3691^{4}.
salts, systematic study of their hydrates, 3691^{7,8,9}.
Alloys. (See also *Bearing metals; Gun metal; Solders; White metal;* etc., and alloys of individual metals, as *Aluminum alloys*.)
acid-resistant—see *Acid-resistant materials*.
activation and reactivation of, P 3398^{4}.
aluminum detn. in non-ferrous, 349^{2}.
analysis by x-ray spectrum, 2617^{3}.
analysis of, AcOH and H_2O_2 mixt as solvent in, 2799^{4}.
annealing, P 3683^{9}.
books: Chem. Technologie der Leichtmetalle und Ihrer, 734^{8}, and their Applications, 1780^{9}; Metaux et alliages métalliques industriels, 1780^{9}, Chem. Technologie der Legierungen mit Ausnahme der Eisen-Kohlenstoff-Legierungen, 2973^{8}.
carbon-binding, manuf. of, P 3682^{2}.
casting, 2970^{1}.
cathodic pulverization of, 2811^{8}.
chemistry of, 3627^{7}.
of Chou Dynasty, analysis of, 1342^{2}.
color of, relation to compn., 732^{4}.
corrosion of, 1202^{1}.
cryst. structure of, 3417^{9}.
dental—see *Dental fillings*
in dye house, 2814^{1}.
elastic properties of, effects of cold hardening and of quenching on, 567^{9}.
elastic properties of, variation with compn., 733^{8}.
elec. cond. of, effect of cold working on, 2970^{2}.
for elec. contacts, P 358^{2}.
elec. furnace for non-ferrous, 2287^{9}.
for elec. resistors, 338^{6}.
electrolytic conduction in molten metallic, 2938^{5}.

equil. diagrams of, with formation of a single compd., 33[3].
etching reagents for, 2651[6].
eutectic patterns in metallic, 1381[3].
fatigue test and dynamic elastic limit of, 3148[6].
hardening of, 2478[2].
Heusler, cryst. structure of, 2266[4]
magnetic properties of, 1209[5].
sp. heat of, 3631[6].
high-performance, 3149[4].
for high-speed tools, P 3683[4].
impact tests on non-ferrous, 1210[2].
for lining acid tanks, P 358[6]
liquation in molten, 2303[3].
low-C, manuf. of, P 2144[3].
macrostructure of non-ferrous, 1582[5].
magnetic susceptibility in binary, equil diagram and, 1209[2].
manuf. of, P 357[8]
metallography of, 567[2].
noble-metal, working-up on a small scale, 25[9]
notched bar impact test of, effect of temp. on, 567[1].
oxygen removal from, P 357[7].
oxygen removal processes and agents in non-ferrous melts, 2655[6].
pyrophoric—see *Pyrophoric alloys*.
quasi limiting state of, 1736[8].
quaternary, method of study of, 732[4].
for railway equipment, specifications of A S.T.M. for non-ferrous, 954[5].
refractory, P 168[5].
review, 3756[9]
segregation in molten, "hot wall" and, 1211[8].
selection and properties of, 888[5]
sepg constituents of, P 3442[6].
slow bend and impact notched-bar tests on, 2134[2].
soft, hardness of, 2134[9].
soly. in NaCl, HCl and sugar with citric acid, 689[9].
structure analogies of, 2654[3].
structure of, 33[3].
surface tension of molten, 3110[1].
temp. detn. of non-ferrous, 895[1].
tempering light, P 168[6].
thermal and elec. conds. of, 2811[5].
thermal cond. of wires and rods of, 1021[8].
thermo-electricity of, 165[5].
tin detn. in non-ferrous, 1365[5].
transition compds. between those having a saline character and the metallic, 1344[4]
viscosity of hot, 568[1].
welding, with flames of at. H, 319[8]

Allyl alcohol, phosphate, Ba salt, 1588[9].
prepn. of, 39[7].
reaction with benzene and $AlCl_3$, 2485[1]
reaction with *N*-methylcarbanilyl chloride, 1798[4].

4-Allyl-*o*-anisylsulfuric acid, potassium salt, 1796[2].

Allyl bromide. See *Propene, 3-bromo-*.

Allyl cyanide. See *β-Butenonitrile*.

Allylene. See *Propine*.

Allyl ether, 361[8].

Allyl isothiocyanate. See *Isothiocyanic acid*, allyl ester.

Allyl mercaptan, 2991[2].
———, **γ-phenyl-**. See *Cinnamic mercaptan*.

Allyl mustard oil. See "allyl ester" under *Isothiocyanic acid*.

Allyloxy group, orienting influence in aldehyde synthesis, 382[5].

Almandite, -biotite, compn. of, 2968[5].

Almond oil, 2989[5], 3091[4].

Almonds, emulsin, effect on *l*-arabinose, 1822[1]
emulsin of, primeverosidase and primeverase in, 435[1], 1632[5].
legumin of sweet, 2375[4].

Alnoite, nephelite-hauynite, from Winnett, Mont., 1778[8].

Alnus See *Alder*.

Aloes, active constituents of Cape, 798[9].
assay of, 1691[2], 3332[5].
socotrina, 1465[9].
standardization of, 2561[5].

Alopecia, thallium, "sensory hairs" and, 3039[1]

"Alpax" See "silicon-" under *Aluminum alloys*

Alpha particles, Alpha rays. See *α-Rays*

Alpinism. See "at high altitudes" under *Atmosphere*.

Alstonia congensis, paper pulp from, 285[7].

Althaea, flowers of, substitute for, 3536[1]
rosea var *nigra*, culture of, 3536[1]
sirup, preservation of, 2387[9].

Altitudes See *Atmosphere*.

Aludur, 2972[5]

Alum See *Alums*

Alumina, for abrasives, P 650[9].
absorption of β-rays by, 3127[8].
adsorption by, constitution and, 1931[7]
adsorption of alk. earth oxides and MgO by, 3368[2].
of NH_3 and CO_2 by, 3615[4].
of C_2H_4 on, 691[9].
from alunite, 3335[6].
from alunite, production cost of, 3335[6]
burning of mixt. with CaO and SiO_2, reactions during, 1702[2].
as catalyst, 691[4], 751[9].
for decompn. of esters, 580[2].
in dehydration of alkylvinyl carbinols, 2146[2,3].
in dehydration of MeOH, 2935[5]
for dehydration of phenol-alc systems, 385[1].
in dehydration of PrOH, 1782[7].
for dissocn. of CO, 3625[1].
for Et_2O prepn. from EtOH, 39[7].
in hydrogenation of org. compds., 1791[1].
in reaction between EtOH and NH_3, 538[4].
for reaction of isovaleraldehyde and NH_3, 2499[2].
catalytic decompn. of NaClO by, 3375[3]
colloidal, coagulation of, 3612[8].
hygroscopicity of, 1546[2].
isomeric hydrogels of, 533[3]
vapor adsorption by, 320[4]
crystal for wave-length measurements of soft x-rays, 1029[6].
crystal structure of, 29[4].
detn. in aluminum, 2800[9].
in basic eruptive rocks, 726[4].
in portland cement, 488[3].
in silicates, 1576[5], 2963[9].
in sodium hydroxide and KOH, 3406[6].
effect on blast furnace slags, 31[4].
effect on org. S compds. dissolved in naphtha, 1784[3].
electrothermal reduction of, P 3136[8].
expansion by heat, 807[9].
fiber formation from, P 1892[2].
heat capacity of, 862[4].

heating curve of colloidal hydrated, 1044[7].
of laterite soils, isolec. pt. of, 1681[6].
from leucite, 3335[1].
manuf. of, P 168[1], P 168[7], P 649[1], P 803[6, 7], P 2566[7], P 3542[5, 7], P 3785[4, 5].
manuf. of, Haglund process for, 551[6].
manuf. of hydrated, P 97[7]
optical behavior of fibers of, 1350[8]
phys. character of hydrous, effect of temp. of formation on, 1158[9]
reaction with basic oxides, 1016[7]
with soda, 2564[7]
with WO_3 and MoO_3, 321[7]
refractories of, thermal expansion of, 3547[5]
sepn. from solns. from leucitic rocks, P 22[5].
sorption of vapors by, 1346[7]
system $BaO-H_2O$-, 1765[8]
system $CaO-SiO_2$-, 3069[1], 3223[2, 6]
system SiO_2-, 1699[1]
system $SiO_2-CaO-MgO$-, 3675[9]
systems with SiO_2, CaO and Na_2O, 2960[8]
system: H_2O, 2274[7].
thermal cond. of, 3392[9].
water of hydration of, transformation into water of adsorption, 531[2]
Aluminates (See also *Alkali metal aluminates*)
hydration of, rich in lime, 1702[8]
manuf. of, P 649[3]
Aluminic acid See *Aluminum hydroxide*
"Aluminon," reaction with hydroxides of Be, rare earths, Zr and Th, 2963[6]
Aluminosilicates, deformation of, 975[7]
Aluminothermic process See *Thermite process*
Aluminum, absorption of the secondary β radiation produced in, by the primary α-rays of Ra, 702[7].
alpha-ray scattering by at. nuclei of, 143[9].
alpha ray stopping powers of, 3128[5], 3638[2].
anode film dielectric, 3378[1].
in app. manuf., 127[3].
app., use of, 2433[3].
atomic nucleus of, reflection of α particles from, 9[4].
atomic wt. of, 1006[6].
attaching labels to, P 1384[6].
books: Studien über d. elektromotorische Verhalten d., u. seine Verfluchtigung als Halogenid, 700[5]; Die Aluminiumindustrie, 1576[6], 1975[1], seine Eigenschaften und seine Bearbeitung in Industrie und Handwerk, 2306[6].
boron in, 894[2]
in breweries, 794[8].
cancer, 3734[7]
casting molds for, coating, P 898[8].
casting of, 3416[3].
castings, 3422[9].
castings, effect of cold rolling on inhomogeneous, 733[9].
casting sheets of, app. for, P 3443[4].
as catalyst for dehydration of phenol-alc. systems, 385[3].
as catalyst in decompn. of $PhNHNH_2$ and its derivs., 598[4].
cathode ray absorption in, 541[6].
cementation of Cu and Cu alloys with, 2812[3].
cementation of ferrous alloys with, 2654[9]
coagulating tanks for rubber lined with, 2431[9].
-coated Fe articles, softening, P 3682[4].
coating ferrous metals with, P 359[1].
coating ferrous metals with Sn and, P 358[9].
coating with metals, 2461[2].
colloidal, adsorption isotherm of, 3[1].
coördination no. of, in fluoaluminates, 719[1]
copper soly. in, 2652[6].
corrosion (intercryst.) produced in, by oxidic salt test, 3680[4].
corrosion of, by concd. H_3PO_4, 647[5]
by plastilin and free S, 2638[9]
prevention by coating with Cd, P 3154[5]
protection by anodic oxidation, 3648[1].
by NaCl, 3438[9].
by water, 2972[6]
crystal form of wire of, mech. strength and, 1155[9].
crystal growth in recrystd. cold-worked, 1581[9].
crystals of, behavior under static and repeated stresses, 2284[8].
distortion under compression, 3107[2].
effect of reversed torsional stresses on, 3418[8, 9]
prepn. of, 1542[8].
production and properties of, 3419[1]
crystal structure of, 131[1], 2601[7], 3105[1].
crystal structure of drawn wire and rolled, 683[8]
crystal structure of, effect of rolling on, 1342[9]
current-e. m. f. curves for, 141[8].
current-voltage sensitivity of Ge in contact with, 1023[5]
discovery of, 129[1], 1342[2], 2434[2]
dissoln. of, velocity of, 3618[8]
effect on bacterial fixation of N, 2003[4].
on lead-Sb alloys, 3423[7]
on photographic fixing baths, 1037[6]
elasticity modulus of, relation to temp., and m. p., 132[8]
elec. resistance of, effect of tension on the transverse and longitudinal, 698[6].
electrodeposition of Cd and other metals on, 1180[8].
electromotive behavior of, 864[8]
etching of, 1381[5]
etching of, new crystal structure revealed by, 2610[2].
expansion coeffs. at low temps., detn. of, 3376[7].
foils, velocity of cathode rays in, 1758[7]
gaseous ions of, energies of soln. of, 2446[1].
grain growth in critically strained, restraint of, 3417[6]
hardness of, 2642[3]
"H" particles from, photographic action of, 1943[7].
hydrogen diffusion through cathodes of, 2446[5].
hydrogen rays from, with Po as radiating agent, 3126[7].
hydrogen soly. in, at high temps., 1544[9].
in hypochlorite app., P 3543[1].
impact resistance of, 1210[2].
industry in Germany during 1925, 1358[7].
industry in Italy, 3134[2]
industry in 1925, 3674[5]
industry in Russia, 1358[7]
ingots and sheets and for Fe and steel manuf., specifications of A. S. T. M. for, 954[8].
ingots, specifications of A. S. T. M. for, 1121[4].
iron absorption by molten, 2143[1].
iron-contg., solidification of, 3152[4].
logarithmic decrement of, variation with amplitude and viscosity of, 132[8].
melting, 31[8].

microstructure of, 2143³.
mol. wt. of, relation to sp. gr., 850⁸.
notched-bar impact test of, effect of temp. on, 567³.
in org. life, 926².
outlook for, 1377².
paint, 671⁴.
photoelec. excitation of, by the total radiation of W, 705².
photomicrographs of, 2972⁴.
phys. properties of, effect of cold-working and annealing on, 732⁵.
plasticity of, 2808⁶
powdered, P 735⁵.
production in Italy, 3416².
pulverizing, P 576¹.
reaction with mixts. of O and N, 3141⁶.
  with HNO_3, 2292⁹.
  with Se_2Cl_2, 2294⁵
removal from oxidized ores, P 1382⁵
resistant to corrosion or high temps., 2814¹
review, 3276³.
review of mining and trade information, 888¹
rolled, vibration-figures on, 3277⁷
Röntgen-ray examn. of castings, 167².
Röntgen-ray refraction in prisms of, 2943².
Röntgen-ray scattering by, effect on polarization, 3266⁴.
scrap, treatment of, 888⁷.
screens of, effect on form of α-ray ionization curves, 3128⁴.
sheeting for printing, P 1976⁹
softening of strain-hardened, 3417¹.
in soils, 2218⁴.
in soils, relation to soil reaction and plant growth, 640²
soils that are acid and, 3527².
solder for, P 575⁸, P 1215⁴, P 1977¹.
soldering, P 36³, P 1384⁵, P 2145⁷.
solid soln. with Fe, tempering color in, 33⁵.
solid soln. with Ag, 32⁹.
spectrum of, 12¹, 17¹, 147⁵, 149⁵, 543¹, 1175⁷, 1351⁸, 1354¹, 1356⁶, 1357², 1561⁵, 1948⁹, 2283⁴, 2458³, 2949³, 3388⁵.
system: B–, 3149⁴.
system: Ce–Fe–, 3416⁸.
system: Cu–, 2654².
system: Mg–Zn–, 3425³.
system: Mo–Ni–, 2970⁷.
system: Si–, 3423².
system: Ag–, 2654⁴.
system: Zn–, 2813⁴, 2972³.
tellurium in treatment of, P 736¹.
temp. detn. in molten, pyrometer for, 3416⁹.
tensile strength and hardness of, 3678³.
tensile strength of hot, 569¹.
thermal and elec. conds. of, effect of torsion on, 2436⁸.
three-dimensional compression effect on, 1155⁶.
velocity loss in, of cathode rays, 705¹.
welding, 1212⁷, 1585⁸, P 2127⁵, P 2480².
welding of castings of, 1212⁷.
welding to Fe and Zn, P 1384⁵.
wire, arrangement of micro-crystals in, 131³.
Aluminum, analysis, detection, 560⁵, 2297⁷, 2963⁶.
  detn., 26⁸, 721⁵, 3371¹.
  detn. in ceramic products, 3546³.
    in com. magnesium, 1366⁵.
    in nickel, 349⁶.
    in non-ferrous materials, 349².
    in soils, 2218⁴.
  detn. of alumina, 2800⁹.
  detn., organometallic complexes in, 1365².
  magnesium entrainment in, 1365⁹.
  methods of A. S. T. M. for, 954⁷, 1121⁶.
  sepn. from Ca, 1573⁷.
  sepn. from iron and Zr, 1366⁸.
  sepn. in silicates, 3219⁸.
Aluminum, metallurgy of, P 1975⁸.
  book: Die Aluminium Industrie, 1567⁶, 1975¹.
  in Canada, 2621⁵.
  elec. furnace for, P 2127³, P 2463¹.
  electrolytic recovery, P 341⁶, 3393⁷, P 3651⁴
    app. for, P 1762⁶.
    formation of CF_4 in, 3393⁷.
  fumes from, fluorine cachexia from fodder altered by, 1675⁸.
  of insol. aluminous materials, 3335⁴.
  refining, electrolytically, P 1182².
  refining, electrolytic cell for, P 151⁴.
  review, 3674⁵.
  from scrap metal, 888⁷, P 1382⁵.
  smelting secondary Al, 1201⁷.
Aluminum acetate, adsorbents for, 2104¹.
Aluminum alcoholates, as catalysts for oxidation-reduction reactions of aldehydes or ketones and alcs., 1611².
Aluminum alloys. (See also *Aludur; Bronze, Duralumin; Silumin;* "Heusler" under *Alloys;* and "system" under *Aluminum.*) 2972⁴
  age-hardened, effect of artificial aging on, 894³.
  age-hardening, 2653⁷.
  aging in self hardening, 2141⁹.
  aging of, 3599¹.
  aging of, effect on elec. cond. and chem. resistance, 2478⁴.
  for aircraft, 732¹.
  amalgam, as reducing agent for azines, oximes, and phenylhydrazones, 2309¹·⁴.
    resistivity and cond. of, 3119².
    soln. in acids, rate of, 2649⁹.
    velocity of decompn. and reducing power of, 2775⁶.
  analysis of, methods of A. S. T. M. for, 954⁷, 1121⁶.
  annealing and hardening of, corrosion of tanks by nitrates used for, 573⁷.
  antimony-, Mg-, Ag-, or Zn-, electrolysis of, 2939¹.
  boron-, 3149⁴.
  boron effect on, 894².
  brass, 166⁶.
  cadmium-Mg-, 2812⁹.
  cadmium-Zn-, 3425².
  calcium-, elec. resistivity of, 2972⁸.
  cast, 2654².
  castings of, for aircraft, 733⁷.
  castings of, specifications of A. S. T. M. for, 954⁵.
  for casting, specifications of A. S. T. M. for, 955², 1122².
  chromium-, coating metals with, P 898⁹.
  chromium-Fe-, P 35⁴.
  chromium-Fe-Mn-Ni-, P 168³.
  cobalt-, 2813⁶.
  copper-, P 2479⁹, 3627⁸, P 3683¹.
    corrosion by plastilin and free S, 2639².
    effect of cold-working and annealing on phys. properties of, 732⁵.
    endurance properties of, 2639⁷.
    equil. relations in, 2652⁴.
    hardening of light, 1209⁹.
    heat treatment of, 2141⁶.

thermal anomaly of, 3420^{9}.
treatment with Te, P 736^{1}.
copper-, and Si-Zn-, for castings, P 1214^{7}.
copper-Au-, P 36^{1}.
copper-Pb-Ni-, coating Fe vessels with, P 1976^{8}.
copper-Mg-, P 3442^{9}.
copper-Mg-, casting and heat treatment of, 1381^{7}.
copper-Mg-Mn-Ni-, 893^{9}.
copper-Mn-Si-, P 3682^{8}.
copper-Mn-Ag-, P 357^{9}
copper-Mn-, treating for hardening, etc., P 35^{9}.
copper Ni-, P 35^{7}, P 3682^{9}.
copper-Ni , age-hardening of, 3425^{7}.
copper-Ni-Mg , and Cu-Fe-Mg-, effect of reheating on, 2651^{9}.
copper-Si-, 3425^{6}.
copper-Si-, and Ni-Si , P 1214^{6}.
copper-Si-, effect of aging temp. on, 894^{4}.
copper-Si-Zn-, P 1214^{8}.
copper-Sn-, 2141^{6}.
copper-Zn-, P 35^{9}.
copper-Zn-, constitution of, 569^{8}.
corrosion (intercryst.) produced in, by oxidic salt test, 3680^{4}.
corrosion of, protection by anodic oxidation, 3648^{1}.
die casting of, 888^{6}.
elec. cond of, as affected by atm. exposure, 3679^{7}.
etching of, 1381^{5}.
etching of, new crystal structure revealed by, 2640^{2}.
fatigue tests on, 1203^{4}.
history of light, 33^{8}
industry in 1925, 3674^{5}.
iron-, P 35^{4}, 2972^{3}, P 3443^{5}.
expansion on solidification, 2972^{7}.
magnetic properties of, 1209^{5}.
microstructure of, 1209^{6}.
operating control of elec. furnace in manuf. of, 712^{5}.
iron-Si-, P 1976^{6}.
lithium-, 1585^{1}.
lithium-, silicon effect on, 3424^{3}
magnesium-, 1021^{5}, 1974^{1}, P 1976^{7}, 2653^{2}.
for aeronautical propellers, P 2145^{5}.
heat-treating, P 3154^{6}.
silicon effect on, 3424^{3}.
magnesium-Si-, 2653^{5}.
magnesium-Si-, endurance properties of, 2639^{7}.
magnesium-Zn-, P 1587^{4}.
manganese-, cast in sand, 733^{5}.
manganese-Ag-, P 2974^{8}
manuf. of, electrolytically, P 3651^{4}.
nickel-, P 1587^{3}.
nickel-, for steam turbine blades, etc., P 1214^{8}.
properties of, 570^{3}, 3278^{2}.
resistant to corrosion or high temps., 2814^{1}.
silicon-, P 357^{8}, 570^{5}, P 1976^{6}, P $3279^{1,3}$, 3423^{1}.
castings of, P 1215^{2}, P 898^{2}.
constitution and structure of, 3423^{6}.
for foundry molds, P 2145^{8}.
mech. properties of, 3423^{4}.
modification and properties of sand-cast, 3424^{1}.
properties of modified, 3423^{9}.
silicon-Sn-, for castings, P $1214^{6,7}$.
smelting secondary, 1201^{7}.
sodium effect on, 3423^{7}.
specifications of A. S. T. M. for, 1121^{4}.
thermal improvement of, 1381^{7}.
tin-Zn-, P 35^{4}.
titanium-, 721^{3}.
transformations under effects of deformations, 355^{6}, 1209^{7}.
welding, P 2127^{5}, P 2480^{2}.
workability of, effect of compd. $MgZn_2$ on, 3425^{3}.
zinc-, 1209^{8}.
crystals of, 3419^{2}.
Röntgen-ray analysis of, $2601^{1,2}$.
tensile tests of, 893^{8}.
zirconium , electrolytic manuf. of, P 2126^{8}.
Aluminum ammonium fluoride, 559^{7}.
Aluminum arsenide, reaction with alcs. and ethers, 3273^{7}.
Aluminum borate, precipitation of, H-ion concn and, 1163^{1}.
Aluminum bromide, as catalyst for polymerization of cyclopentadiene, 2148^{7}.
compd. with H_2S, elec. cond. in benzene soln., 322^{2}.
Aluminum carbonate, precipitation of, H-ion concn. and, 1163^{1}.
Aluminum chloride. (See also *Friedel-Crafts reaction; Petroleum refining.*)
action on hydrocarbons, 3230^{9}.
as catalyst for chloroethane manuf., P 918^{2}.
in hydrogenation of org. compds., 1791^{2}.
for manuf. of alkyl chlorides, P 51^{4}.
effect on cond. of nerves, 1103^{4}, 1860^{5}.
effect on soln of Al in HCl, 3619^{1}.
heat of vaporization and b. p. of, 2603^{8}.
manuf. of, P 97^{1}, P 482^{3}, P 649^{1}, P 1695^{9}, P $2231^{5,6}$, P 2394^{9}, P $3542^{2,3,4}$.
reaction with nonane and with cyclopentane, 899^{1}.
recovery in petroleum refining, etc., P 649^{2}, P 1715^{2}, P 2066^{3}.
spectrum of, 335^{3}.
xylene purified with, 1396^{8}.
Aluminum chromate, precipitation of, H-ion concn. and, 1163^{1}.
Aluminum compounds, alkyl-Al iodides, 361^{6}.
ammino-, 3373^{7}.
with fluorine, 719^{3}.
with iodoethane, 361^{6}.
with pyrocatechol and pyridine, 717^{7}.
reaction of org., with acid chlorides, 1065^{2}.
sepn. from K compds., P 649^{2}.
with titanium, 721^{3}.
Aluminum dichromate, basic, 718^{1}.
Aluminum ferrate, 157^{3}.
Aluminum fluoride, 559^{6}.
heat of formation of, 2111^{1}.
manuf. of, P 803^{3}, P 3784^{8}.
Aluminum formate, prepn. of, 1569^{5}.
Aluminum halides, book: Studien über d. elektromotorische Verhalten d. Aluminiums u. seine Verflüchtigung als Halogenid, 700^{5}.
manuf. of, P 3542^{4}.
Aluminum hydride, mols., relations between electronic structure and band-spectrum structure in, 2458^{1}.
spectrum of, 2948^{6}.
Aluminum hydrosilicates, formation of natural, 885^{2}.
Aluminum hydroxides, 527^{7}, 684^{9}.
adsorption of ions by, and by its mixt. with $BaSO_4$, 3614^{7}.
anion effect on, 3610^{9}.

colloidal, 533^{4}.
freezing of, 2266^{4}
prepn. of, 532^{9}
colloidal AlO_2H, 533^{0}
complexes with proteins, 1249^{1}
elec. charge of, effect of dissolved electrolytes on, 3608^{8}
precipitated, compn. of, 684^{5}.
precipitation of, 26^{8}
precipitation with NH_4OH, 3371^{1}.
soly. of, 3371^{2}.
Aluminum iodide, as catalyst for polymerization of cyclopentadiene, 2118.
Aluminum iron sulfate, 719^{2}.
Aluminum nitrate, sepn. from Fe compds., P 1498^{8}
Aluminum nitride, decompn. of, 3141^{8}.
history of, 3618^{1}
Aluminum ore See *Bauxite*
Aluminum oxalates, of optically active bases, 766^{5,6}
Aluminum oxides. (See also *Alumina*.)
spectrum of AlO, 337^{6}
Aluminum phosphate, precipitation in presence of $Ca_3(PO_4)_2$, 2299^{8}
soly. of, effect of acids and alkalies on, 1682^{9}
Aluminum potassium fluoride, 559^{7}
Aluminum potassium nitrate, as fertilizer, P 1299^{8}.
Aluminum potassium sulfate See *Alums*.
Aluminum resinate, in rosin sizing of paper, 3813^{5}
Aluminum rubidium fluoride, 559^{7}.
Aluminum salts, hydrolysis and H ion concn. of, detn. of, 3095^{5}.
reactions with acetate, oxalate and tartrate of Na, H electrode studies of, 2417^{6}
tuberculosis therapy with, 1269^{4}, 2879^{7}
Aluminum selenide, reaction with alcs. and ethers, 3273^{7}.
Aluminum silicates (See also *Fuller's earth*.)
crystal structure of, 3105^{2}.
formation, solv. and deposition, 1373^{8}
from kaolin, 1746^{7}
Aluminum sodium fluoride, 559^{7}
Aluminum sulfate. (See also *Alums*.)
from alunite, 3335^{8}.
electrodeposition of Zn from electrolytes contg. gelatin and, 1955^{4}
hydrolysis of, 1553^{2}
manuf. of, P 618^{8}, P 2231^{9}, P 3781^{8}
residue from manuf. of, for use in cement mixts., P 3793^{6}
sepn. from Fe, 1497^{5}
system: $NiSO_4$–H_2O–, equil. in, 692^{1}.
systems: $CuSO_4$–H_2O–, and $FeSO_4$–H_2O–, 719^{2}.
system: Ag_2SO_4–H_2O–, 693^{6}.
thermal dissoc. of, 347^{4}.
Aluminum sulfide, reaction with SO_2, 2291^{1}
sublimation of, 1039^{6}
Aluminum telluride, reaction with alcs. and ethers, 3273^{7}.
Aluminum triphenyl, sodium addn. compd., 2993^{1}.
Aluminum tripyrocatecholatostannate, 3404^{3}.
Aluminum uranate, prepn. of, 3657^{3}.
Alums. (See also *Aluminum sulfate; Water, purification of.*)
absorption of β-rays by, 3127^{9}.
as catalyst in manuf. of ether, 2816^{4}.
chromium guanidine, 879^{2}.
dissoln. of diff. faces of crystals of, control of, 132^{7}.
ferric, specifications for, 2798^{8}.
ferrous guanidine, 879^{2}.
in filters, economical use of, 253^{7}.
nomenclature of, history of, 2434^{3}.
protein fixation by, 3468^{8}.
residue from manuf. of, for use in cement mixts., P 3793^{6}.
specifications for, 2468^{7}.
vanadium guanidine, 879^{2}.
Alundum, as refractory for melting Fe, 3068^{4}.
Alunite, aluminum and Al_2O_3 from, 3335^{4}.
aluminum contg. material from, P 3215^{3}.
of Juravlinsky, 1579^{1}.
newtonite and, 1373^{4}.
Alypine, 3011^{3}
diffusion into gelatin contg. lecithin, 427^{4}.
Amalgamation (See also *Gold, metallurgy of, Silver, metallurgy of*.) P 3440^{9}.
plate, 888^{6}.
Amalgamators, impact, P 34^{4}
for placer deposits of Au, Pt, etc., P 34^{5}
Amalgams, alkali, formation by a. c. electrolysis, 873^{1}
aluminum, as reducing agent for azines, oximes, and phenylhydrazones, 2309^{3,4}
reduction of azines with, 899^{9}.
velocity of decompn. and reducing power of, 2775^{6}
in analysis, 26^{2}, 2469^{9}.
barium, free energy and heat of transfer of Ba in, 3632^{1}
coating textiles with, P 1910^{9}.
dissoln. in acids, rate of, 2649^{8}.
distn. of, 685^{9}
elec. resistance of, effect of magnetic field on, 3121^{7}
elec. resistivity and cond. of, 3119^{2}.
equil. consts. of, 1936^{1}
equil. with aq. Na and K halide mixts., ionic activity *vs.* concn. in, 2932^{5}.
gold, 1210^{7}.
iron, electrolytic potential of, 3618^{7}.
manganese, electrode potential and replacing power of, 3123^{7}
microstructure of, 3277^{7}.
order of removal of Mn, Cr, Fe, Co and Ni from, 3376^{8}
reactions between liquid, and aq. solns., 1017^{2}
sodium and K, vapor pressure of, 3109^{3}.
sodium, electrolysis of, 2938^{8}
sodium, manuf. electrolytically, app. for, P 3398^{3}
Amazon stone, heat effect on, 1578^{5}.
Ambard constant, coeffs. of correction for, 2006^{9}
Amber, detection of, 2755^{7}
elec. cond. of, x-ray effect on, 3124^{4}.
varnishes, 3242^{1}.
Ambergris, compn. and nature of, 1671^{7}.
Ambient fluid, freezing point of erythrocytes and, 2008^{6}.
Amboceptors, formation of, effect of salts on, 1269^{1}.
production of, action of sensitized antigen in, 238^{9}.
secretin effect on hemolytic, 1446^{8}.
Ambrain, in ambergris, 1671^{7}.
Ambronn, Hermann, biography, 3251^{3}, 3365^{2}.
Ambrosia artemisiaefolia. See *Ragweed*.

Ameba, effect of immersing and tearing, in salt solns., 1814[7].
Endamoeba gingivalis, effect of drugs and dyes on growth of, 3748[9].
metabolism of water in, 3516[1].
proteus of, effect of H-ion concn. on, 3048[1].
protoplasm of, reaction to injected salts, 1814[7].
soil, effect of antiseptics on, 1879[1], 3529[9]
ultra-violet light effect on, 3467[8].
Amebiasis, blood Fe in, 3029[6]
Amebocytes, decolorization by acids and alkalies, 3462[2].
tissue, effect of ion combinations on, 3461[9]
urease in, of *Limulus*, 1872[5].
Ameboid movement, in amebocyte tissue, effect of ion combinations on, 3461[9].
model for, 2685[9]
surface tension changes underlying, 2001[7].
temp. effect on, 3304[7].

bromo derivs., 767[9].
catabolism of, 3724[4].
in collagen, 528[3].
configurational relation of hydroxy acids, sugars, sugar acids and, 921[2].
conversion into Ca carbaminates, effect on sensitiveness to photooxidation, 2181[9].
in corpus luteum acetone ext., 1496[8].
deamination of, urea synthesis and, 1099[7].
decarboxylation of, 1628[9].
decompn. by acetic bacteria, 2870[9].
dehydrogenation of, 2682[3].
detn in blood, 2686[5].
detn. of, by feeding expts., 617[9].
detn. of, from hydrolysis of proteins, 59[2].
effect on action of diphtheria toxin, 3737[2].
effect on bacterial growth, 2869[6].
in eggs during incubation, 2362[4].

of embryonic tissue ext., effect on fibroblast growth, 3467^{9}.
in embryo of *Teleostei*, 243^{9}.
excretion by kidneys, diet and, 937^{4}.
excretion from exudates into blood, 2200^{3}.
excretion in urine, 3497^{6}.
fermentation of, 213^{8}, 367^{9}.
formation in animals and plants, 3301^{6}.
formation in effusions, 1849^{5}.
formol titration of, 3476^{9}.
in globulin of thyroid gland, 2335^{9}.
glycerides, 3283^{6}
hydroxy, hydrolysis of, 593^{6}.
in meat production, 775^{5}
metabolism of, 2010^{8}.
in muscles, effect of cutting motor nerve on, 2191^{3}.
nitrogen in eggs of *Bombyx mori* during development, 2542^{4}.
nutrition requirement, 1835^{5}.
oxidation of, 2152^{8}
photoöxidation of, velocity of, 2506^{4}.
in post mortem blood and spinal fluid, 231^{4}.
precipitation of colloidal Au with, 2169^{6}.
production with soy bean cake, 3463^{9}.
protein-like substances from, 918^{8}.
in proteins, relation to nutrition, 617^{2}.
reaction with Grignard reagents, 588^{8}.
with hypochlorites, 3019^{2}.
with piperazinedione derivs., 420^{3}.
with sugars, 2660^{4}.
renal injuries by, 1431^{6}.
in respiration of leaves, relation to carbohydrates, 2517^{2}.
in rye kernel, 221^{3}.
sepn. of dicarboxylic, from protein hydrolyzates, 2311^{8}.
soly. of, 697^{9}.
soly. of, effect of H-ion concn. on, 1820^{7}.
specific dynamic action of, 436^{2}.
spectrography of, 3462^{6}.
spectrum of, 1090^{4}.
sulfur-contg., in yeast ext., 924^{3}.
synthesis into diketopiperazine derivs. by bean proteases, 1820^{5}.
synthesis of, 56^{4}.
synthesis of, mechanism of Strecker reaction, 2146^{9}.
system: neutral salt–peptone–, starch decompn. through, 1998^{4}.
tyrosinase effect on, 1635^{2}.
in wheat bran proteins, 3026^{5}.
in wool and silk proteins, 2753^{2}.
in wool proteins, 3088^{2}.
in worts, 90^{2}.
Amino alcohols. See *Alcohols*.
Amino compounds, acetylation in animal organism, 1837^{8}.
bromination of, velocity of, 2316^{2}.
reaction with carbohydrates, 1787^{6}.
with $(ClCH_2CH_2)_2S$, 39^{9}.
with HNO_2, 370^{8}.
with sulfites, 195^{5}, 1074^{7}.
sugar derivs., 3286^{1}.
tesla-luminescence spectra of, 2121^{7}.
Amino group. (See also *Deamination.*)
alkylnitro derivs., reactivity of, 589^{9}, 590^{1,5}.
effect on the reactivity of the CHO group, 402^{6}.
elimination from tertiary amino alcs., 2324^{6}.
Aminosulfonic acid. See *Sulfamic acid.*
Ammino compounds, 578^{1}.
aluminum-, Mg-, and Zn-, 3373^{7}.
with ammonium perchlorate, 2626^{5}.
beryllium-, 139^{6}.
cadmium-, 139^{8}.
chromium-, 716^{7}, 851^{4}, 2625^{9}.
cobalt-, 155^{9}, 716^{6,7}, 2128^{4}, 2128^{6}, 3138^{7}, 3690^{4}.
adsorption of, 531^{4}.
aquotization of, 3622^{5}
mol. vols. of, 2924^{1}.
mol. vol. variations formation of solid, 1343^{6}.
molybdates of, 1962^{2}.
nitrites of, prepn. of, 2794^{5}.
stereochem. configuration of, with anomalous coordination nos., 877^{9}.
copper-, 140^{3}, 2826^{5,6}.
copper-, adsorption of, 531^{4}.
of copper cyanurates, 1767^{5}.
germanium-, 2795^{1}.
gold-, 140^{2}.
of heavy metal vanadates, 1185^{5}.
of iron group, 139^{4}
lattice energy of, 692^{5}.
mercury-, 139^{8}
nickel-, 1589^{1,5}
palladium-, 1589^{4}.
pharmacology of, 1866^{9}
platinum-, cis-trans isomerism of, 2295^{1}.
oxidation of, 1765^{3}.
prepn. of, 2961^{3}
structure of, 2960^{9}.
platinum nitrite, 2961^{6}.
silver-, thermal dissocn. of, 3631^{3}
with sulfates, 2626^{4}.
Ammonia. (See also *Ammino compounds; Ammonia, manufacture of; Ammonification; Ammonium hydroxide; Ammonium nitrate; Ammonium sulfate; Nitrification.*)
absorption app. for use in refrigeration, P 636^{6}.
absorption by a liquid drop, 1543^{7}.
absorption in gas holders, reduction of, 1305^{3}.
addn. compds. with chlorides and alkali carbonates, 1161^{3}.
adsorption of, by Al_2O_3, Fe_2O_3 and Cr_2O_3, 3615^{4}.
by charcoal, 856^{1,4}, 3368^{7}.
by glass walls, 2928^{8}.
in soils from $(NH_4)_2SO_4$, 85^{4}.
alkali metal cond. in, 1168^{9}.
autolytic formation in tissues, 3726^{4}.
in blood, 1658^{1}, 3493^{8}, 3705^{9}.
effect of exertion in high and low altitudes on content of, 2190^{5}.
origin of, 2007^{4}.
in blood of epileptics, 1664^{4}.
in blood or tissues in pregnancy, effect on renal function, 1108^{4}.
chem. behavior in mixt. with Rn, 1031^{6}.
compds. with CO_2, 139^{3}.
crystal structure of, 130^{9}, 526^{1}, 1735^{8}.
decompn. of, catalytic influence of ions of inert gases on, 2459^{9}.
effect of water vapor and HCl on velocity of, 813^{7}.
Ne as catalyst for, 1760^{4}.
by Pt in closed vessels, 2776^{6}.
by ultra-violet rays, 3646^{2}.
depolarization of light scattered by, 1554^{2}.
detn., 1188^{5}, 2406^{7}, 3145^{8}.
detn. in aqueous solns., 3407^{1}.
in blood, 1641^{9}, 2190^{6}, 3185^{3}.
in cotton seed, 1914^{2}.
in fertilizers, 2221^{1}, 3057^{5}.

in grape musts, effect of sugar on, 1885^4.
in sodium hydroxide and KOH, 3406^6.
in ureic fertilizers, 258^6.
in water, 2216^4.
detn. of, entrainment prevention in micro-Kjeldahl method for, 1369^8.
detn. simultaneously with urea, 3468^7.
detoxication in plants, effect of asparagine on, 2351^7.
disinfection with Cl and, 2713^5.
effect on blood vessels, 2368^8, 2702^1.
on brilliant cresyl blue accumulation in sap of living cells of *Nitella*, 1428^3.
on cotton cellulose, 821^5.
on explosibility limits of H and air, 989^4.
on germination of barley, 2182^3.
on lungs, 239^7.
elec. moment of, 2613^2.
electron impact expts. in, 11^4.
equil. data of Haber, 697^1
equil. with *l*-aspartic acid in presence of resting bacteria, 3480^1.
excretion of, effect of ketogenic diet on, 2361^4.
effect of vitamin A deficiency on, 1434^8.
by kidneys, 778^5.
in nephritis, 1454^8.
expansion coeff. and free space, 3595^7
explosion regions of mixts. with H and air and with H and O, 1906^8
fermentation, effect of Th X on, 2690^2.
fertilizers contg., for cotton and corn, 2890^5.
in fertilizers for potatoes, 88^1.
flow through a porous wall, rate of, 3601^5.
formation in infants, 626^3.
formation site in animal organism, 2358^9, 3490^8.
in fuel for motors, P 3074^1
gas mask for protection against, 2552^2.
heat of vaporization of, 3123^1
ionization in aq. MeOH, 2608^6.
ionization potential of, 2118^7.
in lake waters, seasonal variations of, 2887^3.
liquid, action on Et cinnamate, 1066^6.
mol. wt. detn. in, 129^6, 3104^1.
oxidation potentials in, involving quaternary NH_4 radicals and alkali metals, 3633^9.
reactions of compds. of Ph_3C and Ph_3Si in, 189^5.
reactions of KNH_2 in, 720^8.
reaction with esters of citraconic, itaconic, and mesaconic acids, 1056^3
salt formation in solns. in, 717^1
solns. of electronegative elements in, 3373^6
thermodynamic properties of electrolytes in, 3372^4.
luminescence of solidified, 2284^1
mercuric sulfide soly. in, and its effect on detection of As and Hg, 1967^9.
mixt. with H and O, velocity of sound in, 865^7.
molecular wt. of, 3600^7.
mother substance in blood, effect on regulation of neutrality, 3499^9.
nitrogen of, detn. in fertilizers, 1486^2.
oxidation of—see also *Nitric acid; Nitrogen oxides; Ammonium nitrate.*
oxidation of, P 96^8, 971^4, P 972^6, 1363^1, 1693^2, 2443^9, P 2565^6, 2625^3.
app. for, 3334^3.
catalyst for, P 3786^2.
by peroxysulfates, effect of silver NH_3 ion on, 2609^4.
pozzuolana as catalyst for, 257^2.
Rh as catalyst in, 5^9.
vitreous SiO_2 for, 3546^1.
oxidation to nitrite by O, 1744^5
permeability of frog membrane and frog lungs to, 443^7.
poisoning by, and its treatment, 2552^4.
radon effect on mixts. of an oxide of C and, 1173^9.
in rain water from protected and exposed gages, 251^5.
reaction velocity of ethyl monochloroacetate and of Et acetate with, and influence of neutral salts, 2608^9.
reaction with acetaldehyde and HCN, 3260^5.
with EtOH, catalysis by Al_2O_3 in, 538^4
with ferric sulfate, 3259^1.
with HCl, catalysis of, 3625^4.
with isovaleraldehyde, 2499^2.
with α keto acids, 56^7.
with Hg_2Cl_2, 1190^2.
with phosphorus chlorides, 348^1, 882^7.
in refrigerating plant circuit, app. for indicating rate of flow of, 1289^4.
removal from air, P 84^9, P 2552^6
removal from gas, compn. for, P 482^2.
satn. pressure of, relation to temp., 3633^7
sepn. from nicotine, 477^1
in soil, relation to total N, nitrates and soil reaction, 1483^4
soly. of NH_4 salts in, 534^8
specific heats and Joule Thomson coeff. for, 1749^2.
specific vol. of superheated vapor, 1735^1.
spectrum of, 14^6, 1178^1, 1951^3
system: EtBr-O-N-, explosion space of, 2907^6.
systems: H-O-, and H-air-, 1549^5
urinary, origin of, 3491^1.
in urine after exercise, 230^4
in urine, effect of posture on content of, 3495^2.
vapor pressures of aq. solns. of, 2607^5
viscosity of, 853^5.
water contg., effect on pipes and boiler plates, 1211^8.
welding in, 3439^9.
work of adding to, or removing from ammoniates, 692^7
Ammonia, manufacture of. (See also *Ammoniacal liquor; Ammonium chloride; Ammonium sulfate; Coking; Nitrogen fixation.*) P 1306^8.
absorption and desorption in coke-packed column, 3063^3.
from barium cyanamide, 1761^2.
book, 3541^5.
by-product, in U. S., 2393^1.
costs in, 3062^6.
distn. app. for, P 1891^7.
distn. app., lime-scale removal from, 981^5.
from gases contg. HCN, P 1695^7.
gas scrubbers, scale prevention in, 1900^2.
from peat in Sweden, 2571^6.
recovery, from distn. gases, 139^4, 813^6, P 2231^3, 2575^5, $2905^{4,5}$, 3797^6.
review for 1925, 955^4.
from sodium cyanide, N fixation in, 3062^8.
from sugar waste, 955^6.
synthesis, 1497^1, 2728^9, 3227^7; (*Patents.*)

96[6], 648[6], 802[7,8], 1498[4], 1695[7], 2230[9], 2565[5], 3541[8,9], 3784[1,3], 3799[9].
synthesis, app. for, P 266[7], P 2231[1,2], P 3214[1], 3333[9].
by Casale process, 265[2].
catalysts for, P 96[7], 2728[4], P 3065[3].
catalysts for, x-ray examn of, 526[6]
from coke-oven II, 2906[4].
in conjunction with coke ovens, 2229[1]
drying gases for, P 2231[1].
electricity in, 2620[9].
high pressures in, 2712[3].
in low voltage arcs, 2229[3].
Merseburg works for, 2050[3].
purifying gases for, P 2394[8], P 3065[2]
review on, 1937[5].
from vinasses, P 1493[2].
from waste liquors of artificial silk manuf., P 671[1].
waste treatment and disposal, 981[6,7].
from waste waters in manuf. of artificial filaments, P 2394[8].
Ammoniacal liquor. (See also *Gas liquor*.)
analysis of, 2406[7].
distn. app for P 1710[8].
distn. of, waste treatment and disposal in, 981[6,7]
as nuisance, 813[8].
phenol elimination and recovery from crude, 1313[9].
phenol recovery from, distn. app. for, P 3345[8,9].
phenols in, 3553[3].
purifying crude, P 1316[8].
Ammonia-soda process See *Sodium carbonates*.
Ammoniates. See *Ammino compounds*.
Ammonification, in acid soils, 2037[4].
cellulose effect on, 257[8].
in soils, effect of Na_2CO_3, NaCl and Na_2SO_4 on, 1879[9], 1880[1].
of woodland soils, effect of soil acidity on, 1878[5]
Ammonium. (See also *Ammonium ion*.)
consts. of free, 525[1].
detection of, 2129[7]
Ammonium acetate, effect on fermentation by yeast, 2866[6].
as protein substitute in feeding expts., 1096[3].
specifications for, 2468[7]
system: AcOH–H_2O–, 2936[2].
viscosities of solns of, 854[1].
Ammonium aluminum fluoride, 559[7].
Ammonium azide, reaction of, in C_6H_6 and in *p*-xylene under pressure, 2501[2].
Ammonium bromides. (See also *Ammonium halides*.)
mutual orientation of crystals of NaCl and, 1736[2].
NH_4Br_3, 156[3].
Ammonium cadmiopyrophosphate, 2794[2].
Ammonium cadmium sulfate, 2960[7].
adsorption of, 531[4].
Ammonium carbamate, urea from, P 51[6].
Ammonium carbonate, dissocn. tension of NH_4HCO_3, 1572[5].
specifications for, 2468[7].
stability of, 2562[1].
Ammonium cerlochloride, solid soln. with NH_4Cl, 2925[8].
Ammonium cerium sulfate, 2960[5].
Ammonium chloride. (See also *Ammonia, manufacture of; Ammonium halides*.)
acidosis from, 237[3].
corrosion of steel by, effect of $NaNO_3$ on, 3277[2].
diuretic action of novasurol and, 451[7].
effect on acetone body formation and excretion, 3719[4].
on adrenaline discharge, 2206[7].
on case-hardening, 3428[6].
on milk yield and compn, 1657[3].
on parathyroid tetany, 3194[2].
on stomach movements, 1266[8].
light scattering in solns. of, 2113[2].
manuf. of, P 972[7], P 2231[8].
pharmacol. action of, 3042[9].
reaction with HCHO and acetone, 1808[7].
sepn. from $NaNO_3$, P 3784[2].
solid soln. with $CeCl_4$ or with $(NH_4)_2CeCl_6$, 2925[8].
specification for, 2468[7].
spectrum of, 2455[1].
system. NH_4NO_3–, 2436[2].
Ammonium chromate, photochemistry of, 3389[9]
system: $La_2(CrO_4)_3$–H_2O–, 1963[6].
Ammonium chromiphosphite, 2793[8].
Ammonium cobaltophosphite, 2794[1].
Ammonium cobalt selenate, dissoc. pressure of hydrated, 347[5].
Ammonium cobalt sulfate, 2960[7].
adsorption of, 531[4].
Ammonium compounds (See also *Ammonium compounds, substituted*.)
ammoniates of NH_4 perchlorate, 2626[5].
manuf. of, P 2231[3].
nitrogen in, valency of, 535[9], 3103[9]
Ammonium compounds, substituted, (β-arsinosoethyl)trimethyl— chloride, 364[6]
benzyl-β-bromoallyldimethyl— iodide, 390[2]
(2 - benzylcyclohexyl)dimethylphenethyl — iodide, stereoisomers, 2665[8,9]
(2 - benzylcyclohexyl)trimethyl — iodide, stereoisomers, 2665[7,9]
benzyldiethylphenyl— iodide, and CHI_3 addn. compd., 2815[8].
benzyldimethylphenyl— chloride, benzylation with, 3695[4].
benzyldimethyl - 2 - thienylmethyl— iodide, 390[6].
benzyl(2 - furylmethyl)dimethyl— iodide, 390[7].
benzyltriethyl— salts, 3688[6].
benzyltrimethyl— nitrate, 3288[8].
benzyltrimethyl— nitrate, nitration of, 1603[6].
γ-bromoallyltrimethyl— bromide, 899[3].
butyltriethyl— salts, 3688[6].
(carbamylmethyl)trimethyl — chloride, 3688[9].
α carboxyamyltrimethyl— bromide, Et ester, 3688[8].
α-carboxybenzyltrimethyl— bromide, Et ester, 3688[9].
α-carboxybutyltrimethyl— bromide, Et ester, 3688[8].
(α-carboxyethyl)trimethyl— bromide, esters, 3688[8,9].
(carboxymethyl)trimethyl— bromide, esters, 3688[8].
γ-chloroallyltrimethyl— chloride, 899[4].
chloroferrates of, 25[4].
diacetoneglucosyl - 3 - tetramethyl— iodide*, 2663[1].
dibenzyldimethyl— iodide, CHI_3 addn. compd., 2815[8].
β,γ - dibromoallyltrimethyl— bromide, isomers, 899[6].

(β - dichloroarsylethyl)trimethyl— chloride, 364[5]
(γ,γ - diethoxy - α - methylpropyl)diethylmethyl— iodide, 1788[6]
(γ,γ - diethoxy - α - methylpropyl)trimethyl— iodide, 1788[6].
diethyl(methoxymethyl)methyl— iodide, 2309[7]
dimethylphenylpropargyl— iodide, 390[1].
effect on adrenaline secretion, 2703[6].
effect on autonomic nervous system, 3747[4].
(ethoxymethyl)diethylmethyl— iodide, 2309[7].
ethoxytrimethyl — hydroxide, ionization of, 535[8]
ethyldimethylphenyl — p - toluenesulfonate, alkylation of org. compds. with, 1795[5].
(formylmethyl)trimethyl - hydroxide — see *Muscarine.*
(2 - furylmethyl)dimethyl 2-thienylmethyl — iodide, 390[7].
β - hydroxyethyltrimethyl - hydroxide—see *Choline.*
(β - hydroxyisopropyl)trimethyl - - iodide, acetate, pharmacol effect of, 1271[7].
[α (hydroxymethyl)isoamyl]trimethyl— iodide, acetate, pharmacol. effect of, 1271[7].
(γ - hydroxy - α - methylpropyl)trimethyl - iodide, 1788[6].
(hydroxymethyl)trimethyl— bromide, acetate, hydrolysis of, 2311[6]
(hydroxymethyl)trimethyl — chloride, acetate, and chloroplatinate, 364[5]
(hydroxymethyl)trimethyl- - chloride, nitrite, $AuCl_3$ compd. (?), 1386[5].
(hydroxymethyl)trimethyl— iodide, acetate, 364[5]
1 indanyltrimethyl — iodide, 755[8]
[β - keto - β - (1,2,2,3 - tetramethylcyclopentyl)ethyl]trimethyl— bromide, 1399[4]
methoxytrimethyl - hydroxide, ionization of, 535[8].
methylphenyldipropargyl- - bromide, 390[1]
oxidation potentials in liquid NH_3 involving quaternary, 363.?[9].
quaternary base, 1635[1]
β,β' - sulfinylbis[ethyltrimethyl— salts], 40[4].
β,β' - sulfonylbis[ethyltrimethyl— salts], 40[4]
tetrabutyl— iodide, 3688[6].
tetramethyl— hydroxide, from animal organism, 2025[4]
tetramethyl— iodide, effect on secretion of Harder's glands, 447[3]
β,β'-thiobis[ethyltrimethyl— salts], 40[3].
tribenzylpropyl— iodide, and CHI_3 addn. compd., 2815[8]
tributylheptyl— iodide, 3688[6].
trimethyl - m(and p) nitrobenzyl— nitrate, 3288[8]
trimethyl - o - nitrobenzyl — perchlorate, 3288[8].
trimethyl(β - nitrooxyethyl)— bromide,* hydrolysis of, 2311[6].
trimethyl[p - (p - nitrophenyl)phenyl]— salts, 586[8,9].
trimethylphenyl— benzenesulfonate, 1795[5].
trimethylphenyl—chloride, hydrogenation of, 1600[3].
trimethyl(p - phenylphenyl)— salts, 586[7,8].
trimethylphenyl— p-toluenesulfonate, alkylation of org. compds. with, 1795[4].
trimethyl - [β - (3,4,6,7 - tetramethoxy - 1-phenanthryl)ethyl]— iodide, 1406[2].
trimethyl 2 thienylmethyl— salts, 390[6].
trimethylvinyl— hydroxide—see *Neurine.*
valence of N atom in, 3688[5].
Ammonium copper selenate, dissoc pressure of hydrated, 347[5].
Ammonium copper sulfate, 2960[7].
adsorption of, 531[4].
Ammonium cyanide, manuf. of, P 648[5].
Ammonium dihydroxychloroplatinate, from $(NH_4)_2PtCl_4$, 1765[2].
Ammonium dimolybdomalate, 1184[9].
Ammonium dipyrocatecholtungstate, 557[3]
Ammonium dipyrogalloltungstate, 557[3].
Ammonium dithionate, prepn. and properties of, and study of systems contg , 2293[8].
Ammonium ferriphosphate, 2793[9].
Ammonium ferrocyanide, compds. with ferrocyanides of Co, Ni, Fe, Sn and Sb, 2797[6]
Ammonium ferropyrophosphate, 2794[2].
Ammonium fluoride. (See also *Ammonium halides.*)
as disinfectant, 1301[6].
as poison gas, 2701[5].
Ammonium formate, effect on fermentation by yeast, 2866[6].
Ammonium hafnium fluoride, decompn. of, 3658[3].
Ammonium halides, corrosion of metals by, 347[7].
dissocn. by heat, application in quant analysis, 3660[4].
Ammonium hexaformatothoriate, 1569[6]
Ammonium hydroxide. (See also *Ammonia.*)
for analytical work, specifications for, 3406[5].
effect on adsorption of CaO by Fe_2O_3, 3367[9].
on seedlings, 1648[1].
on stomach movements, 1266[8].
precipitation of $Al(OH)_3$ with, 3371[1].
reaction with CS_2, 1219[9].
Ammonium ion, configuration of, 698[9].
effect on viscosity of colloidal Hg derivs. of sulfosalicylic acid, 3611[4]
Ammonium iron sulfate, 2960[7].
adsorption of, 531[4].
specifications for, 2798[8].
Ammonium lanthanum chromate, 1963[6].
Ammonium lithium sulfate, solns. in water, d.-temp curves of, 3117[2].
Ammonium magnesium phosphate, decompn by alkali carbonates, 719[8]
Ammonium magnesium sulfate, 2960[7].
adsorption of, 531[4].
Ammonium manganese sulfate, 2960[7].
adsorption of, 531[4].
Ammonium metabisulfite, spectrum of, 544[9]
Ammonium molybdates, sulfide pptn. from solns of, effect of neutral chlorides on, 2294[8].
Ammonium molybdovanadate, 558[1].
Ammonium nickel chromate, dissoc. pressure of hydrated, 347[5].
Ammonium nickelo-phosphite, 2794[1].
Ammonium nickel selenate, dissoc. pressure of hydrated, 347[5].
Ammonium nickel sulfate, 2960[7].
adsorption of, 531[4].
Ammonium nitrate, as blasting explosive, 2413[3].
compressibility of solns. of, 1014[1].
crystg., app. for, P 2231[4].
double salt with NH_4HSO_4, 2797[4].
effect on adsorption of CaO by Fe_2O_3, 3367[9].
explosives from $NaNO_3$ and, P 667[8].
in explosives manuf., safety in use of, 504[7].

as fertilizer, 258[9].
heat of diln. of, 3630[1].
metastable inversion of, 2435[9].
solns. in water, d.-temp. curves of, 3117[1].
surface tension of solns. of, 2770[6].
system: NH_4HSO_4–H_2O–, 2797[4].
system: $(NH_4)_2SO_4 + 2KNO_3 \rightleftarrows 2NH_4NO + K_2SO_4$, 537[6].
systems: NH_4Cl–, and $(NH_4)_2SO_4$–, 2430[2,4].
system: H_2O–KNO_3, 693[4].
Ammonium nitrite, decompn by light, 3385[9].
Ammonium oxalate, decompn of soln. with $HgCl_2$, 2459[1].
oxidation of mixt. with $(NH_4)_2SO_4.FeSO_4.6H_2O$, 2775[7]
specifications for, 2798[8]
Ammonium perborate, 882[1]
Ammonium perchlorate, refractive index of, 699[1]
specific vol of, 2270[8].
Ammonium persulfate, detection of, 2720[2].
electrolytic formation of, theory of, 3134[8].
prepn of, 2293[1].
specifications for, 2468[7].
Ammonium phosphates, manuf. of, metals for app. in, 617[5].
$NH_4H_2PO_4$, crystal structure of, 526[2].
$(NH_4)_2HPO_4$, crystals, angle variation during growth of, 2602[4].
manuf. of, P 3785[7]
Ammonium pyrocatechol aquotungstate, 557[7]
Ammonium pyrogallolaquomolybdate, 556[9].
Ammonium pyrogallolaquotungstate, 557[3].
Ammonium pyrogallolaquouranate, 557[4].
Ammonium pyrosulfate, effect on tetanus toxin, 3731[8]
Ammonium pyrosulfite. See *Ammonium metabisulfite*.
Ammonium salts. (See also *Ammonium compounds; Ammonium compounds, substituted*)
acid detn. in, 2905[9]
as catalyzers for metaldehyde manuf., P 2333[2].
effect on germination of barley, 2182[3].
as fertilizer, physiol. reaction of, 791[7].
as nitrogen source for plants, 1646[6].
physiol. relations of, 919[7].
sepn. from alkali and alk. earth metals, P 3784[7].
soly. of, in NH_3, 531[8]
valency problems in, 1550[7].
Ammonium selenide, prepn and properties of, 2795[9].
Ammonium silver nitrate, surface tension of solns. of, 2770[6].
Ammonium sulfate, acidity detn in, 3213[3].
ammonification by, effect of Na_2CO_3 on, 1879[9].
analysis of, 2406[7].
barley fertilized with, 2554[5].
caking of, 3213[5].
from coal gases, P 3074[5].
corrosion of steel by, effect of $NaNO_3$ on, 3277[2].
double salt of NH_4HSO_4 with NH_4NO_3, 2797[4].
effect on bacteriol. processes in soil, 218[2].
on detn. of p. d. between H electrode and quinhydrone electrode, 1194[1].
on disease resistance of crops, 471[7].
on fermentation of fruit wines in casks, 2043[7].
as fertilizer, 259[1], 1485[7], 1881[9], 1882[8], 2040[3].
as fertilizer for hill soil, 86[3].
manuf. of—see also "recovery from distn. gases" under *Ammonia, manufacture of*
manuf. of, P 972[8], 3797[6]
from ammonia and SO_2, 2575[4].
costs in, 3062[6].
in gas works, 657[5].
methods and app for, 813[6].
phase rule in, 2728[5].
mech. condition of, 2063[1].
neutrality of, 3213[3].
neutralization of, 3797[6, 7].
nitrification of, effect of limosil on, 3325[6].
nitrogen availability in, effect of P_2O_5 and K_2O on, 642[1].
oxidation of $(NH_4)_2SO_4$ and of NH_4HSO_4 with F, 2794[3].
purification of, P 972[7]
recovery from molasses residues, 307[5]
from sodium bisulfate and NH_3, 3334[3].
specifications for, 2468[7].
from sugar beet molasses, 2593[1].
system: NH_4NO_3–, 2436[4].
system: NH_4NO_3–H_2O–NH_4HSO_4, 2797[4].
system: $(NH_4)_2SO_4 + 2KNO_3 \rightleftarrows 2NH_4NO_3 + K_2SO_4$, 537[6]
system: $Ce_2(SO_4)_3$–H_2O–, 2960[6]
systems: MeOH–, EtOH– and Me_2CO–, e. m. fs at boundaries, 2780[5]
system: H_2SO_4–H_2O–, 2728[6].
viscosity of soln of, effect of H_2SO_4 on, 1935[6].
weed destruction by, 472[1]
Ammonium sulfate-nitrate, as fertilizer, 258[9].
review, 87[9]
Ammonium sulfide, reaction with iron prepns., 3330[7]
reduction of nitrosophenols with, 178[2]
Ammonium sulfite, in paper pulp manuf. from woods, 1322[5], 2071[6].
Ammonium sulfophosphate, in vinification, 474[1]
Ammonium thiocyanate, carbon disulfide from, 3687[4]
light action on solns. of, 3645[5].
mellon from, 3687[5]
Ammonium titanium fluoride, decompn. of, 3658[3].
Ammonium tripyrocatecholatomanganate, 717[6].
Ammonium tripyrocatecholatostannate, 3404[2].
Ammonium tripyrogallolstannate, 3404[3].
Ammonium uranylphosphite, 2793[7].
Ammonium vanadium sulfate, 2626[2].
Ammonium zinc selenate, dissoc. pressure of hydrated, 347[5].
Ammonium zinc sulfate, 2960[7].
adsorption of, 531[4].
Ammonium zirconium fluoride, decompn. of, 3658[3].
Ammonocarbonic acid, 716[9].
Ammonocarbonous acid. See *Hydrocyanic acid*.
Ammonoformaldehyde. See *Hydrocyanic acid*.
Ammonolysis, of mixed aquo-ammonocarbonic acids, 716[9].
Ammunition. See *Explosives; Projectiles*.
Amnion, dye transference from mother's blood into, in acute yellow atrophy of liver, 945[7].

Amniotic liquor, of sperm whale, 1672[7]
Amorphous state, non-existence of, 3254[8].
Amorphous substances, expansion coeff. of, variations in, 2924[7].
plasticity of, 3254[6].
Röntgen ray reflection and refraction by, 706[4].
Amphibians, arginase in, 925[8].
heart of, effect of Rb on, 1871[9].
Röntgen ray effect on, 1443[8]
uric acid catabolism in, 2353[1].
Amphiboles. (See also *Hornblende*.)
-asbestos, 563[9].
-gabbro, compn. of, 1046[1].
iron alkali-, 2805[1].
monoclinic, 29[7, 8]
-quartz-chlorite garnet rock rich in Fe, 2968[7]
Amphibolites, from Austria, 1578[8].
Amphiernia rubra. See *Yeast*.
Ampholytes, multivalent, dissocn. consts. of, 2774[5, 6].
permeability of collodion and protein membranes for, 2513[3].
soly of, 697[2].
Amphoteric substances, as catalysts for mutarotation of sugars, 1163[7]
membranes, properties of, 1940[5].
polonium and Bi as, 697[1].
Amplifiers, vacuum tube valves, 1761[8].
Ampoules, 261[6], P 2228[7].
double, for prepns. which decompose easily, 1731[6].
glass for, 975[6].
of reacting or unstable substances, P 800[9].
Amygdalin, emulsin action on, 607[8]
Amyl acetate. See under *Acetic acid*.
Amyl alcohol, anomalous dispersion and absorption of elec. waves by, 2940[5]
azeotropic mixts. of, with its formate, acetate, and H_2O, 2657[9], 2658[1].
distribution of a mixt. between H_2O and, 1745[4].
effect on conduction in auricle, 2511[1]
electrodeposition of some metals from solns. in, 1022[8].
esterification with acetic, propionic and butyric acids, measurement of expansion from, 2108[8].
ion mobility in air and water vapor mixed with vapor of, 3383[9].
for milk testing, 3197[7].
1-naphthalenecarbamate, 1232[9].
poisoning by, 2712[5].
prepn. of, 2481[2].
specifications for, 2468[7].
systems: 1 (and 2)-naphthol–, dehydration of, 385[3].
sec-**Amyl alcohol** See *2-Pentanol*.
tert-**Amyl alcohol**, detn in aqueous and cottonseed oil solns , 1742[9].
tert-**Amylamine**, *N*, *N*-**dimethyl-**, 1053[7].
Amylases, action of, effect of bases on, 611[4].
action of, effect of H ion concn. on, 3304[7].
activation by spring waters contg CO_2 and H carbonates, 2505[1].
of *Aspergillus oryzae*, effect of H-ion concn on starch liquefying activity of, 1999[2].
complement of, 923[2], 1997[4].
constituents of, 1998[4].
detn of, 61[8], 2335[5].
effect of mode of dissolution of, on saccharification of starch, 428[8].
from germinated wheat and rye, 430[8].
malt, 53[6], 2386[9].
of nasal mucus, 2008[5].
salivary, in infants, 1261[9].
specificity of, 3019[3].
of yeast, fermentation of polysaccharides and, 3018[1].
zymogens, thermostability of, 3310[4].
Amyl nitrite, effect on blood vessels, 239[9], 240[2].
effect on circulation in lungs, 1851[8].
reaction with mercaptans, 2976[6].
Amylobiose, methylation of, 3010[5].
optical rotation of, 583[2].
Amylohemicellulose, staining capacity of, 1830[7].
Amyloid, formation from nutrose injection, 2539[7].
origin of, 2504[9].
Amyloidosis, from protein injection, 1662[7].
Amylolysis. (See also *Amylase; Starch*.)
by digestive secretions in relation to time of glandular activity, 3182[1].
pancreatic, effect of quinine infusion on, 2204[4].
by saliva, 2357[4].
Amylooctadextrin, 1222[3], 1598[5].
Amylophosphates, enzymic hydrolysis of, 428[9].
Amyloses, nitric acid esters of poly-, 380[8].
sepn. in starches, 2918[7]
starch of wheat as partially dehydrated, 3482[3].
Amylotriose, optical rotation of, 583[2].
Amyrin, α-, and β, and derivs , 1399[9].
α- and β, constitution and detection of, 1094[7, 8]
β, from Manila elemi resin, 1069[9].
Amytal, anesthesia, effect of insulin on metabolism in, 2202[6].
anesthesia with, effect on glucose injections, 3193[9]
as anesthetic (intravenous), 2023[9].
effect on coronary circulation, 2209[1].
effect on metabolism, 2880[7].
as hypnotic, 458[7].
Anaerobes. See *Bacteria*.
Anagyris foetida, seeds of, components of integument of, 1095[6].
Analcite, from Mt Tzkhra-Tzkharo, 884[8].
Analeptics, cardiazole as, 448[2].
Analgesia, by morphine derivs , effect of radicals on, 2022[2].
synergistic, 1851[4].
Analgesics, P 479[9].
from barbituric acid, P 2049[2], P 2563[9], P 3333[1].
cibalgin as, 2022[3].
Analysis (*Under this heading are entered only analytical subjects of a general nature. See also* Ashing, Bromometry; Calculations; Calibration, Calorimetry, Indicators; Iodometry, Molybdomanganimetry; Oxidimetry; Reagents, Sampling; Standard solutions; Thermal analysis, Titration; Toxicology, *also such headings as* Aluminum, analysis, Blood, analysis; Food, analysis, Water, analysis.)
by accelerated pptn., 3196[7].
by action of aliphatic and cyclic bases on salts, 3665[2].
adsorption, 3255[4], 3368[2].
adsorption (colloidal) in quant., 2629[9].
by adsorption in cellulose membranes, 3368[6].
agricultural, 1040[1].

amalgams in volumetric, 26[2], 2469[9]
arsenite solns in vol., 3145[2].
in biol. and medical chemistry, unification of methods of, 2686[9].

temp effect on, 3300⁴
oxidation rapidity of, dependence on changes of reaction, 1662⁸.
phosphorus content of, in relation to age, growth and food, 2359⁷.
physiol importance of Fe and Zn in, 1631⁸
protein formation in, 3301⁵.
putrefaction in, formation of HCN and HSCN from, 3172⁵.
pyrroles (substituted) in, 1635⁶
radium deposition in, from $RaBr_2$ injections, 2368².
regulation of H ion concn of sea water by, 2025⁷.
resistance to digestion by pepsin or trypsin, 2512³.
silica in, 211⁵.
sugar action on, 3722².
zinc in, 2001⁷, 2864⁷.
Animal products industry See *Packing industry*.
Animals, body vol. in fresh-water, regulation of, 1471⁸.
excretions of aquatic, detn. of water sol., 1671³.
osmotic pressure effect of physiol indifferent substances on unicellular, 213¹.
preserving, 3711⁷
relationships of, precipitin reaction in study of, 1461³.
Anions. (See also *Analysis; Ions, electrolytic*.)
effect on Al hydroxide, 3610⁹.
reaction distances of, 1600⁴.
Anisaldehyde (*p-methoxybenzaldehyde*), azine, magnetization coeff. of, 1024⁵
condensation with 2,4-dinitrotoluene and with 2,4,6 trinitrotoluene, 3001⁹.
detn. of, 1193⁸.
4-methylthiosemicarbazone, 416⁶.
α oxime, and its Na salt, phys. consts of, 3450¹
in perfumery, 1690¹.
4-phenylthiosemicarbazone, 416³
prepn of, 181³
reaction with Cu in pyridine soln , 1071¹.
reduction of, 739⁸
thiocarbohydrazone, 1811¹

Antifreeze substances, 1306^{4}, P 3786^{6}.

contg. waste liquor from sugar extn processes, P 1892[3].
ethylene glycol as, 96[4].
review of, 3540[9].
from salt and catechu, P 3544[9].
Antigens, action of sensitized, in production of sp. and isophile hemolytic immune body, 238[9].
adsorption site of, as formation site of antibodies, 1461[2].
anaphylactic shock from antibody in animals sensitized by, 1668[8].
antibody-, reactions, 235[7].
Bacillus botulinum as, effect of H ion concn. on, 1458[8].
from *Bacterium suipestifer* action, 1458[7].
behavior of, in animal body, 69[9].
complement fixation brought about by reaction of antibodies with, effect of organ exts. on, 1269[8].
in complement fixation, potency of watery ext. of saprophytic acid fast bacilli as, 1444[1].
in denucleated erythrocytes, 233[5].
diphtheria toxoid as, Ramon test as index of value of, 2195[6].
effect on antibodies, 1458[9].
effect on antiserum titer, 1461[3].
in erythrocytes, 771[4].
Forssman lipoids and other lipoid haptenes as, 1960[1].
glucoproteins as, 1455[1].
in heated protein, 1267[5].
hemoglobin as, 1668[2].
heterogeneous, nature of, 3731[9].
horse dander exts as, 2698[1].
inhaled, reactions to, 2697[3]
lipoidal nature of cercarial, 627[5].
in pneumococcal vaccines, 236[4].
of pneumococcus, immunizing action of, 446[7].
pollens as, 1449[7]
precipitates from interaction of diphtheria toxin and antitoxin as, 3033[4].
in precipitin reaction, antibodies and, 1455[8].
Ramon toxin-antitoxin ppt as, 2200[9].
"residue," from strain of Friedlander bacillus, 2011[7].
soap toxin mixts as, 444[4].
in tuberculin, prepn. of residue, 628[4].
for tuberculosis diagnosis, 3186[5].
tuberculosis, in complement fixation, 1414[5].
urinary, immunization with tuberculosis, 2536[5].
for Wassermann reaction, 782[6].
in Wassermann test, effect of heat on heart extract used as, 1660[8].
Wassermann tuberculosis, 1268[9]
Antiglyoxalase, carbohydrate metabolism in muscle and, 228[9].
Anti-isomorphism, 3415[1].
of crystals, 3415[2].
Antiketogenic action, 936[1]
condensation products of ethyl acetoacetate and, 2358[7].
mechanism of, 1844[2].
Antimonates, from antimony in minerals, P 3278[8].
Antimonic acid, colloidal, coagulating action of ions of equal valencies on, 3609[5].
prepn. and properties of solns. of, 1739[7].
Antimonious acids, number of, 533[1].
Antimonite, reaction with SO_2, 2294[1].
Antimony, absorption of β-rays by, 3127[8].
affinity for S, 3420[4].
atom, energy level of, 2788[9].
atomic wt. of, 1006[6].
bibliography from 1917 to 1924, 1342[1].
book: Antimon in der neueren Medizin, 459[1].
cathodes, disintegration in H, 2446[7].
chemotherapeutic studies on, 1274[8].
coloring glazes yellow with, 3340[1].
crystals, prepn. of, 1542[8].
displacement from solns. of its compds. by H at high temp. and under pressure, 2960[2].
explosive, 527[7].
Hall effect in, with weak fields, 3262[5].
industry in 1925, 3673[9].
in malaria treatment, 449[7].
pharmacol action of, 3709[5].
photoelec. fatigue of, 1947[9].
physiol. relations of, 949[7].
reaction with Se_2Cl_2, 2294[5].
recovery of, in flavanthrene manuf., P 1996[1].
reduction of Sb_2O_3 and $K_2H_2Sb_2O_7$ to, 2960[4].
resources of U. S in 1924, 1695[3].
review of mining and trade information, 888[1].
Rontgen-ray energy level of, detn. of outer, 2787[3].
sepn. from Sn, 2636[4].
solid soln. with Ag, 32[9].
spectrum of, 3367[7,9], 1950[1], 2118[7], 2943[9], 3640[2]
system: As–, in nature, 2636[5].
system: Pb–, 568[4], 2652[9].
systems: Sn–, Cu–, Pb–, magnetic susceptibility in, 1209[4].
thermal cond. and thermal e. m. f. of crystals of, 1939[8].
trypanocidal action of, 3508[2].
Zeeman effect for, 2790[4].
Antimony, analysis. (See also *Hydrogen sulfide group*)
detn , 1188[5], 2298[8], 3662[3].
detn. in bearing metals, 2130[7].
detn in biol. material, 3709[5].
Antimony, metallurgy of, 163[7], P 735[1], P 1214[9].
from alloys, P 3441[7].
in Wilhelmsburg in 1915, 3675[1].
Antimony alloys. (See also *Babbit metal; Bearing metals;* and "system" under *Antimony*.)
aluminum-, electrolysis of, 2939[1].
amalgam, resistivity and cond. of, 3119[2].
antimony from, P 3441[7].
copper-, sodium effect on, 3423[7].
lead-, and Pb-Sn-, hardening of, 2811[9].
lead-, effect of Al on, 3423[7].
lead-Sn-, P 3443[2].
lead-Sn-, sepn. of Sn and Sb from, 2636[4].
purifying, P 1214[9].
thallium , potentials of, 1156[2].
Antimony bromides, $SbBr_3$, as catalyst for polymerization of cyclopentadiene, 2148[7].
Antimony chlorides. (See also *Antimony halides*.)
$SbCl_3$, as catalyst for polymerization of cyclopentadiene, 2148[7].
complex salt with quinoline-HCl, 601[8].
heat of vaporization and b. p. of, 2603[8].
prepn. of, 1693[5].
reaction with Hg compds. of naphthalene, 176[7].
$SbCl_5$, dissocn. of, 2275[4].
reaction with β-diketones, 403[1].

Antimony compounds, analogs of the cacodyl series, 361[7], 2977[1]
aromatic, 2486[1]
book Contribution à l'étude de la valeur thérapeutique du tartre stibié, 2371[1]
detn of easily oxidized org , 2977[5]
of β-diketones, 403[1]
effect on enzymic functions of organism, 2000[9]
with germicidal and therapeutic properties, P 3061[8].
infantile leishmaniosis therapy with, 1274[1]
in kala-azar treatment, 450[2], 591[8], 592[1], 1274[8]
for pharmaceutical use, P 264[7]
pharmacol action of org 2371[1]
poisoning by, in rubber industry, 1920[5].
for tropical diseases, P 800[6].
as trypanocides, 1987[2]
white enamels contg , in prepn of enamelled Fe cooking utensils, 2711[4].
Antimony ferrocyanide, compds with ferrocyanides of K, Na, NH_4, Sr and Ba, 2797[6].
Antimony fluoride (See also *Antimony halides*)
heat of formation of, 2111[1]
Antimony glance. See *Stibnite*
Antimony halides, double decompn between halides of Sn, Bi, Si or Ti and, 1938[7]
double decompn with P halides, 2936[1]
refining mineral oils with, P 3804[6]
Antimony hydrides (See also *Stibine*) 880[1]
Antimony ores, in British Columbia, of Chilko Lake and vicinity, 30[7]
from Lake George, N B , concn of, 2301[9]
of Yellow Pine dist , Idaho, 2132[5]
Antimony oxides, structure of, 1569[7].
Sb_2O_4, hydrates of, 533[1]
manuf. of, 163[9].
reactions with basic oxides, 324[9]
reaction with PbO_2, 1766[9]
Sb_2O_5, sepn from Sb_2O_4, 533[1]
Antimony salts, sepn from As and Sn salts, P 1382[8]
Antimony sulfate, additive compd. with HCl, 2292[9].
Antimony sulfides (See also *Stibnite*) 1038[6]
calcium sulfate detn in, 3407[8]
colloidal, effect of protective colloids on size of coagulated particles of, 3115[6]
Sb_2S_3, colloidal, prepn of, 532[9]
electrochem reduction of, 150[5].
reaction with SO_2, 2294[1].
reduction of $Sb_2(SO_4)_3$ to, 2960[1].
Sb_2S_5, analysis of, 1575[7]
Antimony telluride, 882[1].
"Antimosan," kala azar treatment with, 2702[2]
"Antinit," calorimeter bombs of, 521[7]
Antioxidants, effect on rubber deterioration, 3840[9].
use in oils, 3801[6]
Anti-oxydul, 837[6].
Antioxygenic action, 3374[6].
autoxidation and, 2443[6].
Antioxygens, oxidation of, 1146[6,7].
for unsatd. compds , 2819[8].
Antipepsin, in blood, 942[5], 1659[9].
Antiperthite, heat effect on, 1578[2].
Antiphlogistics, monosulfonated thianthrene as, P 3061[7].
Antipyresis, blood and plasma changes during, 3037[9]
Antipyretics, *o* acetoxy-*p*-methoxybenzoic acid, P 2563[9]
effect on heat regulation, 1857[1].
Antipyrine (*1, 5 - dimethyl 2 - phenyl - 3-pyrazolone*)
detection of, 2891[7]
differentiation from amidopyrine and pyramidone, 1887[4]
effect on acetanilide soly , 1161[9]
on blood vessels of brain, 3514[9]
on body temp , 1857[1]
on quinine hydrochloride soly., 1161[6]
prepn of, 1795[6]
reaction with BrCN, 2857[5]
with $C_2H_2Br_4$, 1086[6]
with $FeCl_3$, 3329[1]
with furfural-H_2SO_4, 1687[7].
salicylate, spectrum of, 1030[9]
system hydroquinone , "thaw"-m -p diagram for, 693[9]
——, **amino-**, prepn of, 1795[6]
——, **bromo-**, 2857[5]
——, **cyanomethylamino-***, 2857[6]
——, **4-dimethylamino-** See *Pyramidone*.
Antipyrinediazonium compounds, rate of decompn of, 759[5]
Antiscorbutics See *Scurvy*
Antisepsis, urinary, surface tension in, 2369[7].
Antiseptics (See also *Acriflavine, Carrel-Dakin solution, Chloramine T; Disinfectants, Rivanol, Surgical dressings*) P 264[9], P 1890[1], P 3212[6]
acridine compd of flavine as, 1827[4].
acridinium compds , P 1692[9]
amino derivs of styryl- and anilquinoline as, 3712[2]
benzyl alcs as, 3315[1]
biliary, mercurochrome as, 3510[1].
chlorinated, from industrial products, 1303[2].
chlorinated, prepn of, 1303[4]
chloropicrin as, 2689[9]
copper chloride as, 1257[4]
crotonaldehyde as, 2687[4]
2,4 dihydroxydiphenylethane, P 3332[9]
effect on germination, 1427[6]
on soil ameba, 3529[9]
on soil ameba in partially sterilized soils, 1879[4]
emolient, P 3333[2]
for hide soaking, 122[7]
α-hop bitter acid as, 218[5]
internal, hexylresorcinol and its homologs as, 451[9].
intestinal, 1850[3]
local, 2726[1]
mercurochrome, as, 1279[6]
mercury salts as, 3513[2].
phenols and aromatic compds as, effect of H-ion concn. on, 3315[3]
prepn., properties, application and testing of, 796[4]
for preserving wood, etc , P 2058[5]
salicylic and benzoic acids as, 931[1].
urinary, hexylresorcinol and its homologs as, 452[1].
Antiserums See *Blood serum, Vaccines*.
"Antislip" surface, P 652[1]
Anti-space lattice, 3415[1].
Antithamnion, bromine localization in, 1428[6,7].
Antithyreoidin, -Moebius, 3513[6].
Antitoxins, for diphtheria and tuberculosis, prepn. of, 1105[5].

diphtheria, antigenic properties of ppts. from interaction of toxin and, 3033[4].
diphtheria, detn. of, 2202[5].
diphtheria toxin-, flocculation, 444[9].
diphtheria toxin, titration, 232[1].
prepn. with yeast, P 2049[6]
production in anti diphtheria immunization, effect of Ba and Pb salts on, 1269[5].
protein free, prepn of, 2689[8].
of scarlet fever, P 3781[3].
tetanus, 1847[7].
toxin, flocculation phenomenon, 3739[4].
toxin, ppt. as antigen, 2200[9].

Antitrypsin, of soaps, 3302[8].

Antlerite, prepn. of, 3401[5].

Ants, insecticide in sugar manuf., 1534[2].

Aolan, skin reaction to, effect of menstruation on, 2358[3]
toxicity of, 3035[1]

Aorta, bromine content of, 3726[2].

Apatites, in sedimentary rocks as indicators of amt. of atm. CO_2 in periods of deposit, 3409[6].

Aperients. See *Purgatives*.

Aphids, grain, wing production in, 3515[2].
infestation of *Vicia faba* with *Aphis rumicis*, 2543[1].
toxicity of plants and plant products to *Aphis rumicis*, 3769[7].

Apigenin, trimethyl ether—see *Flavone, 5,7,4'-trimethoxy-*.

Apiin, spectrum of, 1991[3].

Apiol, from *Crithmum maritimum*, 3449[9].
as fungicide, 3021[6]

Apis mellifica. See *Bees*.

Apocamphane, 2846[7].

Apocodeine, pharmacol properties of, 1469[6].
susceptibility to, effect of vitamin-deficient diet on, 2371[4]

Apoconessine, and derivs., 3458[5]

Apocyclene*, prepn. of, 3164[9]

Apocynum, biol. assay of, 1495[9].
cannabinum—see "Indian" under *Hemp*.

β-Apofenchane*, 2846[7].

Apofenchocamphoric acid, synthesis of, 2490[7].

Apomorphine, detection and detn. of, 2722[2].
dissocn. const. for, 2108[5].
effect on gall bladder, 1855[5].
-hydrochloride, detn. of, 3211[6]
reaction with furfural-H_2SO_4, 1687[9].
vomiting, antagonism of trichloroisobutyl and trichloroisopropyl alcs. to, 3512[3].
vomiting from, 2205[9].

Apomorphine alkaloids, synthesis of, 604[8].

Apoplexy, radium treatment of, 450[2].

Apoquinine, derivs., 1993[9].

Aporphine, synthesis of, 604[8].

Apothesine, as anesthetic, 240[7], 1851[1].

Apozymase, phosphorylation with, 923[9].

Apparatus. (*With the exception of the few general subjects entered below, all apparatus have been indexed under names which indicate their use or nature, as* Colorimeters; Distillation apparatus; Photometers; Spectrometers; *etc. See also* Calibration; Handling of materials; *and* "blowing" *under* Glass.)
aluminum in manuf. of, 127[3].
aluminum, use of, 2433[3].
bakelite coating for, 1497[9].
bakelite products for, 3363[2].
of basalt, 265[4].

Arsenates, from arsenic in minerals, P 3278[8]
from arsenious oxide, P 3337[5].
detn in sheep dips, 963[8]
differentiation from orthophosphate, 3661[9]
manuf of, P 482[6, 7], P 1957[9], P 2566[1]
as soil insecticides, 2891[7]
Arsenelectroferrol, in anemia treatment, 3740[9]
Arsenic, in apples, 1871[3], 3531[5]
atom, energy level of, 2788[9]
bismuth combination with, effect on blood colloids, 1273[1]
in British Columbia, of Chilko Lake and vicinity, 30
in British Columbia, Prince Rupert to Burns Lake, 30[6]
in cancer formation, 1819[6]
cathodes, disintegration in H, 2146[7]
[illegible] of [illegible] "Hall-sickness," 2748[9], 2749[1, 2]
in copper, 3419[9]
crystal structure of, 131[1]
dermatitis from, compn for treating, P 2049[7]
displacement from solns of its compds by H at high temp and under pressure, 2960[2]
effect on lymph, 2707[6]
on sarcoma, 1848[6]
on steel, 2644[1]
on yeast, 3308[1]
in embryoes from syphilis treatment, 3039[4]
habituation to, 3747[1]
industry in 1925, 3783[1]
localization after intravenous injection, 1469[1]
localization in viscera, 2021[1]
for opacifying alkali-CaO-silicate glasses, 2731[1]
penetration into central nervous system and spinal fluid, effect of dyes on, 2202[7]
physiol relations of, 949[7]
poisoning by, 2298[7]
fibrin formation in blood plasma in, 1461[9]
glycogen in liver and muscles in, 2701[7]
at high elevation, 450[5]
localization of As in, 1278[2]
in orchards, 88[5].
treatment with $Na_2S_2O_3$, 1115[7]
poisoning of silkworms by, 3516[4]
poisoning of stock by, 3769[1]
production in France, 2229[7]
reaction with bases, 720[8]
with cyanides in liquid NH_3, 3373[6]
with Se_2Cl_2, 2294[6]
recovery from ores, P 735[1]
recovery from ores at Jardine, Mont , 1047[9]
recovery from speiss, 889[5]
reduction of Fe arsenates to, 2960[4]
removal from ores, P 1781[1].
removal from H_3PO_4, P 482[1], P 802[6].
resources of U. S in 1924, 971[8]
review of mining and trade information, 888[1].
in sheep dips, harmful effects of, 1128[7]
spectrum of, 336[9], 1354[9], 3640[2]
system Sb—, in nature, 2636[5]
tolerance for, 456[2]
tolerance in insects, 2556[1]
toxic action in silkworm, speed of, 2543[8]
toxicity of tervalent *vs* quinquevalent, for mandibulate insects, 1490[3].
in urine, 2530[3, 4]
waste, recovery and use of, 634[6]
Arsenic, analysis (See also *Hydrogen sulfide group*)
detection, 2799[6]
detection, effect of soly. of HgS in NH_3 on, 1967[9]
detection in bismuth subnitrate, 3775[1]
detection in cocoa, 1013[8]
detection, necessity of testing for absence of HNO_3 in Marsh test, 3663[1]
detn , 1048[9], 1191[5], 1575[5], 1773[2], 2298[1], 2799[8], 2800[1]
detn , app for, 1339[5]
detn in arsenobenzenes, 965[7]
in brass, 726[9]
in iron pills, 92[7]
in org compds , 2300[1]
in organs, 927[6]
in plant tissue, 259[5]
in sheep dips, 963[8]
in silicates, 1576[1], 3219[8].
in silver arsenobenzenes, 263[3].
in sodium cacodylate, 3209[9]
in sprays, 3531[5]
in steel, 1573[7]
sepn from selenium, 2799[8]
Arsenic acid, adsorption by metallic oxides, 2601[1]
analysis of, 1348[1]
detn of, 1367[5], 2631[5]
Arsenic alloys (See also "system" under *Arsenic*)
iron , 345[1]
manganese , 345[1]
Arsenic bromide, ($AsBr_3$), binary systems contg , phase diagrams of, 1165[2]
compd. with pyridine, 2668[1]
Arsenic chlorides, 10 - chloro - 1,6 - dihydrophenarsazine addn compd , 1606[8].
reaction with Hg compds of naphthalene, 176[7]
$AsCl_3$, as catalyst for polymerization of cyclopentadiene, 2148[7]
complex salt with quinoline HCl, 601[6].
compd with pyridine, 2668[1].
heat of vaporization and b p of, 2603[8].
reaction with quinine derivs., 1629[6]
Arsenic compounds (See also *Sprays, Tryparsamide*) P 3461[5].
aromatic, 2486[6]
aromatic, valency detn in, 1747[1].
with bismuth and Hg, 796[3]
of cinchophen, 397[1]
in codling moth control, 1189[8], 3531[5].
colloidal, P 1401[6]
effect on enzymic functions of organism, 2000[9]
on fireclay refractory material, 2735[6].
on heart pulsations of silk worm, 3047[3].
on kidneys, 1858[2]
on spirochetes, 613[6].
future research in org., 261[5].
with germicidal and therapeutic properties, P 3061[8].
in gingivitis therapy, 2205[3].

historical review, 1128[1].
as insecticides, 2891[8].
as insecticides for fruit flies, 89[5].
with iodine, 1570[9].
manuf. of, P 3786[2].
manuf. of org., P 917[8], P 970[4].
optically active tripyrocatechol-arsenic acid, 1572[9].
org., 176[7], 3156[2].
prepn. of new types of org , 2993[9].
pyrrole derivs., 387[4].
with quinine, P 95[7].
reduction by $Na_2S_2O_4$, 1186[8]
therapeutic, P 264[8], P 2228[6].
therapeutic action of org., 3742[3].
thiophene derivs., 1406[7].
with tin, valency in study of, 1344[4].
toxicity of, effect of reduced atm. pressure on, 1866[3].
trypanocidal action of, 3746[9].
vanadium-, 1768[4]
with yeast, P 1890[2].
Arsenic fluoride, AsF_3, as catalyst for polymerization of cyclopentadiene, 2148[7].
Arsenic halides, double decompn. with P halides, 2936[1].
Arsenic hydrides. (See also *Arsine*.) 880[1].

dimethylphenyl-*p*-tolyl — iodide, 393[3].
ethyldimethyl(δ - phenylbutyl)— iodide, 2839[6].
ethyldimethyl(γ - phenylpropyl)— iodide, 2839[5].
mesityldimethylphenyl — iodide, 393[4].
tetrabenzyl— iodide, CHI_3 addn. compd., 2815[9].
tribenzylmethyl — iodide, CHI_3 addn. compd., 2815[9].
tricyclohexylmethyl — iodide, 2839[6].
trimethyl(δ-phenylbutyl) — iodide, 2839[6].
Arsono group, effect of drying on, 1605[8].
Arsphenamine (*salvarsan; 3,3′ diamino-4,4′ - dihydroxyarsenobenzene dihydrochloride*). (See also *Arsenobenzene; Neoarsphenamine, Sulfarsphenamine.*)
action of, 613[5].
blood and symptomatic changes following intravenous injection of, 1855[7].
calcium effect on action of, 1861[3].
color reaction of, 2301[1].
and derivs , reaction with O_2, 2993[4,9].
dermatitis, treatment with $Na_2S_2O_3$, 1115[2].
detection of, 3143[5].
effect on blood sugar, 3510[8].
on *Entameba dysenteriae*, 2542[1].
on *Entameba gingivalis*, 3748[4].
on exudation and edema, 448[7].
on heart, 449[4].
on spirochete infection, 2879[6].
fixation by tissues and urinary and fecal elimination of compds. of, 2208[2].
manuf. of, P 424[5].
meningitis treatment with, 3713[4].
phys. and colloidal chemistry of, 1886[2].
prepns , assay of, 2173[8].
reagent for, strontiuran as, 261[7,9], 646[4].
silver deriv —see *Silver arsphenamine*.
sodium deriv.—see *Sodium arsphenamine.*
solvent for, strontiuran as, 261[7], 3189[6].
standardization of, 2046[9].
sulfur content of, and its relation to mode of synthesis and toxicity, 176[3].
toxicity and reactions caused by, 1858[2].
treatment with, control by liver function tests, 2514[2].
Arsphenamine-glycide*, reaction with O_2, 2993[4].
Arsphenamine series, iodine compds. of, synthesis of, 3289[1].
Arsylene, pharmacol. study of, 2019[1].
Artemisia, *absinthium*—see *Wormwood*.
annua, oil of, 2718[6,8].
brevifolia, Himalayan, 1302[5].
camphora, oil of, 2894[2].
santonin detn. in, 2387[9].
true and false, 264[4].
Arteries. (See also *Blood vessels.*)

anion effect on, 1867[9]
coronary, effect of adrenaline, pituitrin and acetylcholine on, 3314[6]
Arteriosclerosis (See also *Antherosclerosis*.)
cholesterol effect on sympathetic ganglia in, 949[1]
lipolytic power of blood serum in, 3729[7]
treatment, medicine for, P 1692[5]
treatment of, 913[8]
Arteritis, cholesterol in diabetes with, 67[6]
Arthritis, muscular atrophy in, O consumption in, 2201[7]
treatment of, prepn. for P 479[5].
treatment with o-iodoxybenzoic acid, 3043[4]
viscosity of blood serum in, 237[8]
Arthropoda, Röntgen ray effect on, 1113[8]
Artichokes Jerusalem—see *Jerusalem artichoke*
inulin in, digestion of, 2522[1]
Articulating fluid, P 3786[9]
Artocarpus kunstleri, as paper making material, 1516[5].
Arylamines See *Amines*
Aryl groups, introduction into polyphenol nucleus, 3163[1]
Arylmagnesium halides See *Magnesium compounds*
Arylsulfuric acids, prepn of, 1795[9]
Arylthio group, introduction of, 3289[1]
Asarum caudatum, and its oil, 3486[1]
Asbestine, detn. in lithopone paint, 297[5].
prepn of, and use in paper industry, 3812[9]
Asbestos, adsorption of dyes by, effect of NaCl on, 2928[4]
amphibole-, 563[9]
cement pipe, tests of, 2903[9]
-chrysotile, 3670[6]
deposits of Arizona, 887[1]
from Dobschau and its manuf, 3670[6]
effect on fermentation, 961[5]
elec charge of, effect of dissolved electrolytes on, 3608[8]
industry in 1925, 3783[4]
paper, P 1905[6]
prepn of, and use in paper industry, 3812[9]
products, casein in, 972[1]
resources of U S in 1924, 1891[3]
review, 2251[5]
review of mining and trade information, 888[1].
roofing felt of, and other fibrous material, P 272[6]
translucent film contg , P 484[2].
waste, molding, P 619[8]
Asbestos board, asphalted, mat finish on, P 484[3]
Ascaridole, detn in chenopodium oil, 2722[4]
Ascaris, eggs, effect of ultra-violet, Röntgen and Ra rays on, 1871[9].
nephritis, 2702[7]
Ascidia, *mentula*, H-ion concn of blood of, 2372[1]
mentula, mol concn of interior medium of, 2026[5]
Ascites, cancerous, 3735[1]
in cirrhosis of liver, treatment with novasurol, 2369[1].
Ascitic fluid, proteins from, effect on Ca diffusibility, 1244[1]
Ascoli reaction See *Miostagmin reaction*.
Ascoloy, for nitric acid containers, 1716[3]
Ash(es), of beer, effect of brewing water on, 2557[6]
book: Die Separation von Feuerungsrückstanden und ihre Wirtschaftlichkeit, einschliesslich der Briquettierung und Schlackensteinherstellung, 1315[9]; Coal, and Clean Coal, 3345[1].
coal, and clean coal, 1313[6], 1898[6].
coal, fusibility of, 1704[1].
coal, magnetic sepn of, 2240[2].
in coals of Iowa, 3554[8]
in coke for blast furnace, 2741[4]
of cottons, 1326[7].
detn in casein, 3783[4].
in cereals, 3317[6].
in coke, and its fusion point, 2576[6].
in drugs, 1688[5]
in flour, 75[2], 75[4], 1284[7,9], 1474[1], 3320[5].
in flour and grain, 460[9]
in foods, 2883[1]
in org. materials, 2131[3]
in sugar, 1531[9], 2425[7], 3357[7]
in sugar juices and end products, 2916[2].
in sugar manuf , 2086[1]
detn of fruit, in jams, jellies and preserves, 77[6]
flotation sepn from coal, P 1710[1].
flour, significance of, 1284[5]
fuel recovery from, 3554[1]
from furnaces as refractory material, 487[1].
heat for steam from, app for, P 3599[1]
lignite, compn and behavior in gas producers, 2210[4]
melting p of, 812[6]
from plants in relation to inorg constituents in coal, 275[1]
from powdered fuel installations, 1705[6]
reclaiming app. for, 2739[8]
removal from gas generator, 491[7]
removers for gas producers, 1510[7]
slag, magnetic sepn of unburned coal and, 2573[1]
unburned coal in, calcn of, 2405[9]
volcanic, effect on portland cement, 1895[6].
from volcano Acetenango, Guatemala, 564[4].
Ashing, of plant tissues and products, 3318[9].
of small quantities, 2686[6]
wet, app for, 2098[1]
Asparagine (*α-aminosuccinamic acid*)
in alfalfa, 615[5]
aspartic acid from, 1386[8]
effect on ammonia detoxication in plants, 2351[7]
isomers of, laws of variation of optical rotation and of indices of refraction with variation in wave length of, 2418[3]
l-, consts , 3280[1]
as nitrogen source for plants, 1646[6].
optical rotation of, effect of H-ion concn on, 3262[9]
protein-like substances from, 918[8,9].
spectrum of, 2147[5]
——, N^{α}-**acetyl-**, ring formation in, 50[1].
——, N^{α}-**benzoyl-**, ring formation in, 49[8].
——, N^{α}-(α-**bromoisovaleryl**)-, isomers, 2310[4]
Asparaginic acid See *Aspartic acid*.
Asparagus, canning of, H-ion concn. changes during, 2710[6]
growth of, 615[2], 2517[9].
Aspartamic acid See *Asparagine*.
Aspartic acid (*aminosuccinic acid*).
in alfalfa, 615[5].
configuration of, and derivs., 1056[6,8,9].
effect on kidneys, 1431[7].
from fermentation of sugar by yeast in presence of $CaCO_3$, 174[2]
l-, configuration of, 2982[6].

l, consts. of, 3280[1]
l, equil. with fumaric acid and NH_3 in presence of resting bacteria, 3480[1].
from oxalacetic acid, 56[6].
prepn. of, from asparagine, 1386[8]
spectrum of, 2147[5].
, *N*-**acetyl-**, esters, 1056[9]
, *N*-**benzoyl-**, diethyl ester, 1056[8]
, *N*-**cinnamyl-**, diethyl ester, 1056[8]
, *N*-**enanthyl-**, diethyl ester, 1056[9]
— , *N*-(**ethylsulfonyl**)-, diethyl ester, 1056[9]
— , *N*-**formyl-**, diethyl ester, 1056[9]
— — , *N* - **hydrocinnamyl-**, diethyl ester, 1056[9]
— — , *N*-*p*-**tolylsulfonyl-**, and diethyl ester, 1056[9], 1057[1]
Aspartyl chloride, *N* - *p* - **tolylsulfonyl-**, 1057[1]
Aspergillus, book, 1424[1]
fumigatus, effect of Ra on, 3485[1]
fumigatus, in flour, 2210[6]
minimus, of coal, 2344[1]
niger, boron effect on, 2222[1]
glucosidase from, 3301[1]
growth stimulation by vitamin B prepn., 929[4]
inulin-splitting power of ext. of, 3017[8]
oxidation of sugars by, 3713[2]
respiration of, copper action on, 2512[4]
respiration of, effect of heavy metals on, 2516[1]
thiourea utilization by, 2867[1]
urea excretion by, 1829[5], 2344[2]
oryzae, arginase in, 925[9]
of coal, 2344[1]
dextrin liquefying activity of dextrinase of, effect of H ion concn. on, 1999
hydrolysis of starch and dextrin by, measuring rate of, 1999[1]
optimum temp. for growth and diastase production of, 219[1]
phosphatides of, 1831[5]
starch liquefying activity of amylase of, effect of H ion concn. on, 1999
therapeutic compn. from, P 179
Asperula, *odorata*, compn. of, 1646[7]
Asperuloside, 1646[7]
detection in plants and its extn. from *Galium aparine*, 2182[1]
Asphalt (See also *Bitumens*, *Paving*.)
absorption in mineral oils or their residue by fuller's earth contg. hydrosilicates, 3229[9]
artificial, prepd. with S, 3802[9]
blown oil, P 2583[6]
book, 2110[4]
cement, acid-resistant mastic, and roofing material, specifications of A. S. T. M. for, 954[6]
coloring black, P 997[1]
compn. of, 107[9]
compn. of cement and, P 3070[1]
concretes, bitumen detns. in, 3791[7]
crystal structure of, 29[4]
cubical expansion coeffs. of, detn. of, 1314[9].
dehydrogenating, P 2064[3]
density of asphalt cement and, methods of A. S. T. M. for detg., 954[8]
distg. and refining, P 502[3]
emulsions contg., P 1897[9], P 3805[5]
emulsions, prepn. of, P 3077[6].
formation in Auvergne, theory of, 2634[9].
gas extn. from, app. for, P 3348[2].
hardened products of, P 662[9].
industry in 1925, 3802[9].
lacquers, 297[5], 2254[4]
from low temp. tar, 2905[7]
melting p. of, detn. of, 1140[7]
mixing, with fibrous and abrasive materials, P 272[5]
nomenclature in Germany, 2997[1]
packing, P 502[3].
of Palestine (southern), 2303[1]
paving mixts., deformation test for, 2401[3]
paving mixts., detn. of stability of, 2401[4].
penetration test for, 1513[9]
petroleum, 986[2].
from petroleum sludge, use as paint, P 662[9]
in photography, P 2292[6]
removal from asphalt base oils, P 3564[3]
residues from petroleum, P 3564[5]
residues, vulcanizing, P 3248[2]
resources of U. S. in 1924, 1140[6]
as road building material, 1135[7]
road compn. from, P 3552[8]
road making compn., etc. from, app. for producing, P 3552[7]
roofing and shingles of, specifications and testing methods of A. S. T. M. for, 1121[7, 8]
for roofing manuf., prepn. of, 1135[9]
as rust preventive, review on, 995[6]
ultramicroscopical research on, 3560[8]
from waste, app. for reclaiming, P 818[1].
Asphaltenes, 107[9]
in various products, 986[2]
Asphaltite, from Utah, 1778[1]
Asphyxia (See also "poisoning" under *Carbon monoxide*.)
adrenaline discharge during, 1862[1]
blood sugar after, in decapitate cats and its relation to adrenal glands, 1838[7].
effect on blood and platelets, 2875[1].
on blood of marine fishes, 2372[1]
on blood sugar of *Myoxocephalus* and *Ameiurus*, 3495[8]
on motor function of large intestine, 780[6].
ethyl alc. content of blood and liver in, 3746[2]
Aspidium filix mas See *Ferns*
Aspirin See *Acetylsalicylic acid*
Assaying See *Analysis*.
Assimilation See *Metabolism*, *Plants*
Association See *Molecular association*.
Astarte borealis, bones of, mineral compn. of, 2210[1]
Asterias, *forbesii*, activation of eggs by acids, 2543[6].
Linckii robusta, bones of, mineral compn. of, 2210[1]
Asthma, anaphylaxis and, 2012[2].
blood serum in, P-Ca content of, 2014[1].
calcium deficiency in, 627[3]
ephedrine treatment of bronchial, 2701[2], 3041[1].
non-sp. desensitization therapy in allergic, 1149[9].
pathogenesis of bronchial, 781[6]
sputum in, spasm inciting substance in, 232[1].
Astigmatism, in ultramicroscopy, 3592[4].
Astrangia danae, digestion in, and its symbiosis with zooxanthellae, 630[6].
Astringents, effect on tendons of rat's tail, 2705[7]
Asymmetry. (See also *Nitrogen*.)
atomic and mol., 359[5].

and dissymmetry, 1049[5].
odor and mol., 903[6].
optical activity and mol., 699[1]
Atherosclerosis, from cholesterol feeding, 2015[7]
relation to adrenal sclerosis, 1841[6].
Atmolysis. See *Diffusion*
Atmosphere. (See also *Air; Nitrogen fixation; Oxygen.*)
books: Smoke: A Study of Town Air, 491[9], The Uppermost Regions of the Earth's, 3379[9]
electricity of, 145[7].
electricity of, effect of slow ions on measurement of elements of, 2616[3].
elec. phenomena in, 8[9].
elec. state of upper, 1555[6].
flue dust in, prevention with collectors, 2381[4].
at high altitudes, acidosis of, 2829[8]
azotemia during sickness at, 944[1]
compn. and quantity of blood in persons living in, 3182[4].
effect on H ion concn. and CO_2-binding capacity of blood, 3496[4].
healing effect of, 2004[4].
metabolism in, 230[9]
oxygen consumption during exercise, 939[4].
pressure of, recorder for, 1923[7].
respiratory changes during airplane flight, 2509[4].
temp. and pressure recorder for, 1923[7].
at high and low altitudes, effect of exertion on NH_3 content of blood in, 2190[5]
high-frequency rays of, 2615[6], 2945[2].
ionization by moon, 1944[4]
ionization equil. in, 1353[5]
ionization measurements of, radioactivity and, 1352[5].
light scattering in, 1555[6]
nitrogen loss in higher regions of, 545[8].
ozone and upper, 2935[2]
ozone content of higher regions of, 1357[4]
ozone in, 2112[8].
measurement of amt. of, 1006[9]
terrestrial magnetism and, 2112[8].
ozone layer in, measurement of altitude of, 31[1].
penetrating radiation in, 2114[8].
app. for measurement of, 1352[4]
origin of, 1175[9], 1352[7], 2114[9].
pollution of, 256[1]
by C_6H_6, 3522[3]
detn. of degree of, 3765[1]
pressure, effect on gas metabolism of red blood cells, 3723[7].
radon detn. in, 1756[2].
rare gases of, 1927[8].
Atomic heat, for aliphatic compds., 2777[6].

immobile groups of, with strong sp. external fields as cause of catalytic activity, 1549^{6}.
inner development of, effect on ionic radii, 2278^{3}.
intra-at. field, 1943^{2}.
iodine, affinity for electron, 2945^{9}.
ionization and activation potentials of, 10^{8}.
ionization of, 330^{9}.
ionization (spontaneous) of, with one K atom removed, 2449^{2}.
ionized, statistical mechanics of, 2116^{7}.
iron, electron system of, 2781^{7}.
levels in, effect of chem. bond on energy of, 540^{2}.
light emission by, length of, 3637^{4}.
light emission by, quantum mechanics of, 1026^{7}.
magnetic field between, regularity in distribution of spectral lines of Fe and, 2617^{9}.
magnetic inactivity of residue of, 541^{4}.
magnetic moments of Fe, theory of, 3618^{7}.
magnetic properties of, 2614^{5}.
magnetic properties of, valency theories and, 2781^{4}.
magnetization of, quantum theory of, 3378^{3}.
magnet, structure of, 2940^{7}, 3378^{5}.
mercury, collisions of 2nd kind with, in 2P state, 3126^{2}.
dissocn of H mols by, 3126^{5}.
metastable $2p_3$-state of, 866^{9}.
metal, period of adherence on glass surface, 1737^{3}.
metastable, 2616^{2}.
metastationary states of, 1556^{1}.
in mixed crystals, distribution of, 1736^{1}.
mobility of recoil, detn. of, 1946^{5}.
monochromatic radiations from, 1942^{9}.
motion in solids, 3254^{5}.
neon, metastable s_3 and s_5 state of, length of life of, 866^{6}.
nucleus of—see *Atomic nucleus.*
physics of, review on, 700^{7}.
Planck-Einstein formula, derivation of, 3633^{4}.
pseudo-, dimensions of, 867^{3}.
quantum mechanics of, 2782^{4}.
quantum vectors in, coupling possibilities of, 2449^{4}.
radiation effect on, model of, 1172^{9}.
radii of, 1153^{9}, 3415^{2}.
rays of, 3381^{9}.
reactions involving, velocity of, 3621^{3}.
relativity and, 3633^{9}.
relativity fine structure, 144^{8}.
review, 2766^{9}.
Röntgen radiations from, 2453^{6}.
Röntgen-ray absorption levels of light, 701^{7}.
Röntgen-ray internal absorption by, 3635^{6}.
shapes and sizes in ions, 1734^{1}.
size of, comparison with ions, 1026^{3}.
size of, effect on thermodynamic stability, 1749^{5}.
spectrum of diff., of same electronic structure, relations between, 3388^{4}.
in stars, 3636^{8}.

states of, spectral terms and, 3386[1]
stripped, Rb- and Cs-like doublets of, 3636[1]
structure of, 1025[8], 2113[6], 2613[4]
Bohr model, detn of no of vibrations radiated by, 7[1]
Bohr model for H and ionized He, 7[1]
Bohr model from standpoint of general relativity, 3126[1]
Bohr models of, behavior of valency of B, C and N from standpoint of, 2114[6].
Bohr model, spectral intensity distribution and cascade transitions in, 2788[6]
Bohr theory and ionization potentials, 3636[2]
of carbon, 2114[5]
coördination no and, 8[1]
crystal structure and, 1912[8], 2114[1]
electron, based on chem properties, 3265[4]
electron configuration for lighter elements, 708[6]
electron distribution in, 8[1]
magnetic properties of coordination compds and, 2944[1]
magnetism and, 701[9]
magnetism of the rare earths and, 114[6]
mechanics and, 1025[4]
metallurgy and, 1376[1]
of nickel magnet, 2611[6]
nuclear momentum and, 1556[7]
optical behavior of models, 866[6]
paramagnetism and, 866[7]
periodic system of elements and, 2782[7]
photochem reactions and, 2943[5]
refractive index of org. substances and, 1553[9]
relation to isomorphism, 694[3]
reviews on, 1555[5], 3594[9]
Röntgen rays and, 1025[5]
Rutherford Bohr model, theory of light emission according to, 3637[1]
significance of tetrahedral nos in natural system for, 1754[8]
spectra and, 540[2], 2113[8]
spectral terms and, 18[1]
spectrum analysis in, 3385[1]
theories of, 7[2], 2613[8]
transmutation of elements and, 2943[5]
triangular systems of Rutherford-Bohr in relative equil, 540[3]
Whittaker's model, 8[1]
theory of, 2613[4]
transformation of, into radiation, 549[9]
vibration frequencies of elements in solid state, dependence on pressure, 1025[7]
Atophan. See *Cincophen*
Atoxyl (*monosodium arsanilate*)
color reaction of, 2301[1]
effect on liver arginase activity, 3706[9]
poisoning of lipase by, 2681[9]
therapeutic action of, 3742[8]
toxicity of, effect of reduced atm pressure on, 1866[3]
Atractylin, 3458[8]
Atriplex See *Saltbush.*

in raw and filtered water in Ohio, 3525[4].
synthesis of water-sol. vitamin by, 1644[3].
toxic action of NaCl and $CaCl_2$ on, 1423[6].
viability and electrophoretic migration of, effect of electrolytes on, 1646[1].
diphtheriae, differentiation from *B. pseudodiphtheriae*, 1645[6].

distinction from *B. xerosis* and from *B. hofmanni*, 1645².
isolation from throat cultures, K tellurite in culture media for, 1645⁷.
dysenteriae, detoxication by formaldehyde, 1458⁵.
immunization with non toxic culture filtrates, 1268⁵.
immunizing properties of toxin from, 446¹.
enteritidis, convergent phenomena exhibited by, 2869⁸.
enteritidis, toxic products of, 1455².
felsineus, cultures of, P 297².
of Friedlander—see *Diplococcus pneumoniae*.
granulobacter pectinovorum, deamination in relation to glucose oxidation in, 3724⁸.
hofmanni, distinction from *B. diphtheriae*, 1645².
influenzae, growth of, effect of V factor in blood serum in avitaminosis on, 1436⁵.
vitamin production by, 1645⁵
vitamins for growth of, 3479⁸.
lactis aerogenes, adaptation to toxic salts, 2865⁹
lactis aërogenes, differentiation from *B coli*, 1286³.
macerans, fermentation by, acetone formation in, 3307⁶.
moniliforme, calcareous incrustations of, 2348¹.
morgani, distinction from *B aërogenes*, 1645²
mycoides corallinus, identification as a streptothrix, 2869⁶
nitroso, in sulfhemaglobinemia, 3037⁴.
paratyphosus B, toxic substances in young cultures of single cell strains of, 1458⁸
perfringens—see "*aerogenes capsulatus*," above
pestis, effect on carbohydrates, 2345⁵
Pfeiffer's—see "*influenzae*," above
phosphorescens, light from, 433¹
phytophthorus, differentiating from *B solanisaprus*, 3481².
prodigiosus, carbon dioxide production by, 3767⁶.
proteus, growth on phenol agar, 3479⁷.
sol proteolytic enzyme of, 2341⁸.
test for, 1421⁹
urease production by, effect of Be on, 1820⁹.
pseudodiphtheriae, differentiation from *B. diphtheriae*, 1645⁶.
pyocyaneus, arginase of, 56¹
metabolism of, 930³.
pyorubrin of, 2345⁶.
synthetic culture medium for, 2867⁵.
radicicola, from alfalfa and sweet clover, 929¹.
radicicola in soil, 2554³.
Shiga-Kruse, toxin formation in broth of diff. *p*H, 3713⁵.
sinicus enzyme, coagulation of egg yolk by, 2867⁴.
solanisaprus, differentiating from *B. phytophthorus*, 3481².
sporogenes, death temp. of, effect of H-ion concn. on, 2710⁶.
suipestifer, toxic substances produced by, 1458⁸.
timothy, effect of autolysis products of organs on CH_3OH exts. of, 432⁸.
timothy, metabolism of, 432⁴.
trumpet, metabolism of, 432⁴.
tuberculosis, acid-fastness of, 2177⁶
acid-fastness, removal by oleic acid or olive oil, 3480³.
agglutination of, 1444³.
carbohydrates of, 3307².
chemistry of, 3478⁷.
complement fixation, potency of watery ext. of saprophytic acid-fast bacilli as tuberculins and as antigens in, 1444¹.
destruction in sputum, 3773³.
disinfection with $HgCl_2$, 2688⁷.
effect of autolysis products of organs on CH_3OH exts. of, 432⁸.
effect of oils on, 3501¹.
effect of salts on the growth of, 1269⁴.
effect of sanocrysin on, 1853⁷, 3741⁸
effect of unsatd. fatty acids on, 2177⁷.
excretion in urine, 1443⁹.
formation of tubercles by injection of $CHCl_3$ exts. of, 232⁹, 233¹
growth on glycerinated beef broth, effect of Fe on, 2177⁴.
in milk, thermal death point of, 1286³.
reaction and growth curves of cultures of, 2177⁸.
resistance of sp. properties to NaOH and HCl, 2177².
soly in cod-liver oil, 219².
specific pptg. substance from, 237⁸.
split products of, 3502⁹.
tyrosine and tryptophan content of cultures of, 2515⁹.
virulence of, effect of chem. agents on, 2690³.
tumefaciens, vitamins in, effect on tissue growth, 2524⁴.
typhosus, convergent phenomena exhibited by, 2869⁸.
destruction by mercurochrome, 3510¹.
detoxication by formaldehyde, 1458⁵.
disinfectants for, 1225⁸.
distinction from *B. aërogenes*, 1645².
effect of acriflavine on, influence of soaps on, 2345⁴.
effect on sugar fermentation in Russell double sugar tube, 1644⁷.
morphological comparison with bacilli in natural waters, 432⁵.
protein in cultures of, 1257¹.
viability in oysters of, 219⁹, 220¹.
welchii—see "*aerogenes capsulatus*," above.
xerosis, distinction from *B. diphtheriae*, 1645²
Bacteremia, acriflavine effect on, 2019⁷.
Bacteria. (See also *Ammonification; Bacillus; Culture mediums; Disinfectants; Microorganisms, Nitrification; Nitrogen fixation; Pasteurization; Phagocytosis; Sewage, Toxins, Water, analysis; Water, purification of.*)
acetic acid, chem. work of, 2867⁷.
acetic acid, decompn. of amino acids by, 2870⁹.
in acetic acid fermentation, 929⁸.
acid-fast, effect of H-ion concn. on growth of, 2178⁸
acidophile, 1645⁴.
adaptation to toxic salts, 2865⁹.
adsorption of Ag salts by, 454⁵.
aerobiosis and anaerobiosis of, 1422⁶.
agar-splitting, 219⁴.
agglutination of—see *Agglutination*.

alkali land origin and, 1680[4].
anaerobic, 930[7]
catalase production by, 2869[5].
effect on toxin of *B. botulinum*, 1460[2]
in sewage, 1126[1], 3054[6]
arginase of, 56[1]
autolysis by, temp. increase from products of, 1267[7]
behavior of *Entameba dysenteriae* in mixed cultures with, 2511[8]
beta-rays and, 3711[9]
binding of, SiO_2 for, P 803[1]
in blackening of sand, 3203[2]
of blood, effect of clotting and of Na citrate on, 3033[8]
books Analyse bactériologique des eaux potables, 168[1], in Relation to Soil Fertility, 613[1]
Castellani's phenomenon, 1257[7]
catalase in, detn. of, 928[1]
in catgut, control of, 2390[5]
of cellulose decompn. in soil, 3056[6]
chalk, 1423[7]
chemistry of, 3478[7]
coli-aerogenes group, cellobiose fermentation by, 3480[6]
colon aerogenes group, identification with cellobiose, 2868[6]
of colon-aerogenes group in soil, 2890[6]
colon-aerogenes groups of, quinic acid in differentiation of, 1481[6]
colon aerogenes group, utilization of salts of org. acids by, 2869[1]
colon group, isolation in water, 1291[6].
colon, in fissure springs of Balcones Fault zone, 1481[5]
complement-binding expts. with rabbit serum against exts. of, 1104[7]
culture app. for, 613[1]
cultures of, app. for production of, P 3021[6].
cyclopoesis by, 2515[9]
dark-field condensers in study of, 2106[3]
death temp. of spore-bearing, 2710[8]
dehydrogenations by resting, 2178[1]
denitrification by, reaction of medium and, 1422[7]
denitrifying, effect of liming on, 1483[1]
detection in water, 251[9]
differentiating by agglutination, 3481[2]
in duodenum, pathol. development of, 2198[1]
effect on equil. between *l*-aspartic acid, fumaric acid and NH_3, 3480[1]
on nitrogen nutrition of *Diplotaxis erucoides*, 435[8]
on soil N, 3327[4]
on sugar fermentation in Russell double sugar medium, 1644[1]
on textile fibers, 1721[3]
in eggs (preserved), 245[8]
elec. current effect on, 2179[2].
electrophoretic migration of, effect of electrolytes on, 1638[8]
enteritidis paratyphoid B group, relationship of infections to hyperglucemia, 1456[2].
of enteritidis-paratyphoid group, sol. toxic products of, 2867[2].
fermentation by, 218[3].
fertilization of soil with nitrogen-fixing and cellulose-decomposing, 2220[1].
filters for, 3481[3]
fixation by liver, 446[4].
fluorescein of, effect on protozoa, 1423[2].
in frozen soil, 2030[6].
green, in soils, 1422[9]
growth-accessory and stimulating factors in media for, 3180[9]
growth-inhibiting changes produced by absorbents in nutrient bouillon, 2344[5].
growth of, effect of CO_2 on, 2870[7]
effect of H ion concn. on, 219[1].
effect of polarized light on, 2688[7].
inhibition by amino acids, 2869[6].
surface tension and, 2869[2]
vertebrate hormone action on, 1422[5]
vitamins and, 2343[9]
water sol. vitamin and, 1643[7].
growth promoting substance in blood serum in avitaminosis, 1436[6]
gum formation by, 1422[3], 1643[5]
heat stable peroxidases in, 2335[4]
heterogenetic specificity among, 614[6]
hydrogen sulfide production by anaerobic spore-bearing, 219[5]
in ice cream, com. control of, 245[2].
effect of re-emulsifying, re viscolizing or re homogenizing ice cream mixt. on, 2028[6]
gelatin as source of, 245[1]
indole production by, 219[6]
interconvertibility of "rough" and "smooth" types of, 1423[9].
interfacial tension relations of, 771[5].
intestinal, chemistry of, 2341[9], 2315[1,2,3]
intestinal, with Ca deficient diet, 616[9]
iron, prevention of deposits in water pipes by, 1125[8]
lactic acid, 2687[4]
culture medium for, 2687[4]
effect on acetone BuOH fermentation, 2868[1]
reaction of hexoses with lactic acid in, 3462[5]
therapeutic prepn. of, 433[6]
lactic acid fermenting, 2867[6]
lactic acid formation by, 2002[9], 2178[9].
lactose-fermenting, 3053[9]
leather destruction by, 837[9].
of legume nodules, culture media for, 1830[2]
increase in activity by passage through host plant, 2688[2]
viability outside of plant, 1826[7].
leptisepticum, changes in virulence and growth characteristics after alterations in O tension, 217[8]
lipochromes in, 2178[1]
luminous efficiency of, 433[1]
metabolism, amino N detn. in studies of, 1645[8]
metabolism of, 1256[9], 1644[5], 2344[8].
metabolism of acid-fast, 432[4]
metabolism of, cond. method in studies of, 2179[9]
in milk, cream and skim milk, 2883[7].
in milk, detn. of, 3048[7]
mixed cultures of, *Entameba gingivalis* in, 2542[1]
in muscular tissues and blood, 1424[2].
nitrate decompn. by, 1483[2].
nitrate-forming, 2553[8].
nitrites in urine from, 2199[9].
nitrogen fixation by, effect of Al on, 2003[4].
nitrogen-fixing, in Vesuvian soils, 2220[2].
nitrogen metabolism of, d'Herelle phenomenon and, 1827[6].
in nodules of *Vicia faba*, 62[3].
nuclear staining effect on, 1422[1].
nuclei of, compn. of, 1829[8].

oxidation of glycerol to dihydroxyacetone by, 3307[4]
oxidation of org. compds. by, 2178[1]
of paratyphoid group, toxic products of, 1455[3].
photogenous, 2688[5]
proteins of, 2365[6]
punctiform colony forming, in soil, 1879[4].
quinic acid utilization by, 929[9]
reduction by, effect of tuberculin prepns. on, 1446[6]
respiratory pigment of, 58[2]
respirometer for, 1816[1].
Rontgen ray effect on, 1413[8]
in sewage purification, percolating beds for, 84[4]
of silage in Italy, 2884[8].
soil infertility and action of, 2553[9]
of soil, productivity and, 3204[1]
in soils, counting, 1483[9], 3766[8]
in soil, temp. conditions and adaptability to climate of, 3530[1]
of soil (wind-blown), 1484[1]
of soy beans, 929[2]
spore bearing gas-forming, in Ohio River at Cincinnati, 1125[6]
spore formation in aerobic, effect of lipoid solvents on, 1422[1]
spores of, thermal resistance of, 2867[9]
staining of acid fast, in milk, 2211[8]
staining of, petrolatum effect on, 2866[8].
stains for—see *Stains*
sugar inverting, and their use in manuf. of fatty acids, etc., 3713[8]
sulfate reducing, thermophilic, 219[1]
sulfate reduction in oil field waters by, 887[1]
sulfolying, culture medium for, P 3482[1]
sulfur, as indicators of polluted water, 3525[5]
sulfur, energy source of, 217[7]
sulfur oxidation by, 1422[9], 1484[1], 2315[9]
surface growths as diffraction gratings, 1120[1]
surface tension effect on, 1645[1]
in swimming pools, 2889[4]
thermophilic, fermentation of cellulose by, 2687[7].
of typhus and paratyphus group, resistance in milk pasteurized by holding, 3752[9]
urea, 2179[8]
urea, relation to org. compds., 1422[6]
urine infection with nitrite forming, 1247[9]
variation of, 2869[8]
viability of, effect of acids on, 1827[1]
vinegar, generator capacity and temp. optimum of, 795[4], 2386[2]
viruses (cryptantigenic), 2688[9]
vitamin formation by, 1645[5], 2003[1]
vitamins and, 3479[8]
in water filtered through various media, 76[6]
in whiteware bodies, 1892[9].
xylinum, fermentation of α-ketoglutaric acid by, 2179[1]
yoghurt, prepn. of tablets of, 2388[1]
Bacterial preparations, P 2049[5]
blood sera and, 2046[8].
protein, toxicity of, 3035[1]
Bacterial toxins. See *Toxins*
Bactericides. See *Disinfectants*
Bacterins. See *Vaccines*
Bacteriology, books: 615[1]; Bacteriologische Problemen voor Biologen en Chemici, 1257[6], Précis de, pratique, 2003[5]; Methoden der bacteriol. Untersuchung von Nahrungsmitteln, 3021[5], Lab. Outlines in, 3021[6].
of calfskin soaking, 517[3].
of duodenum, 1421[9]
finger cot for use in, 60[3].
of goat skin soaking, 2427[1], 3360[1].
of milk, 76[1], 2374[1]
soil studies at Idaho Sta., 1879[8]
Bacteriophages, complement binding expts. with rabbit serum against, 1104[7]
effect of corpuscular rays of Ra on, 2689[8].
effect of freezing and thawing on, 613[6].
inactivation of, effect of electrolytes on rate of, 931[2], 3178[6]
isolation from bacterial proteins, 1827[6].
potency of, effect of partial inactivation on, 2002[9]
power of river or sea waters, 1291[7].
reduction with, 928[9]
regeneration of, 2346[1]
respiration, 1121[1].
of *Staphylococcus aureus*, filterability of, 3481[5]
in surface water, 1125[8]
synthetic medium for development of, 2179[3].
taches vierges appearance during activity of, 219[7].
theory of, 3702[6]
Bacteriophagy, relation to N metabolism of bacteria, 1827[6]
Bacteriosis, 3181[2].
Bacteriostasis, dye, 2868[1]
Bacteriotoxins. See *Toxins*
Bacterium, *pasteurianum*, stock feed contg., P 3756[5]
stutzeri, denitrification by, reaction of medium and, 1422[7]
Baddeleyite, 3788[6]
Baeckea gunniana, *var. latifolia*, oil of, 2721[1]
Bagasse, carrier for, 1917[7]
compn. of, controlling, 2085[9].
drying of, 2760[7]
fermentation of, 3831[6]
fertilizer from molasses lees and, P 2043[1].
fiber-board from, P 1523[2]
as fuel, 1917[7], 2425[8]
generator gas from, burning of limestone with, 2918[1]
lumber substitute from, P 1310[9]
paper pulp from, P 1323[8]
wood substitute from, P 1508[3]
Bags, impregnating compn. for, P 1328[7]
paper for, effect of heat on strength of, 503[1]
sugar, fiber substitutes for, 2586[9]
Bakelite (See also *Phenol condensation products*.)
for app. construction, 3363[2]
assay of solns. of, 2255[7]
as coating for chem. app., 1497[6]
colored screens of, for illuminated "imitation fires," P 1500[6].
manuf. and properties of, 3541[1].
manuf., properties and uses of, 3270[5].
review, 2419[6].
spalling of, 2735[2].
transparency to diff. radiations, 710[6].
volatility with spirit vapors, 117[8]
Bakelometer, 2255[9].
Baker, John Townsend, biography, 1006[2].
Bakery products. (See also *Bread*, *Dough*.)
cakes, compn. of, 460[7].

cakes, graphic record of texture, vol. and contour of, 1285[9].
crackers, hydrogen-ion concn. detn. in, 2549[6].
Graham crackers, acid- and base-forming elements in, 459[7]
hydrogen ion control in, P 79[5].
pies, compn. of, 460[8]
saccharin detection and sepn. in, 3317[4].
Baking. (See also *Bread; Flour.*)
books: Handbook for Bakers, 1288[1]; Repts. on Research at the Natl Bakery School, 2711[7].
elec. heat in, 872[4].
fermentation in, 3199[2].
fermentation in, effect of water on, 3320[2].
lab. test of, standardizing of, 3319[6,7].
science in, 247[2].
tests, 3319[9].
yeast prepn. for, P 1493[3].
Baking powder, P 79[6].
analysis of, 3198[3].
fluoride detn. in, 3198[4].
ion concn. of, detn. of, 1285[9].
manuf. of, 2210[7].
yeast contg., P 953[6].
Balances, automatic, 3101[9].
deflection, for biochem. labs, 3472[9].
for magnetic sepn., 2475[3].
mercury, 2234[5].
micro, 214[6], 711[4].
detns. with, 2629[8].
for gases, 1923[3].
in photochem. decompn of AgI, 3390[7]
for pills and tablets, 679[9].
sorption, 1151[3]
ultra-, 522[7], 1151[2].
Balata. (See also *Chicle*)
coloring, P 2596[6].
detn. in mixts. with rubber, 125[8].
molded articles from fibrous materials and, P 3589[9].
structure of, x rays in study of, 3837[3].
Ball bearings. See *Bearings.*
Ballistite, stability of, 1523[7], 1524[1].
Balloons (See also *Aircraft; Airplanes*)
fabrics for, manuf. of, 114[3].
inflating small, by chem reactive substances, P 974[9].
material for, P 671[1].
Balls, golf, manuf. of, P 3590[9].
rubber, P 1338[5].
rubber, app. for making, P 1538[1,2].
rubber compn. for, P 2596[8].
Balsa bark, analysis of, 3360[1].
Balsam, photoactivation by ultra-violet light, 1654[1].
Bamboo, cellulose, comparison with cotton cellulose, 2248[2].
constituents of, 2248[1].
gases in stem of, 1831[3].
growth of shoots of, 434.
as paper-making material, 3811[4].
for pulp and paper making, 2071[7].
Banana, antiscorbutic vitamin in, 2006[8].
cellulosic material from stems of, P 2073[2].
fibers, 1327[5].
paper from waste from tree, 3812[6].
in scurvy prevention, 1432[4].
Bandages. See *Surgical dressings.*
Bankia setacea. See *Shipworm.*
Barberry, berberine in, 3212[4].
effect on morphine and heroine addicts, 1864[5].
fluorescence of ext. of, 337[4].
killing, with Na_3AsO_3, 259[4].
pharmacol. action of, 2205[4].
sprouts, compn. of etiolated and green, 2351[3].
Barbital (*veronal; 5,5-diethylbarbituric acid*).
detection of, 3330[3].
distribution coeff. between water and org. solvents, 2540[9].
effect on coronary circulation, 2209[1]
effect on irritability of frog heart, 452[7].
as hypnotic, 458[7].
localization and elimination of, 1850[7].
micro-testing of, phys consts. in, 3209[3].
poisoning from, barbital in organs in, 783[6].
poisoning with, exanthemata in, 1859[5].
pyramidone compd., 3284[9].
pyramidone-, mixt, 262[4].
reaction with Hg salts, 1595[1].
sodium deriv.—see *Barbital sodium.*

sepn. from wash oils, distn. app. for, P 278[5]
solns. of $C_{10}H_8$ in, surface tension change as function of concn , 2607[8].
solns of p-$MeC_6H_4NH_2$ in, d.-temp. curves of, 3117[1].
as solvent for alkaloids, 3209[2].
spectra of mono- and di derivs. of, 1559[4].
spectrum of, 14[3], 190[4], 2455[7], 2949[2], 2953[9].
sulfonation of, with SO_3, 2153[9].
sulfur detn. in, 1137[9], 2471[5], 2575[7].
sulfur in, effect on Cu and brass, 1137[9].
surface tension of, 1008[6], 2437[7].
surface tension of, relation to viscosity, 2267[6].
synthetic, for fuel, 653[4].
system: butyric acid–, vapor tension of, 2935[8].
system: α - chlorotetrahydronaphthalene–, vapor tension of, 2935[7].
system: decalin–, vapor pressure of, 2851[8].
system: EtOH–H_2O–, 1938[8].
systems: CS_2–, *m*-xylene–, $PhNO_2$–, and $SnCl_4$–, magnetic susceptibility of, 2612[2].
systems: CS_2–, *m*-xylene–, $SnCl_4$–, and $PhNO_2$–, refractometry of, 2612[4].

systems: CCl_4–, $PhNH_2$–, $PhNO_2$–, and *p*-$MeC_6H_4NH_2$–, 1548[2,8].
system: SO_2–, 1984[1].
systems with MeOH, EtOH, iso-Pr alc. and Bu alc., phys. properties in vicinity of crit. temp. of miscibility, 1544[3].
system: toluene–, 1020[6].
system: urethan–, effect of pressure on, 1164[8].
system: H_2O-toluene–, 2777[1].
system: *m* xylene–, fusion curve for, 1020[5].
ultra-violet absorption spectra of aq. solns. of, 708[1].
vapor pressure and sp. vol. of, detn. of, 1551[6].
vapor-pressure curves for mixts. with tetrahydronaphthalene and with cyclohexanone, 1013[4].
vapor pressure of, 3602[4].
vapor pressures of mixt. of CS_2 and of CCl_4 with, 139[1].
viscosity and vapor pressure of mixts. with bromobenzene and with ethylene dichloride, 1012[9].
viscosity of, as function of d., 1929[8].
viscosity of mixts. with water, 3116[4].
washing app. for, P 278[5].

Benzene, acetyl-. See *Acetophenone*.
——, **1 - allyl - 4 - bromo-**, reactions of, 2666[1].
——, **1 - allyl - 3,4 - methylenedioxy-**. See *Safrole*.
——, **1 - allyloxy - 2 - (*p* - nitrobenzyloxy)-**, 1798[1].
——, **arsenobis-**. See *Arsenobenzene*.

——, ***o* - bis(methylsulfonyl)-**, 3289[9].
——, ***m* - bis(4 - nitrophenylmercapto)-**, 3163[2].
——, **bromo-**, coeffs. of internal friction of mixts. with C_6H_5Cl, 2926[6].
dielec. const. for, and for system: C_6H_5Cl–, 2781[1].
elec. cond. of, 1751[9].
heat of vaporization of, 1551[4].
as solvent in the catalytic reduction of BzCl, 1396[4].
viscosity and vapor pressure of mixts. with toluene, 1012[8].
——, **β-bromoallyl-**, 899[4].
——, **γ-bromoallyl-**, 899[5], 3155[5].
——, **4 - bromo - 1,2 - bis(ethylmercapto)-**, 1797[8].
——, **(γ - bromo - Δ^3 - butenyl)-**, 1054[2], 3286[8].
——, **4 - bromo - 1,2 - dichloro-**, reaction with NaOMe, 2152[4].
——, **1 - bromo - 2,4 - dinitro-**, system: 1 - (*m* - nitrophenyl) - 5 - phenyl - $\Delta^{2,4}$-1-pentadienone–, 750[1].
——, **1 - bromo - 3,5 - dinitro - 2 - nitroso-**, 2666[8].
——, **1 - bromo - 2 (3 and 4) - nitro-**, consts. of, 386[4].
reduction of, 2835[6].
——, **1 - bromo - 2 (and 4) - nitro-**, detn. of, in presence of 1 - bromo - 3 - nitrobenzene, 1225[2].
——, **1 - bromo - 3 - nitro-**, mixts. with *m*-chloronitrobenzene, effect of pressure on, 3627[8].
——, **1 - bromo - 4 - nitro-**, system: 1-(*m* - nitrophenyl) - 5 - phenyl - $\Delta^{2,4}$ - 1-pentadienone–, 749[9].
——, **(γ-bromopropargyl)-**, 1783[2].
——, **1-bromo-4-propenyl-**, 2666[1].
——, **1 - bromo - 2,3,4 - trimethoxy-**, 1609[7].
——, **1 - bromo - 2,3,4 - trimethoxy - 4,6-dinitro-**, 1609[7].
——, **1-bromo-2,3,5-trinitro-**, 2666[8].
——, **butyl-**, 2316[8].
——, ***sec*-butyl, *d*-**, 1983[8].
——, **1-*sec*-butyl-4-nitro-, *dl*-**, 1983[9]
——, **chloro-**, 1 - chloro - 1,6 - dihydrophenarsazine addn compd., 1606[8].
coeffs. of internal friction of mixts. with C_6H_5Br, 2926[6].
dielec. const. for, and for system: C_6H_5Br–, 2781[1].
effect on sulfur metabolism, 3182[9].
heat of vaporization of, 1551[4].
as insecticide, 2556[4].
reactions of, produced by β- and γ-rays of Ra, 3638[4].
as solvent in the catalytic reduction of BzCl, 1396[4].
sulfonation of, with SO_3, 2153[9].
systems: *o*-MeC_6H_4Cl–, and CH_2BrCH_2Br–, 1548[3].
——, **γ-chloroallyl-**, 899[5].
——, **1 - chloro - 3,5 - dimethoxy - 2,4-dinitro-**, 1395[4].
——, **1 - chloro - 3,5 - dimethoxy - 2,4,6-trinitro-**, 1395[5], 2317[5].
——, **1 - chloro - 2,4 - dinitro-**, as insecticide, 2556[4].
——, **1 - chloro - 2,4 - dinitro - 3,5 - diphenoxy-**, 1222[8].
——, **chloroethyl-**, oxidation of, P 1631[4].
——, **1-chloro-4-iodo-2-nitro-**, 2152[6].
——, **chloronitro-**, as insecticide, 2556[4].
manuf. of, P 2504[4].
poisoning by, 1289[7].
reaction with alc. KOH, 1793[6].
——, **1 - chloro - 2 (and 3) - nitro-**, consts. of, 386[4].
——, **1 - chloro - 2 (3 or 4) - nitro-**, reduction of, 2835[6].
——, **1 - chloro - 2 (and 4) - nitro-**, systems: 1 - (*m* - nitrophenyl) - 5 - phenyl - $\Delta^{2,4}$-1-pentadienone–, 749[9].
——, **1 - chloro - 3 - nitro-**, mixts. with *m*-bromonitrobenzene, effect of pressure on, 3627[8].
nitration of, 388[8].
prepn. of, 174[1].
——, **1 - chloro - 4 - nitro-**, phenacetin from, 2995[6].
system: *p*-phenylazoaniline–, 1062[7].
——, **chloropropyl-**, oxidation of, P 1631[4].
——, **1 - chloro - 2,4,6 - trinitro-**. See *Picryl chloride*.
——, **cyano-**. See *Benzonitrile*.
——, **diamino-**. See *Phenylenediamine*.
——, **(β,β′-dibromo-*tert*-butyl)-**, 385[4].
——, **1,3 - dibromo - 4,6 - dichloro - 2,5-dimethoxy-**, 1609[9].
——, **1,3 - dibromo - 2,5 - dimethoxy-**, 1394[2].

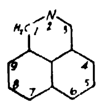
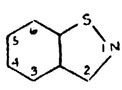
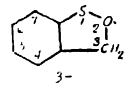
filtration for dry cleaning, 2078[9]
manuf. of, P 3803[7].
poisoning by, 2712[5]
poisoning by, in rubber industry, 1920[5].
production and synthesis of, 3225[2]
recovery from cracked gases, 2905[1].
synthesis of, 2743[6]
synthetic, 2815[2,4]
yield from crude oil, increasing, 1898[3].
2(1) - *peri* - Benzisoquinoline (*peri - naphthazole*),



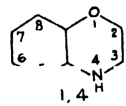
2,1 - *peri* - Benzisoquinoline - 1,3(2) - dione. See *Naphthalimide*
Benzisosulfonazole, **2 - o - sulfamylbenzal-**, and sodium deriv., 3450[6].
2(1)-Benzisosulfonazolone See *Saccharin*.
Benzisothiazole,



s-dioxide—see *Benzisosulfonazole*.
prepn. of, and $AgNO_3$ compd., 763[4].
——, **2-amino-**, 763[6]
2 - Benzisothiazolecarbamic acid, ethyl ester, 763[6].
2-Benzisothiazolecarboxamide, 763[3].
2-Benzisothiazolecarboxanilide, 763[6].
2 - Benzisothiazolecarboxylic acid, and derivs., 763[4,5]
2-Benzisothiazolecarboxylyl azide, 763[5].
2(1) - Benzisothiazolone, **1 - methyl-**, and -HCl, 2327[7].
——, **1-phenyl-**, 2327[7].
——, **1-o-tolyl-**, 2327[7].
3-Benzisothioxole,

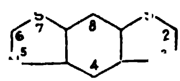


——, **3,3 - bis(hydroxyphenyl)-**, *S*-dioxide—see *Phenolsulfonephthalein*
$\Delta^{1,\alpha}$ - **Benzisothioxoleacetic acid** (?), *S*-dioxide, Et ester, 1069[2].
——, **? - bromo** - (?), *S*-dioxide, Et ester, 1069[1]
3 - Benzisothioxolol, **3 - (5 - hydroxycarvacryl)-**, *S*-dioxide, dibenzoate, 1615[3].
Benzisotriazole. See *1,2,3 Benzotriazole*.
1,4-Benzisoxazine,

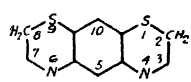


——, **2,3-dihydro-** See *Phenomorpholine*.
Benzisoxazole (*isoindoxazene, indoxazene*),

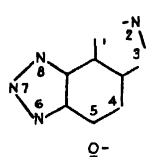
——, **4,6-dibromo-**, 103[8]
——, **4,6-dibromo-3,5-dimethyl-**, 403[9]
——, **4,6-dinitro-2-phenyl-**, 1229[8].
——, **2-methyl-4-nitro-**, 1230[1]
——, **4-nitro-2-phenyl-**, 1229[9].
β,γ-Benzisoxazole See *Anthranil*.
Benzoates, assay of, 1888[3].
effect on arteries, 1868[1].
m-α-**Benzobisthiazole**,



——, **2,6-dimethyl-**, hexabromide, 1806[6].
Benzobithiazine

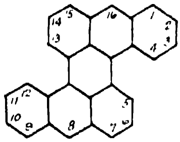


3,7(4,6)-Benzobithiazinedione, 1993[4].
Benzobitriazole,



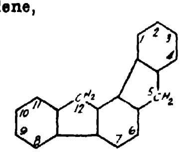
m - **Benzobitriazole**, **2,6 - dihydro - 2,6-diphenyl-**, constitution of, 2327[9].
o - **Benzobitriazole**, **2,7 - dihydro - 2,7-diphenyl-**, constitution of, 2328[1].
Benzocaine, dissocn. const. for, 2108[5].
5,6 - Benzocarbocyanine, **1,1′ - diethyl-***, bromide, 419[7].
Benzocholic reaction, 2877[4]
5,6 - Benzocinchoninic acid, **3 - Δ¹ - cyclopentenyl-**, 1978[1].

——, 1,2,3,4 - tetrahydro - 3 - phenyl-, 2331[6]
Benzocoumaran. See *Naphthofuran.*
p-meso-**Benzodianthrene,**



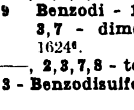
p-meso-

——, **8,8′-dithiobis[16-bromo-,** 192[4].
1,3-Benzodiazine. See *Quinazoline.*
1,4-Benzodiazine. See *Quinoxaline.*
2,3-Benzodiazine. See *Phthalazine.*
1,3-Benzodiazole. See *Benzimidazole.*
Benzodiazphospholium, anilino - P - oxodihydro-*, 911[1].
——, **phenoxy-P-oxodihydro-*,** 913[9].
——, **p-tolyloxy-P-oxodihydro-*,** 914[1].
Benzodiindene,

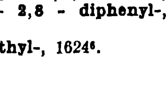


m-β

5,12 - m - β - Benzodiindenedione, 7 - methyl-, 911[6].
Benzodi - 1,4 - pyran,



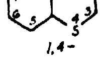
1,7-



1,9-

1,7 - Benzodi - 1,4 - pyran - 4,10 - dione, 9 - acetyl - 2,8 - dimethyl-, 1237[6].
——, **2,3,8,9 - tetramethyl-,** 1624[7].
1,9 Benzodi - 1,4 - pyran - 4,6 - dione, 3,7 - dimethyl - 2,8 - diphenyl-, 1624[6].
——, **2,3,7,8 - tetramethyl-,** 1624[6].
1,3 - Benzodisulfole,

——, **5-bromo-2-phenyl-,** 1797[8].
——, **2-methyl-2-phenyl-,** 3290[2].
——, **2 - (o - nitrophenyl)-,** 1797[7].
——, **2,2′-oxybis[2-phenyl-,** 3290[2].
——, **2-phenyl-,** 3290[2].
1,3-Benzodisulfol-2-one, and oxime, 3290[1].
——, **5-bromothio-,** 1797[9].
——, **nitro-,** 3290[2].
——, **2-thio-,** 3290[2].
1,4-Benzodithiin,



1,4-

1,4 - Benzodithiin - 2,3 - dione, 6 - bromo-, 1797[8].
1,4-Benzodithiin-2(3)-one, 6(or **7**)**-bromo-,** 1797[9]
Benzodithiole See *Benzodisulfole.*
5,6-Benzoflavanone, 2159[1].
Benzoflavone, 2,3-dihydro-. See *Benzoflavanone.*
5,6-Benzoflavone, 2159[1].
——, **1-thio-,** and $HgBr_2$ addn. compd., 3651[1,2].
Benzofuran (*coumarone*),

——, **3 - bromo - 6 - methoxy-1-methyl-4,5-methylenedioxy-,** 3450[2]
——, **2,3 - dibromo - 6 - methoxy-1-methyl-4,5-methylenedioxy-,** 3450[2]
——, **dihydroketo-** See *Benzofuranone*
2 - Benzofurancarboxylic acid, octahydro-1-keto-, and ethyl ester, 1989[4]
2-Benzofuranol, 1 - (3,4-dimethoxyphenyl)-1,2 - dihydro - 3,5 - dimethoxy-2-methyl-, 405[6], 3007[5]
3-Benzofuranol, 4-chloro-, acetate, 1237[9]
2(1)-Benzofuranone, 1 - bromo-1-(α-bromo-o-methoxybenzyl) - 3,5 - dihydroxy-, diacetate, 195[8]
——, **1-bromo-4-chloro-,** 3004[7].
——, **4-bromo-5-methoxy-1-triazo-,** 3004[4].
——, **4-chloro-,** semicarbazone, 1237[9]
——, **3,5 - dihydroxy-1-o-methoxybenzal-,** diacetate, 195[8].
——, **3,5-dimethoxy-1-veratral-,** 2326[4].
——, **1-ethyl-3,5-dihydroxy-,** 3163[8].
——, **1-triazo-,** 3004[4]
——, **3,4,6-trimethyl-,** 2154[8].
2-Benzofuranpropionic acid, 2-carboxyoctahydro-1-keto-, 1989[4]
——, **1,2,3,4,5,6-hexahydro-1-keto-,** and derivs., 1989[4].
——, **octahydro-1-keto-,** 1989[4].
Benzoheptatriazine, 745[8]
4,5 - Benzo[hept-1,2,6-oxdiazines]. See the acyl derivs of *Isoindazole, Isoindazolol,* etc.
Benzohydrol (*diphenylcarbinol*), 1-naphthalenecarbamate, 1232[9].
oxidation of, 2996[3].
prepn of, 2999[9]
——, **α-(α-aminobenzyl)-,** heat action on, 588[8].
——, **α-(α-aminoethyl)-,** *l*, 2324[9].
——, **α-(aminomethyl)-,** heat action on, 588[8].
——, **α,α′-o-biphenylenebis-**†, 2675[2].
——, **p,p′-bis(dimethylamino)-,** condensation reactions of, 1627[6].
——, **α-phenethyl-.** See *1-Propanol, 1,1,3-triphenyl-.*

——, **p-(p-tolyl)-,** 1988[3].
Benzohydrol-o-carboxylic acid*, 1226[6].
Benzohydroxamic acid, benzoate, 2161[8].
——, **benzohydryl-.** See *Toluhydroxamic acid, α,α-diphenyl-.*
Benzohydrylamine, *p* alkoxy derivs., anesthetic action of, on cornea, 2158[3].
alkoxy derivs., pharmacol. action of, 2370[8].
——, **p-butoxy-,** 1400[6].
-HCl, 2158[6].

p-ethoxy-, 1400[4].
and -HCl, resolution of, 2158[5,6]
——, **p-isoamoxy-**, 1400[5]
-HCl, 2158[6].
——, **p-methyl-**, and -HCl, 1615[1]
p-phenoxy-, 1400[5]
-HCl, 2158[7].
——, **p-propoxy-**, 1400[5].
and -HCl, 2158[6]
——, *N, N, α*-**trimethyl-**, 3451[8]
——, *ar, ar′, α*-**triphenyl-**, monomol film on $CaCl_2$ soln., 134[5]
Benzoic acid. *(Simple esters (benzyl, ethyl, etc.) are entered here, and the others as derivatives under the names of the corresponding hydroxy compounds.)*
addn. compds. with caffeine, 1161[3].
antiseptic action of, 931[1]
antiseptic action of, effect of H-ion concn. on, 3315[1].
behavior in animal organism, 3496[1].
benzalhydrazide, 2,4-dibromophenylhydrazone, 1085[3].
β - (β - benzalisopropylidene)-α-phenylhydrazide, 2494[7].
benzyl ester, prepn. of, 1787.
binary systems contg., 1745[7].
bismuth salt of—see *Bismuth benzoate.*
depression of f. p. of nitrobenzene by, 2107[8].
detn. in cordials, etc., 95[2]
dielec. const. of soln. in C_6H_6, 2607[9]
dielec. consts. in $PhNO_2$ and C_6H_6, 2780[6].
as disinfectant, 1301[6].
as disinfectant, effect of esterification on, 3060[9].
effect on yeasts, 2178[6].
elec. cond. of, 1751[9].
esters, velocity of reaction with KI, 3687[7,8].
ethyl ester, as a solvent in the catalytic reduction of BzCl, 1396[4].
ethyl ester, saponification of, effect of rate of stirring on velocity of, 1937[3].
excretion of, 1838[1].
extn. with toluene, rate of, 3602[9].
formation from toluene in sunlight, 337[7].
heat of combustion of, 327[3], 862[7], 1748[4], 3379[2].
hydrazide, 2,4 - dibromophenylhydrazone, 1085[3].
hydrogenation of, salts, 1799[1].
ionization consts. of p-substituted, 2944[4].
ionization in aq. MeOH, 2608[6]
isopropyl ester, catalytic decompn. of, 580[2].
manuf. of, 1118[5], P 51[3], P 1631[8], P 3171[7].
mol. assocn. in C_6H_6, 3117[4]
2-naphthyl ester, detection of, 2720[2].
nitration of, P 917[1].
p-nitrobenzalhydrazide, 2,4 - dibromophenylhydrazone, 1085[3].
oxygen bomb detns. with, pressures in, 1193[3].
prepn. of, 2491[7].
as preservative, 2027[1], 3712[8].
reactions at boundary of 2 liquid phases, 1016[2].
reduction of, 181[4].
silver salt, reaction with I, 409[4].
sodium salt—see *Sodium benzoate.*
soly. in Na salt solns. of succinic, fumaric, malic and tartaric acids, ionization const. from, 3372[8].
as stabilizing agent for oils, 1146[5].
system: azobenzene—, 1224[6].
systems of, with amines, 1224[7].
thallium salt, 2818[4].
triphenylmethylhydrazide, 408[5].
tri-p-tolylmethylhydrazide, 408[7].
ultra-violet absorption spectrum of, 708[4].
Benzoic acid, m-acetamido-, metabolism of, 1837[9].
o-acetamido-. See *Anthranilic acid, N-acetyl-.*
——, **p-acetamido-**, metabolism of, 1837[9].

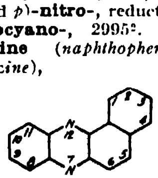
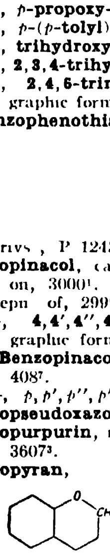
o-**Benzoic sulfinide** See *Saccharin.*
Benzoin (See also *Colloidal benzoin reaction; Gum benzoin*)
heat of combustion of, 327[1].
l, racemization of, 2325[1]
1 naphthalenecarbamate, 1232[9]
oxidation of, 2996[3].
oxime, Cu deriv , 1055[6]
prepn of, 189[9]
reaction with Cu, in pyridine soln , 1074[2].
Benzoin, *α*-**benzyl-**, oxime, Cu deriv , 1055[7].
——, **3,4,3′,4′ - bis(methylenedioxy)-**. See *Piperonyloin.*
——, *p*′-**chloro**-*p*-**dimethylamino-**, oxime, Cu deriv , 1055[7]
——, *p*,*p*′-**diisopropyl-**. See *Cuminoin.*
——, *p*,*p*′-**dimethoxy-**. See *Anisoin*
——, *p*′-**dimethylamino-**, oxime, Cu deriv , 1055[7].
——, *p*′-**isopropyl** - *p* - **methoxy-**, oxime, Cu deriv , 1055[7].
——, *p*-**methoxy-**, oxime, Cu deriv , 1055[7].
——, *p*(and *p*′)-**methoxy-**, benzoates, 1615[8].
——, **4′-nitro-**, acetate and benzoate, heat of combustion of, 327[1].
——, *α*-**phenyl-**, 47[4].
oxime, Cu deriv , 1055[7]
p-**Benzoisopyrazolone***, and acetyl deriv., 1066[5].
Benzol. See *Benzene*
Benzonaphthol. See "2-naphthyl ester" under *Benzoic acid*
Benzonitrile, 2322[5].
reduction of, 371[8].
——, **3,4-dichloro-**, reaction with NaOMe, 2152[4].
——, **dimethyl-** See *Xylonitrile.*
——, *o*,*o*′-**dithiobis-**, 2995[2].
——, *o*-(*γ*-**ethoxypropyl**)-, 905[4].
——, *o*-(**methylmercapto**)-, 2995[2].
——, *m*(*o* and *p*)-**nitro-**, reduction of, 1216[1,2].
——, *o*-**thiocyano-**, 2995[2].
Benzophenazine (*naphthophenazine; phenonaphthazine*),

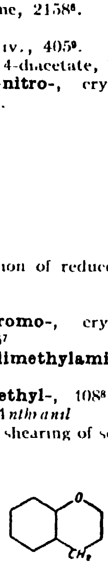


α-**Benzophenazine, 10-amino-**, 195[7].
——, **5,7-dihydro-5-imino-7-phenyl-**. See *Rosinduline.*
9,10 - α - Benzophenazinediol, 5-acetamido-, 603[2].
Benzophenazonium compounds, 5-acetamido - 12 - (*m* - acetamidophenyl) - 12 - *α*— perchlorate, 602[6].
5 - acetamido - 12 - (*m*-aminophenyl) - 12 - *α*— salts, 602[4]
12 - (*m* acetamidophenyl) - 5 - amino - 12 - *α* salts, 602[6]
12-(*p*-acetamidophenyl)-12-*α*— salts, 602[2].
5-amino-12 (*m*-aminophenyl)-12-*α*— salts, 602[5]
12 - (*p* - aminophenyl) - 12-*α*— perchlorate, 602[2].
o-**Benzophenetide, 5′-chloro-**, 3694[6].
——, **5′-nitro-**, 3694[6]
Benzophenone, adsorbed mols. on glass surface, diffusion of, 2268[4]
crystals, growth and soln. of, 1935[1].
derivs , absorption spectra of, 1030[7].
4,5 dichloro 2-nitrophenylhydrazone, 750[6].
4 (*m* nitrophenyl)semicarbazone, 175[6].
oxime, 1-naphthalenecarbamyl deriv , 2319[5].
oxime, reduction of, 1615[2].
prepn of, 408[4], 2999[9]
reduction of, at high pressure in presence of Cu, 3164[1].
reduction of, under pressure in the presence of Cu, 2487[6]
thiocarbohydrazone, 1811[1]
Benzophenone, *p*,*p*′ - **bis(dimethylamino)-thio-**, reaction with Et_3P and with Et_3PO_2, 2977[1].
——, **2-bromo-3,5-dinitro-**, 1229[8].
——, **2-bromo-4′-ethoxy-**, crystallographic form of, 1736[6]
——, **3-bromo-4-ethoxy-**, crystallographic form of, 1736[6]
——, **2-bromo-5-nitro-**, and oxime, 1230[1]
——, *p*-**butoxy-**, and oxime, 2158[6].
——, **5-chloro-2-hydroxy-**, 1238[2]
——, **2-chloro-5-nitro-**, oxime, 1229[9].
——, **3,5 - dibromo-4-ethoxy-**, crystallographic form of, 1736[6]
——, **3,5-dibromo-2′,4′,6′-trimethyl-**, crystallographic form of, 1736[7]
——, **3,4-dichloro-**, reaction with NaOMe, 2152[4].
——, **4,4′-diethoxy - 3,3′-dimethylthio-**, and addn compds. with $HgBr_2$ and with $HgCl_2$, 365[1,2]
reaction with Et_3P and with Et_3PO_2, 2977[1].
——, *p*,*p*′-**diethoxythio-**, reaction with Et_3P and with Et_3PO_2, 2977[1]
——, **3,4-dihydroxy-2′-methyl-**, 402[2].
——, **2,4-dimethoxy-**, 2,4-dinitrophenylhydrazone, 2848[8]
——, **4,4′-dimethoxy-3,3′-dimethylthio-**, reaction with Et_3P and with Et_3PO_2, 2977[1].
——, **3,4-dimethoxy-2′-methyl-**, 385[8], 402[2].
——, **4,4′-dimethoxythio-**, addn. compds. with $HgBr_2$ and with $HgCl_2$, 365[2].
reaction with Et_3P and with Et_3PO_2, 2977[1].
——, *o*,*p*′-**dimethyl-**, 385[7].
——, *p*-**ethoxy-**, crystallographic form of, 1736[5].
and oxime, 2158[4,5].
——, **4-ethoxy-3-methoxy - 2′ - methyl-**, 402[2].

———, *p*-**hydroxy-**, prepn. of, and benzoate, 2158[7].
———, **4 - hydroxy - 3,2′ - dimethoxy-6′-methyl-**, 402[1].
———, **2-hydroxy-3,5-dinitro-**, potassium deriv., 1229[8].
———, **4 - hydroxy - 3 - methoxy-2′-methyl-**, and derivs., 402[1, 2].
———, *p*-**isoamoxy-**, and oxime, 2158[6].
———, *p*-**methoxy-**, oxime, reduction of, 1615[1]
———, *p*-**methoxy-*o*′-methyl-**, 385[8]
———, **2-methoxy-5-nitro-**, and oxime, 1230[1].
———, *p*-**methyl-**, oxime, reduction of, 1615[1].
———, **2,4,6,3′,4′-pentahydroxy-** See *Maclurin*
———, *p*-**phenoxy-**, and oxime, 2158[7]
———, *p*-**propoxy-**, and oxime, 2158[6].
———, *p*-**(*p*-tolyl)-**, 1988[3].
———, **trihydroxy-**, iron deriv., 405[9].
———, **2,3,4-trihydroxy-**, 3,4-diacetate, 1052[9].
———, **2,4,6-trimethyl-4′-nitro-**, crystallographic form of, 1736[6].
β-Benzophenothiazine,
derivs., P 1243[4]
Benzopinacol, catalytic action of reduced Cu on, 3000[1].
prepn. of, 2999[9]
———, **4,4′,4″,4‴-tetrabromo-**, crystallographic form of, 1736[7]
β - Benzopinacolin, *p*-**dimethylamino-**†, 408[7].
———, ***p,p′,p″,p‴*-tetramethyl-**, 108[8].
Benzopseudoxazole. See *Anthranil*
Benzopurpurin, modulus of shearing of sols of, 3607[3].
Benzopyran,

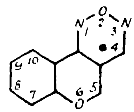


1,2-

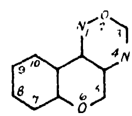


1,4-

1,2-Benzopyran, 3,4-dihydro- See *Chroman*.
—, **2-ethoxy-2,3,4-triphenyl-**, 3167[3].
—, **2 - (*o*-hydroxystyryl)-2-methoxy-3-methyl-**, 3008[3]
—, **2-imino-**, hydrochlorides, 3291[7].
—, **2-imino-3-phenyl-**, 3291[6].
—, **3-isopropyl-2-methoxy - 6 - methyl-2,4-diphenyl-**, 3167[9].
—, **2-keto-**. See *Coumarin*.
—, **2-methoxy-3,6-dimethyl - 2,4 - diphenyl-**, 3167[9].
—, **2-methoxy-2,3,4-triphenyl-**, 3167[3].
—, **2,2,3,4-tetraphenyl-**, 3167[3].
1,4 - Benzopyran, 4-benzal - 2,3 - diphenyl-, 3167[7].
—, **4-benzyl-2,3-diphenyl-**, 3167[6].
—, **2,3-dihydro-** See *Chroman*.
—, **4-(3,4-dimethoxyphenyl) - 5,7 - dimethoxy-2,3-methylenedioxy-**, 2489[6].
—, **2,4 - di-(1 - naphthyl)-3-phenyl-**, 3167[7].
—, **4-keto-**. See *Chromone*.
—, **4-(1-naphthyl)-2,3-diphenyl-**, 3167[5].
2,3,4-triphenyl-, 3167[2].
1,2-Benzopyran - 4 - acetic acid, 7-hydroxy-2-keto-5-methyl-, 909[1].
1,2 - Benzopyran - 3 - carboxanilide, 6,8(1)-dihydro - 2,6-diketo-5,7,8-trimethyl-, 2320[6].
1,2 - Benzopyran - 3 - carboxylic acid, 6,8(1)-dihydro-2,6-diketo-5,7,8 - trimethyl-, and derivs., 2320[6, 7]
———, **6-hydroxy-2-keto - 5,7,8 - trimethyl-**, derivs., 2320[7].
———, **2-keto - 6 - methoxy - 5,7,8 - trimethyl-**, and esters, 2320[7].
1,2 - Benzopyran-2-ol, 6-methyl-2,3,4-triphenyl-, 3167[9]
———, **2,3,4-triphenyl-**, 3167[3].
1,4 - Benzopyran-4-ol, 6-methyl-2,3,4-triphenyl-, 3167[9].
Benzopyranoxdiazine,

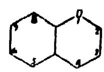


[1 2 6]



-[1 2 5]-

Benzopyran[1,2,5]oxdiazine, 3,5,9 - trimethyl-, 1411[7]
Benzopyran[1,2,6]oxdiazine, 4,5,9 - trimethyl-, 1411[7]
Benzopyranyl, free, derivs. of, 3167[1].
1,2-Benzopyrone. See *Coumarin*.
1,4-Benzopyrone. See *Chromone*.
Benzopyrrole. See *Indole*
Benzopyrylium,



Benzopyrylium compounds, 4 - *p* - anisyl - 2 - (*p* - dimethylaminostyryl) - 7 - methoxy - 3 - methyl - derivs., 3455[1].
4 - *p* - anisyl - 2 (*p* - hydroxystyryl) - 7 - methoxy-3-methyl— derivs., 3455[1].
4 - *p* - anisyl - 7 - methoxy - 2,3 - dimethyl — derivs., 3454[9], 3455[1].
4 - *p* - anisyl - 7 - methoxy - 2 - (*p* - methoxystyryl)-3 methyl — derivs., 3455[1]
4 benzyl-2,3-diphenyl – salts, 3167[6].
3 - benzyl - 2 - (*o* - hydroxystyryl) — perchlorate, 3008[4].
5,7 - dihydroxy - 3 - methoxy - 2 - (3,4,5 - trihydroxyphenyl)— chloride, 3457[4]
2-(3,4-dihydroxyphenyl) — chloride, 3456[7].
2 - (3,4 - dihydroxyphenyl) - 3,6 - dihydroxy— chloride, 3457[1].
2 - (3,4 - dihydroxyphenyl - 3,8 - dihydroxy— chloride, 3457[2].
2 - (2,4 - dihydroxyphenyl) - 5,7 - dihydroxy-3-methoxy — chloride, 3457[2]
2 - (3,4 - dihydroxyphenyl) - 3,7 - dihydroxy - 5-methyl — chloride, 3456[9]
2 - (3,4 - dihydroxyphenyl) - 3 - hydroxy— chloride, 3456[8]
2 - (3,4 - dihydroxyphenyl) 6 - hydroxy — chloride, 3457[1].
2 - (3,4 - dihydroxyphenyl) - 7 - hydroxy— chloride—see *Butinidin* chloride.
2 - (3,4 - dihydroxyphenyl) - 3,5,7 - trihydroxy— hydroxide—see *Cyanidin*.
5,7-dimethoxy-2,4-dimethyl— chloroaurate, 2498[9].
5,7(and 7,8) - dimethoxy - 2,4 - diphenyl— salts, 2499[3].

5,7(6,7 and 7,8) - dimethoxy - 2 methyl - 4 - phenyl— salts, 2499[1].
2 - (3,4 - dimethoxyphenyl)— ferrichloride, 3456[8].

effect of sunlight on, 2529[9].
normal, and in tuberculosis, syphilis and cancer, 1663[1]
temp. effect on, 3300[4].
cell content of, effect of ethyl urethan anesthesia on, 457[3].
cerebrospinal fluid and, 231[4], 1439[5].
change during fever and antipyresis, 3037[9]
charcoal—see *Charcoal*
chemistry findings in diagnosis and prescribing, 3733[4].
chemistry, toxic effects of Au compds. and, 3045[6].
of children, glucose, cholesterol and Ca in, 65[8].
chloride content of, 1098[5].
effect of alkaloids on, 1114[7].
effect of gastric secretion on, 1838[6].
effect of histamine on, 1276[7].
effect of insulin on, 446[9].
in pernicious anemia, 1659[8].
chlorides of, formation of gastric HCl from, 3493[2]
cholesterol and cholesterol ester balance in, relation to liver function, 1448[4].
cholesterol content of, 2015[6], 3179[4].
in anaphylaxis, 1848[4].
in diabetes with arteritis, 67[8].
effect of avitaminosis C on, 437[1].
during ether anesthesia, 3315[1].
during pregnancy, decrease of, 1839[2].
in pregnancy in tuberculosis, 1847[6].
coagulability of, glucose serum and, 2363[8].
coagulation of, 2685[1].
effect of adrenaline-HCl on, 2203[9].
effect of Ca on, 3300[2].
effect of fructose on, 1089[3].
effect of Hofmeister series of ions on, 439[8].
effect of "Novirudin" on, 1684[9].
effect of tissue ext injections on, 3181[1].
glucolysis and, 3491[4].
in hemophilia, 2698[8]
after introduction of various substances, 782[2]
mechanism of, 3698[4].
pathol. changes in ultramicroscopic picture of, 1461[9].
in peptone shock, 2698[9].
coagulation time of, effect of heparin on, 3495[9].
effect of organ exts. on, 3498[3].
effect of plasma proteins on, 3726[1].
effect of Na citrate on, 1856[4].
law for, 624[8]
colloids of, effect of Salluen on, 1273[4].
color index of, 1657[7].
compn. of, after death, 231[3].
in narcosis, 3743[8]
in normal and parathyroidectomized dogs, 2193[8].
in tropics, 2001[8].
in whooping cough, 2015[2].
compn of saliva and, 780[6].
in convulsions, 2878[9].
copper and Mn distribution in organism after injection into, 3191[6].
of cretins, fats and cholesterol in, 444[8].
cyanate in, 1657[6].
of dams and calves immediately after calving, compn. of, 1102[4].
dehydrocholic acid effect on, 3039[7].
density detn. of, 2176[6]
density of, in cancer, 1664[7].
destruction of, bile acid elimination and, 2533[1].
detn of total quantity of, 928[4]
dextrose and levulose effect on, 1280[8]
in diabetes after insulin treatment, 3504[6].
in diabetes, glucolysis of, 1452[4].
in diabetes, protein-fat ratio of, 948[6].
in diabetes mellitus, 1450[4].
in diabetes mellitus, relative vols. of, 1450[3].
in diabetic toxemia, concn. of, 1450[1].
diagnosis of, pptg. serum for, 2174[9].
diastase in, in measles, 237[9].
diastases in depancreatized dogs, 1817[3].
diastatic activity in, 1664[2].
diazo compd. of, 2012[5].
diln of, after ingesting liquids, 938[1].
diseases, surface tension of blood serum and urine in, 781[2,3].
of dog, 440[8].
dried, as fertilizer, 1881[9].
dried, in fertilizer expts. with rape, 792[7].
drying of, 632[5].
duodenal fistula effect on, 948[8].
dyes in, effect of filterability of dyes on excretion by kidneys, 1817[3].
dye transference from mother's, into liquor amnii in acute yellow atrophy of liver, 945[7].
in dystrophies of alimentary and nervous origin, 3733[1].
in eclampsia, 2879[1].
effect of adrenaline, hypophysis ext. and

histamine on, in small vessels of frog tongue, 453[7].
effect of bases and acids on, 1468[6].
effect of changes in NaCl and H_2O content of food on, 1096[4].
effect of darkness and of C-arc radiation on, 1838[5, 6].
effect of hydrocyanic acid and cyanide poisoning on, 3477[4].
effect of mixt. of quinine-HCl and urethan-HCl on, 3041[4].
elec. cond. of, 2684[5], 3463[1]
elec. resistance and capacity of, 1249[7].
enzyme content of, alterations in, 2337[1]
in pregnant and non-pregnant women, 3034[3]
in sympathicotonus, 3467[1].
enzymes in, changes of, 940[5].
enzymes of, during recurrent typhus, 232[5].
ether ext. of, 437[6].
ethyl alcohol content of, 1253[9].
in asphyxiation, 3746[2].
in intoxication, 3474[1].
in ethyl alc. habituation, 1271[5].
ethylene in, during C_2H_4 anesthesia, 2207[3]
exchange between tissue and, 1662[1], 2013[2], 3035[5].
exercise and, 2533[9].
fat-cholesterol content in nephritis, 3503[3].
fat-cholesterol content of, of adipose and myxedematous patients, 1846[6].
fat content in avitaminosis, effect of insulin on, 1658[5].
fat effect on, 2528[8].
fat, in diabetes mellitus in relation to treatment, 2877[7]
effect of pituitrin and pituglandol on, 3029[1].
of fasting children, 616[4].
insulin effect on, 1670[1].
female sex hormone in, 2193[2].
in fever, physicochem. changes in, 1264[8].
fibrin of, in anaphylaxis, 3729[6].
fibrin of, in CCl_4 intoxication, 3717[6].
filtrates, relation between optical activity and reducing power of, 3182[6].
of finback whale, compn. of, 1671[8].
food from, P 3520[8].
formation of, growth-promoting vitamin in, 222[7].
gaseous content of, 2874[2].
gaseous exchange between lumen of stomach and intestines and, 2509[2].
glucolysis in, rate of, 2539[5, 6].
glucolysis in samples of, preventing, 2170[9].
glucolysis in, zinc ion and, 3703[7].
glucolytic power of, 925[2].
in goiter, fats and cholesterol in, 444[8].
grouping of Australian aboriginals, 2001[5].
groups of rabbit, 3736[8].
growth-promoting properties of, effect of thyroid on, 1658[5].
gum arabic effect on, 3502[1].
heart stimulant in, 3722[6].
hematopoietic tissues, effect of HCl on, 1440[3].
hemin formation from hemoglobin A, and existence of 2 hemoglobins, 1244[2].
hemocyanin-contg., transport of O and CO_2 by, 3316[4].
hemolytic and hemopoietic action of exts. of spleen and bone marrow, 2533[6].
hemolyzed, change of lake color of hypotonic, to cover color with simultaneous reappearance of red blood cells in microscopic field of vision, 1665[1].
hemopoëtin effect on, 1839[8].
hemopoietic substances in, in plethora, 1848[7].
heparin content of normal and hemophilic, 3504[7].
heparin effect on, 1855[4].
hexosephosphoric acid in, 234[2].
at high altitudes, compn. and quantity of, 3182[4].
hunger effect on, 1097[5].
of hydrocyanic acid workers, 452[4].
hydrogen, chloride and bicarbonate ions in oxygenated and reduced, distribution of, 229[8].
hydrogen-ion concn. and CO_2-binding capacity at high altitudes, 3496[4].
hydrogen-ion concn. of, albuminuria and, 2699[8].
of *Ascidia mentula*, 2372[4].
in atrophic and dyspeptic infants, 446[6].
in cyanosis, 2878[1].
effect of *d*-glucose or maltose on, 937[8].
effect of submaxillary gland on, 3475[1].
effect of temp. and of diln. on, 2357[1, 2].
effect of tumors on, 2200[8].
hydrogen-ion concn. of circulating, respiration and, 2189[8].
hydrogen-peroxide decompn. by, effect of salts on, 923[4].
hydrogen sulfide fixation in, 2515[3].
in inanition, 3187[5], 3488[1].
infections of, effect on reticuloendothelial app., 1664[2].
ingestion of cooked, effect on feces, 3018[4].
inorg. compn. of, 2538[8].
insulin effect on, 1274[1].
insulin effect on phosphate and K content of, 1470[7].
insulin effect on reaction of, 1862[3].
insulin in, of normal and pancreatic diabetic dog, 441[6].
from insulin-treated animals, effects on glucemia, 2018[6].
internal secretion effect on, 3028[3].
iodine content of, effect of menstruation on, 2010[7].
ion displacement in, effect on kidney function in pregnancy, 1265[6].
ion equil. in, relations between reaction and, 1098[3].
ion passage from, to cerebrospinal fluid, 3491[7].
iron in, of diff. human races, 3029[6].
irradiation of, effect on cell electrophoretic potential, 3300[2].
irradiation of, effects of, 939[7].
in kala-azar, 450[2].
in kidney insufficiency, diazo and urochromogen reactions in, 1665[8].
in kidney insufficiency, pathogenetic relations between true uremia and substances retained by, 1666[3].
lactic acid content of, 2011[6], 3502[4], 3721[4].
in carcinoma, 2197[9], 3502[6].
under normal and pathol. conditions, 3186[7].
under respiration, 441[4].
of larvae of honey bee, 459[3].
lead poisoning effect on, 3038[4].
lecithin, cholesterol and fatty acids in, during vitamin B-free diet, 934[5].
in leg weakness of chickens, Ca and P in, 3312[4].

in leprosy, 3504[4].
lipase in gastric juice from contamination with, 1087[3].
lipase of, 1248[1].
lipase of, effect of salts on formation of, 1269[3].
lipase of, effect of soy bean feeding on, 3488[7]
lipoid partition in, 1449[1]
lipoids of, in cancer, 1847[9]
lipoids of, in pregnancy, 621[5]
measuring, for microanalysis, 2174[5].
mercury-combining power of deproteinized, 3468[4]
metabolite concn. of, in renal insufficiency, effect of protein rich diet on, 2014[1].
metal salts in, after absorption from salve, 449[1]
methylguanidine in, after parathyroidectomy, 2537[4].
molded products from, 265[2]
of mother and child compared, 3733[6]
during narcosis, Ca Mg ratio in, 2368[1].
of *Necturus*, compn. of, 2512[8]
in nephritis, inorg. P and Ca of, 1451[1]
of newborn, 65[9]
nitrification of dried, under tropical conditions, 3768[1]
nitrogen availability in dried, effect of P_2O_5 and K_2O on, 642[1]
nitrogen (non protein) of, effect of sodium oleate on, 3721[6]
nitrogen partition of, effect of iodides on, 2024[4]
nitrogen retention in edema, 3503[7]
nitrogen retention in, kidney function and, 2009[1].
novasurol effect on, 3191[4].
oocytin in, 621[8]
oxygen-, acid-, and base-combining properties of, 2342[3]
oxygenated, effect of CO_2 tension on concn. of acids of plasma of, 1101[6]
oxygen consumption in children's, 2362[9]
oxygen consumption of, hormonal and pharmacologic influence on, 59[9]
oxygen exchange, and the circulation, 1263[4]
oxygen in, in relation to respiration and minute vol., 241[5]
oxyhemoglobin in horse, elements in, 1219[8]
oxyhemoglobin prepn. from, 3470[6]
in parathyroidectomy and in guanidine injection, 2366[1]
during parenteral excitation of activity of digestive glands, 439[6]
passage of polypeptides of digestion into portal circulation and arrest in liver, 2194[8]
peptide N in, 226[4]
perfused through liver, effect of sp. lymphagogs on, 2530[3]
perfusion of citrated, in kidneys, 227[4].
phenols in, in diseases, esp. pernicious anemia, 3470[4]
phosphates in, effect of exercise on, 2527[5]
effect of sunlight on, 2188[9].
effect of vitamins A and C on, 64[1].
in fibroma, 1849[2].
variations of, 1088[9].
phosphoric acid in, effect of glucolysis on, 211[5].
phosphorus and Ca content of, effect of ultraviolet light on, 2189[1].
phosphorus compds. in, autolytic decompn. of, 940[7].
phosphorus compds. in, distribution of, 228[4].
phosphorus compds. in, in tuberculosis, 1659[9]
phosphorus in, of newborn, 65[9].
partition of, 1656[9]
time limit for detection of, 1092[3].
phosphorus (inorg.) of, in rats fed on normal, rachitic, and irradiated rachitic diets, 1433[4]
of *Pieris brassicae*, 243[7]
pituitrin effect on, 1462[2]
plastics from dried, 3064[6]
in pneumonia, chem. study of, 2364[8]
in porphyrinuria, coproporphyrin in, 426[2].
potassium and Ca content of, effect of irradiation on, 940[8]
potassium and Ca content of, in circulatory diseases, 3732[5]
potassium in, and K-Ca ratio in essential hypertonia, 233[8]
in pregnancy and puerperium, amino acids and polypeptides in, 1265[7]
in pregnancy and puerperium, importance of changes of, 1264[9]
in pregnancy, cholesterol in, 1453[5]
preservative for whole, H_3BO_3 as, 216[2]
protein decompn. products in, 2695[9]
protein effect on, after parenteral injections, 3034[6]
protein-free, xanthoproteic reaction in, 1666[1]
proteins of, 609[2], 920[1]
acetylation of, 3017[1]
tuberculin reaction and, 1445[6].
pyrimidine nucleoside from, 229[4]
quinine concn. in circulating, 240[6].
racial index of Japanese in Hokurika dist., 3701[2].
radium effect on, 3193[7]
reaction of arterial, in circulatory diseases, effect of exercise on, 3186[9]
reaction of, for diagnosis, 235[2]
effect of sea-bathing on, 2007[2]
in newborn, regulation of, 1448[7].
pulmonary ventilation and, 2194[4].
reducing substances in, in adrenaline hyperglucemia, 242[2]
in renal insufficiency, phenol in, 1447[8].
residual N content of, in relation to renal insufficiency and uremia, 2877[4].
residual reduction of, 2360[1]
respiration of animals joined so as to receive same supply of, 2875[2].
in rickets, 932[8]
in rickets pathogenesis, Ca and P in, 935[6].
Röntgen ray effect on cholesterol content, H-ion concn., f. p. depression and surface tension of, 1416[2].
salt content of, relation of certain endocrines to, 1108[9].
salts of, diuresis and, 2875[3].
samples, preservation and transportation of, 1825[3]
of seal, 1672[8].
sea-water injections and, 2367[4].
silver salt soly. in, 454[2].
in skin diseases, Ca content of, 1448[9].
in sleep, 2358[1].
in sleep, Ca content of, 2357[9].
sodium chloride content of, during fatigue, 2357[3].
relation to gastric HCl, 441[3].
variation with food ingested, 1652[9].
solids ratio of serum and, 2532[1].
soy-bean diet and, 2355[2].

staining of pictures of, effect of H-ion concn. on, 2171^{6}.
stains, analysis in criminal cases, 2515^{4}
sugar—see *Blood sugar*.
sulfur content of, in cirrhosis, 3188^{2}.
sulfur (labile) in, 3728^{9}
sulfur passage from exudates into, 2200^{8}
suspensions in, elec. capacity of, 1248^{9}
and symptomatic changes following intravenous injections of a variety of agents and solns., 1855^{6}.
syphilis effect on, 1269^{6}, 1451^{8}
tetany effect on, 2197^{1}
thiasine in, 1814^{3}.
of thyroidectomized horses, fats and cholesterol in, 444^{7}.
thyroparathyroidectomy effect on, 1417^{3}
in thyroparathyroidectomy, effect on normal blood pressure, 1258^{9}
transfusion of, accidents in heterogeneous, 3721^{7}.
transport of gas by, 2532^{3}
under tropical conditions, hemoglobin and Fe in, 3029^{1}.
in tuberculosis, 1446^{2}, 3501^{3}
NaCl and water content of, 1446^{1}
stability of some of constituents of, 1660^{5}
tumor effect on, 238^{4}.
ultra-violet light effect on, 2528^{1}
urea detn. in, of Europeans and natives in tropical countries, 2008^{9}
urea formation in, during digestion, 1099^{1}
urea in, of rats immune to Jensen's rat sarcoma after X radiation, 445^{5}
urea in saliva and, 928^{1}
urea-N concn. of, 3181^{2}
urea-N concn. of, and effect of fixation and anesthesia on it, 1141^{2}
in uremia 2197^{6}
uric acid in, effect of light on, 1838^{9}.
uric acid levels in, 1659^{5}
uric acid metabolism in tuberculosis, 1446^{1}.
uric acid oxidase of, 2010^{6}
uric acid retention in, during fasting, 1434^{4}
of *Vanessa urticae*, 243^{7}.
viscosity of, effect of thyroid feeding on, 1440^{2}.
viscosity of, shock and, 2367^{8}.
vitamins in, growth-promoting and antirachitic, 3024^{9}.
vol. of, detn. of, 2514^{8}, 3475^{3}.
detns. in splenomegalias, 1447^{7}.
in heart and lungs, 3475^{2}.
in myxedema, 3731^{9}.
water balance with tissues, psychic modification of, 1837^{3}
in whooping cough, 948^{7}
of women, cyclic variations in uric acid and total non-protein N content of, 2522^{5}.
Blood, analysis. (See also *Hemoglobinometer*.)
books: Les sucres du sang, 773^{4}, Mikromethodik quantitative Bestimmung der Harn- u. Bluthestandteile in kleinen Mengen f. klin. u. experiment. Zwecke, 1256^{4}.
colorimetric calcn. in, 1823^{2}.
detection, 771^{7}, 1251^{2}, 2175^{2,3}, 2340^{9}, 2513^{9}, 3176^{9}.
detection in feces, 1420^{9}.
detection in urine, 2199^{5}.
detection of aniline in poisoning, 2175^{7}.
of bilirubin, 772^{8}.
of magnesium in Ca oxalate ppts. in, 1640^{2}.
of nitrates, 2175^{9}.
of nitrites, 2175^{9}.
of phenols, 3470^{4}.
of phosphorus, time limit for, 1092^{3}.
detn. in feces, 1250^{8}
detn. of alkalies, 69^{1}
of amino acids, 2686^{5}
of ammonia, 1641^{6}, 2190^{5}, 3185^{3}
of bases, 217^{3}.
of bicarbonates, 772^{1}, 1094^{4}, 2515^{2}.
of bile acids, 2013^{4}.
of bile salts, 927^{7}.
of bilirubin, 2514^{9}, 2686^{5}, 3306^{6}, 3473^{3}.
of bromine, 2865^{1}, 3709^{1}
of calcium, 61^{1}, 431^{6}, 2515^{1}, 3473^{1}, 3474^{8}
of carbonates, 2515^{2}
of carbon dioxide, 1824^{9}.
of carbon monoxide, 60^{4}, 1192^{1}
of chlorides, 773^{3}, 3711^{2}.
of chlorine, 3473^{2}
of cholesterol, 613^{1}, 2341^{3}, 2686^{5}, 3710^{2}

of hydrogen ion concn., electrode for, 2340^{4}
of indican, 2686^{5}.
of inulin, 3472^{6}
of iodine, 1092^{6}
of iron, 1824^{3}, 2172^{1}
of lactic acid, 1252^{4}, 1255^{3}
of lecithin, 3710^{2}.
of lipoids, 3474^{5}
of methemoglobin, 1255^{1}, 2342^{7}.
of nitrogen, 1823^{8}, 3306^{6}, 3477^{8}.
of oxygen, 1824^{9}
of oxyhemoglobin, 3470^{5}.
of phenols, 3470^{4}.
of phosphates, 1093^{1}, 3711^{2}.
of phosphorus, 61^{1}, 431^{6}, 1252^{4}, 2341^{6}.
of protein, 927^{9}, 937^{7}, 1250^{7}, 2514^{7}.
of reducing substances, 3475^{8}
of salicylic acid, 3476^{2}
of sugar, 437^{9}, 771^{9}, 926^{9}, 1640^{6}, 1641^{7,9}, 1660^{1}, 1824^{5}, 1826^{1,5}, 2171^{6}, 2173^{2}, 2339^{8}, 2340^{8}, 2528^{4}, 2865^{5}, 3031^{7}, 3470^{7}, 3471^{9}, 3472^{1,5,6}, 3475^{8}
of sugar, effect of K oxalate on, 1824^{1}.
of sugar, taking blood for, 927^{4}.
of sulfates, 2515^{6}, 3711^{2}.
of tryptases, 3306^{4}
of urea, 1640^{1}, 1823^{8}, 1824^{2}.
of uric acid, 229^{4}, 1251^{4}, 1642^{6}, 1814^{5}, 1824^{9}, 2171^{5}, 2686^{5}.
hydrogen-ion concn. in, 1168^{6}.
measuring blood for, 2174^{5}.
postmortem, 2172^{7}.
Blood corpuscles. (See also *Hemagglutination*; *Hemagglutinins*; *Hemolysis*.)
amount of, fluctuations in, 3496^{9}.

benzene effect on, 3522[2].
effect on blood reaction in newborn, 1448[7]
ethylene distribution between plasma and, in anesthesia, 2207[4]
formation of, effect of anemic blood on, 1263[9].
glucose adsorption by bovine, 610[8].
glucose dehydration by, 3176[4]
glucose disappearance in, 625[9].
glutathione in, 228[5].
inorg. compn. of, effect of hemorrhage on, 2538[8].
salts in blood plasma and, ratio of, 921[1].
sedimentation test, 1825[2]
stability in acidosis, 1418[9]
sugar distribution between plasma and, 1842[8].
suspensions of, viscosity of, 2695[5].

Blood corpuscles, red (See also *Hemagglutinins; Hemolysis; Polycythemia.*)
adsorption of diphtheria toxin by, effect of quinine on, 1276[6]
anaphylactic shock and, 2196[6]
anaphylactoid reaction producing reagents and, 3748[1]
appearance under dark ground illumination, 620[6].
bimol. hemoglobin layer on surface of, 1816[9].
bismuth effect on, 950[4].
in blood and serum in plethora, 1818[7]
in blood, effect of desiccated spleen and bone marrow feedings on content of, 2190[7].
in blood, effect of living at high altitudes on content of, 3182[1]
bone development and, 916[4]
cholesterol esters in, in pregnancy, 3031[8]
colloid chem. condition of, indication by reversion of hemolysis, 1665[6].
decay of, urobilin elimination and, 2013[8].
destruction in thyroid treated amphibian larvae, 2015[9].
destruction of, urobilin and, 231[6]
detns. in tuberculosis, 1416[7].
diam. of, measurement by diffraction, 1420[1].
diam. of, measuring, 2173[4]
diseases of, diagnosis of, 946[2].
effect of germanium compds. on, 3513[1].
effect of nuclear staining on, of guinea pigs poisoned with Pb, 1663[6]
elec. discharge of, effect on rate of their sedimentation, 1819[7]
electrophoretic potential of, effect of direct irradiation of blood on, 3300[2].
formation of, effect of anemic blood on, 129[3].
formula in normal human being and its change in exptl. anemia, 3732[8].
freezing point of ambient fluid and, 2008[5]
gas metabolism of, effect of barometric pressure on, 3723[7].
gel formation from, by AcOH, 3699[2].
generating action of GeO_2, 1464[6].
glucose adsorption by, 925[2].
glucose adsorption by, altering by narcotics and lipoids, 1471[3].
glucose content of, 1439[5].
hematoporphyrin effect on, 1632[1].
heterogeneous antigens in denucleated, 233[5].
in liver diseases, 3503[9].
in nephritis, 68[7].
neutrality regulation by, 625[5].
osmotic resistance of, effect of cations on, 3465[7].
permeability of, 2510[4].
phosphorus in, 2875[8].
porphyrin action on, effect of Ca salts on, 1266[2].
potassium content of, 2539[1].
preservation *in vitro* and elective poison sensitivity of, 924[2].
resistance, spleen and, 3495[7].
resistance to hemolysis by saponin and cobra venom of, normally and in beriberi, 2700[1].
resistance to hemolysis in avitaminosis, 1844[1].
sedimentation velocity of, 439[1], 2864[3], 3728[4].
detn. of, 1250[6].
detn. of, factors of error in, 61[2].
in diagnosis of latent or active tuberculosis, 1453[4].
effect of medicaments on, 1419[8].
effect of respiration on, 1821[3].
effect of thyroid feeding on, 1440[2].
Hofmeister series and, 439[7].
in leprosy, 1461[8].
of mother and child, 3733[7].
in prognosis of tuberculosis, 3501[3].
rouleaux formation and, 620[4].
in tuberculosis, 66[9], 3501[3]
in tuberculosis diagnosis, 2196[2].
sensitization for light and Röntgen rays by putrefaction-porphyrin, 2513[1].
shape of, effect on respiratory function, 1263[7], 2532[9].
in shock, vol. of, 948[1].
surface compn. of normal and sensitized, 771[2].
suspensions of, elec. capacity of, 1249[2].
variations of, measure of, 2171[3].
weight, diam. and vol. of, effect of artificial venous obstruction on, 940[6].

Blood corpuscles, white. See *Leucocytes.*

Blood pigments. (See also *Chlorocruorin; Hemoglobin; Oxyhemoglobin.*)
chemistry of, 1087[9].
constitution of, 1248[9].
detn. in normal tissues and tumors, 773[1].
iron salts and, 1419[6].
porphyrins and, 608[6].
porphyrins from, 770[3].
reaction with $K_3Fe(CN)_6$, 926[1].
synthesis in eggs during incubation, tryptophan and, 2362[5].
transformation products of, 56[8], 2333[9].
in yeast, 3174[9].
yeast effect on, 3016[5].

Blood plasma. (See also *Blood, analysis.*)
acid-base equil. of, in diabetes, 782[9].
acid base equil. of, in health and disease, 1101[4], 1107[2], 1454[8].
acids in, of children, 69[2].
agglutinins in, behavior of, 947[3].
alkali reserve of, detn. of, 2515[2].
beef, concn. of certain constituents of, 1102[2].
in carcinoma, effect on explanted tissue, 1661[2].
change during fever and antipyresis, 3037[9].
changes in, method for study of, 2439[2].
chloride equil. between cerebrospinal fluid and, effect of protein concn. on, 3030[8].
chlorides in, effect of forced respiration on, 235[2].
cholesterol content of, in anaphylaxis, 1848[4].
development of, 65[1].
Donnan equil. in, 2194[7].
dyes in, disappearance of intravenously injected, 1465[1].

effect of coagulation-diminishing salts on, 920[1].
effect of dild., on sedimentation rate of erythrocytes, 439[1].
electrolyte concn. of, in pneumonia, 2364[8].
ethylene distribution between cells and, in anesthesia, 2207[4].
fibrin formation in, during As poisoning, 1461[9]
fibrinogen content of, in anaphylaxis, 1848[4].
growth of normal and neoplastic tissue cultures in previously modified, 2357[5].
hemolytic power of hemoglobinuric, effect of warming on, 2361[9].
hydrogen-ion concn. of, 3302[1].
of *Ascidia mentula*, 2372[4].
detn. of, 3306[3].
relation between colorimetric reading and true, 1093[6].
ion constituents of, changes in equil. of, 2508[6].
ion content of, effect of morphine on, 2705[3]
ionic equil. in, effect of cancer on, 1848[5].
of mother and child compared, 3733[7].
photoöxidation of, 2506[3].
protein groups of, analysis of, 2174[3].
proteins of, "effective" osmotic pressure of, 3300[3]
effect of India ink injection on, 3728[4].
effect on coagulation time, 3726[1].
function of, 1440[6].
osmotic pressure of, 3464[7].
salts in blood corpuscles and, ratio of, 921[1].
in sarcoma, as medium for culture of tissues, 1821[8].
in sepsis, changes in colloidal structure of, 3032[1].
sugar distribution between corpuscles and, 1842[8].
surface tension of, changes in, 1105[9].
effect of thyroid gland on, 1103[8].
in shock, 1104[5].
transfer of intravenously injected substances from, 2513[3].
urease in, of *Limulus*, 1872[5]
viscosity of, effect of proteins, protein fractions and chlorides on, 1264[9].
vol. changes in myxedema and cardiac edema, 3731[9].
Blood platelets (*thrombocytes*), anaphylactoid reaction-producing reagents and, 3748[1].
in anaphylaxis, 3729[7].
antibodies which load microörganisms with, 1460[6].
in asphyxia, 2875[1].
effect of vitamin A deficiency on count of, 1653[1].
genesis of, in light of oxidase reaction, 1668[3].
in infants, 944[2].
physiol. study of, 3721[3].
Blood poisoning. See *Septicemia; Toxemia.*
Blood pressure, after adrenalectomy, effect of choline and choline esters on, 1280[4].
adrenaline effect on, 3508[9], 3509[4]
adrenaline effect on, in essential hypertension, 945[6].
adrenalinemia and arterial, 1440[1].
analysis of, 454[5].
antagonistic action of insulin and atropine on vagus nerve in expts. with, 1464[4].
arterial, effect of variations on adrenaline secretion, 1843[2].
in arterial hypertension, effect of "benzycin" and of "benzyphos" on, 1853[2].
arterial hypertension treatment with $CaCl_2$ and KCl, 949[6].
calcium effect on, 1465[4].
cephalin effect on, 1463[9].
chem. regulation by liver, 3182[5].
control with hepatic extract, 2009[7].
depression of arterial, from irradiation, 939[7].
effect of blood in thyroparathyroidectomy on, 1259[1].
of exts. of ovary and testicle on, 1438[8].
of guanidine derivs. on, 3046[9].
of histamine and NaCl on, 1273[7].
of hypertonic dextrose solns. on, 3183[8].
of manganese treatment of thyroid on abnormal, 1272[1].
of nitric acid esters on, 3043[7].
of ovarian perfusion fluid on, 3183[7].
effect on peristalsis, 2009[1]
effect on protein decompn. products in blood, 2696[1].
high, from affinity of serum proteins for water, 1108[8].
basal metabolic rate in, 3504[3].
cholesterol content of serum in, in relation to its power to hydrolyze fats, 3736[8].
ephedrine treatment of, 3041[3].
guanidine excretion in relation to, 3732[1].
guanidine theory relative to, 3730[7].
from nicotine, cytisine or lobeline, yohimbine effect on, 1863[9].
radium treatment of, 450[2].
hypotensive action of pancreatic ext. and hypertensive action of adrenaline, 1858[1].
insulin effect on, 1271[2], 3192[8].
iodine effect on, 1463[3].
lowering with Na phenobarbital and with phenobarbital, 1851[2].
organ ext. effect on, 2193[3].
of portal vein, effect of sp. lymphagogs on, 2530[2].
posture effect on, 3495[2].
in renal insufficiency, effect of protein rich diet on, 2014[4].
rubidium effect on, 2017[9].
in sleep, adrenaline effect on, 2357[9].
thujone effect on, 1114[4].
thyroid and Mn treatment in cases of abnormal, 3740[1].
thyroparathyroidectomy effect on, 1447[4].
in tuberculosis, cholesteremia and arterial, 1847[6].
Blood serum. (See also *Antitoxins; Blood, analysis; Blood sugar; Hemolysis; Syphilis; Wassermann reaction.*)
accumulation of water, salts and lipoids in, as preliminary to sweating, 778[6].
acidity in fowls with polished-rice disease, 1430[7].
activated, enzyme action in, 945[1].
activation of, 2877[6].
agglutinating, effect of Ra α-rays on titer of, 627[9]
agglutination by, effect of arc-light irradiation on, 1845[6].
agglutinins in, behavior of, 947[2].
agglutinins in horse-erythrocyte anti-, 771[4].
albumin of, heat effect on, 3114[5].
interaction with $Fe_4[Fe(CN)_6]_3$, 3114[9].
iodine effect on, 1998[6].
localization of hemolysin of hemolytic immune serum in, 2539[8].
peptic hydrolysis of, 609[4].

radium ray effect on, 2685[6].
alkali-binding power of, in childhood, 3726[2].
alkali content of, of children, 691[4], 2696[9].
alkalosis of, from Et_2O anesthesia, 3743[8].
anaphylactic, effect on complement, 2197[1].
anaphylatoxin-like properties of, 3186[8], 3502[6].
anaphylaxis with heated, 2697[7].
anti-brain, phosphoric acid excretion in urine after treatment with, 1846[9].
anticarcinoma, for treatment of implanted malignant tumors, 1109[9].
antidiphtheria, precipitation of antitoxic proteins by electrodialysis, 948[2]
anti-, effect of antigen concn on titer of, 1461[3].
antigen-antibody reaction, 235[7]
antigenic character of heated, 1267[5].
antipepsin of, 942[5]
antipneumococcus, immunol characteristics of water insol. protein in, 2697[6].
protective substance in, 1455[1]
sp precipitates obtained from, 1459[8]
antiserum, effect against sol. toxic substance of *B. coli*, 1669[1]
antitoxic, P 2228[6]
antitoxic value of, effect of CH_2O on, 2201[1].
atropine resistance of dogs treated with normal, 1858[5].
atropine sulfate inactivation by rabbit, 212[8].
autolysin of, protein therapy effect on, 1111[4].
auto-, reaction in tuberculosis, 233[1]
in avitaminosis, effect of V factor on growth of influenza bacillus, 1436[5]
bacterial prepns and, 2046[9]
before and after tar cancer, 3735[7].
bilirubin of, liver function and, 1441[1].
bismuth salts in, binding of complex, 70[4].
book: La chlorure de sodium dans le serum du cheval, 1263[8]
calcium after thyroparathyroidectomy, effect of bleeding on, 1838[8]
calcium and inorg. P in, of rachitic rats, 1655[4].
calcium content of, 1438[2], 2190[1], 3725[9]
in eclampsia, 783[5].
effect of ovaries on, 1264[7].
effect of radiation on, 3507[5].
in fever, 237[2].
in hypo- and hyperglucemia, 1099[4]
of normal and thyreoparathyroprivic dogs, influence of orally administered Ca salts on, 230[5].
pathol. variations in, 2877[8].
in tuberculosis, 1105[1].
calcium in, state of, 2193[1], 2513[5].
calcium phosphate soly in, 2538[2].
calcium phosphate soly. product in, 3301[2].
calcium, Na and K in, normally and in renal disease, 441[9].
calcium soly. in, 2360[1].
cancer diagnosis by, 2697[2].
in cancer, effect of radio-therapy on, 1664[4].
in cancer, refractometric study of, 1664[8].
carbon dioxide absorption by, effect of temp. on, 2864[4].
in carcinoma, effect on explanted tissue, 1661[2].
cellular metabolism in, manometric detn. of, 1421[2].
changes in, method for study of, 2439[3].
changes in, which det. Wassermann reaction, 3732[7].
charcoal from, colloidal diagnostic, 2173[9].
cholesterol and cholesterol ester balance in, relation to liver function, 1448[4].
cholesterol content of, clinical significance of, 2533[1].
effect of saponin of *Primula elatior* on, 3509[2].
in hypertonicity, relation to its power to hydrolyze fats, 3736[8].
in lead poisoning, 950[5].
in pernicious anemia, 1667[5], 3730[1].
cholesterol in, state of, 624[2].
chromogens in, in kidney disease, 1665[9].
coagulation of, 3303[6].
in colloidal benzoin reaction, 779[7].
colloidal condition and chem and phys. constitution of, 3183[4]
colloidal Au pptn by, 1106[6].
colloid osmotic pressure of, membrane equil. and, 2170[3].
colloids in, in cancer, 3735[3]
colloids in kidney diseases, absorption of dyes by, 3187[3]
colloids of, 920[9]
complement-binding expts. with, against bacteriophages and bacterial exts , 1104[7].
complement content of, insulin effect on, 3314[8]
complement deviation by, in pregnancy, 3736[7].
complement, lytic and opsonic properties of, 1844[4]
compn. of, effect on toxin action, 613[1], 623[8].
concn of, detn. of, 1640[2]
constituents of, physicochem properties of, 1249[9]
constitutional serology and its application in biology and medicine, 1106[3].
in detn. of amt. of jaundice, 2340[7].
diagnosis of syphilis, 1268[4].
in disease, inorg. constituents of, 2696[4].
Donnan equil and osmotic pressure relation between cells and, 3725[6].
drying of, 632[5].
in duodenal fistula, chlorides in, 948[8].
of eel, effect on secretion of Harder's glands, 447[1].
effect of coagulation diminishing salts on, 920[1].
effect of dild , on sedimentation rate of erythrocytes, 439[1].
effect of dog, on human blood, 1447[3].
effect on anaerobic respiration of yeast, 929[9]
on bactericidal action of acridine dyes, 2345[1].
on diffusibility of Ca, 2512[2].
on hemolysis, 67[4].
on mastic, 3492[1].
on paramecia, 1449[8]
on pharmacol. action of drugs on intestines, 1464[1].
on tumor growth, 2197[2].
elec cond. of, influence of protein concn. on, 230[2].
electrodialysis of, 3030[1].
electroendosmosis of, through serous membranes, 2338[5].
electrolytes of, effect of vomiting on, 1107[7].
electrolytes of, venesection and dissocn. of, 2013[2].
ether effect on, 623[9].
ether-sol. constituents of, in serological reactions, 236[6].
evapn. of, app. for, 3468[9],
filter for, P 2[9].

flocculation reactions, surface tension in Wassermann test and in, 1446[9].
freezing point of, changes in, during lobar pneumonia, 3732[2].
globulin—see *Globulins*
glucose in, effect on blood coagulability, 2363[8].
in gynecological diagnosis, photochem. reaction of, 2015[1].
hematin in, 3491[6].
hematin in, of sick persons, 1245[8].
hemolytic action of, effect of volatile chemicals on, 1443[7].
hemolytic power of hemoglobinuric, effect of warming on, 2361[9].
hemolytic titer of, effect of hemorrhage on, 627[4].
hemopoietic substances in, in plethora, 1848[7]
human native, whole blood serum and, 1417[1].
hydrogen ion concn of, 3302[1].
  effect of diln on, 2357[2]
  $p_{K'}$ of Henderson-Hasselbalch equation for, 609[5].
  relation between colorimetric reading and true, 1093[6].
immune hemolytic, effect on hemolysis, 3019[9].
immunizing substances from, P 970[6].
in inflammation, 3035[7].
inorg. compn of, effect of hemorrhage on, 2538[8]
iodine binding by, 1089[1].
ion distribution in, 2009[9]
in joint diseases, sp. viscosity of, 237[7]
Kottmann reaction of, effect of olive oil treatment on, 3036[2]
lipase of, in diseases of pancreas or pernicious anemia, significance of atoxyl resistant, 945[5].
  significance in psychiatry and neurology of quinine-resistant, 1844[9].
  in tuberculosis, 233[2], 2196[1].
  urethan effect on, 1816[9].
lipoids, effect of syphilis on distribution of, 1266[7].
lipoids of, in pregnancy, 3031[6].
magnesium and Ca of, menstruation and, 3033[7].
measles prevention by immune goat, 1459[4].
of mother and child compared, 3733[7].
narcotic effect on, 1115[6].
nephelometry of, 1822[7].
in nephritis, 68[7]
oxalic acid in, 3739[2]
pancreatic lipase in, in diseases of pancreas, 1265[9].
peptidase content of, of paralytic with malaria and other infections, 1265[6].
peptidase in, 52[7].
peptidase in, in fever, 2363[9].
peroxidase detection in, 3472[7].
phosphorus content of, 2190[1]. 2875[8].
phosphorus content of, effect of radiation on, 3507[5].
phys. properties of, study by addn. of substances which combine with water, 770[8].
in plethora and plethoric anemia, 2877[5].
potassium and Ca content of, normally and in disease, 2014[1].
  relation to ovarian function, 779[8].
  vegetative nervous system and, 1841[4].
precipitating, for diagnosis of blood and of sperm, 2174[9].
precipitin of, reaction of milk to, 1669[2].
in precipitin reactions, classification of, 1286[8].
in pregnancy, lipolytic enzymes in, 1453[7].
in pregnancy, protein concn. in, 1453[8].
proteases of, 3465[2].
protein and residual N in, of animals suffering from burns, 1844[2]
protein content of, effect of nutritional factors on, 2526[7].
protein detn. in, 1250[7].
protein fractions of, sp. rotation dispersion of, 1819[9]
proteins of, 2507[3].
  acid pptn. of, 3704[8].
  alkali union with, 2685[9].
  buffering properties of, 1637[1].
  colloidal condition of, 1661[9].
  detns. in tuberculosis, 1446[2].
  effect of phys influences on colloidal condition of, 1636[4].
  effect of thyroid feeding on, 1440[2].
  electrodialysis of, 3704[4].
  nomenclature of, 2170[1].
  osmotic pressure of, 3464[7].
  refraction of, 2685[6].
  tyrosine and trytophan content of, 2012[8].
  viscosity of, 937[7].
reaction with alkaloids, 3020[2].
reducing power of, serological diagnosis of cancer based on study of, 1663[2].
refractive index and protein content of, detn. of, 2514[7].
sensitization by mixts. of porphyrins and, 1815[9].
sensitization with albumin and pseudoglobulin from normal and immune, 1847[1].
serol differentiation between lecithin and cholesterol, 1106[7].
sodium in, activity of, 1658[2].
solids ratio of blood and, 2532[1].
spectrum of, 1090[4].
surface tension of, 2696[4].
  const. value of, 1438[6].
  effect of emetics, purgatives, etc., on, 1246[4].
  in liver disease, 628[1].
  in normal and pathol. conditions, 781[2].
  in normal and pathol. conditions, esp. in tuberculosis, 2200[1].
in syphilis, lipolytic power and cholesterol content of, 3504[7].
therapeutic acitivity of, effect of salts on, 2879[7].
thiocyanate content of, 1658[9].
toxicity of agar agar treated, 1468[5].
toxicity of, contg. gelose or starch, 1639[4].
toxicity of, left in contact with starch, 2695[9].
toxicity to paramecia, effect of arc-light irradiation on, 1845[8].
toxin - antitoxin flocculation phenomenon, 3739[4].
trypsin flocculation reaction in, 1662[2].
in tuberculosis, 66[6].
  adrenaline, K and Ca of, 3501[3].
  effect of Ca lactate and thyroid ext. on Ca content of, 1444[9].
tuberculosis diagnosis by, 1105[7,8].
ultrafiltration of, 1092[4].
viscosity of, 1108[7].
Wassermann reaction in, filtered through collodion sacs, 1108[6].
of whales, in detn. of relationship of diff. kinds, 1671[3].

Blood sugar. (See also *Blood, analysis; Glucemia; Hypoglucemia*) 2359[5].
adrenaline and its derivs. and, 457[8].
adrenaline effect on, 3508[9].
in arhythmia perpetua, digitalis effect on, 3192[5].
arsphenamine effect on, 3510[8].
after asphyxia in decapitate cats and its relation to adrenal glands, 1838[7]
atropine effect on, 2207[6].
in carcinoma, 945[2].
of children, 65[9]
circulation of, 3729[8]
colloidal character of, 921[1].
combined, 1098[4].
dihydroxyacetone effect on, 2534[8], 3741[1].
in diphtheritic intoxication, 69[7].
disappearance of, rate of, 621[1]
distribution between corpuscles and plasma, 1842[9].
effect of antipyretics of pyrazolone group on, 1112[7].
of exts. of ovary and testicle on, in normal and in diabetic animals, 1438[9].
of guanidine derivs and related substances on, 1852[1].
of injections of dextrose and of insulin and dextrose on, 3316[2]
of oxygen inhalation and RN on, 3038[6]
of toxic products of enteritidis-paratyphoid *B* group on, 2867[2].
effect on gastric hunger contractions of changes in level of, 1261[7]
effect on H-ion concn of blood, 937[8]
effect on rate of conversion of lactic acid into glucose, 2361[7].
in encephalitis (epidemic), 1450[8]
in encephalitis lethargica, 2202[1]
equil., effect of thyroid feeding on, 941[3].
fasting concn. in infants, 1660[3].
formation from fat, glycogen in, 778[1].
glycolysis at varying levels of, 1098[2].
glucose and other reducing substances in, 2528[4].
glucose effect on, 1273[9], 2530[9].
d-glucose isomer in, 2508[8].
glycogen and starch effect on, 1670[7].
in head injuries, curve of, 239[2].
heat regulation and, 1660[8].
after hepatectomy, 68[5].
increase during glucose absorption, 2194[1].
in Indians in Bengal, 782[7], 3029[7].
initial rise of, 3029[9].
insulin effect on, 54[5], 1462[8], 1669[9], 1837[2,4], 1851[4,5], 2529[6].
effect of nutritive condition on, 3487[2].
in fowls, 1860[7]
inhibition by ovarian hormone, 612[6].
in insulin hypoglucemia, 3493[4].
in insulin intoxication, 3475[9], 3499[7]
after insulin treatment in diabetes, 2699[3].
intestinal exts. and, 3739[9].
inverse change between concn. of chloride and, 3495[9].
irritability and, 2531[9].
"lag" curve, 2201[9].
in leprosy, 3504[4].
level, effect of rate of absorption of sugar solns. from intestinal tract on, 2194[3].
malaria modification by changing content of, 3036[1].
in mental disease, 3730[2].
morphine effect on, 241[2], 1276[2].
of *Myoxocephalus* and *Ameiurus*, effects of asphyxia and isletectomy on, 3495[9].
nature of, in health, in diabetes and in glucosuria, 440[3,5].
organ ext which decreases, 441[6].
oxygen inhalation effect on, 3508[3].
parasympathetic poisons and, 3745[6].
in pernicious anemia, 1665[6].
phosphate effect on, normally and in diabetes, 3194[9].
physiology of, 437[9].
pilocarpine effect on, 2207[6].
pituitrin reaction, effect of Ca and K ions on, 449[1]
potassium ion action on, 1464[3].
in pregnancy, 945[2].
in pregnancy and puerperium, importance of changes of, 1264[2].
in pregnant women and in embryos, 3031[7].
quinine effect on, 1467[4].
reaction in ulcer cases, 1447[8]
reduction with *Herba urticae dioicae*, 2705[7].
regulation of, 442[9], 3184[7].
santonin effect on, 1271[6].
in sleep, sucrose effect on, 2357[9].
sodium arsenite effect on concn of, 71[6]
in splanchnectomy and normally, effect of choline, pilocarpine and ergotamine on, 3509[1].
in thyroidectomy, insulin effect on, 1113[6].
thyroid feeding and, 1839[7].
thyroid gland operation and, 238[7].
time curves, 3491[3].
time curves in diabetic and non-diabetic individuals after *d*-glucose ingestion, 782[8].
in toxemia of pregnancy, 3731[4].
in tuberculosis, 2536[7].
tumor effect on, 238[4].
urine sugar and, 2190[8].
vegetarian diet and, 228[9]
vitamin-deficient diet effect on, 2694[6].
of whale, 1672[2].
whey action on, 619[6].
Blood vessels. (See also *Aorta.*)
adrenaline effect on, 239[9], 240[2], 1840[8], 2206[5].
albuminuria by constriction of renal, 628[5].
ammonia action on, 2368[8].
amyl nitrite effect on, 239[9], 240[2].
atropine effect on, 239[9], 240[2].
of brain, pharmacology of, 3514[7].
calcium effect on, 452[1], 2016[6].
cerebral circulation, effect of phenobarbital and other barbituric acid derivs. on, 2209[2].
cerebral, effect of adrenaline, etc., on, 2209[4].
changes in walls of, in dystrophies of alimentary and nervous origin, 3733[1].
coronary circulation, effect of Na phenobarbital and other barbituric acid derivs. on, 2209[1].
dilatation of, effect on cerebrospinal sugar, 3730[8].
dilating action of adrenaline and stimulation of the sympathetics on, 1116[7].
dimethylguanidine effect on, 1113[6].
diseases of, urea in blood after death from, 2173[1].
effect of medicinal substances on, 1280[7].
functional changes in, from Pb poisoning, 1116[1].
genista effect on, 2206[5].
guanidine effect on, 2016[8].
gynergen effect on, 3512[5].

of heart, effect of crystal violet on, 3315[6].
histamine effect on, 3194[3].
intestinal, in anaphylaxis, 2011[9].
kidney substances which affect, 624[5].
lead poisoning effect on, of isolated organs, 1115[9].
ligation of portal vein, effect on insulin secretion, 3496[5].
of liver, permeability of, 1273[8].
of lungs, contracting and dilating app. of, 3490[8].
nicotine effect on, 2880[1].
obstruction of, effect on wt., diam. and vol. of red blood corpuscles, 940[6].
of organs, effect of sp. lymphagogs on, 2530[2].
ovarian fluid effect on, 231[3].
peripheral vasomotor exhaustion, effect of ergot derivs in, 2016[4].
pharmacology of isolated vein ring, 457[6].
postmortem effect of adrenaline, $BaCl_2$ and strophanthin, 1840[8].
pyridine effect on, 2880[2].
reactions to skin injury, 1844[8]
sensibility of, effect of fluid from adrenals and adrenaline on, 3039[9].
smooth muscle of, pilocarpine effect on, 1463[2].
strophanthin effect on pulsation rate in dorsal, of *Lumbricus terrestris*, 457[4].
tobacco effect on, 2702[1].
transfer of chem. substances to tissues from, 1469[4].
vasomotor effect, temp. effect on, 3304[7].
Blotting paper. See *Paper*.
Blowers, construction of, 2098[2].
Blow-fly, parasiticides for, 3328[8]
sheep, insecticides for, 2385[6,7].
Blueing, app., P 1341[2]
"Dôle" fast, manuf. of, 2076[9].
Blue prints, with dark lines and white fields, 344[1].
dermatosis industrialis from, due to Cr compds., 249[5].
Blumea balsamifera, oil of, 93[5].
Boats, molding from phenolic condensation products, P 1307[5].
Body fluids, acetone in, detection and detn. of, 927[5].
acidity changes in, recording, 3475[4].
amylase detn. in, 2335[6].
arsenic distribution in, after intravenous injection, 1469[1].
bismuth detn. in, 3044[7].
calcium in, 3182[8].
catalytic activity in normal and pathol. conditions, 1662[9].
chloride detn. in, 927[9].
chlorides in, diln. in death by drowning, 2201[4].
diastase detn. in, 1825[9].
electrotitration in, 1642[1].
estrual effect of, 2193[2].
glucose detn. in, 2342[5].
hexose phosphatase in, 922[9].
ion constituents of, changes in equil. of, 2508[5].
muscle stimulants in, 1468[3].
oxygen removal from, 3749[8].
protective colloid studies, 3612[2].
silver salt soly. in, 454[2].
Body heat. See *Body temperature; Heat*.
Body surface, basal metabolism of, tables of values of Du Bois formula, 1824[9].
of swine, calcg., 2356[9].
Body temperature, antipyretic effect on, 1857[8].
blood sugar effect on, 1660[8].
in diuresis, 3505[2].
heat-puncture hyperthermia, gas metabolism and min. vol. during, 1279[2].
hematoporphyrin effect on, 3496[2].
hot air baths and, 230[7].
hypothermia, physiology of abnormally induced, 1469[2].
parathyroids and, 442[6]
regulation in homeotherms and pecilotherms, 1440[8].
regulation of, 625[2].
regulation of, relation to sugar metabolism, 1112[7].
water exchange and, 778[8].
Body volume, in fresh water organisms, regulation of, 1471[8].
Body weight, hot air baths and, 230[7].
Bogs, flora of, effect of H-ion concn. on, 2872[4].
Bohr's theory. See *Atoms*.
Boiler compounds, P 1679[5], 2216[1], 3762[3].
feeding app. for, P 3526[7].
Boiler gages, glasses for, P 3789[7].
Boilers. (See also *Firing; Fuels; Water, purification of.*)
air-flow meter for, 2904[4].
air heating in, 3553[8].
autogenous and electrically welded, 1585[9].
blast furnace, gas fired furnace for, P 735[3].
corrosion of, 1585[6], 2973[3,5], 3151[5,6,7,8,9].
corrosion of plates from water contg. NH_3, 1211[8].
corrosion of, prevention of, P 1587[5], P 1877[7], 3762[3].
covering for, zonolite as, 728[3].
economy in plants, 491[3].
efficiency of, lower calorific value in calcg., 1706[4].
elec., generation of explosive gases in, 2955[1].
embrittlement of, 2814[3].
encrustation of, prevention with elec. current, P 554[6].
feeding device for, P 1541[4].
firing-up tests of, 3794[9].
furnace—see *Furnace*.
heat balance of, 2765[6].
heat insulation for, P 81[7].
hydrogen production by steam in tubes of, 3623[5].
lye concns. in seams of, 3762[5].
magnesium chloride effect on, 467[2].
metallurgy in relation to, 893[6].
metals of, soly. of, 689[8].
preheaters for, economy of, 2217[4].
priming of, 634[5].
priming of, surface tension in, 82[7].
protection against scale and corrosion, 467[3].
sheets, pitting and corrosion of, 2886[2].
for sugar factories, instruments for, 1532[8].
thermochemistry of, 2904[1].
thermoregulator for, P 1341[4].
waste-gas for, from cement kilns, P 2238[8].
waste-heat, 2406[2].
waste heat in gas, 492[1].
waste-heat, in steel mills, 566[8].
welding on, 167[1].
for wood, peat, or brown coal firing, 656[3].
Boiler scale. (See also *Boiler compounds; Water, purification of.*)
formation of, 3323[6].
phys. properties of, 467[2].
preventing and removing, P 960[6].

preventing and removing by ionization, 3323[8].
prevention of, P 84[9], 467[3]
by Agfil process, 1481[8]
by elec. currents, P 256[6], P 1877[7], P 3650[8].
"Filtrator" app. for, 252[9]
removal of, compn for, P 3055[1].
Boiler tubes, corrosion of, 1585[6]
corrosion of, effect of "hot wall" in, 1211[6]
effect of segregation on, 2619[1]
prevention of, P 1781[6]
pitting and corrosion of, 2886[2]
steel and iron, specifications of A S T M. for, 955[2], 1122[1].
Boiler water See *Water, potable and industrial; Water, purification of*
Boiling, in low-temp and vacuum distn, device for, 1151[8].
Boiling points (See also *Volatility*)
of alkali halides, 3255[3]
of binary mixts, calcn of curves of, 3367[2]
compn and, 1737[8]
consts, calcn of, 2777[3]
consts. of equation of state and, 2271[6]
detn. of, app. for, 653[7], 2161[1], 2777[1], 2765[8]
of elements from new form of periodic system, 2923[6].
equil, in fuels, 2402[8]
of halides of Si group metals, 717[4]
mol. diam. at, 2768[9]
osmotic pressure and, 2267[1]
of paraffin derivs, effect on attraction for flies, 1490[1]
and polarization of H atom in org compds, 3684[6].
of pseudo- and nonelectrolytes, similarity to those of noble gases, 130[6]
of silicon tetrachloride, 2140[2].
"zero-point vol" and, 3108[7]
Boldine, constitution of, 1405[9]
dimethyl ether,* identity with glaucine, 1628[4].
Bolk, F. W, obituary, 3093[2]
Boll weevil, insecticides for, Ca arsenates as, 643[1].
insecticides for, Ca salts of phenols from low-temp. tar as, 88[9]
Bolts, alloy-steel, specifications of A. S. T M. for, 1121[4].
holding nuts on, compn for, P 3338[7]
for tracks and for high temp service, specifications of A. S. T. M for, 954[4]
Bombs. See *Calorimeters; Projectiles*
Bombyx mori. See *Silkworm*.
Bömer number, for lard, effect of satd fatty acids on, 3091[7]
Bonds. (See also *Double bonds; Triple bonds*) 3594[9].
carbon-C, configuration in tartaric acid, 3104[8].
dynamic model of chem, 2114[3]
effect on energy of intraat. levels, 540[2].
energy of, in org. radicals, 3157[9].
heat of linking of, energies of absorption bands and, 547[6].
nitrogen-II, infra-red absorption of, 1356[3].
of paramagnetic elements, no. of magnetons in complex, 1946[7].
strength of, in org. radicals, 3683[9].
Bone black. See *Charcoal*.
Bone extract, enzymes in, decompn. of hexosemonophosphoric acid by, 2507[5].
Bone marrow, bilirubin formation in, 939[6].
effect on bone development, 946[4].
feeding dried, effect on erythrocyte and hemoglobin contents of blood, 2190[7].
hemolytic and hemopoietic action of ext. of, 2533[6]
histological reaction of, by Na nucleinate, 1840[1]
in porphyrinuria, 426[2].
reactions of, 1669[6]
relation to thyroid, thymus and spleen, 1658[8], 1839[7], 1840[1].
vitamins in, 222[7]
Bone meal, absorption in soils of P and K in presence of, influence of soil reaction on, 470[6]
effect on phosphorus content of soil soln. and of soil exts, 3325[3].
fermentation of, as preliminary to nitrification, 2553[8]
Bones, ash in rats fed on normal, rachitic, and irradiated rachitic diets, 1433[4]
calcification and healing of fractures in, effect of parathyroids and thyroids on, 442[5].
calcification of, 2528[6].
effect of cereals on, 3489[1].
in rickets, 935[5]
calcium and Pb in, effect of parathyroid on, 3508[6]
carbonizing, 972[3]
compn of, effect of diet on, 3179[6]
detn of calcium, Mg, phosphate and carbonate in, 3171[8]
development of, hematopoietic system and, 946[4]
dyeing, P 3240[8].
effect on case-hardening, 3428[7]
fat recovery from, 3092[3].
flour from, as fertilizer, 471[2]
flour from, as mineral supplement for milk cows, 462[5]
formation of, 234[9].
diet and, 3488[8]
effect of hexosephosphoric esters on, 2528[7].
phosphatases in, 3703[5].
fractures of, effect of Na hexosemonophosphate on, 2507[5].
growth of, effect of sunlight on, 225[2].
systemic and sex determinants of, 1102[6]
vitamin A and, 2525[8].
healing of fractures of, effect of avitaminosis on, 1431[1].
inorg compn. of, 2209[9], 2528[1]
in leg weakness in chickens, 1435[5].
mineralization of skeletons, 1375[4]
minerals of apatite series in, 2602[7]
org substances in, occurrence and detection of, 1419[8]
phosphate, Ca and Mg in tibia, 64[4].
phosphates and other ions in growing, histochem demonstration of, 2339[9].
in porphyrinuria, uroporphyrin in, 426[2].
rachitic, Rabl pptn. method in investigation of, 234[7].
in rickets, effect of food irradiated with ultraviolet light on lesions of, 222[3].
transplantation of, effect on blood Ca, 3727[3].
ultra-violet light effect on, 2523[9].
Bone substitutes, from soy bean proteins, P 3544[1].
Books, paper for, white water treatment in manuf. of, 3081[1,2].
Boracetic anhydride*, reactions of, 1052[6].
Boracite, crystal structure of, 29[4].

Borates. (See also *Alkali metal pentaborates*.)
'detn. in soaps, 3829^{8}.
precipitation of basic, H-ion concn. and, 1163^{1}.
Borax, beads, microscopy of, 3599^{1}.
beads, set of standard, 1190^{1}.
detn. of, 2963^{7}.
dialysis of, membrane for, 1547^{3}.
electrolysis in fused boric acid or borates, 1169^{1}.
electrolysis of oxides in fused, 1169^{1}.
industry in 1925, 3783^{1}
from lake brines, P 1306^{8}.
in lemon treatment for storage, 2375^{5}.
luminescence of, U as activator of, 2286^{2}
monohydrate of, 1364^{8}
procaine solns. with, 2390^{4}.
recovery from saline liquors, P 973^{2}.
refining, P 483^{5}
review of mining and trade information, 888^{2}.
sepn from brines, P 3214^{7}.
as stabilizer of Dakin soln , 2561^{9}.
standardization of HCl with, 1041^{1}.
volatility and dissocn. of, 3400^{8}.
Bordeaux mixture, adhesives for, 1883^{6}.
spraying of rubber trees with, 2428^{5}.
spreaders for, 793^{8}.
Bordet-Wassermann reaction See *Wassermann reaction*
Boric acid. (See also *Metaboric acid*.)
decompn. of alk. carbonates in solns. by, 1186^{1}
in detn. of chem constitution of org compds , 2980^{4}
dialysis of, membrane for, 1547^{3}.
effect on electrolytic dissocn of electrolytes, 2933^{1}
on local suppuration, 1271^{8}.
on optical rotation of malic and tartaric acids, 1980^{4}.
on vitamins A, B and C in foods, 3317^{8}
elec cond. of, effect of OH compds on, 3158^{2}, 3163^{8}
elec. cond. of, effect of triquinoyl on, 3163^{8}.
electrolysis of oxides in fused, 1169^{1}.
esters, reaction with Grignard reagents, 1605^{1}.
flame test for, Ba test and, 1190^{5}
ionization const. of, change with concn , 3118^{3}.
manuf. of, P 2050^{9}.
neutralization curves of mixts. with polyhydric alcohols, 1014^{7}.
prepn of, British Pharm process for, 969^{1}.
as preservative for whole blood, 216^{3}.
in pulse, 2549^{8}
reaction with 3,4 - dihydroxy - 4 - methyl-2-pentanone, relation to configuration of sugars, 3157^{6}.
volatility in water vapor, 1965^{3}.
volatility of, with steam, 25^{7}.
Borine, trimethyl-, structural formula for, 2625^{7}.
——, **triphenyl-,** alkali metal compds. of, 2668^{6,7}.
Borneol, detection of, 2341^{4}
d-, and *l*-, and esters, 2998^{2,3,4,5}.
d-, catalytic action of reduced Cu on, oxidation of, 408^{1}.
isotherms and crit. consts of Et_2O mixt with, detn. of, 2111^{5}.
mol. wt. detn. of, 2767^{5}.
?-naphthalenecarbamate, 1232^{9}.
oxidation of, 2996^{3}.
photoactivation by ultra-violet light, 1654^{1}.
photoactivation by x-rays, 3303^{2}.
picrate, constitution of so called K salt of, 2998^{8}.
from pine oil, 1799^{8}.
soly of, 3258^{1}
in spruce turpentine, 187^{1}.
——, **3-methoxy-2-phenyl-,** 2157^{7}.
Bornesitol See *Quebrachitol*.
Bornite, flotability of, effect of cyanogen compds. on, 1376^{4}.
at Magna Mine, Superior, Arizona, 3670^{3}.
Bornyl chloride. See *Camphane, 2-chloro-*.
Bornylene, oxidation of, by BzO_2H, 2674^{7}.
Borocaine, 240^{4}, 1279^{8}
borate, in urethral anesthesia, 1850^{2}.
chem. compn. and therapeutic effect of, 2726^{2}.
in ophthalmology, 1850^{1}.
Boron, in aluminum and Al alloys, 894^{3}.
atomic wt. of, 1006^{6}, 1041^{1}, 1733^{6}, 2434^{8}
cementation of Fe, Ni and Co with, 3429^{2}.
chemistry of, 1925^{5}.
compn. with C, P 2232^{7}.
effect on nodules on *Vicia faba*, 62^{2}.
effect on plants, 2222^{1}.
reaction with mixts of O and N, 3141^{6}.
spectrum of, 17^{9}, 2949^{4}, 3385^{2}.
system Al-, 3149^{4}
valency of, variation in, 2114^{4}.
Boron, analysis, detn. in nickel or Fe alloys, 2472^{8}
Boron, triphenyl-. See *Borine, triphenyl-*.
Boron alloys. (See also "system" under *Boron*.)
aluminum-, 3149^{4}
aluminum-, Al-Cu-, Al-Si-, and Al-Zn-, 894^{3}.
analysis of, 2472^{8}
Boron chloride, BCl_3, as catalyst for polymerization of cyclopentadiene, 2148^{7}
Boron compounds, as catalysts for 2-naphthol sulfonation, P 769^{1}.
org , 3156^{2}
quinquevalent, 1765^{7}.
Boron fluoride, crit. potentials of, 2949^{3}.
heat of formation of, 2111^{1}.
system H_2S-, thermal analysis of, 1550^{9}.
Boron hydrides, structural formula for, 2625^{7}.
BH_3, crit. potential and ionization of, 2618^{3}.
B_2H_6, crystal structure of, 130^{9}, 526^{1}.
Boronia citriodora, oil of, 2720^{3}.
Boron nitride, prepn. of, 3141^{9}.
Boron oxides, BO, mols., relations between electronic structure and band-spectrum structure in, 2458^{1}.
BO, spectrum of, 148^{7}, 337^{6}
B_2O_3, density of, 1733^{7}, 3606^{6}.
detn. in glass, 1502^{4}.
effect on properties of chem. and heat-resisting glasses, 3219^{1}.
specific heat of, 2445^{2}.
Boron triphenyl See *Borine, triphenyl-*.
Borosilicates, deformation of, 975^{7}
Boswellia serrata, gum from, 837^{1}.
oleoresin of, enzymes in gum from, 60^{2}.
Bothelo reaction, 1846^{8}, 1848^{9}
Bothriocephalin, pharmacology of, 2205^{7}.
Botrytis cinnerea, germination of conidia of, 1423^{5}
Bottles. (See also *Wash bottle*.)
app. for filling, closing, labeling and packing, 127^{7}.

dispensing, capacity and graduations of, 680[2].
testing, weighting and weight-adjusting band for, P 128[4].
Bottle washers, specifications for manuf. of, 2432[1].
Bouillon, creatinine detn. in prepns of, 2375[2].
Bowlingite, from Taodeni, Soudan, origin of, 30[9].
Boyle's law. See *Laws.*
Bragg's law. See *Laws.*
Brain. (See also *Cephalin; Encephalitis*)
abscess and tumor of, lactic acid content of cerebrospinal fluid in, 3502[4].
absorption of water by tissue of, effect of adrenaline and thyroxin on, 3505[4].
antiserum, phosphoric acid excretion in urine after treatment with, 1846[2].
argon in beef, 59[1].
basal ganglia of, calcification in, 2201[1].
blood vessels of, effect of adrenaline, etc , on, 2209[4].
blood vessels of, pharmacology of, 3514[7].
blood vessels of, thrombosis and compression, adrenaline discharge from ligature of, 1862[5].
"calcification" in, 2201[3].
carbohydrate content of, 1099[1]
cerebrum, effect of narcotics on compn. of, 1861[4].
chem. excitability of cerebellar cortex, 628[9]
cholesterol in, in HCN poisoning and in beriberi, 67[1].
circulation in, effect of barbituric acid derivs. on, 2209[2].
cisterna cerebello-medullaris, pituitary-gland hormone in fluid of, 922[2].
compn. of human, 925[9].
cortex of, lipoids and N of, 924[9].
cortex of, morphine effect on, 3315[9].
creatinine in alc. exts. of, 3176[3].
hypocerebric acid from human, 768[2].
insulin in, of normal and pancreatic diabetic dog, 441[8].
lactic acid in, accumulation during anaerobic conditions, 2009[6].
in lead poisoning, immunity to manifestations of, 3729[4].
lipoids, detn of, 1092[5].
metabolism of carbohydrates in, 438[7].
nucleic P index of, 3304[4].
oxygen deficiency in cells of, tetany and convulsions from, 783[3].
phosphoric acid in tissue of, effect of pharmacol. agents on, 2023[1].
phosphorus compds. in, autolytic decompn. of, 940[7].
polyuria following cerebral lesions of, 1842[4].
protein in beef and hog, nutritive value of, 2694[8].
spermine in, 3172[7].
surgery of, 611[7].
thalamus, effect of bulbocapnine on cats without, 456[4].
tumor of, diagnosis by colloidal benzoin reaction, 1849[1].
tumor of, lactic acid content of cerebrospinal fluid in, 2011[7].
vol., effect of $MgSO_4$ on, 1114[3].
Brakes, bands, saturating with oxidizing oils, etc., P 3544[7].
linings, P 2053[4].
compn. for treating, P 1500[6].
from phenolic condensation products, P 3544[4].
Bran. (See also *Shorts.*)
food from, P 462[7].
protein detn. in, 2029[5].
proteins of wheat, 3026[5].
rice, avitaminosis treatment with, 1653[4].
rye, fodder value of, 1475[2].
Brandy, ethyl alc. shrinkage in, 1684[5].
Brasilin. See *Brazilin.*
Brass. (See also *Copper alloys; Zinc alloys.*) P 2974[7].
alloy for bearings, P 36[2].
analysis of, 726[2].
analysis of red, 2130[8]
ancient Chinese, 1342[2].
books: The English, and Cu Industries to 1800, 3152[7]; Industry, 3440[7].
bright dipping of, 1565[3].
casting sheets of, app. for, P 3443[4].
castings of, 3416[6]
cementation with Sn, 2812[1].
condenser tubes of admiralty, elec. heat treating and annealing process for, 1381[3].
copper detn. in, 1773[1].
corrosion of, in condenser pipes, 355[1], 2973[4].
by plastilin and free S, 2638[9].
by $K_2S_2O_8$, 2770[4].
by saline waters, 1584[5].
by salts contd. in waste liquors from potash manuf., 1211[8].
by sulfur in C_6H_6, 1137[9].
Zn loss in, 2973[4]
effect on photographic fixing baths, 1037[8].
electroplating with, defects in, 553[2].
electroplating with Ag, 713[3].
etching, with chromic acid reagent, 2640[1]
extruding, 3421[8]
hardness of, 2642[3].
heat of combination of constituents of, 2655[7].
hot working of, 3421[5].
impact resistance of, 1210[2].
journal, cooling fractures in, 734[4].
losses in manuf. of, 2476[7].
macrostructure of, 1582[6].
melting furnace, device for charging and discharging, P 34[9].
melting, furnace for, 19[6], P 22[4,5], P 735[4], 888[4], 1033[8], 1180[3,6], 2124[3], P 3271[4].
nickel, 166[4].
nickel, annealing, quenching and tempering of, 1210[4].
notched-bar impact test of, effect of temp. on, 567[3].
oxidation at high temp., 2934[5].
phys. properties of, effect of cold-working and annealing on, 732[5].
pickling of, purification of waste waters from, P 266[6].
polish for, P 974[7].
pressed rods of, technol. behavior of, 3421[7].
press temp. (best) of $(\alpha + \beta)$-, 3677[8].
recovery of Cu, Sn and Pb from, P 1360[8].
red, structure and properties of, 3678[1].
rolled, vibration-figures on, 3277[7].
rolling of, 2142[1].
scrap recovery, crude coal gas for, 1708[1].
sheets and rods of, specifications of A. S. T. M. for, 955[2], 1122[2].
softening of strain-hardened tubes and strips, 3417[1].

soldered joints of, tensile properties of, 1212^{4}.
tensile curves of, 568^{9}.
tensile strength and hardness of, 3678^{3}.
thermal cond. of, 3679^{9}.
Thomson effect in, effect of strain on, 853^{3}.
tubes, effect of low-temp. heating on release of internal stress in, 568^{9}.
waste, treatment of, P 574^{8}.
zinc oxide detn. in, 1366^{1}

Brassidic acid, stereoisomerism of, 2310^{9}.
thallium salt, 2818^{3}.

Brassylic acid, and esters, 1789^{3}.
heat of combustion of, 2937^{5}.
monomethyl ester, 1590^{3}.

Brazilin, constitution of, 605^{6}.
synthesis of, 2325^{9}.

Brazing. See *Soldering*.

Bread. (See also *Bakery products; Baking; Dough; Flour.*) P 79^{4}, P 3051^{1}
acid- and base-forming elements in white and Graham, 459^{7}.
age of, detn. of, 1874^{1}.
baking of, alc. recovery in, 2548^{9}, 2549^{3}.
book: Chemistry of Breadmaking, 1874^{9}
cellulose content of, 3476^{6}.
chemistry of, 631^{2}.
diet of, effect on growth, 1258^{8}.
digestibility of wheat and rye, from flour of diff. grades of milling, 3751^{6}.
enzymic compn. for making, P 3521^{6}.
food value of, 784^{6}.
from frozen and non-frozen wheat, 3750^{5}
ingredient for leavened, P 3200^{6}.
lactose detn. in, 631^{4}.
lead poisoning from, 2210^{7}.
loaf vol. of, detn. of, 460^{5}.
making, variable factors of, 1285^{4}.
manuf. without usual fermentation period, P 953^{4}.
pasteurized inactive yeast for, P 2034^{5}.
from potato pulp, P 2034^{5}.
protein, biol. value of, 2523^{7}.
proteins and H-ion concn. in manuf. of, 2549^{3}.
proteins of milk and, maintenance values for, 1436^{2}.
residual sugar of, 1285^{3}.
staleness, starch and, 3320^{3}.
water detn. in, 73^{7}.
weight losses of, 73^{9}.
whole-grain, P 1875^{1}.
"yeast assistant" for making, P 3521^{5}.

Breaking strength, detn. of, 3678^{7}.

Breathing. See *Respiration*.

Breathing apparatus. See *Respirators*

Brewing. (See also *Wort; Yeast.*)
aluminum in, 794^{8}.
chemistry in, 1129^{4}.
disinfectants in, 2557^{5}.
filter in, 3059^{7}.
with and without hop extractor, 3770^{9}.
hops addition in mash tub, effect on quality of beer, 1129^{1}.
hops in, proportion of spent, 3770^{9}.
hydrogen-ion concn. in, 474^{6}, 1168^{8}, 1185^{3}, 2044^{7}, 2717^{1}.
hydrogen-ion concn. of mashing liquor in relation to ext. yield and sol. non-coagulable N, 1300^{5}.
hydrogen peroxide in, 3533^{9}.
infection before boiling stage, 1129^{2}.
iron in, 2043^{9}.
lactic acid in, effect of starch on, 3533^{6}.
under pressure, 3208^{1}.
refuse in, app. for dewatering, P 2046^{3}.
top fermentation, "pitching" in, 2224^{4}.
water for, from hard water, 1481^{2}.
yeast prepn. for, P 1493^{9}.

Bricks. (See also *Chamotte; Kilns.*) P 100^{1}, P 270^{6}, P 1895^{1}, P 3548^{4}.
books: Die Ziegelfabrikation, 1894^{9}; Cement, Concrete and Bricks, 3070^{2}.
bulk vol. of, app. for measuring, 2234^{5}.
cement, air removal from, P 3548^{4}.
checker-, for carburetors, 2235^{1}.
for coke ovens, 3220^{6}.
coloring of, P 2569^{9}.
compressive strength of sand-lime, effect of method of prepg. specimens on, 3220^{2}.
concrete, P 3552^{2}.
concrete building, specifications of A. S. T. M. for, 954^{5}
contg. colloidal H_2SiO_3, 1135^{9}.
cracks in, 2900^{9}.
dolomite, manuf. and properties of, 2901^{1}.
drying of, 2900^{9}, 2901^{4}, 3220^{2}.
temp and humidity regulation in, P 976^{4}.
tunnel app. for, P 3221^{6}.
dry-press, manuf. and phys. properties of, 806^{5}.
efflorescence on, 2901^{3}.
efflorescence on, prevention of, 1505^{8}.
elec. resistance of, 3220^{5}.
expansion in tunnel kilns, 2901^{6}.
face, P 1700^{7}.
fireclay, 2054^{8}.
American and German, 2568^{8}.
changes during industrial burning of, 485^{9}.
elimination of carbonaceous matter from, 486^{2}.
etching and staining in testing of, 99^{5}.
resistance to spalling action, methods of A. S. T. M for, 954^{7}.
firing, cost of, 1307^{9}.
firing, powd. coal for, 3789^{1}.
furnace linings of, fractional fusion of, 486^{5}.
glazing of, P 809^{3}
green scum on, 2568^{8}.
hollow, manuf. of, 1893^{2}.
insulation, P 809^{3}.
from kieselguhr, P 97^{9}
lining and checker, for water-gas manuf., 3788^{9}.
mold for, of porous structure, P 650^{7}.
from Nyasaland clays, 98^{7}.
paving, from Iowa shales, 806^{7}.
paving, specifications of A. S. T. M. for, 955^{2}, 1122^{2}.
refractory, P 1505^{6}.
action of CO on, 270^{1}.
Al_2O_3-SiO_2 minerals in, 806^{4}.
deformation at high temps., 485^{6}.
detn. of bauxite in, 808^{4}.
for furnace linings, P 1505^{7}.
for furnaces using pulverized fuel, 806^{8}.
joining parts of furnaces, retorts, etc. with glass and pulverized, P 2056^{2}.
load-bearing capacities at high temps., testing of, 486^{4}.
plastic, P 270^{5}.
relation between refractoriness and compn. of, 486^{7}.
selection and testing of, 3788^{8,9}.
selection of, 3547^{8}.
specifications for French navy, 1893^{4}.

silica, 1309^{2}, 1893^{8}.
from coke-oven walls, 2234^{4}.
effect of chromium oxide on, 1699^{7}.
as linings for blast furnaces and coke ovens, 650^{4}.
quartz modification in, 99^{5}.
sp. gr. and after expansion of lime-bonded, 1699^{6}.
storage of, 3339^{7}.
temp.-load detns., 1504^{7}
silica and fireclay, heat flow in, 2733^{2}.
silica compn. for, P 2400^{6}.
sillimanite, properties of, 3068^{1}.
slag for making, P 976^{6}.
spalling of, 2735^{2}, 3788^{7}.
strength of, 2734^{1}.
sulfite digester, 3083^{7}
surface deposits formed in glass-furnace regenerators, 3788^{3}.
temp. gradient from different rates of heating in unfired, 485^{6}
waste, building material from, P 2238^{9}.
Bright's disease. See *Nephritis*
Brilliant green, culture medium, 2178^{1}.
Brine. See *Salts; Sodium chloride.*
Brinell, Johan-August, biography, 1579^{5}.
Briquets, binder for, P 1511^{6}
bituminous emulsion for, P 811^{1}
book: Die Separation von Feuerungs-ruckstanden und ihre Wirtschaftlichkeit, einschliesslich der Briquettierung und Schlackensteinherstellung, 1315^{9}.
of cast-Fe and rusted and unrusted steel, cupola burdens with, 1971^{7}.
drying and calcining, app. for, P 1341^{1}
manuf. of, bituminous emulsions for, P 663^{2}.
of metal chips, P 1383^{1}.
mortar, device for measuring pressures used in molding, 3791^{3}.
Briquets, fuel. (*Patents*) 106^{3}, 495^{5,6}, 658^{9}, 814^{7}, 982^{7}, 1316^{1,2}, 1781^{4}, 2577^{6,7}, 3073^{9}, 3345^{2}, 3799^{2,6}
binders for, 1518^{8}, 2062^{3}, P 3558^{2}, P 3805^{5}
bituminous emulsions for, P 1321^{4}, P 2067^{8,9}.
calcns., graphic methods for, 2210^{2}.
carbonization of, P 2407^{4}, P 3799^{1}
coal, P 106^{3}, P 495^{1}, P 982^{9}, P 3345^{5}.
coke, P 3800^{4}.
coking, P 659^{1}.
elec. dust pptn. in manuf. of, 1567^{1,2}.
of lignite, 490^{2}, P 1710^{2}, 3072^{6}, 3554^{2}, P 3558^{2}.
boiler firing with dust from manuf. of, 2404^{8,9}.
by-product producer for, 978^{7}.
colloid process of manuf. of, 3795^{8}.
detn. of strength of, 102^{7}.
electrostatic dust pptn. in manuf. of, 811^{7}, 2904^{3}, 3554^{3}.
manuf. of, 2241^{2}.
measurement of pressures and temps. in mold of press for, 2241^{1}.
in rotating-grate producer plants, 3073^{1}.
spiral conveyors in tube driers for, 490^{1}.
with oil binder, P 3345^{4}.
of peat, 102^{6}, 276^{2}, P 982^{8}.
peat, origin of coal and, 2061^{9}.
poisoning from pitch and pitch dust in manuf. of, 2062^{4}.
resources of U. S., 1705^{7}, 2571^{3}
of sawdust and wood waste, 1313^{9}.
semi-coke for, P 3559^{2}.
from slack, 2059^{8}.
of sub-bituminous coal, 1313^{5}.
with sulfite liquor binder, P 3345^{3}.
from waste, calorific value of, 3553^{9}.
wood, P 1901^{3}
Briquets, ore, P 735^{2}, P 1781^{4}.
iron, 3415^{6}.
Brisance, of explosives, modifying, 3237^{5}.
Britannia metal, electroplating with Ag, 713^{3}.
Brittleness, 3604^{7}.
Brochantite, prepn. of, 3401^{6}.
Bromates, detn. in presence of hypobromites or iodates, 1192^{9}.
in titrations, 882^{9}.
Bromelin, hydrocyanic acid effect on, 1245^{5}.
Bromellite, 29^{5}.
Bromic acid, detection of, 158^{6}.
Bromide ion (See also *Halide ions.*)
effect on oxidation by HIO_3, 2981^{7}.
mobility of, in cells made from solns. of LiCl and NaBr in abs. EtOH, 3618^{4}.
transport no. of, 3618^{5}.
Bromides (See also *Halides.*)
detn. of, 2632^{1}
hydrogen peroxide decompn. in soln. of Br and, catalysis in, 860^{6}.
potentiometric titration of, 2469^{2}.
reaction $2IO_3^- + 10Br + 12H^+ \rightleftarrows I_2 + 5Br_2 + 6H_2O$, equil. of, 3626^{2}
vapor pressure of Br in, 1928^{7}
Bromidism, cutaneous, in infants, 2205^{2}.
Bromination, of aromatic compds., velocity of, 2316^{1}.
of aromatic Hg compds., 3162^{1}.
electrochem., of benzene, 3396^{3}
of fatty acids, 42^{2}.
in light of cinnamic acid, 3647^{1}.
of org. compds., 2660^{9}
of petroleum of Persia, 3559^{5}
Bromine. (See also *Bromine water; Halogens.*)
action on metals in org. solvents, 1184^{6}.
in algae (floridian), 1428^{6,7}.
analysis (quant.) using, 3662^{3}
in animal organism, 3726^{8}.
atom, effect on affinitive capacity of aromatic radicals, 3684^{2}.
effect on firmness of union of CO_2H groups in aromatic acids, 1613^{1}.
effect on reactivity of Br, 1066^{2}.
atomic wt. of, 1006^{6}.
atoms, recombination of, 2419^{2}.
from brine, 3540^{3}, P 3543^{7}.
Budde effect in, 2123^{5}.
chem. consts. of, 2265^{9}.
combination with wood charcoal and its removal, 1931^{4}.
dielec. const. and optical properties of, 1342^{5}.
discoverers of, 1733^{3}.
elec. cond. of, 1752^{2}.
electron affinity of, 2446^{2}.
fluorescence of, 3132^{5}.
heat capacity and entropy of, 696^{6}.
hydrogen peroxide decompn. in soln. of bromide and, catalysis in, 860^{6}.
industry in 1925, 3783^{1}.
in photochemistry, 1033^{1}.
photochemistry of, 3390^{1}.
photoelec. effect (compound) in, 705^{6}.
physiol. relations of, 949^{7}.
quinquevalent, in heterocyclic rings, 1239^{2}.
reactions $Br + Br = Br_2$ and $H_2 + Br_2 = 2HBr$, velocity of, 3621^{2}.
reaction with 1-chloro-2-iodoethylene, 1787^{2}.
with cinnamic acid or with stilbene, velocity of, 1953^{2}.

with cinnamic acid, photochemistry of, 2620[3].
with *cis*- and *trans*-*s*-$C_2H_2Cl_2$, 2480[8].
with HCO_2H, velocity of, 859[6].
with hydrogen (active), 3645[1].
with H in presence of charcoal, 2050[2].
with iodine, 3623[7].
with $Ni(CO)_4$, 1570[5].
with Ag and with Cu, measurement of thickness of layers formed by, 1753[1].
with tartaric acid in light, 870[8].
with tartaric acid, lactic acid, malic acid, $H_2C_2O_4$ or with citric acid, velocity of, 1953[9].
reactivity of, 1066[2].
resources and demand for, 1694[7].
resources of U. S. in 1921, 801[2].
Röntgen-ray effect on, in photographic plate, 542[2].
soly. in KBr, 1161[2].
spectrum of, 147[6], 1351[9], 2284[8], 2613[1], 3640[2].
spectrum of reaction with Na, 1917[6]
storage and transportation in metal containers, 647[9]
in sylvite from eruption of Vesuvius in 1906, 2806[7].
system: benzamide—, 3377[1]
vapor pressure in bromides, 1928[7].
vapor pressure of, 1929[3], 3602[1].
Bromine, analysis, detn., 349[3].
detn., app. for, 3591[2].
detn. in biol. material, 1640[9].
in blood, 2865[1], 3709[4]
Bromine compounds, absorption spectra of, 2119[9].
Bromine iodide. See *Iodine bromide*.
Bromine-iodine number. See *Iodine-bromine number*.

Bubbles, of gases in water, surface phenomena of, 2605[5].
  pressure of Hg and Bi, measurement of, 3110[1].
  in supersatd. solns. of gases, initiation of, 320[1].
  from supersatn. of O_2 in liquids, 319[9].
Bubbling device, for gases, 3249[4]
Buccinum undatum, amphoteric substance in radula of, 429[9].
Buchanan, John Young, obituary, 2100[1].
Bucherer experiment, theory of, 3385[9].
Bucherer reaction, mechanism of, 2977[9].
Buchner, Max, biography, 2766[6], 2923[1].
Buchu, glucosides from, 391[1].
Buckthorn, purging, rhamnicoside from, 220[7].
Buckwheat, fertilizers for, 1485[7].
  growth of, effect of H-ion concn. of soil on, 1681[1].
  nitrogen availability studies on, harvested at diff. stages of growth, 2040[2].
Budde effect, in bromine, 2123[5].
Buds, in Baldwin apple, formation of blossom, 2185[5].
  effect of photocatalyzers on early sprouting of resting, 433[7].
  inhibition of potato, effect of thiourea on, 2351[2].
Buffer action, biochem. activity and, 2169[4].
  of soil, 3203[9]
Buffer systems, of acetate and of citrate-phosphate, comparison of H-ion reversal pts. with, 609[8].
  for alk. range of H-ion concn. detns., 2172[6].
  catalysis in, 3375[6].
  course of reaction in, 2507[9].
  in fermentation industries, 1491[7].
  hydrogen-ion concn. of, effect of salt content on detns. of, 1743[9]
  in intestinal diseases, 67[2,3].
  phosphate, relation of acidity to biologic hemolysis, 1267[1].
  in protease study, 1632[2], 1998[1].
  soil, effect on Fe, 2715[1].
  standardization of, 2275[6].
  water as, for Romanowsky-Giemsa stain, 1420[7].
Bufo. See *Toads*.
Bührer, Christian, obituary, 1691[3].
Building materials. (See also *Bricks; Paperboard; Roofing; Stone, artificial; Tile; Wood substitutes;* etc.)
  asphalted, mat finish on, P 484[3].
  blast-furnace slag as, 3223[7].
  blocks, compn. for, P 1703[8].
  blocks, etc., P 3552[6].
  books: Deterioration of Structures in Sea Water, 271[9]; Cours de Connaissance des Matériaux., 464[9].
  from brick waste, P 2238[9].
  casting, *in situ*, P 2238[8].
  coating, bituminous emulsion for, P 2067[9].
  coloring of, P 1703[8], 3340[7].
  copper as, 651[7].
  cork board, P 3544[9].
  from cornstalks and waterproofing substances, app. for making, P 3552[6].
  diffusion of gas mixts. through, 2926[4].
  effect of carbonated and iron-bearing mineral waters on, 271[7].
  gypsum, technology of manuf. of, 1896[5].
  heat insulating compn., P 3323[1].
  heat transmission by, 271[6].
  insulating, P 652[5].
  paper (corrugated), 809[9].
  plaster blocks and board from synthetic gypsum, 2903[5].
  plaster blocks or slabs, P 2239[1].
  for porous walls, P 1507[7].
  sheets of fibrous material and synthetic resins for, P 3355[1].
  siding sheets, P 3224[5].
  slag as, 651[7].
  unburned building blocks, P 2239[1].
  wall-board compn., P 489[6], P 2239[1].
  wall board from zonolite, 728[3].
  waterproof and fire-resistant, from pulp board, 2747[3].
  waterproofing, bituminous soap for, P 489[6].
Bulbocapnine, effect on body position, 456[4,5,6,7].
Bumping, in analysis of crude fiber, prevention of, 1872[9].
  preventing, stirring rod for, 2098[1].
Bunsen-Roscoe law. See *Laws*.
Bunt, of wheat, control of, 793[4].
Bunte, Hans, obituary, 489[9].
Bupleurum fruticosum, oil of, 2717[8].
Bureau of Standards, book, 700[5].
  metallurgical division of, 1047[6].
  organization and work of, 848[9].
Burets, accuracy of, 1005[4].
  calibration for gas analysis, 1339[7].
  graduation defects in, 679[2].
  micro-, 521[7].
  micro-, filling app. for, 2263[6].
  micro-, for measuring speed of toxic action of As in silkworm, 2543[8].
  reading lens for, 1731[9].
Burners. (See also *Sulfur burners*.)
  atm. gas, orifices of, 2766[2].
  for blast-furnace gas, 2242[8].
  blast-furnace-gas, for boilers, tests of, 3797[5].
  for coke-oven gas with O-enriched air, 890[8].
  for detonating gas, 1586[1].
  gas, 103[9], 3797[4].
  for gas, efficiency of, 277[5].
  for gas lighting, aeration of, 981[2].
  for lead soldering, 896[3].
  liquid-fuel, thermoregulators for, P 1710[3].
  micro-, 2921[6].
  oil, design of, 3233[2].
  for petroleum in industrial furnaces, 2244[5].
  for surface combustion, 3343[4].
Burning. See *Calcination; Firing*.
Burns, acid or alkali, treatment of, 635[6].
  effect on adrenaline secretion, 3495[9].
  picrates of local anesthetics for treatment of, P 3781[1].
  protein and residual N in blood serum of animals suffering from, 1844[2].
  sodium chloride metabolism in, 3037[1].
  wheals produced by, cause of, 1844[8].
Burnus, as cleansing agent, 1332[4].
1,3-Butadiene. See *Bivinyl*.

dehydration and dehydrogenation of, over ZnO catalyst, 2308[8].
dehydration of, P 2333[5].
detn. in aqueous and cottonseed oil solns., 1742[9].
heat of vaporization of, 1551[4].
tert-**Butyl alcohol,** acetate, velocity of alk. hydrolysis of, 536[6].
detn in aqueous and cottonseed oil solns., 1742[9]
heat capacity, entropy and free energy of, 2444[9].
reaction with Tl or Na, thermochemistry of, 3123[2].
Butylamine, *N*, ***N*-diethyl-**, prepn. of, 3688[6].
——, *N*, *N* - **diethyl - α,α - dimethyl-**, and salts, 3280[4].
——, *N*, *N*, α, α - **tetraethyl-**, and salts, 3280[4].
——, *N*, *N*, α, α - **tetramethyl-**, and chloroplatinate, 1053[7].
and salts, 3280[4].
sec - **Butylamine, α - ethyl - *N*, *N* - dimethyl-**, 1053[3].
Butyl bromide. See *Butane, 1-bromo-*.
Butyl chloride See *Butane, 1-chloro-*.
Butylenediamine, structure of, 2061[1].
Butyl ether, prepn. of, 361[9].
spectrum of, 544[2].
sec-**Butyl ether,** prepn. of, 361[9].
Butyl iodide. See *Butane, 1-iodo-*.
sec-**Butyl iodide** See *Butane, 2-iodo-*.
Butyl nitrite, effect on activated cholesterol and antirachitic vitamin, 1654[2].
effect on gaseous ionization, 333[6]
Butyl sulfide, effect of petroleum-refining agents on, dissolved in naphtha, 1784[2].
Butyl sulfite, reaction with PhMgBr, 3693[9].
Butyl sulfone, effect of petroleum-refining agents on, dissolved in naphtha, 1784[2].
Butyn, effect on cornea, 2018[9].
as local anesthetic, 1851[1].
Butyraldehyde, azine, hydrogenation of, 3282[6].
butyric acid from, P 1813[7].
manuf. of, P 1631[1], P 3696[7].
polymers, P 1631[1].
stabilization of, P 210[3].
——, **β-amino-**, diethyl acetal, and -HCl, 1788[5].
——, **β-benzalamino-**, diethyl acetal, 1788[5].
Butyraldehyde, β-bromo-, diethyl acetal, 1788[4].
——, **β-diethylamino-**, diethyl acetal, and its methiodide, 1788[6].
——, **β-dimethylamino-**, derivs., 1788[6].
——, **α - ethyl - α - methyl-**, semicarbazone, 2481[4].
——, **β - (formylmethylamino)-**, bisdiethyl acetal, 1788[4].
——, **β-hydroxy-**. See *Aldol.*
——, **β-methylamino-**, derivs , 1788[5].
——, **β - (*N* - methylbenzamido)-**, diethyl acetal, 1788[5].
——, **β-(1-piperidyl)-**, derivs., 1788[7].
Butyramide, carbethoxyglycyl - β - amino-,* 44[7].
——, **γ-keto-γ-phenyl-**. See *Propionamide, β-benzoyl-*.
——, ***N*-*p*-methylbenzyl-**, 371[9].
——, **γ-phenyl- *N*-vanillyl-**, 404[8].
——, **α,α,β-trimethyl-**, 2483[2].
——, **ureidoacetyl-β-amino-***, **β-series**, 44[7].

Butyramidine, *N, N'* - **di** - *p* - **phenetyl-,** 1218[5].
——, *N, N'* - **di** - *p* - **phenetyl** - *N* - **phenylcarbamyl-,** 1218[6].
Butyranilide, *p*-ethoxy-, 1218[5].
Butyric acid, adsorption by hide powder, 3369[1].
beryllium salt, crystal structure and chem. constitution of, 3598[2].
book: Die Herstellung von, 2332[8]
bromination of, 42[3].
butyl ester, prepn of, 39[6], P 1813[6].
p chlorophenyl ester, 1237[7]
1,3 dichloropropyl ester, 2818[6]
effect on intestinal contraction, 2533[3]
esterification of AmOH with, measurement of expansion from, 2108[8].
ester of 3 - (hydroxymethyl)camphor, 1228[1].
esters of, detn. in aq. and cottonseed oil solns , 1742[9].
ethyl ester, coeffs. of internal friction of mixts with Et isobutyrate, 2926[8]
ethyl ester, dispersion of elec. double refraction of, 2612[5]
ethyl ester, heat of vaporization of, 1551[5]
by fermentation of cellulosic materials, P 3771[9].
heat capacity, entropy and free energy of, 2444[9].
ionization in aq MeOH, 2608[6].
p-isopropylbenzyl ester, 2488[2]
manganese salt, as catalyzer in oxidation of butyraldehyde, P 1813[8].
manuf. of, P 3460[2].
from butyraldehyde, P 1813[7].
by fermentation, P 476[2].
with sugar-inverting bacteria, 3713[8].
methyl ester, expansion coeff and free space, 3595[7].
oxidation by H_2O_2, effect of phosphates, on, 579[3].
oxidation of mixt. with *d*-glucose, 579[3].
polymers of, formation and heat of decompn. of, 3252[6, 8].
purification of, P 1813[7].
refractive index of, 2818[7].
resorcinol di-ester, 3163[7].
sepn. from caproic acid, 2371[8]
systems: acetone—, AcOMe—, $CHCl_3$—, CS_2—, and C_6H_6—, vapor tensions of, 2935[8].
thallium salt, 2817[9].
in yoghurt and kefir as decompn. product of fat, 3773[9].
Butyric acid, *α*-**amino-,** *d*-, prepn. from sclera of whale, 1672[3].
from *α*-ketobutyric acid, 56[5].
——, *γ*-**amino-,** fate in phlorhizinized dog, 3724[4].
——, *α* - **amino** - *β,β* - **dimethyl-,** metabolism of, 2010[8].
——, *α*-**amino-***γ*-**phenyl-,** from phenylketobutyric acid, 56[6].
——, *γ* - *p* - **anisyl** - *β,γ* - **dibromo** - *α* - **keto-,** and esters, 3164[7].
——, *β*-**(benzalamino)-,** sodium salt, 3283[4].
——, *α* - **benzal** - *β* - **keto-.** See *Cinnamic acid, α-acetyl-.*
——, *γ* - **bromo** - *α* - (*β* - **bromoethyl)-,** ethyl ester, 385[5].
——, *γ*-**(***α***-bromoisocaproylamido)-,** 3300[8].
——, *α* - (*α* - **carbamyl** - *α* - **hydroxy** - *γ* - **phenylpropoxy)** - *α* - **hydroxy** - *γ* - **phenyl-,** 1232[4], 1798[5].
oxidation of, 2673[5].
——, *β* - (*α* - **carbethoxyaminoacetamido)-,** and derivs., 44[6].
——, *β*-**carbomethoxyamino-,** 44[3].
——, *β* - (*β* - **carboxyamino** - *α* - **hydroxyethylideneamino)-,** and diethyl ester, 44[6]
——, *β* - [(*α* - **cyanobenzyl)amino]-,** ethyl ester and its -HCl, 3283[4].
——, *γ*-**cyclohexyl-.** See *Cyclohexanebutyric acid*
——, *α,γ* - **diamino-,** *d*-, configuration and $[\alpha]_D$ of, and di HCl, 2982[6]
——, *α,γ* -**dibenzamido-,** *d*, and esters, [*α*] of, 2982[6, 9], 2983[1].
——, *β,γ* - **dibromo** - *α* - **keto** - *γ* - **phenyl-,** methyl ester, 3164[6].
——, *γ,γ*-**dichloro-,** and methyl ester, 41[1].
——, *α*-**ethyl-,** thallium salt, 2818[2].
——, *α*-**ethyl-***α*-**methyl-,** silver salt, 2481[4]
——, *α* (and *β*)-**hydroxy-,** oxidation of, 579[4]
——, *β*-**hydroxy-,** of blood, effect of ketogenic diet on, 2361[4].
configurational relationship with 1,2-propanediol, 2659[7]
configuration of, 579[9]
decompn. of, role of kidney in, 2530[6].
d-, and methyl ester, 2980[6].
d-, configuration of, 1787[8]
ethyl ester, b p of, 1386[7].
secondary oxidation in presence of peroxidase, 2335[5].
——, *γ* - **hydroxy** - *γ,γ* - **bis(***p* - **hydroxyphenyl)-,** lactone see *Phenolsuccinein*
——, *α* - **hydroxy** - *β,β* - **diphenyl-,** ethyl ester, prepn. of, 3000[2]
——, *α*-**keto-,** amino acid synthesis from, 56[5].
——, *α*(or *β*) - **keto** - *β*(or *α*), *γ* - **dimethoxy-(?),** methyl ester, 3286[4].
——, *α*-**keto-***β,β*-**dimethyl-.** See *Isovaleric acid, β-methyl*
——, *α*-**keto-***γ*-**phenyl-,** phenylaminobutyric acid from, 56[6]
——, *γ*-**keto-***γ*-**phenyl-.** See *Propionic acid, β benzoyl-.*
——, *γ*-**leucylamino-,** yeast effect on, 3300[8].
——, *α*-**methyl-,** *dl*-, prepn of, 41[8]
——, *β*-**methyl-** See *Isovaleric acid.*
——, *α*-**methylamino-,** from *α*-ketobutyric acid, 56[5]
——, *β*-**phenylmercapto-,** 202[3].
——, *γ*-**phosphono-,** and derivs., 2979[2].
——, *γ* - **piperidyl-.** See *Piperidinebutyric acid*
——, *β* - **sulfo-,** *dl*, *d*- and *l*-, and salts, 2482[4, 5, 7].
and salts, 1979[1, 2, 3, 4]
——, *β*-*p*-**tolylmercapto-,** 202[3]
——, **trichloro-,** cond of, in MeOH, 536[1].
——, *α,α,β*-**trimethyl-,** 2483[2]
Butyric acid number, for milk fat, detn. of, 2373[5].
Butyric anhydride, refractive index of, 2818[7].
Butyrimidic acid, *β* - **carbamido** - *N* - **(carbamylmethyl)-,** 44[6].
Butyrin, *α,γ*-di-, *β* palmityl-†, 2818[7].
effect of sera of subjects with high blood pressure on, 3736[9].
effect of urethan on serum lipase with, 1817[1].
lipase action on, 610[9].
β-mono-, *α,γ*-dipalmityl-†, 2818[7].
mono-, effect of secretion of peptic-HCl glands on, 1087[2].
prepn. of, 2658[4].

Butyroin. See *4-Octanone, 5-hydroxy-.*
Butyrone. (For derivs. see under *4-Heptanone.*)
azine, reduction of, 899[9], 2309[5].
diethyl acetal, sapon. of, 2937[8].
manuf. of, P 2332[9].
oxime, Zn chloride compd. with, 1784[9].
Butyronitrile, **α,γ - bis(dimethylamino)-**, 1053[4].
——, **α - dimethylamino - α - methyl-**, 1053[3].
——, **α-hexylidene-**, 3447[5].

as antidote for hydrated chloral, 3195^9.
bromination of, 587^5.
and citrate, effect on heart, 3043^3.
citrate of, hydrolysis of, detn. of, 3776^8.
compds. with NaOBz, 1161^3.
compd. with Sn halides, 156^8.
derivs., 2826^9.
effect on blood vessels of brain, 3514^9.
on dextrinizing and saccharifying action of amylase, 53^9.
on diuresis, 950^1.
on gastric juice secretion, 2190^9.
on irritability of frog heart, 452^9.
on kidneys, 2704^9.
on leucocytes, 3190^3.
on metabolism of *Paullinia cupana*, 2518^2.
on muscle hardness, 3040^6.
on phosphoric acid in brain tissue, 2023^2.
on urea-N concn. of blood, 1441^5.
on uric acid formation and excretion, 3510^2.
hydrochloride, spectrum of, 1030^2.
methohydroxide, physiol. action of, 3190^2.
pharmacol. action of, 3513^6.
prepn. of, 1795^7.
pyramidone detn. in mixts. with, 2388^2.
reduction of, 2827^1.
salicylate, spectrum of, 1030^2.
skin reaction to, in menopause, 2358^4.
vasodilating effect of, on isolated organs, 1840^9.
in yocco, 3061^2.
Caffeine, α^1-methoxy-†, P 3780^6.
Cajuput oil, 2047^1, 2717^4, 3330^2, 3828^5.
Cake. See *Bakery products.*
Calamary oil, 3355^9.
Calamintha, *nepeta*, oil of, 2718^2.
nepeta var. *canescens*, 2225^4.
Calcareous substances, of *Bacillus moniliforme*, 2348^1.
Calcemia, 1843^3.
blood serum Ca in hypo- and hyper-, 1099^4.
effect of calcium salts on, 3190^4.
in pathol. states, 2200^4.
in tetany, 2107^5.
thyroid and, 2200^8.
Calcification. (See also *Bones.*)
with diet deficient in fat-sol. vitamins, effect of sawdust irradiated with ultra-violet light on, 2523^3.
dystrophic, of kidney, 1847^4.
in rickets, 935^6.
"Calcin," 308^7.
Calcination. (See also *Furnace; Kilns; Lime.*)
app. for, P 3250^6.
of briquets, etc., app. for, P 1341^1.
as grinding aid, 806^8.
of grog, 2734^7.
of petroleum coke, etc., P 495^9.
plant for, P 483^9.
Calcite. (See also *Aragonite; Calcium carbonate.*)
alky. of solns. of, 960^7.
on ankerite and siderite, 2804^9.
from Bioul, 161^6.
calcining and clinkering, plant for, P 483^9.
compressibility of, 525^4.
crystn. of, 132^2.
crystal structure of, 29^4, 131^2.
crystals, variations of reticular distances on application of a force, 2435^6.
deposits in St. Erhard, Styria, 2303^9.
from Khibin tundra, 2966^4.
in limestone of Oberscheld, 1046^4.
Rontgen-ray reflection by, effect of crystal size on, 2786^9.
Röntgen-ray reflection by, effect of low temp. on, 2616^8.
somatoid forms, 685^4.
Calcium. (See also *Alkaline earth metals; Calculi.*)
absorption in intestines and effect of carbohydrates thereon, $3718^{3,6}$.
absorption in rickets, effect of H-ion concn. on, 3311^6.
absorption of, from intestinal tract, 2704^5.
in animal cells, effect of, 1246^9.
assimilation of, dietary factors influencing, 1433^7.
balance in health and in diabetes, 3180^6.
binding by animal tissues, 439^4.
biochem. action of, 449^9.
in blood, adrenaline effect on, 3040^4.
in circulatory diseases, 3732^5.
effect of bleeding on, 3035^4.
effect of bone transplantation on, 3727^3.
effect of $Ca(HCO_3)_2$ on, 2701^9.
effect of irradiation on, 940^3.
effect of irradiation with C arc on content of, 2531^1.
effect of protein-free ext. of parathyroid gland on, 1839^1.
effect of ultra-violet light on, 2180^1.
effect of vitamins A and C on, 64^1.
effect on growth of cancer tumors, 1848^6.
during narcosis, 2368^1, 3743^8.
in nephritis, 1451^3.
in parathyroidectomy, effect of guanidine intoxication on, 3505^1.
in pathogenesis of rickets, 935^6.
potassium ratio to, in essential hypertonia, 233^8.
in relation to sex, 226^5.
in reproductive cycle, 2531^4.
in skin diseases, 1448^9.
in sleep, 2357^9.
in tuberculosis, 783^3.
in blood and cerebrospinal fluid, 2012^4.
in blood of chickens in leg weakness, 3312^4.
in blood of children, 65^8.
in blood plasma, morphine effect on, 2705^3.
in blood serum, 1438^2, 2190^1, 2513^5, 3725^9.
in disease, 2696^4.
in eclampsia, 783^6.
effect of narcotics on, 1115^7.
effect of ovaries on, 1264^7.
electrodialysis of, 3030^1.
in fever, 237^2.
in hypo- and hyperglucemia, 1099^4.
menstruation and, 3033^7.
pathol. variations in, 2877^6.
radiation effect on, 3507^5.
relation to ovarian function, 779^8.
relation to vegetative nervous system, 1841^6.
state of, 2193^1.

state of dispersion of, 921^1.
in tar cancer, 3735^8.
after thyroparathyroidectomy, effect of bleeding on, 1838^8.
in tuberculosis, 1105^8, 3501^8.
in tuberculosis, effect of Ca lactate and thyroid ext. on, 1444^9.
in blood serum normally and in disease, 2014^1.
in blood serum normally and in renal disease, 441^9.
of blood serum of normal and thyreoparathyroprivic dogs, influence of orally administered Ca salts on, 230^6.
in blood serum of rachitic rats, 1655^4.
in body fluids, 3182^8.
in bones, effect of parathyroid on, 3508^8.
in bones (growing), histochem. demonstration of, 2339^9.
in bone (tibia), ratio to phosphate, 64^4.
as catalyst for hydrogenation of C_2H_4, 39^3.
in cerebrospinal fluid, 1667^6.
in cerebrospinal fluid normally and in lues and in meningitis, 2198^1.
in chicks from hens with and without $CaCO_3$ in diet, 2524^8.
chromosphere, equil. of, 1025^9, 3265^8.
decalcification of human tooth enamel, 938^2.
deficiency of, in asthma, hay fever, etc., 627^3.
in diet, balance with vitamins C and D for teeth development, 3717^8.
in diet, effect on absorption from intestine, 1259^4.
diffusibility, effect of protein on, 1241^1.
diffusibility of, effect of protein solns. and of blood serum on, 2512^2.
effect of excessive ingestion on Ca content of tissues with and without ultra-violet light, 1435^4.
effect on acid-base balance of man, 937^7.
on action of adrenaline and of insulin, 2370^4.
on adrenaline action on heart, 1864^2.
on arsphenamine action, 1861^1.
on blood pressure, 1465^4.
on blood vessels, 2016^8.
on *Citromyces* growth, 613^4.
on coagulation of blood, 3300^2.
on development of normal and neoplasmic tissue *in vitro*, 3734^8.
on growth of hyacinths, 3716^8.
on heart, 1462^{4,6}, 2203^7.
on heart, comparison with that of digitalis, 1466^1.
on heart isometric response, 3510^7.
on intestine and uterus, 1859^3.
on isolated vein ring, 457^5.
on lactation, 934^3.
on milk, 3493^9.
on pituitrin hyperglucemia, 2192^4.
on saliva secretion, 1448^3.
on sugar metabolism in liver, 2358^5.
on sugar output of liver, 442^2.
on tonus of skeletal muscle, 1859^3.
on "Treppe" formation and spasms from K, 2368^9.
on vegetative nervous system, 70^2.
elec. arc, luminous vapor distd. from, spectroscopy of, 3386^8.
elec. glow discharge of, mixed with Na, Mg and Sr, 2121^8.
electrodes, electromotive force of, 2939^5.
excretion of, effect of parathyroid ext. on, 2538^3, 2538^6.
effect of K on, 1259^7.
effect of thyreoparathyroidectomy and of injection of $CaCl_2$, Na_2HPO_4, or both on, 2537^{8,9}.
injected intravenously, 3193^5.
in feeding expts. with dairy cattle, 1432^9.
in flour, 1675^6.
in food from Philippine Islands, 631^1.
gaseous ions of, energies of soln. of, 2446^1.
germination of seeds and, 435^4.
in hay, 2033^1.
heat of vaporization of, 2777^8.
inhalation of dust contg., relation to tuberculosis, 635^2.
ionization of, 1945^5.
ionization of, phase rule and, 18^5.
ionization potential of, 2945^8.
metabolism, 3699^3.
adrenaline effect on, 1271^7.
in dairy cows, 2694^9.
dietary factors influencing, 1834^2.
effect of hysterectomy on, 1842^8.
in lactating animal, effect of ultra-violet light on, 2528^5.
in oysters, etc., 950^8.
with rachitic diet rich in Ca, 1655^2
in thyroparathyroidectomy, effect of Ca salts and of Na_2HPO_4 on, 2538^4.
metabolism of growing children, effect of orange juice on, 1435^8.
in oxyhemoglobin in horse blood, 1249^8.
in parathyroid tetany prevention, 3504^7.
Paschen-Back effect in, 12^4.
physiol. action of, 2357^8.
in placenta, 3031^6.
reaction with mixts. of O and N, 3141^6.
reaction with org. halides, 3156^3.
removal from brine, P 3337^5.
requirements of human body, 1258^9.
resorption from intestine, effect of saponin on, 3493^5.
in saliva, effect of diet on, 3730^3.
scattering of X-rays by, 2453^8.
in sea water, pptn. of, 3703^9.
in skin, 2528^2.
in skin of mice on acid or basic diet, 3726^9.
in soils, availability of exchangeable, 2553^2.
effect of, 3528^8.
effect of CaO and MgO on loss of, 3325^4.
effect on Mg solv., 2714^8.
as indicator of their response to liming, 641^5.
liming and exchangeable, 3767^3. —
in soils of Mediterranean region, 2219^4.
soly. in blood serum, 2360^1.
spectrum of, 18^5, 330^8, 543^{1,3}, 2283^4, 2284^6.
system: Sn–, 1747^6.
in tears, 1419^1.
in teeth affected by dental caries and by pyorrhea alveolaris, 946^3.
therapy, 3190^4.
metabolic aspects of, 2019^6.
physiol. basis for intravenous, 3314^7.
toxicity of, dependence on diet, 3487^8.
vapor in eruptive prominences, selective radiation pressure and accelerated motion of, 1951^7.
in vegetables, loss by cooking, 783^9.
Calcium, analysis. (See also *Lime.*)
detection, 928^{6,7}, 2631^4, 2799^6.
detn., 1041^5, 1188^5, 1190^6, 1772^9, 2469^9, 3196^8.
detn. in blood, 61^1, 431^6, 2515^1, 3474^9.

in blood, detection of Mg in Ca oxalate ppts. in, 1640^{3}.
in blood serum, 3473^{1}.
in bone, 3471^{8}.
in com. magnesium, 1366^{5}.
in milk, 2027^{8}.
in minerals contg. H_3PO_4, Mg, Fe and Al, 2473^{5}.
in mineral substances contg. H_3PO_4, Mg, Fe and Al, 1573^{9}.
in org. liquids, 351^{6}.
in silicates, 3219^{8}.
in soils, 3055^{8}.
in tissue, 1420^{8,9}.
in tissues, feces and milk, 1093^{8}.
in urine, 1639^{7}.
detn. of free ions, 1190^{8}.
methods of A. S. T. M. for, 954^{7}.
sepn. from Mg, 2773^{9}.
from Mg in water, 790^{2}.
from Mg, Fe, Al and H_3PO_4, 1573^{7}.

Calcium acetate, manuf. from destructive distn. gases, P 2246^{8}.
viscosities of solns. of, 854^{3}.

Calcium alloys. (See also "system" under *Calcium*.)
aluminum-, elec. resistivity of, 2972^{8}.
amalgam-, soln. in acids, rate of, 2619^{9}.
copper-, P 341^{9}.

Calcium aluminates, hydration of, 1702^{8}.
reaction with Na_2SO_4 and $MgSO_4$, 488^{5}.

Calcium arsenates. (See also *Alkaline earth arsenates*.)
from calcium arsenite, P 3214^{9}.
insecticide, airplane dusting of peach orchards with, 2555^{8}.
insecticide contg., P 3532^{9}.
as insecticides, 642^{9}.
manuf. of, P 2566^{1}.

Calcium azide, spectrum of, 2791^{2}.

Calcium boride, structural formula for, 2625^{7}.

Calcium bromide, compds. with EtOH, 1764^{4}.
compds. with MeOH, EtOH and BuOH, dissocn. pressures of, 1746^{2}.
hydrate, transition pts. in non-aq. solvents, 2774^{1}.
hydrolytic action of low-pressure superheated steam on, 2467^{1}.
system: EtOH–, 1746^{3}.

Calcium carbide, detn. in calcium cyanamide, 2145^{6}, 3662^{9}.
elec. furnace for, 3392^{4}.
heat of formation of, 2777^{7}.
heat of nitrogenation of, 695^{9}.
manuf. in elec. furnace, P 2126^{7}.
manuf. of, and its derivs., electricity in, 2620^{9}.
manuf. of, operating control of elec. furnace in, 712^{5}.
residue, utilization of, 647^{7}.

Calcium carbonate. (See also *Alkaline earth carbonates; Aragonite; Calcite; Chalk; Vaterite; Whiting*.)
clay suspensions of, electrolyte effect on, 2713^{9}.
crystn. of, effect of dyes on, 685^{2}.
crystal shape of, effect of substances in the solns. on, 132^{2}.
crystals of, prepn. of, 29^{6}.
decompn. of, 2401^{6}.
decompn. of $Ca(HCO_3)_2$, 685^{5}.
in diet, effect on feces of chickens, 3027^{6}.
in diet of hens, Ca and P content of chicks with and without, 2524^{8}.
effect of $Ca(HCO_3)_2$ on blood Ca, 2701^{9}.
effect on acid soils, 3768^{1}.
effect on phys. properties of vulcanized rubber, 2920^{3}.
as fertilizer, 1485^{7}, 3531^{2}.
hydrolytic action of low-pressure superheated steam on, 2467^{1}.
in leaves and fruit of figs, 3023^{2}.
pseudo-anticline formation by deposition of, 1198^{8}.
reactions with WO_3 and MoO_3, 324^{7}.
reaction with pozzuolanas, 1896^{9}.
reaction with NaF, P 973^{1}.
recovery from caustic liquors, P 2565^{9}.
in soils, effect on multiplication of *Azotobacter*, 2715^{3}.
solid soln. with $NaNO_3$ as fertilizer, P 2566^{3}.
soly. of, 2440^{2}.
system: $CaO-CO_2$–, equil. in, 3674^{5}.
system: $Na_2CO_3-H_2O$–, soly. curve for, 960^{7}.
thermal decompn. of natural, rate of, 651^{5}.
thermal dissocn. of, 3121^{4}.
weighing small amts. of, 2629^{8}.

Calcium caseinate, compd. with Ca phosphate, heat effect on, 3019^{6}.
compd. with Ca phosphate, rennet action on, 3019^{7}.

Calcium chloride, activity coeff. of, 1162^{8}.
analyses of, 308^{7}.
antagonism to anesthetic action of $MgSO_4$ and EtOH, 1868^{4,5}.
antagonism to NaCl in hemolysis, 625^{3}.
in arterial hypertension treatment, 949^{6}.
barium chloride detection in, 3775^{5}.
blood and symptomatic changes following intravenous injection of, 1855^{7}.
colloidal, in nitrobenzene, 320^{7}.
complex salt with quinoline-HCl, 601^{5}.
compds. with MeOH, EtOH and BuOH, dissocn. pressures of, 1746^{2}.
diuretic action of Ca salicylate with, 1860^{1}.
for dust prevention, specifications of A. S. T. M. for, 954^{6}.
effect on adrenaline discharge, 2206^{7}.
on adsorption of CaO by Fe_2O_3, 3367^{9}.
on cement, 2237^{4}.
on concrete, 3793^{1}.
on diuresis, 1855^{2}.
on hemolysis, 2507^{4}.
on irritability of frog heart, 452^{8}.
on irritability of heart muscle, 1113^{1}.
on milk yield and compn., 1657^{3}.
on mucosa musculature of stomach, 2370^{7}.
on protoplasm of *Amoeba proteus*, 2511^{7}.
on time of hardening of cements, 3791^{1}.
on urine secretion, 2703^{9}.
elec. cond. of AmOH in equil. with soln. of, 141^{5}.
electrolysis of fused, anode effect in, 3134^{5,6}.
excretion of Ca, P and Mg after injection of, 2537^{9}.
as fertilizer, 3057^{9}.
films on solns. of, 134^{5}.
heat of diln. of, 1749^{4}.
heat of vaporization and b. p. of, 2603^{7}.
hydrated, P 3214^{5}.
hydrate, transition pts. in non-aq. solvents, 2774^{1}.
hydrolytic action of low-pressure superheated steam on, 2467^{1}.
parathyroid overdosage phenomena produced by, 2509^{8}.
reaction with O, 3134^{5}.

resources of U. S. in 1924, 801[2].
spectrum of, 2283[4].
surface tension of solns. of, 1738[6].
in waters from oil fields in Ventura Co., Calif., 1199[4].
Calcium citrate. See *Citric acid.*
Calcium compounds. (See also *Alkaline earth compounds.*)
ammino-, work of adding NH_3 or removing it from $CaF_2.6NH_3$, 692[8].
in blood, 2538[4].
with cyanogen, P 3337[4].
effect on soil, 1127[1].
insol., transformation into sol. ones and their absorption in gastrointestinal canal, 1811[9].
mercury-, 1766[3].
org., iodides, 3156[7].
waste, recovery and use of, 634[6].
Calcium cyanamide. (*For indexing purposes the name "Calcium cyanamide" is used not only for the compound $CaCN_2$ but also for the various commercial products, as "cyanamid," "lime nitrogen" and "nitrolim," the chief constituent of which is $CaCN_2$. See also* Cyanamides.)
analysis of, 1771[1].
book, 791[3].
calcium carbide detn. in, 3145[6], 3662[9].
carbon removal from, P 648[5].
dust removal from, P 3542[8].
as fertilizer, 471[9], 1485[8].
fertilizing with, 2040[3], 2554[7].
heat content of, 695[9].
heat of formation of, 696[1].
industrial hygiene of, 635[3].
manuf. of, P 643[6].
nitrate from oxidation of, 1363[2].
review, 2229[6].
synthesis of, changes of heat content in, 3540[1].
technology of, 1761[5].
transportation of, accidents from, 1716[1].
Calcium cyanide, compd. with HCN for use as a fumigant, 971[1].
fumigant from, P 3214[2].
fumigation with, 642[9], 1490[7].
in gopher poisoning, 963[6].
as insecticide, 791[1], 2555[8], 3770[1].
manuf. of, P 1498[5], P 3337[4].
rat extermination with, 3769[9].
Calcium dimolybdomalate, 1184[9].
Calcium dithionate, heat of diln. of, 1749[4].
prepn. and properties of, and study of systems contg., 2293[8].
soly. of, 858[3].
system: H_2O-EtOH-, 2293[8].
Calcium ferrate, 157[2].
Calcium ferrites, 1962[9].
hydraulic properties of, 3548[9].
thermomagnetic study of, 1939[9].
Calcium ferrocyanide. (See also *Alkaline earth ferrocyanides.*)
soly. of, 1160[8].
Calcium fluoride, absorption of β-rays by, 3127[9].
analysis of, 1966[6].
decomposing, P 3542[9].
electrolysis of fused, anode effect in, 3134[6].
heat of formation of, 2111[1].
luminescence of, U as activator of, 2286[2].

——, **α-isopropyl-δ-keto-**, semicarbazone, 2846^{1}.
——, **ε-keto-ε-phenyl-**. See *Valeric acid, δ-benzoyl-*.
——, **δ-methyl-**, thallium salt, 2818^{2}.
——, **β-phenyl-**. See *Hydrocinnamic acid, β-propyl-*.
Caprokol, chem. compn. and therapeutic effect of, 2726^{3}.
Capronoin. See *6-Dodecanone, 7-hydroxy-*.
Caprophenone, 5-caproyl-2,4-dihydroxy-†, 3163^{7}.
——, **3,5-dibromo-2,4-dihydroxy-**, 2995^{8}.
——, **2,4-dihydroxy-**, 2320^{2}.
and derivs., $2995^{7,8}$.
——, **2,4-dihydroxy-5-nitro-**, 2995^{8}.
——, **2-hydroxy-4-methoxy-**, 2995^{8}.
Caproyl alcohol. See *Octyl alcohol*.
Caprylic acid, activity coeffs. of K and Na salts of, 3617^{8}.
diffusion in gelatin, effect of lecithin on, 427^{8}.
elec. cond. of, 1751^{9}.
piperidide, pungency of, 2845^{1}.
thallium salt, 2818^{1}.

——, **η-cyclohexyl-**. See *Cyclohexanecaprylic acid.*
——, **α-ethyl-**, and esters, 363^{1}.
——, **η-formyl-**, trimer and derivs., $1590^{1,2}$.
——, **α-hydroxy-**, ethyl ester, 1786^{5}.
——, **α-keto-**, calcium salt, 1593^{1}.
——, **N, N′-trimethylenebis[α-amino-**, and derivs., 370^{8}.
Caprylonitrile, **N, N′-trimethylenebis[α-amino-**, di-HCl, 370^{8}.
Caprylophenone, **2,4-dihydroxy-**, 2320^{2}.
——, **α-hydroxy-**, 1786^{7}.
Capsicum, resin ointment, British Pharm. method for prepn. of, 969^{9}.
Caramel, adsorption by nitrocellulose, 3368^{6}.
beer stability and, 2386^{3}.
dye detection in, 1118^{5}.
meaning of word, 2913^{1}.
purification of, 121^{5}.
Carane, 5-keto-. See *Carone.*
Caraway oil, 3329^{6}.
Carbamates, books: Studier over Kuldioxyd og Kulsyre og over Karbaminater og Karbonater, 1965^{9}.
Carbamic acid, ammonium salt—see *Ammonium carbamate.*
ethyl ester, anesthesia from mixt. of EtOH, chloretone and, 1868^{5}.
effect on acid-base equil. and cell contents of blood, 457^{3}.
effect on blood of mixt. of quinine and, 3041^{4}.
effect on blood serum lipase, 1816^{9}.
effect on involuntary muscle, 457^{6}.
effect on irritability of frog heart, 452^{7}.
effect on phosphoric acid in brain tissue, 2023^{2}.
mobilizing effect of, 1439^{2}.
system: $AsBr_3$–, phase diagram of, 1165^{3}.
system: BzOH–, 1745^{8}.
system: diphenylamine–, 1745^{8}.
tolerance to, 3514^{2}.
treatment of pancreatic diabetes with, 1856^{7}.
potassium salts of, formation in liquid NH_3, 717^{2}.
system: C_6H_6–, effect of pressure on, 1164^{8}.
——, **N-acetyl-N-phenyl-**, ethyl ester, crystallography of, 1926^{2}.
——, **(β-5-acridylethyl)-**, derivs., 2501^{7}.
——, **amino-**. See *Carbazic acid.*
——, **N, N′ (p-arsono-o-phenylene)bis-**, esters, 1605^{9}.
——, **benzyl-**, ethyl ester, 3164^{5}.
——, **carbamyl-**. See *Allophanic acid.*
——, **(β-carbamylisopropyl)-** methyl ester, 44^{3}.
——, **[(β-carbamylisopropyl)carbamylmethyl]-**, ethyl ester, 44^{7}.
——, **[β-(carbamylmethylcarbamyl)isopropyl]-**, methyl ester, 44^{5}.

assimilation by plants, 3486^{7}.
assimilation in plant growth, effect of Mn on, 962^{7}.
atomic wt. of, 1006^{6}.
atom (non-tetrahedral) of, in pentaerythritol, 526^{4}.
atom, stereochemistry of, 48^{2}, 190^{1}, 742^{2}, 1073^{8}, 2312^{1}.
atom, structure of, 2114^{1}, 2114^{5}.
benzene recovery from adsorbent, P 2232^{9}.
bivalent, as valency problem, 1550^{7}.
bivalent, compds. of, 2824^{9}.
in blood in normal and exptlly. induced pathol. conditions, 2537^{6}.
books: Blacks and Pitches, 266^{3}, Auf dem Wege zur Spodiumlosen Weisszucker-Erzeugung und Raffination, 516^{2}, Ueber Entfarbungskohle im allgemeinen und uber "Carboraffin" and "Norit" in besonderen, 802^{4}.
catalytic action of powd., 1018^{5}.
cathodes, disintegration in H, 2446^{7}.
color in glass from, 2397^{8}.
combustion in oxygen, 2059^{6}.
compn. with B, P 2232^{7}.
consumption in blast furnace, relation to material smelted, 890^{3}.
decolorizing, P 483^{4}, P 649^{4}, P 804^{2}, 836^{2}, P 1499^{4}, 2917^{6}, P 3245^{6}.
adsorptive power of com., 1918^{1}.
evaluation of, 1918^{2}.
furnace for prepg., from paper pulp waste, P 3652^{1}.
revivifying of, 1694^{3}.
for sugar manuf., 1336^{1,2}, 2760^{7}.
use and revivification of, 1306^{4}.
decolorizing by—see also *Sugar manufacture.*
for depolarizing compns., P 3650^{7}.
deposition by motor lubricants, 2409^{8}.
deposition in engines, faulty oil as cause of, 273^{4}.
deposits, gasoline quality and, 3561^{8}.
dielec. const. and optical properties of, 1342^{5}.
disintegration by α-rays, 1556^{7}.
electrolytic sepn. of, bearing Fe from its complex compds. with carboxylic acids, 1358^{9}.
elimination in open hearth furnace, rate of, 3147^{6}.
elimination in open-hearth process, 1379^{6}.
equil. with CO and CO_2, 3626^{4}.
equil. with Mn and P in open-hearth process, 1972^{7}.
excretion during first fast day, 3728^{8}.
heat of combustion of, in various unions, 327^{2}.
hydration of aliphatic, and the CO_2 assimilation of plants, 774^{4}.
from hydrocyanic acid manuf., P 481^{8}.
hydrogenation and fluidification of, 3225^{7}.
hydrogenation of, gas for, P 3799^{7}.
iodine sorption by, 2268^{9}.
in iron (cast), 2617^{4}
in iron (cast), effect of P on, 3131^{6}.
light absorption coeff. of bond between H and, in alcs., 2950^{4}
manuf. of, app. for, P 1499^{6}
melting and vaporization of, 319^{8}.
morphology of, 1927^{1}.
in petroleum products, app. for sepg., P 501^{7}.
pigments, effect on oxidation of linseed oil, 2417^{8}.
for pigments, furnace for burning resin, ozocerite and pitch for making, 3064^{4}.
in Pre-Cambrian formations, sources of, 1017^{1}.
reaction $CO_2 + C \rightleftarrows 2CO$, 3314^{5}.
reaction with FeO, 3626^{4}.
reduction of Cr_2O_3 and UO_2 with, 2776^{2}.
removal from engines, compns. for, P 495^{9}, P 2063^{9}, P 2578^{1}
removal from steel, 3148^{4}.
removal in petroleum cracking, P 501^{4}.
removal of free, from cyanamides and cyanides, P 648^{5}.
Rontgen ray effect on, in photographic plate, 542^{2}.
Rontgen-ray refraction in prisms of, 2943^{2}
Rontgen rays from, excitation of soft, 1354^{6}.
romance of, 1924^{9}.
in soils, ratio with N, 2553^{6}.
soly. in austenite, 2639^{3}.
soly. lines in chrome and W steels, identification of, 2477^{4}.
spectra associated with, 2121^{1,2,3}.
spectrum in presence of He group, 1356^{9}.
spectrum of, 12^{1}, 13^{8}, 17^{9}, 2120^{7}, 2285^{3}, 2949^{3}, 3267^{1}, 3385^{2}, 3386^{6}.
in steel, effect of other elements on migration of, 571^{6}.
system: Fe-, 2810^{4}.
system: Fe-Cr-, 1584^{6}, 2810^{9}.
system: Fe-Ni-, 570^{8}.
system: Fe-O-, 164^{1}.
system: Fe-Si-, 571^{9}.
system: Fe-, solidus line in, 1205^{2}.
temper, Fe graphite and, 1379^{8}.
tervalent, 383^{8}, 1624^{7}, 3167^{8}.
transformation of, in cellulose decompn. by filamentous fungi, 615^{7}.
triumph of, 682^{8}.
in urine (alk.) contg. sugar, change in N:C quotient due to decompn., 3723^{9}.
in urine, effect of phlorhizin diabetes on ratio to N, 3743^{9}.
in urine, in adrenaline glucosuria, 3493^{9}.
effect of acids, alkalies and alk. mineral waters on ratio to N, 3726^{6}.

insulin action on deoxidizable, effect of ions on, 3189^{3}.
insulin effect on, 3509^{9}.
during I administration, 3038^{6}.
N and, 2192^{2}.
valence of, 1925^{7}.
valency of, variation in, 2114^{6}.
vapor pressure of, measurement of, 1007^{8,9}.
in zinc distn., relation between Zn, ZnO, CO, CO_2 and, 1377^{2}.
Carbon, analysis, detection in tantalum, 1211^{4}.
detn., P 29^{2}, 2802^{3}, 2964^{6}.
detn. in cast Fe, 3663^{8}.
in coal, 1704^{5}.
in org. compds., 2131^{4}.
in steel, 1368^{7}, 1573^{7}.
in tungsten powder, 3664^{3}.
in urine and in dil. water solns., 1641^{2}.
detn. of unburned C, 1705^{7}.
Carbonaceous materials. (See also *Destructive distillation.*)
distn. of, P 817^{6}, P 2066^{4}.
distn. of, app. for, P 2061^{5}, P 3364^{4}.
ionizing retort for, P 3798^{9}.
tubular retort for, P 3804^{9}.
removal from fireclay bricks, 486^{2}.
Carbonado. See *Diamonds*.

color in glass from, 2397^{8}.
crystal structure of, 3365^{6}.
electron displacement in, 2944^{4}.
magnetic rotation of, Verdet const. for, 1752^{6}.
models of, device for constructing, 1342^{3}.
Carbon dioxide. (See also *Carbonic acid; Photosynthesis; Respiration.*)
absorption of, by blood and serum, effect of temp. on, 2864^{4}.
by colloidal Fe_2O_3 and Prussian blue, 1739^{1}.
from gas mixts. by means of water under pressure, 1137^{7}.
by leaf material, 2181^{7}.
by a liquid drop, 1543^{7}.
in milk of lime, 3620^{8}.
by pyrophoric Fe, Ni and Co, 3255^{8}.
rectification and, 1476^{6}.
adsorbed, elec. moment of mol. of, 531^{8}.
adsorption of, by Al_2O_3 and Fe_2O_3, 3615^{4}.
by charcoal, 856^{1}, 1346^{4}, 2105^{2}, 3368^{7}, 3615^{3}.
by coal, 2404^{5}.
by MnO_2, Cu_2O_3 and their mixts., 2443^{7}.
by powd. glass, 3111^{3}.
by solid combustibles during drying, 654^{2}.
adsorption of mixts. of H and, on wood charcoal, 2104^{4}.
alpha rays traversing, app. for counting scintillations produced by, 1756^{4}.
alveolar tension following exercise, 2510^{1}.
alveolar tension, gastric acid secretion and, 3723^{1}.
alveolar tension, value of acetone detn. in expired air in correlation with, 1824^{8}.
in anesthesia, 1115^{4}.
assimilation by plants, 774^{4}, 931^{6}, 1832^{1}.
effect of optical sensitizing on, 2184^{9}.
CH_2O as intermediate product in, 2519^{9}.
sp. photochem. action of, 1833^{2}.
in atmosphere, effect of fluctuations on rate of respiration in leaves, 2181^{6}.
in bamboo stems, 1831^{8}.
beverage treatment with, P 964^{8}.
in blast furnace, automatic registering app. for, 1580^{9}.
in blood, 2874^{2}.
changes in content of loosely bound, 3727^{4}.
effect of ketogenic diet on, 2361^{4}.
effect of sea-bathing on content of, 2007^{2}.
effect of venesection on, 1662^{4}.
increase during digestion, 441^{3}.
in pneumonia, 2364^{9}.
in toxemia of pregnancy, 3731^{4}.
books: L'oxyde de carbone et l'intoxication oxycarbonique, 1281^{4}; Studier over Kuldioxyd og Kulsyre og over Karbaminater og Karbonater, 1965^{9}.

breathing of, effect on ion equil. of blood, 1098^{4}.
breathing of, in exercise, 2527^{1}.
bubbles in water, surface phenomena of, 2605^{4}.
from carbohydrate fermentation, reaction with NH_3, P 2395^{5}.
catalysis by ions of, 2459^{9}.
as catalyst for polymerization of C_2H_2, 1760^{4}.
cataphoresis of, 1820^{7}.
charging beer with, 2044^{4}
charging liquids with, app. for, P 2^{5}, P 316^{6}, P 1541^{1}, P 3364^{4}.
charging liquids with, app. for simultaneously refrigerating and, P 3202^{3}.
combining capacity of blood at high altitudes, 3496^{4}.
combining power of blood, effect of tumor on, 238^{4}.
compds. with NH_3, 139^{3}.
in corrosion of Fe, 573^{3}.
corrosion of Fe in presence of, measuring rates of, 2648^{4}.
cryoscopic measurements of solns. in liquids, 2267^{2}.
crystal lattice of, 851^{6}.
crystal structure of, 318^{4}, 526^{1}, 3106^{5}, 3598^{4}.
decompn. by elec. spark, $3628^{7,8}$.
density of, $3600^{2,3}$.
detn. of, P 29^{2}.
in air, 1192^{1}, 3613^{8}.
app. for, 3591^{4}.
in atm. in refrigerated enclosure, app. for, 1289^{4}.
in baking powder, 3198^{3}.
in blood, 1825^{1}.
colorimeter for, 3306^{2}.
in flue gases, app. for, 277^{6}, 2739^{5}.
in flue gases, etc., app. for, P 815^{4}.
in flue gas of Cowper stoves, app. for, 3102^{7}.
in gas, 3796^{7}.

on luminescence of P, 3391^{6}.
on minerals, 1044^{2}.
on org. oxidations, 227^{7}.
on respiration, 3721^{2}.
elec. moment of, 2613^{2}.
elimination from aq. soln. to a stream of bubbles of an indifferent gas streaming through it, 1347^{9}.
equil. with austenite, 2810^{2}.
evacuation of, 2264^{8}.
evolved by living tissue, micro app. for measuring, 1640^{9}.
excretion by frog nerve, 230^{8}.
excretion by nerve fiber, 1263^{7}.
expansion coeffs. for, 3122^{2}.
extinction of CH_4 flames by, $3573^{2,4}$.
as fatigue index, 634^{8}.
fertilizer, 1681^{9}.
fire extinguisher using, 2050^{7}.
fire extinguishing with solid, 3201^{6}.
flow through a porous wall, rate of, 3601^{5}.
in flue gases, 3341^{4}.
formation of, from alcs., 2975^{4}.
in *Drosophila* cultures, duration of life and, 2372^{9}.
in respiration, app. for graphic registration of, 1092^{1}.
in soil and soln., 3767^{6}.
from sucrose, valency problem in, 1550^{7}.
in sulfite cooking, 2718^{1}.
formed in metabolism, detn. of, 2174^{6}.
formula of, detn. of, 1006^{7}.
generation from C electrodes in elec. water heaters and boilers, 2955^{1}.
generator for, P 1541^{1}, P 3364^{5}.
heat of adsorption by coal and charcoal, 1167^{9}.
heat of adsorption on charcoal, 2104^{7}.
heat of vaporization of, 3123^{1}.
ionization potential of, 2118^{7}.
magnetism of, 1350^{6}.
measuring small quantities of, 3271^{3}.
milk and cream treatment with, P 953^{3}.
mixts. with H, H and air, and N, velocity of sound in, 865^{7}
mol. diam. for, 2101^{7}.
mol., structure of, 1731^{4}, 2282^{7}, 3641^{8}.
natural, origin and exploitation of, 2728^{9}.
opalescence of liquid, 143^{1}.
packaging solid, P 3543^{6}.
penetration into living protoplasm, 1428^{4}.
permeability of frog membrane and frog lungs to, 413^{7}.
in petroleum refining, protecting "doctor" from pollution by, 1512^{6}.
photochem. reduction by chlorophyll, 3484^{8}.
photochem. reduction of, effect of Ra-contg. Pb on, 331^{9}.
in plant cells, production of EtOH and AcH in relation to concn. of, 1830^{4}.
plant production and, 2890^{9}.
in plants, malic acid as substitute for, 3486^{8}.
plant treatment with, 962^{8}, 1257^{9}, 2891^{3}.
plant treatment with, app. for supplying for, P 2556^{9}.
in post-mortem blood and spinal fluid, 231^{4}.
pressure of, magnetic susceptibility and, 2781^{3}.
purification of, Backhaus process for, 2050^{3}.
radon effect on mixts. of NH_3 and, 1173^{9}.
reaction: $CO_2 + C \rightleftarrows 2CO$, 3344^{5}.
reaction: $3Fe + 2CO = Fe_3C + CO_2$, 3429^{9}.
reactions in, produced by α-particles, 145^{5}.
reaction with CO and C, 3626^{4}.
with CO and O in corona discharge, 700^{2}.
with H (active), 3645^{1}.
with H, photosensitivity and mechanism of, 546^{3}.
with H, promoter action of ThO_2 on Ni catalysts in, 325^{5}.
with Zn, equil. in, 1021^{8}.
recorders for boilers in sugar factories, 1532^{8}.
reduction by H, Rh as catalyst in, 5^{9}.
reduction by plants, 2181^{7}.
removal from gases, 1476^{9}.
from gases by water under pressure, 813^{5}.
from water, 3524^{8}.
requirements among bovine strains of *B. abortus*, 2180^{2}.

retention of, effect on skeletal muscle cramp, 2527^{5}.
satn. pressure of, relation of temp. to, 3633^{7}.
in soil air, effect on absorption of inorg. elements by plants, 641^{8}.
in soil and atm., effect on plants, 1293^{2}.
in soils, effect of gas permeability on production of, 3328^{4}.
solidifying app., P 1541^{3}.
soly. of, as source of error in gas analysis, 1576^{5}.
spectrum of, 14^{8}, 143^{6}, 1178^{3}, 1951^{3}, 2949^{1}.
stability of solns. of, 1161^{1}.
in sub-soil of the Ardenne, 354^{2}.
system: $CaCO_3$–CaO–, equil. in, 3674^{5}.
system: CS_2–NO–, 1549^{5}.
temp. detn. by amt. in combustion gases, app. for, P 1541^{2}.
tension, effect on concn. of acids of plasma of oxygenated blood, 1101^{6}.
tension in animal tissue, 2510^{8}.
tension in expired air, app. for detn. of, 2514^{3}.
thermal consts. of solid and liquid, 3121^{8}.
transport by blood, 2532^{3}.
transport by blood contg. hemocyanin, 3316^{4}.
in urine and bile, 2511^{3}.
in urine, effect of posture on content of, 3495^{2}.
in water (distd.) and its detn., 3613^{6}.
in zinc distn., relation between Zn, ZnO, C, CO and, 1377^{2}.
Carbon disulfide, absorption of β-rays by, 3127^{8}.
adsorption by alumina gel, 320^{4}.
binary mixts. with Me_2CO, C_6H_6, $CHCl_3$ and $PhCH_3$, 3120^{4}.
in coal carbonization, origin of, 1508^{9}.
compds. of, 1609^{1}.
compd. with PEt_3, crystallography of, 1926^{4}.
compressibility of mixts. with $CHCl_3$, 1014^{1}.
crystn. of, sparks in, 2276^{3}.
detection and estn. in gases, 561^{2}.
detection in olive oil, 3581^{5}.
detn. of, 1966^{7}.
dielec. const. of, 864^{5}.
dispersion in the ultra-violet, 335^{5}.
dispersion of, Ketteler-Helmholtz formula and, 3131^{7}.
drying, effect of, 529^{1}.
effect of petroleum-refining agents on, dissolved in naphtha, 1784^{2}.
emulsion of, as insecticide, 2891^{9}.
explosion of, and liquid air in cooling-bath prepn., 824^{6}, 1716^{9}.
fumigating with, for land crabs, 1683^{4}.
heat of vaporization of, 1551^{4}.
ignition of, 319^{9}.
in industry *vs.* CCl_4, 249^{3}.
as insecticide, 3769^{5}.
insecticide contg., inflammability of vapors from, 1716^{2}.
as insecticide for grain, 1489^{7}.
Kerr consts. of, detn. of, 2612^{6}.
light scattering by boundaries in mixt. of MeOH and, 143^{2}.
luminescence of, subjected to gamma radiation, 3381^{3}.
manuf. of, P 973^{3}, P 1696^{3}, 3334^{9}.
manuf. of, elec. furnace for, P 3271^{2}.
poisoning by, 2712^{3}.
poisoning by, in rubber industry, 1920^{5}.
polarization of light scattered by mixts. of MeOH and, 1030^{9}.
prepn. from NH_4CNS, 3687^{6}.
purifying, P 2052^{1}.
reaction with NH_4OH, 1219^{9}.
spectrum of, 14^{8}, 544^{2}.
system: C_6H_6–, magnetic susceptibility of, 2612^{2}.
system: C_6H_6–, refractometry of, 2612^{4}.
system: butyric acid–, vapor tension of, 2935^{8}.
system: decalin–, vapor pressure of, 2851^{8}.
system: MeOH–, mol. wt. detn. in, 683^{3}.
systems: NO–N_2–, and NO–CO_2–, 1549^{5}.
vapor pressures of mixt. of C_6H_6 and, 139^{1}.
viscosity and vapor pressure of mixts. with acetone, 1012^{9}.

with catalysts and under H pressure, 3342^{6}.
charging retort in, of coal, P 3228^{6}.
of coal, 1898^{7}, P 2577^{9}, P 3228^{7}, P 3345^{9}, P 3798^{4}.
coal blending for, 2240^{4}.
of coal, oil shale, wood, peat, etc., P 3228^{8}.
coals for, examn. and evaluation of, 3225^{9}.
comm. rept. on, 493^{7}.
of conifers from Morocco, 500^{5}.
continuous vertical retort in, 981^{9}.

extn. of uncondensable gases in, of coal, lignite, peat and shales, 3226^{7}.
of fossil combustibles, 2404^{8}.
fuel for, from cracking oils, P 3071^{2}.
of fuels, P 2064^{4}, 3341^{4}, P 3558^{3}, P 3558^{4}.
in Germany, 490^{4}.
high-temp., in 1925, 1898^{8}
industries, problems in, 2904^{7}.
by internal heating, 1707^{1}.
kiln for, of coal, ores, etc., P 128^{4}.
of lignite, 2240^{3}, 3343^{1}
app. for, 3557^{4}
tar yields in, 2240^{9}.
of lignite and coals, 2103^{7}, 3551^{7}.
of lignite, etc., P 2567^{4}.
low-temp., 102^{9}, 490^{6}, 491^{5}, 494^{1}, 656^{5}, 1314^{2,4}, 1706^{7}, 1706^{5}, 2404^{1}, 2405^{4,5}, 2574^{8}, 3073^{3}, 3343^{6}, 3557^{2}, P 3798^{6}, P 3799^{5}.
in America, 494^{2}.
analysis of coal for, 1704^{1}.
of coal, oil shale, etc., retort for, P 3228^{6}
as com. process, 981^{8}
detn. of yield of tar in, 3314^{5}
in Europe and America, 3343^{7}.
Fellner-Ziegler process of, 275^{7}
future trends in, 3797^{8}.
hard coke from, 1900^{8}
of lignite, 3072^{4}.
of lignite and pit coal, 2740^{6}
of lignites and bituminous shales, 490^{3}.
of powdered fuel, 1707^{1}
relation of origin and state of carbonization of coal to problems of, 2061^{2}
in relation to mining industries, 273^{1}.
reviews, 1508^{9}, 1898^{8}, 2573^{8}, 3557^{6}
at Sarre mines, 1706^{9}
of solid combustibles, 1138^{5}
survey of the field for, 1311^{5}.
tar from, 657^{9}
tunnel oven for, P 2577^{9}
of municipal refuse, P 2037^{2}.
of non coking coals, 490^{9}
ovens, portable, 282^{1}
of peat in Sweden, 2571^{6}.
plant for, 1898^{8}.
plant of Leopold mine in Edderitz, 3343^{7}
plant of Midland Coal Products, Ltd., 2059^{8}.
progressive regional, of coals, 1314^{8}.
rationale of, of coal, 2575^{1}
refractory materials in, 1314^{2}, 2902^{2}.
review of, of coal, 981^{9}.
in rotary retorts, 655^{6}.
of shale, etc., app. for, P 3564^{1}
of "Sosnitza" coal, 2060^{4}
of sub-bituminous coal, 2405^{3}
tar utilization in relation to, 493^{1}
tests, 493^{8}.
of textiles, 1909^{7}.
of textiles by acid, app. for, P 1722^{4}.
thermal analysis of, 3073^{2}.
thermal reactions in, of coal, 2904^{7}
of waste sulfite liquor, 2747^{7}.
of wood, 102^{4,5}, 2748^{2}
of wood in closed vessels, 1902^{6}.
of wool, 507^{4}.
of wool with acids, app. for, P 1528^{7}.
Carbon monoxide, absorption by $CuCl_2$, 1369^{7}.
absorption by skin, 71^{8}
adsorbed, elec. moment of mol. of, 531^{8}.
adsorption of, by activated charcoal, 2604^{5}.
by activated charcoal at very low pressures, 1346^{4}.
by blood, 2739^{4}.
by Pt black, 2927^{9}.
adsorptive equil. of mixts. with O and with H, 2138^{3}.
biochem. degradation of, 2715^{2}.

combustion of mixts. with O, 2414^{2}, 2923^{1}.
combustion rate of, 291^{2}.
in corpses, 1253^{1}
in decompn. and prepn. of org. compds., 2983^{5}.
decompn. of, 2103^{8}, 3624^{9}.
catalytic influence of ions of inert gases on, 2459^{9}
in corona due to alternating elec. fields, 861^{3}
Ne as catalyst for, 1760^{1}.
depolarization of, 1551^{1}
detection in fire damp, combustion gases and afterdamp, 3145^{6}
detn. of, P 1577^{8}, 2801^{2}
in blood and in air, 60^{1}, 1192^{1}.
in boiler flue gases, app. for, 1510^{6}.
in exhaust gas of trucks using producer gas, 3556^{3}.
in flue gas, app. for, 2739^{9}
in gas, 3796^{8}
in hydrogen mixt., 1576^{7}.
in metals, 1193^{1}
in mine air, etc., 1576^{7}
in N or other inert gases, app. for, 723^{5}.
in presence of CH_4 and H, 350^{9}
dielec. const. for, 2780^{9}.
diethylacetal, 2821^{9}
effect on copper at high temps., 3419^{1}.
on explosibility limits of C_2H_2 and air and H and air, 989^{1}
on fire brick, 270^{1}
on metabolism of yeast, 3308^{6}.
on plants, 1258^{1}
equil. $3Fe + 2CO = Fe_3C + CO_2$, 3429^{9}.
equil. of CO_2 with, in corona discharge, 700^{2}
equil. with austenite, 2810^{2}.
excretion from blood, 229^{3}
in exhaust gases of automobiles, 1875^{7}.
explosions of air and, in closed vessels, 3085^{5}.
explosions of mixts. of O and, catalysis in, 2953^{1}
in explosive gases, effect of confining explosive on content of, 3571^{3}
formation from alk. pyrogallol during O absorption, 5?
formation from CH_2O, 860^{7}.
gas mask for, 3757^{4}.
generation from C electrodes in elec. water heaters and boilers, 2955^{1}.
heat of adsorption by coal and charcoal, 1167^{9}.
hydrogenation of, 2814^{7}, 2815^{8}.
ionization potential of, 2118^{7}.
from iron oxide, P 3215^{8}.
in iron oxide reduction, 729^{4}.
in lime-kiln gases, 647^{9}.
magnetism of, 1350^{6}.
in manholes, 635^{1}.
manuf. of, P 3697^{1}.
metal salts of, 2467^{2}.
methane formation from H and, catalysis in, 860^{9}, 861^{1}.

methane manuf. from, MeOH formation during, 2229[5].
mol. diam. for, 2101[6].
mol., energy levels of, 2279[5], 3129[8,9].
moment of inertia of mol. of, 2101[3].
oxidation (catalytic) of, 2443[7].
oxidation of, catalyst for, P 3786[2].
catalytic influence of ions of inert gases on, 2459[9].
by water with Pd as catalyzer, 1017[6].
pharmacol. action of mixt. with HCN, 3194[5].
pharmacol. action of mixt. with H_2S, 3194[5].
photochem. reaction with, 2459[5].
poisoning by, 1856[6], 2016[7], 2749[5].
in automobile exhaust, 3521[9].
distribution of CO in blood in, 2021[7].
effect of lobelia on, 2881[2].
in industry, 2035[8].
literature of, 1289[5].
O-CO_2 treatment of, 635[6].
Parkinsonism following, 3740[3].
street risk of, 3051[5].
poisoning by, and its treatment, 2552[4].
preservation of plant organs by, 2180[4].
production by gas appliances, testing, 2062[8].
radon effect on mixts. of NH_3 and, 1173[9].
reaction: $CO_2 + C \rightleftarrows 2CO$, 3344[5], 3626[4].
reactions in, produced by α-particles, 145[5].
reaction with Cl_2, velocity of, 3621[2].
with Grignard reagents, 1073[9].
with HCl, P 3015[7].
with H, 1937[6]
with H (active), 3645[1].
with H, free energy and equil. const of, 539[1].
with H, photosensitivity and mechanism of, 546[3].
with H when photosensitized by Hg vapor, 3645[7].
with Fe, 3626[4].
with MeOH and with CO, 1745[6].
with Ni, Cu and their oxides, catalysis of, 2443[1].
with O in contact with Au, 537[7].
with Pd salts and Pt salts, 1039[6].
with PhMgBr, 2999[9].
with ZnO, equil in, 1021[3].
recorder for, in tunnels at Pittsburgh, 255[4].
reduction by H, Rh as catalyst in, 5[9].
reduction of, 3684[6].
refractive index in magnetic field, 2113[9].
removal from gases, 1476[9].
removal from H and N for NH_3 synthesis, P 3065[2].
sepn. from H, 3601[9].
soly. in C_6H_6, $PhNO_2$ and $CHBr_3$, 853[9].
soly. in Fe, 1972[8].
spectrum of, 13[7], 148[7], 337[4,6], 543[9], 1950[7], 1951[3], 2281[9], 2454[7].
spectrum of, in elec. field, 869[2].
systems: air–N–, air–CCl_4–, air–$CHCl_3$–, air–CH_2Cl_2, and air–CH_3Cl–, 1549[5].
in wounds from firearms, 1255[2].
in zinc distn., relation between C, Zn, ZnO, CO_2 and, 1377[2].

plastic materials with base of, 1695[3], 2050[8].
plastics, structure of, 1306[4].
precipitation of colloidal Au with, 2169[5].
preservation of, 3465[4].
as protein source in diet of rats, 933[3].
recovery from dairy waste, 959[6].
silver emulsion from, P 3539[5].
solids, manuf. of, P 1499[7], 3064[5].
soly. in HCl, 1934[2].
swelling of, in presence of org. acids in connection with their structure, 3116[2].
testing, for artificial horn industry, 3783[3].
trypsin effect on, 924[1].
trypsinized, as culture medium, 2178[4].
waterproof glue, P 1003[6].
yatren, effect on *Entameba dysenteriae*, 2541[9].

Casein, bromo-, 767[4].

Caseinogen, nitrogen detn. in, 2171[7].

Caseosan, toxicity of, 3035[1].

Casolari reaction, 1568[7].

Cassia, nodule formation in, lack of, 773[9].

Cassiopeium. See *Lutecium.*

Cassiterite, from Bolivia, 3669[6].
crystal structure of, 2600[9].
soln. of, 2475[5].
in Sullivan ore, 3276[4].
tin detn. in, 3663[6].

Castanea. See *Chestnut.*

Casting process. (See also *Cupolas; Molds (I); Sand.*)
adhesion to molds during, prevention of, P 897[8].
for alloys of Pb, Sn and Zn, 3416[6].
for aluminum, 3416[3].
for aluminum, coating molds for, P 898[9].
for aluminum-Cu-Mg alloys, 1381[7].
app. for, P 3443[4].
books: Handbuch der Eisen- und Stahlgiesserei, 896[6]; Le Laboratoire de chimie d'une fonderie de fonte, 2306[7]; Fonderie moulage et fusion, 3440[7].
for bronzes, 3421[3].
for bronze worm-gear blanks, 3421[3].
for building *in situ*, P 2238[9].
for celluloid, etc., app. for, P 3593[1].
for ceramic materials, effect of alkali and SiO_2 contents in waterglass on, 3839[3].
for copper, P 358[6].
for copper fins on cast Fe cylinders, P 1215[2].
core oils, rosin in manuf. of, 3090[3].
dental, 2897[6].

for duralumin, 3425[1].
elec. furnace for, 2460[4].
elec. furnaces in, 338[7].
fluxing the cupola, 1971[7].
for fused quartz, P 100[3].
gas supply for molds, device for, P 37[3].
for hollow ware in sections from cement, etc , P 3224[3].
for ingots, P 36[7], P 1215[2].
for iron, P 735[8].
for iron alloys, 2654[9]
for iron drier rolls, 32[7].
for iron in permanent metal molds, P 3442[2].
for magnesium, 3152[5]
for magnesium or other easily oxidizable metals, P 1976[5].
for metals, P 3682[7].
for metals and alloys, 2970[1]
mode of metal flow in molds of complicated design, 1582[9].
oxygen enriched air in foundry, 890[5]
for pipe, etc., from cement or similar mixts , P 3224[3].
for plaster and other materials, P 3551[9].
refractories for, 3789[4].
for silicon-Fe, P 1383[2].
for slip, P 2236[1].
for steel, app. for, P 575[9].
steel, oil-fired open hearth furnaces in, 3676[6].
technic, 2637[5].
for zinc bronze, temp effect in, 3421[1]
Castings. (See also *Casting process; Molds (I)*)
aircraft, of Al alloys, 733[7].
aluminum, 3422[9].
effect of cold rolling on inhomogeneous, 733[9].
inspecting with x-rays, 167[2].
specifications of A S T M. for, 951[5]
welding of, 1212[7].
of aluminum-Mn alloys, 733[8].
of aluminum-Si alloy, P 898[2], P 1215[2].
annealing, P 2479[7].
of brass and bronze, 3416[6].
brass journal, cooling fractures in, 734[4].
carbon-steel railroad, specifications of A.S.T.M. for, 954[4].
carbon-steel, specifications of A.S.T.M. for, 1121[4].
centrifugal, with protective coatings, P 3154[8].
chromium-coated, 3063[2]
copper, exudations on, 2656[5].
dental, P 3544[9].
die, manuf. and use of, 888[6].
dilation of, 3418[6].
electroplating with Ni, defective phenomena in, 552[2].
from furnace scrap, 567[2].
of gray Fe, P 3279[1].
heat-treating iron, P 1383[5,8].
holes in, Cu-Si alloy for filling, P 736[4].
iron, P 2479[7], P 2974[4], 3430[6].
iron, with Si-alloy surface, P 2479[6].
malleable Fe, P 37[4], P 358[7].
malleable, specifications of A.S.T.M. for, 955[2], 1122[1].
of manganese steel, heat treatment of, P 3651[8].
Perlit process for, 892[4].
Röntgen-ray examn. of steel, 32[4].
sand, specifications of A.S.T.M. for, 1121[4].
steel, elec. heat-treating of, 2621[4].
heat-treatment data on quality of, 3677[7].
melting practice for converter and acid elec., 731[8].
waste reduction on, 1048[9].
Cast iron See *Iron*.
Castor beans, enzymes of, hydrolysis of esters by, 1999[6], 2339[1].
fertilizer from, nitrification under tropical conditions, 3768[3].
oil in, effect of climate, etc., on, 2348[4].
protein of, protoctin from, 3703[3].
from Punjab, compn. of seed and cake, 1483[6]
Castor oil, consts. of, 2989[5].
detection in chaulmoogra oil, 3210[3].
effect on intestinal peristalsis, 454[8].
fatty acids of, sepn. of ricinoleic acid from mixed, 833[8].
fluorescence of, polarization of, 1952[8].
hydrogenation of, 2590[8]
interesterification of, 303[7].
law of Poiseuille and, 311[6]
as lubricant, 3802[6].
2-octanol from, 39[6].
origin, compn and uses of, 2389[7].
potential distribution in a layer of, 2780[7].
preserving, P 3244[1]
from Punjab, 1483[7].
as purgative, 452[3].
in seeds, effect of climate, etc , on, 2348[4].
uses of, 2227[5].
viscosity at higher temps., 3255[4].
Castor oil plant, development in medium contg. Th X, 2692[6].
Castration, effect on salt content of blood, 1109[1].
nitrogen metabolism after, effect of injections of emulsions of testes and prostate and of insulin-like testicular exts. on, 776[9]
Catabolism. See *Metabolism*.
Catalase, 1820[2].
activity in blood, effect of preservation on, 2685[4].
in dormant seeds of *Xanthium*, respiration and, 434[5].
in oral mucous membrane, 1836[9].
in plant tissue, detn. of, 2183[3].
in seeds, 2520[3].
biol oxidations and, 2193[9], 3704[3].
blood, 1086[8].
in cancer, 3736[2].
effect of sunlight on, 2529[9].
in cream, 76[1].
detn. in bacteria, 928[1].
detn. in milk, 2027[8].
iron in prepns. of, effect on activity, 1419[3].
liver, 1086[8].
in needles of evergreen trees, effect of temp. on, 2691[8].
oxidation with, mechanism of, 363[5].
in paramecia, effect of $CHCl_3$ and of Et_2O on, 3316[4].
production by anaerobic organisms, 2869[5].
properties of oxyhemoglobin, 2685[3].
reaction of, effect of temp. on, 2505[9].
in salmon trout eggs, 1471[8].
sensitivity of blood, 2337[1].
theories of respiration and, 2170[5].
in tissues and blood normally and in tuberculosis, syphilis and cancer, 1662[9].
ultra violet light effect on, 2336[8].
ultra-violet light effect on blood, 2337[2].
in warm-blooded animals and evergreen trees, 3300[4].

Catalysis. (See also *Catalysers* and the various catalyzed processes, as *Hydrogenation.*) 2609[3].
of acetoacetic acid hydrolysis by strong acids and bases, 138[2].
address, 2109[6].
adsorption and, 608[3], 3614[5].
by alumina, 691[4].
by alumina of reaction between EtOH and NH_3, 538[4].
app. for, 2758[5].
auto-, with variant catalysts, 1019[5].
autoxidation and, 3374[6], 3625[6].
of autoxidation of carbohydrates and hydroxy acids, 582[9].

of bromination of fatty acids, 42[2].
in buffer solns., 3375[6].
by carbon, 1018[5].
in carbon monoxide dissocn., 3621[9].
by charcoal in oxidation of oxalic acid, effect of N and Fe on, 3375[6].
of combustion, 537[7], 2413[1].
contact, 1164[2].
contact, committee rept. on, 1163[9].
controlling, P 81[6].
by copper in oxidation of NH_3 to nitrite, 1744[5].
by copper in reactions with alcs., 3375[9].
decompn. by, in closed vessels, 2776[6].
of decompn. of org. compds. by splitting of CO, 2983[5].
of dehydration of alkylvinyl carbinols, 2146[2,3].
diluent effect on initial stages of, 2776[5].
with dust particles, 3374[9].
in dyeing, 3816[9]
in electrochemistry, 2271[8].
in enzyme reactions, 3707[3]
of ethyl alc. decompn., P 1243[2]
in explosions of mixts. of CO and O, effect of infra-red emission on, 2052[9].
gaseous, by metals of Pt group, 5[9].
in gaseous explosions, 2749[7].
of gaseous reactions, 824[1].
gaseous, with He group, 702[3].
heterogeneous, 5[8], 2271[7], 2609[2].
at high temps. and pressures, 744[5].
homogeneous, promoter action in, 3260[6].
by hydrogen halides in BuOH, 3376[4].
in hydrogen iodide decompn. on surface of Pt, 1017[7].
of hydrogen peroxide decompn. in acid Cl-chloride soln., 1163[5].
of hydrogen peroxide decompn. in Br-bromide soln., 860[6].
of hydrogen transference in dissimilation, 5[4].
hydroxyl-ion, secondary kinetic salt effect in, 325[2].
immobile groups of atoms with strong sp. external fields as cause of, 1549[6].
industrial, 463[9], 2378[3], 2551[2], 3322[6].
with insulin, vitamins or hormones, 52[4].
intermediate reactions in, 3625[3].
with iodine, 1061[3].
ionic, 1031[9].
by iron ions in oxidation of EtOH by H_2O_2, 3375[7].
of isomerization of eugenol and safrole, 2671[1].
kinetic equations of homogeneous, 3624[3].
laws of, 607[9].
mechanism of, 751[9], 2935[2].
mechanism of, change in form of mols. in, 1392[8].
of mercury acetate decompn., Cu salts in, 2459[4].
by metallized SiO_2 gel, 2109[6].
by metals (heavy), effect of Et carbylamine on, 3704[9].
in methane formation from CO and H, 860[9], 861[1].
in micro-heterogeneous systems, 2772[5].
negative, theory of, 3375[1].
by nickel in synthesis of water vapor, 1348[4].
in nitric oxide decompn. at surface of Pt, 3375[2].
of nitroamide decompn., 538[2].
by nitrogenous compds., 2443[6].
oxidation and, 2935[1].
of oxidation of borneol by reduced Cu, 407[9].
in oxidation of carbohydrates, uric acid and inorg. substances, 2935[4].
of oxidation of CO, 2443[7].
of oxidation of dihydroxyacetone and glyceraldehyde in phosphate solns., 1637[2].
in oxidation of HCN, 3625[8].
in oxidation of HCN and NH_3, 2443[9].
in oxidation of CH_4, 2273[1].
of oxidation of org. compds., 2990[6].
of oxidations by HIO_3, 2981[2].
in oxygen removal from gas mixts. contg. H, 3063[6].
of photographic processes, 3652[9].
photo-, in rearrangement of *allo*-δ-phenyl-α,γ-pentadienic acid, 1799[5].
principles and methods of, 1163[5].
by proteobismuthic ppts., effect of radioactive elements on, 3647[4].
of racemization of optically active ketones, 2325[1].
of reaction between H_3AsO_3 and $HMnO_4$, 2442[5].
of reduction of acid chlorides, 1226[2].
in reduction of acid chlorides, effect of $POCl_3$ on, 380[5].
in reduction-oxidation, 1017[6].
by silver-ammonia ion in oxidation of NH_3 by peroxysulfates, 2609[4].
by silver ion of oxidation of chromic salts by peroxysulfuric acid, 1744[9].
in sodium hypochlorite decompn. by metallic oxides, 3375[3].
by solid surfaces, 3625[5].
in soln. of zinc in acids, 1019[1].
in soln. of Zn, overvoltage of H on finely divided metals and its relation to, 1019[4].
solvents in the, of the reduction of acid chlorides, 1395[9], 1396[3].
as surface action, 3624[6].
surface, in photochem. processes, 2791[9].
in synthesis at high pressures, 1937[5].
theories of, 859[9], 860[1], 1937[5,6], 2442[7,8], 3260[6].
theory of, in heterogeneous reactions, developments from, 3625[5].
with thorium oxide in dehydration of EtOH, 1018[8].
two-phase, theory of, 1549[3].
by water and paraffin wax in reaction of NO with O, 3373[2].
with water in photosynthesis of HCl, 545[9].
Catalyzers. (See also *Catalysis; Enzymes; Saponification.*)

for acetaldehyde and Ac_2O manuf., P 1995^{6,8}.
for alc. and aldehyde manuf. from C oxides, P 1995^{7}.
alcoholates as, in prepn of alcs. and aldehydes, 2321^{3}.
for alkyl chloride manuf , P 918^{1,2}
alum as a, for prepn. of ether, 2816^{4}.
alumina as, in dehydration of MeOH, 2935^{5}.
for dehydration of PrOH, 1782^{7}.
for Et_2O prepn , 39^{7}.
for reaction of isovaleraldehyde with NH_3, 2499^{2}.
aluminum chloride as, for manuf of alkyl chlorides, P 51^{4}.
for ammonia synthesis, P 96^{7}, P 3065^{3}, 3334^{7}.
thermionic properties of, 2728^{1}.
x-ray examn of, 526^{6}
autocatalyses with variant, 1019^{5}.
for benzanthrone deriv manuf , P 1996^{2}.
benzenesulfonic acid as, for prepn. of Et β-bromopropionate, 43^{9}
for benzoic acid manuf., P 51^{3}
for benzoyl chloride manuf., P 51^{4}.
in bleaching vegetable fibers, Cu and Fe compds. as, 3087^{8}.
for carbonization of coal under H pressure, 3342^{6}
charcoals as, 2442^{2}
for chlorination of C_2H_4, 359^{6}
chromic chloride as, for reaction of CO and PhMgBr, 2999^{9}.
colloidal, P 1696^{5,6}.
colloidal metals of the Pt group as, 137^{9}.
for condensation and polymerization reactions of C_2H_2 and AcH, P 2333^{2,3}.
contact, activity of, 5^{6}, 691^{2}
copper, action on pinacols, 2999^{9}.
copper and Cu salts as, for decompn. of diazonium compds , 1053^{9}.
copper as, in condensations of C_2H_2, 1384^{7}.
in dehydrogenation of CH_3OH and CH_2O, 860^{7}.
for hydrogenation of CO group under pressure, 3163^{9}
in hydrogenation of phorone, 860^{4}.
for reduction of CO group in aromatic compds., 2487^{6}.
copper oxide as, for oxidation of borneol, 408^{1}.
copper oxide as, in prepn. of esters from BuOH, P 1813^{6}
for decompn. of esters of sec. alcs., 580^{1}.
for decompn. of $MeCH(OAc)_2$, P 1630^{9}.
for decompn. of $KClO_3$, MnO_2 and Fe_2O_3 as, 2627^{2}.
definition of, 1937^{7}.
for dehydration of phenol-alc. systems, 385^{1}.
effect of size and shape of pores, 2443^{1}.
effect on thermal decompn. of cellulose and lignin, 2241^{8}.
for elementary analysis, prepn. of, 1966^{1}.
for ester manuf., P 768^{9}.
gaseous contact, poison for, 1476^{7}.
in gaseous explosions, 2751^{1}.
heat of activation lowering by, 3624^{8}.
for hydrogenation, 301^{7}, 673^{1}.
hydrogenation by metallic, discovery of, 3625^{1}.
hydrogenation in presence of non-hydrogenating, 1791^{1}.
for hydrogenation, Ni salts as, 1402^{7}.
for hydrogenation of azines, 3282^{3}.
for hydrogenation of CO, 2814^{9}.
for hydrogenation of C_2H_4, 39^{3}.
for hydrogenation of org. substances, 1017^{9}.
for hydrogenation, Pt black as, 1218^{2}.
for hydrogen manuf. from CO and H_2O, P 3786^{5}.
for indole synthesis, 598^{2}.
industrial applications of, 1875^{6}.
iodine as a, for prepn. of Grignard reagents, 2657^{2}.
ions of inert gases as, 1760^{4}, 2459^{9}.
iron as, for decompn. of fatty acids, 2480^{6}.
iron salts as, for reaction of H_2CO_3 and H_2O_2, 3684^{8}.
magnetic properties of, alteration in H_2O_2 decompn., 3625^{2}.
manganese butyrate as, in oxidation of butyraldehyde, P 1813^{8}.
manganese oxide as, for oxidation of toluene, P 1631^{3}.
mean life of hypothetical, detn. of, 2123^{3}.
mercuric chloride as a, for prepn. of org. Be compds., 2657^{2}.
mercury as, in sulfonation of anthraquinone, 756^{6}.
mercury compds. as, for manuf. of vinyl esters, P 3696^{6}.
for metaldehyde manuf., P 917^{9}, P 2333^{7}.
metallic, P 3065^{3}, P 3543^{9}.
metallic, activation of, P 3398^{4}.
metallic chlorides as, for reaction of Bz_2O_2 with C_6H_6, 1986^{4}.
for methanol manuf , P 209^{9}, P 210^{1}, P 768^{5}, P 1414^{8}, P 2504^{1}.
2 - naphthalenesulfonic acid as, in prepn. of unsatd. acids, 1591^{3}.
nickel and Cu, crit. potentials of H in presence of, 1548^{9}.
nickel as, P 515^{8}.
for decompn. of acid amides, 1054^{9}.
in hydrogenation of unsatd. acids, 834^{1}.
for reduction of α-cyanocamphor, P 2167^{7}.
in reduction of nitriles, 1216^{1,3,6}.
nickel, compn. of reduced, 138^{4}.
effect of acid and alk. substances on, 2590^{4}.
fat from, 2758^{6}.
heat of adsorption of H for, 2442^{3}.
promoter action of thoria on, 325^{6}.
toxicity of thiophene for, 860^{1}.
x-ray crystallometry of, 131^{5}.
for nitrogen fixation, P 2395^{6,7}.
for org. reactions, 37^{7}, 38^{1,4}.
for oxalic acid decompn. by Ac_2O, 363^{3}.
for oxalic acid manuf., 2312^{1}.
for oxidation, P 3786^{2}.
for oxidation of alcs., 2996^{1}.
for oxidation of BuOH, P 1631^{1}.
for oxidation of CO, 3260^{9}.
for oxidation of CH_4 to CH_2O, P 970^{3}.
for oxidation of nitro compds., P 1631^{3}.
for oxidation of org. compds., P 51^{6}.
for oxidation-reduction reactions of aldehydes or ketones and alcs., 1611^{2}.
palladinized $BaSO_4$ as, in reduction of nitro alcs., 1052^{2}.
palladium as, for cleavage and oxidation of HCO_2H, 3280^{6}.
for oxidation of alkylvinylcarbinols, 1217^{1}.
for reduction of C_2H_2 derivs., 2977^{9}.
photo-, action on early sprouting of resting buds and on the germ, 483^{7}.

in photochemistry of 3-pentadienone derivs., 180[4].
platinum black-PtO as, for reduction of cinnamaldehyde, 376[8].
platinum black-PtO as, for reduction of org. compds., 1599[9].
platinum blacks as, for hydrogenation of aldehydes and ketones, 739[1].
platinum electro-sols as, 1348[5].
platinum, hydrogenation of cottonseed oil with, 2271[7].
of platinum in the contact H_2SO_4 reaction, effect of x-rays on, 138[7].
platinum oxide as, for reduction of nitriles, 371[7].
platinum oxide as, for reduction of org. compds., 1054[5].
platinum, relation between rate of catalytic decompn. of H_2O_2 and particle size of, 3624[5].
poison for, iron salts as, 1600[3].
poisoning and reactivation of, 1599[6].
poisoning of, 687[1], 692[1], 2272[7].
for polymerization of butyraldehyde, P 1631[1].
for polymerization of cyclopentadiene, 2148[7].
for polymerization of vinyl esters, P 2333[6].
positive ion emission from, of Fe oxide and alkali metals, 2946[7].
potassium xanthate as, in prepn. of substituted thioureas, 2325[6].
for pyruvic acid decompn., 45[7].
reaction of metals and HNO_3 in presence of, 3376[3].
for rearrangement of diacylanilides, 745[5].
for reduction of CO, 3684[6].
for reduction of cresols, 1064[6], 2841[8].
for reduction of 1-nitronaphthalene, 1232[7].
for reduction of rubber, 3165[5].
regeneration of, P 2052[3].
rhodium black as, 2948[3].
sodium ferropyrophosphate as, in atm. oxidation, 1017[4].
specific action of, 1550[3].
for sugar mutarotation, amphoteric solvents as, 1163[7].
sulfates as, in manuf. of ketene, P 3697[6].
in sulfite pulp manuf., 3565[7].
for sulfonation of 2-naphthol, P 769[1].
sulfuric acid as, in prepn. of α-chlorohydrin, 2311[8].
surface properties of, effect of inert diluents on, 2442[2].
for synthesis of O-contg. org. compds., P 424[6].
tertiary aliphatic amines as, for reaction of 1-naphthyl isocyanate with phenols, 2319[4].
for tetraglucosan manuf., P 3698[1].
thorium oxide as a, for decompn. of glycerides, 2483[2].
titania as, 1163[8].
two-phase, theory of, 1549[3].
vanadates as, in oxidation of aldehydes and alcs., P 1814[1].
variations in, according to heat of adsorption of H, 1549[9].
water as a, for polymerization of CH_2O, 2816[7].
water as polar, in reaction of C_2H_4 and Cl_2, 1744[9].
zinc oxide as, for dehydration and dehydrogenation of alcs., 2308[8].
Cataphoresis, adsorption and, 2104[2].
demonstration of, app. for, 1731[7].
in electrolytes, 1740[7].
of oxygen and CO_2, 1820[7].
in pathol. organs, 2014[7].
under physiol. conditions, 1641[8].
of sugars, 1820[8].
of thrombin, 624[9].
velocity of, effect of H-ion concn. on, 2107[1].
Catechin. See *Catechol; Pyrocatechol*.
Catechol (*catechin*). (See also *Pyrocatechol*.)
constitution of, 2489[3].
crystal structure of, 2101[8].
from cyanidin, 382[7].
rearrangement of, 405[4].
——, **3,5 - dinitro-**, dissoc. consts. of, 689[9].
——, **tetramethyl-***, reaction with PCl_5, 3006[7].
ψ-Catechol. See *Pseudocatechol*.
Caterpillars, insecticides for tent, war chemicals as,* 3058[1].
locomotor activity in tent, effect of temp. on, 629[9].
metamorphosis of, 3748[9].
Catgut, bacteriol. control of, 2390[5].
disinfecting, P 3324[3].
Catgut substitute, P 3579[3].
Cathartics. See *Purgatives*.
Cathode rays. See *Rays, cathode*.
Cathodes. (See also *Electrodes*.)
accumulator, P 714[7].
accumulator, lead oxide from old, P 714[7].
of arc discharge, changes in, 1175[9].
copper, crystallite orientation in, 2971[4].
diffusion of H through metallic, 2446[6].
disintegration, 3639[1].
disintegration in H, 2446[7].
dispersion of, nature and charge of the metal particles emitted in, 3643[1].
dropping Hg, analysis with, 2297[1].
for elec. discharge tubes, P 128[7].
for electrolytic depositions, of steel wire gauze, 2963[8].
for electron tubes, P 3650[2,3].
fall in Kr and Xe, 1025[7].
of glow discharge, energy distribution between anodes and, 3383[1].
of glow discharge, phenomena of, 7[8].
hydrogen, effect on strength of steel, 2779[2].
mercury, electrolysis of Na chromate with, 3395[6].
hydrogen over-potential at, 2939[9].
use in anodic oxidation processes, 1023[7].
multiple, and origin of canal rays, 541[8].
overvoltages at Pb and Hg, 141[9].
oxide, cooling effect on, 2116[9], 2784[7].
oxide, work function of, 3643[9], 3644[1,2].
pulverization of alloys by, 2811[6].
for vacuum tubes, P 22[3].
of vacuum tubes, cores for, P 343[1].
Cathodoluminescence. See *Luminescence*.
Cations. (See also *Ions, electrolytic*.)
effect on concn. in intestine and uterus, 1860[7].
on esophagus muscles, 3744[6].
on osmotic resistance of red blood cells, 3465[7].
in perfusing liquids, effect of change in concn. on heart, 2358[4].
Cattle. See *Feeding experiments*.
Cauliflower, nitrogenous constituents of bud, 3715[8].
Caustic potash. See *Potassium hydroxide*.
Caustic soda. See *Sodium hydroxide*.
Cauterization, prepns. for, P 264[3].

Cayenne pepper. See *Capsicum*.
Ceanothus, *americanus*, alkaloids of, 1688[4].
Cecal contents, hydrogen ion concn. of chicken, effect of feeding *B. acidophilus*, lactose, dry skim milk or whole milk on, 3024[5].
nitrogen and protein in, 3500[4,6].
Cedar oil. See *Oils*.
Cedrene, *l*-, from *Dacrydium elatum* oil, 798[4].
oxidation of, 1073[3].
reaction with HCO_2H, 187[3].
Cedrol, *d*-, from *Dacrydium elatum* oil, 798[4].
in oil from Tonquin, 263[6].
Cedrus. See "cedar" under *Oils*.
Ceilings, plastic compn. for, P 2567[3].
Celadonite, constitution of, 1195[5].
pseudomorph after apophyllite, 884[5].
Celanese. See *Silk, artificial*.
Celery, nitrogen in, 615[9].
storage effect on, 2029[9].
Celestite, from Caramanico, 2132[2].
compressibility of orthorhombic, 525[1].
crystal structure of, 852[2], 3597[6].
from Senegal, 2132[2].
Celite, in cement clinkers, 1702[7].
Cellhorn, 116[9].
Cellobiase, of malt ext., sepn. of, 3705[8].
Cellobiononitrile, octaacetyl-*, degradation of, 2988[3].
Cellobiose. (See also *Cellulose*.)
and acetate, reversible transformation of, 2684[8].
acetolysis of, 380[1].
celtrobiose from, 2181[2].
constitution of, 2988[2].
in differentiation of members of colon-aërogenes group of bacteria, 2868[6].
fermentation by coli aerogenes group, 3480[6].
——, **octaacetyl-***, acetolysis of, 380[1].
anti-oxime, 2988[6].
——, **octaethyl-***, acetolysis of, 380[1].
Cellobiose anhydride*, and acetyl derivs., 381[2,3,4].
Cellobioside, β-benzyl-*, 380[5].
——, **β-benzylheptamethyl-***, 380[5].
——, **heptamethylmethyl-***, reducing action of, 1221[4].
Cellodextrin, optical rotation of, 665[2].
Cellon, 116[9].
stability at high temps., 3051[1].
Cellophane, manuf. of, 3810[9].
Cellosan, 2829[8].
Celloxan, as dyeing assistant for acetate silk, 1325[6].
Cells. (See also *Protoplasm*, and the following headings.)
artificial, with bio-colloidal membranes, 2517[8].
cytolysis of, model for, 2685[9].
oxidation potential of, 2337[1].
permeability of, 1933[4].
protoplasm in interior of living, microelectrodes and micromagnets for study of, 3707[8].
respiration of, 1840[4].
simulating living, 1632[6].
suspensions of, reduction potentials in, 2779[9].
Cells, animal. (See also *Tissue, animal*; etc.)
activity of, coagulative changes in protoplasm and, 1997[2].
books: La cinétique du développement: multiplication cellulaire et croissance, 771[5]; Synthese d. Zellbausteine in Pflanze u. Tier, 2002[2].
cancer, effects of β-rays from Ra on, 3741[6].
cancer, glucolytic properties of, 1451[7].
carbohydrate utilization by, 3725[1].
carcinoma, metabolism of, 1109[9].
cataphoresis in, 1641[8].
cholesterol, phosphatides and lipoids in, as basis for treatment of arteriosclerosis, 943[8].
colloidal properties of surface of, 2684[5], 3463[1].
destruction of, acidification of medium by, 428[9].
destruction of, in oncology, 3735[1].
differentiation by Fe salt formation, 215[1].
division of, effect of neutral red on, 1872[4].
effect of Na on rate of, 2539[9].
imitations of, 926[6].
Donnan equil. and osmotic pressure relation between serum and, 3725[6].
effect of Se and Se compds. on, 1668[7].
elec. potential of colloids of, effect on staining capacity, 1817[5].
elec. tension in, 1641[7].
energy exchanges and metabolism of, effect of radioactivity on, 2000[7].
enzymic activity of, designation of, 2170[5].
enzymic nature of phenomena of, 611[4].
epithelial lung, study of secretion by staining, 1857[1].
equil. in, relation of lipoids to, 57[9].
functions of, nutrition and, 437[4], 3489[4].
growth of normal and malignant, effect of increased O pressure on, 1668[8].
identity of action of nerves, ions and poisons on, 2007[8].
ion combinations in study of, 3462[1].
irradiation effect on, 1999[7].
lipase in gastric juice from contamination with, 1087[1].
lipoid-contg., in spleen in diabetes with lipemia, 2201[7].
liver, effect of H ion concns. on mitochondria in, 1631[9].
effect of sugar on respiration of, 3493[1].
fat content in hibernating salamander, 2541[3].
magnesium and Ca in, effect of, 1246[9].
of marine eggs, H-ion concn. and oxidation-reduction potential before and after fertilization and cleavage, 1116[9].
membranes of, effect of Ra on permeability of, 3699[2].
membranes of, effect on decompn., 3493[4].
metabolism in serum, manometric detn. of, 1421[2].
metabolism of normal and malignant, 445[9], 3506[5].
metabolism of, reversible permeability of membranes and, 1160[1].
multiplication of, chem. nature of substances required for, 3707[4].
muscle, reaction with acetylcholine, 3743[1].
neoplastic, carbohydrate metabolism in, 2198[6].
nucleal reaction and staining of, 214[3].
nucleus, chemistry of, 52[2].
osmosis in, cholesterol and, 1547[8].
osmotic swelling in, kinetics of, 2512[8].
oxidation and reduction by, cancer origin and, 1663[9].
oxidation-reduction potential of, 1999[8].

oxidizing agents in, methylene blue and O as, 1637^{8}.
oxygen removal from, 3749^{8}.
of pancreas, nuclear substances of, 3175^{5}.
pathologic glia and, 1822^{4}.
permeability of, chloride content of fluids in relation to selective character of, 226^{8}.
permeability of, effect of sympathetic nerve on, 1817^{6}.
physiology of, 625^{5}.
physiology of, micrurgical studies in, 2511^{7}.
potential differences between interior and exterior of, origin of, 1246^{9}
processes in, effect of H_2S on, 2170^{2}
proliferation, causes of, 3735^{8}
protozoa, encystment of, 2683^{9}.
respiration of, effect of thiocyanate on, 920^{3}
respiration of liver, 410^{3}
respiration of normal and neoplastic, effect of ions Rb-SeO_3-SeO_4 on, 1664^{9}.
respiration of, pharmacology of, 3190^{6}.
of spinal cord, effect of spasm producing poisons on motor ganglion, 1857^{9}
of sponges, behavior of dissocd., 213^{4}.
swelling of, effect of H-ion concn on, 2512^{9}.
thyroid, activity and structure of, 3464^{9}.
in tissue cultures, effect of CO_2 on, 2686^{2}.
urate genesis in orthopteric acridian, 1282^{4}.
in vitamin insufficiency, 776^{6}.

Cells, electrical See *Accumulators; Cells, electrolytic, Cells, voltaic*

Cells, electrolytic (See also *Anodes, Electrodes; Rectifiers.*) P 21^{7}.
for alkali metal chlorides, P 22^{5}.
for aluminum refining, P 151^{4}.
for cellulose deposition, P $2957^{1,5}$.
for chlorine and NaOH manuf., 1904^{2}
copper refining, voltage studies in, 3394^{1}.
for decompg. metallic salt solns., P 3398^{3}.
for deposition of Cu, etc., P 3136^{7}.
for deposition of metals, P 875^{9}.
diaphragms for, P 848^{5}.
electroplating, anode holder for, P 3398^{6}.
for electroplating metal sheets, P 1567^{8}.
for fused metal salts, P 715^{4}.
for gas manuf., P 1360^{8}.
for iron production, P 22^{6}.
for manuf. of Al or other earth "metals," P 1762^{6}.
for metal coated roofing sheets, P 1360^{8}.
of pairs of reference electrodes, e. m. f. of, 2112^{2}.
potential difference over, app. for measuring, 2447^{4}.
refrigerated, 873^{1}.
rubber separators or diaphragms for, P 2096^{2}.
for sepg. metals such as Ag, Au and Pt, P 1567^{8}.
for sodium chloride electrolysis, P 341^{2}, P 1957^{8}, 3269^{5}.
for sodium hypochlorite, etc., P 2462^{7}.
Swiss products from, in 1925, 3647^{8}.
for water electrolysis, 20^{5}, P 341^{2}, P 3136^{6}, P 3270^{9}, P 3397^{3}, P 3650^{7}.
for water electrolysis, device for preventing explosions in, P 2076^{2}.
for water electrolysis, etc., P 1567^{9}.

Cells, plant. (See also *Tissue, plant.*)
acid penetrability of, 2691^{4}.
amylogenic condensation in, 2520^{9}.
book: Synthese d. Zellbausteine in Pflanze u. Tier, 2002^{2}.
cataphoresis in, 1641^{9}.
closing stomata, effect of chem. agents on starch content and osmotic values of, 2351^{5}.
contraction, expansion and plasmolysis of, effect of metals on, 2181^{6}.
cytoplasm of, 1830^{8}.
effect of H ion concn. of nutritive substrata on, 3482^{4}.
electrophoretic migration of, 2868^{6}.
energy exchanges and metabolism of, effect of radioactivity on, 2000^{7}.
ethyl alc. and AcH production by, in relation to concn. of O and CO_2, 1830^{4}.
formation in fungi, chitin in, 2867^{1}.
growth of, as problem in permeability, 2181^{4}.
interchanges with environment, effect of lipins in, 2517^{8}.
lactic acid formation by, 2691^{5}.
membranes of, relation to crude fiber, 3516^{6}
metachromatic staining of walls of, with substantive dyes, 1427^{6}.
of *Nitella*, dye accumulation in, 1428^{3}, 2520^{8}
onion, chloroform effect on protoplasm, nucleus and chondriome of, 3304^{1}.
osmosis of, application of Donnan membrane equil. to, 924^{5}
oxidation intensity in, equil. of cellular constituents and, 1429^{1}.
permeability in, 2517^{9}, 2691^{9}.
permeability of, in leaves, 1425^{9}.
permeability to H and OH ions, effect of neutral salts on, 1831^{8}.
permeability to K and Ca ions, 3022^{4}.
pigments of, physico chem. actions of, 3178^{8}
polysaccharides and aromatic constituents of, histol. studies of, 1830^{6}.
potassium localization in, 3309^{3}.
protein in, labile modification of reserve, 2872^{6}.
protoplasm in, effect of wounds on rotation of, 433^{9}.
reproductive, 220^{7}.
salt absorption by, 220^{5}
starch catabolism in mesophyll and guard, 2180^{4}.

Cells, voltaic (*Under this heading all primary cells are indexed. For secondary cells see* Accumulators. *See also* Anodes; Depolarizers; Electrodes; Polarization, electric.) (*Patents.*) 21^{5}, 340^{4}, $553^{6,7}$, 714^{5}, 1181^{9}, 1360^{3}, 1568^{1}, 1762^{1}, 2957^{6}, 3136^{4}, 3397^{1}, $3649^{5,7}$.
alternating-current, 3376^{9}.
with automatic depolarization, P 3649^{8}.
with carbon electrodes, P 2126^{4}.
coating compn. for terminals, P 21^{7}, P 714^{6}.
coating for electrodes of, P 1568^{3}.
combustion, 1169^{3}, 3134^{2}.
concn., e. m. f. of, 134^{9}.
concn., e. m. fs. of $BaBr_2$, 2440^{5}.
container for, P 1360^{4}.
contg. hydrochloric acid, H_2SO_4 or H_3PO_4, e. m. f. of, 1023^{8}.
of copper oxide type, P 340^{5}.
copper-Zn, increasing potential of, 2954^{9}.
corrosion of, compn. for preventing, P 3154^{5}.
depolarizer protection in, P 3649^{7}.
dry (*Patents.*) $21^{4,7}$, 340^{5}, 553^{8}, 714^{5}, 875^{5}, 1568^{2}, 1762^{2}, $1957^{6,7}$, $2126^{2,3}$, 2462^{4}, 2957^{6}, 3136^{4}, 3270^{8}, 3396^{9}, 3397^{1}, 3649^{9}, 3650^{1}.
dry, electrolyte for, P 21^{6}.

dry, sealing compn. for, P 98[3].
effect of superposed a. c. on polarizable, 3394[2].
efficiency of, catalysis and, 2271[8].
electrolyte for, P 340[6].
electromotive force of, calcn. of, 2276[8].
contg. AmOH with KCl, $CaCl_2$ or HCl, 141[5].
contg. fluorescent electrolytes, 1357[8].
detn. of, 1931[1].
seat of, 874[6].
gas vents for, P 875[5].
interconnected, P 2462[5].
ion-concn., P 3397[2].
of Leclanché type, P 875[5].
light and heat effect on, 1005[8].
oil releasing device for electrolyte of, P 340[7].
phase rule (modified) applied to, 3628[3].
photoelec., P 1924[6].
alkali metal, 2124[7].
behavior of AgI in, 710[7].
contg. fluorescent electrolytes, origin of e. m. f. of, 2944[1], 3644[6].
for phonocinematography, 2959[3].
photogalvanic element of, spectral distribution of sensitivity of, 2619[2].
rubber separators or diaphragms for, P 2096[2].
selenium, P 875[9], P 3650[8].
selenium, sensitivity of, 2953[7].
as smoke detector, 1359[8].
standard, 874[4].
standard Cd, applicability of Wolff's temp. formula for, 2461[6].
standard Cd (modified Weston), with small temp. coeffs, 327[7].
with sulfate solns , activity coeffs. from measurements of, 1935[7].
thermo-, 2446[1].
thermodynamic p. ds. of, 328[4].
thermoelements and, 1179[6].
zinc deposition on anode of, 2461[1].
Cellulase, decompn. of artificial silk and native cellulose by, 1416[9]
Celluloid, camphor detn in, 352[7]
coloring pressed articles of, P 1892[1].
fabric coated with, P 2254[1].
fireproofing, 3565[4].
iridescent coating for, P 3065[9].
Italian industry of, 3810[8].
manuf. of, 284[1].
manuf. of, analysis of raw materials used in, 3810[9].
melting and casting, app. for, P 3593[1].
from nitrocellulose and acetanilide, P 1905[1].
polishing compn. for, P 3085[1], P 3814[4].
printing plates of, P 504[5].
Röntgen-ray refraction in prisms of, 2943[2].
sheets of, P 3814[4].
sheets of glass and, P 1500[3,4].
Celluloid substitutes, from cellulose, P 2584[3].
manuf. of, 284[1].
Cellulose. (See also *Amylohemicellulose; Cellobiose; Copper-ammonia cellulose; Hydrocellulose; Lignocellulose; Oxycellulose; Paper pulp; Silk, artificial; Sulfite liquor; Threads; Viscose.*)
acetylation of—see *Cellulose acetates*.
acetyl derivs.—see *Cellulose acetates*.
adsorbent properties of, 1739[4], 3368[5].
alkali, P 822[8].
for cellulose ethers, P 1904[7].
compn. of, 3079[4].
oxygen action on, 3806[4].
alkali action on, 2745[4].
alkali adsorption by, 2771[8].
alkali compds. of, formation with medium of water and alc., 3565[1].
alpha-, in artificial silk cellulose, 1526[7].
detn. in paper pulp, 1520[4], 3806[8].
detn. of, 283[8].
in artificial silk manuf., 1515[4].
in bamboo, 2248[3].
bamboo, comparison with cotton cellulose, 2248[3].
from banana stems, P 2073[2].
bleached sulfite, for rayon industry, manuf. of, 2586[3].
bleaching of, P 822[6], P 3567[8].
books: Über die Natur der, aus Getreidestroh, 988[6]; Die Verwertung der Zellstoff-Ablaugen. Patentliteratur 1912–24, 988[6]; Ueber das Harz der Nadelholzer und die Entharzung von Zellstoffen, 1323[5]; Ueber das warmetechnische Verhalten des Sulfitzellstoff-Kochprozesses, 1323[5]; Uber die Destillation von, und anderen Stoffen unter Wasserstoffdruck mit Katalysatoren, 2072[9]; Die Wärmewirtschaft in der Zellstoff und Papierindustrie, 3084[1]; Technik und Praxis der Papierfabrikation, P 3348[9].
characterization of prepns. of, 664[8].
chemistry of, 692[8].
chemistry of, and its principal derivs., 3805[7].
chemistry of, future trend of, 3805[7].
from chestnut wood residues in tanning ext. manuf., 2411[2], 3230[3].
chlorination of, P 110[9], P 1904[9].
chlorine in manuf. of, 1904[2], 3806[1].
coal-like products from, 1215[7].
colloidal, dispersibility of, 3113[1].
colloids of, 3078[6].
compns. of rubber and derivs. of, P 3567[7].
constitution of, 902[8], 2829[7], 3607[1], 3805[8].
Naegeli micellar theory of, 2410[9].
and its significance in chem. transformations, 2068[1].
cotton, action of NH_3 on, 821[6].
cotton, light effect on, 3352[5].
crystal structure of, 1222[2].
decompn. of, by enzymes, 1416[7].
by filamentous fungi, C and N transformations in, 615[7].
by heat in presence of catalysts and H under pressure, 2241[3].
by heat under hydrogenation conditions, 663[5].
in soil, 1881[4], 3056[6].
in soil, microörganisms of, 3056[6].
degradation of, 2829[9].
depolymerization of, 110[1], 663[9], 818[2], 1321[5].
depolymerization *vs.* dispersion of, 663[9].
derivs., P 2411[7,8], P 2584[3], P 3084[2], P 3567[1,2].
derivs., molded articles from, P 3349[3].
detn. in feces, 3476[4].
in paper, 3082[8]
in paper pulp, 502[5], 1516[8].
digesters, charging, P 666[9], 3080[3], P 3236[5].
digestion of, by invertebrates, 72[2].
digestion of, effect of cellulose-splitting enzyme prepn. on, 3705[3].
dispergation of, in solns. of alkali metal salts, 818[8], 819[3,4,5,8].
dissoln. in cellulase prepns., rate of, 1720[4].
dissolving, P 3084[4].
dissolving and electrolyzing, P 2957[2].

dissolving with HCl, P 988^{7}.
distn. under H pressure with catalysts, 1515^{8}.
double refraction of fibers of, 3634^{8}.
dyeing fibers of, P 993^{2}.
dyeing of, formation of colors in vat, 113^{6}.
electrodeposition of, P 2956^{5,6,8,9}, P 2957^{1,3,4}.
electrodeposition of, cell for, P 2957^{4,5}.
esterifying—see *Cellulose esters*.
from eucalyptus, 2907^{4}.
evapg. and electrolyzing, P 2957^{4}.
fermentation by thermophilic bacteria, 2687^{5}.
fermentation in soils, effect of available N on, 1482^{7}.
fermentation products from, 3059^{5}.
fibers, P 3566^{9}.
  for paper making, P 1904^{6}.
  treatment with H_2SO_4 and AcH, P 116^{1}.
fiber structure of, effect of water on, 2072^{1}.
filaments from, app. for making, P 3241^{3}.
filaments from derivs. of, dry spinning of, P 2417^{6}.
filaments of, drying, P 3568^{1}.
film-forming compn. from "organo-oxy-cellulose compd.," P 504^{3}.
films of, P 2957^{2}, P 3814^{3}.
fluorescence of, dipped in solns. of tanning materials, 3835^{1}.
foils from, P 3084^{6}.
fuel alc. from waste, 1684^{4}.
Guignet, from lignocellulose and wood, 3564^{9}.
heat effect on, 2411^{1}, 3565^{4}.
heat problems in manuf. of, 3806^{1}.
hollow articles from, P 3084^{5}.
hydrated products of, shrinkage prevention of, P 988^{6}.
hydrating, P 2073^{3}, P 3567^{9}.
hydrating or beating, app. for, P 666^{3}.
hydration in paper making, P 1904^{5}, 2068^{5}, 2069^{1}.
hydrochloric acid effect on, 2247^{1}.
hydrogenation of, 103^{3}.
hydrogenation of compds. of, 102^{4}.
hydroxide action on, 284^{1}.
industry in U. S., 987^{6}.
investigations of, at Technical High School in Norway, 289^{6}.
lacquering with, 671^{9}.
lacquers—see *Lacquers*.
of lichens, 1832^{6}.
low-viscosity, P 3566^{9}.
lye recovery from, app. for, P 2412^{1}.
lye recovery from disintegrated, P 666^{3}.
manuf. of, P 111^{2}, P 2073^{1}, P 2583^{9}, P 3566^{8}.
manuf. of pulverulent and chlorinated, lab. tests on, 2070^{2}.
in manure, decompn. of, 259^{2}.
mercerization of, heat development in, 3087^{6}.
methylation of, 3080^{7}.
mol. wt. of, 2118^{3}.
nitration of—see *Nitrocellulose*.
non-inflammable compns. of, P 2584^{1}.
occurrence and detection of, 1419^{6}.
organism decomposing, fertilization of soil with, 2220^{4}.
organisms which decompose, culture media for, 3480^{9}.
oxidation of, in relation to carbohydrates and polysaccharides, 283^{4}.
oxidizing properties of hypochlorites towards cotton, effect of H-ion concn. on, 827^{1}.
parchment or pattern effects, etc., on fabrics, yarns or fibers of, P 3578^{9}.
from peat, etc., P 3814^{3}.
physico-chem. study of, 287^{6}, 987^{6}.
from *Pinus maritima* in France, 284^{5}.
plants, ventilation and heat recovery in, 284^{6}.
plasticity of, 529^{8}.
prepn. of wood-, phys. chemistry of, 2071^{6}.
preserving hydrated, P 1904^{5}.
quality of, "Cu no." as exponent of, 1516^{1}.
quebracho ext. contg. ext. of, 308^{8}.
reactions in production of, mechanism of, 3806^{2}.
reaction with CH_2N_2, 743^{7}, 1390^{8}.
Röntgen-ray examn. of, 3077^{9}.
Röntgen-spectrographic comparison with lichenin, 1425^{5}.
semi-, 285^{3}.
sizing, P 3084^{8}.
sodium hydroxide absorption by, 2247^{8}.
sodium hydroxide and, 819^{9}.
in soil, effect of N compds. on decompn. of, 257^{7}.
in soils, humification of, 3203^{1}.
solns. in cuprammonium hydroxide, 821^{2}.
solns. of, P 822^{7}, P 2584^{2}.
solvent recovery in manuf. of colloidal, P 3568^{1}.
spectrum of, 2455^{8}.
staining capacity of, 1830^{7}.
sugar and alc. from wood, 260^{5}.
sugars from, P 2248^{6}.
sulfite, P 666^{1}.
sulfite boilers, etc., P 2073^{6}.
sulfite boilers, regenerating H_2SO_3 and waste heat from, P 1905^{2}.
sulfited, detection in tannin exts., 2260^{6}.
sulfuric acid action on, 3079^{9}.
swelling of, 3078^{3,9}.
swelling of, detn. of degree of, 3806^{7}.
synthesis of, problem of life and, 3019^{6}.
testing of, for use in celluloid manuf., 3810^{9}.
varnishes—see *Varnishes*.
washing in Holland vats, 3236^{1}.
waste from factories for, purification by fish ponds, 252^{2}.
waste gas from soda furnaces in manuf. of, recovering valuable substances from, P 666^{4}.
waste liquor, fertilizer from, P 89^{7}.
waste lye, destructive distn. of sulfate, P 822^{9}.
waste sulfite, for tanning, 308^{7}.
Cellulose, acetyldimethyl-, 818^{7}.
——, **nitro-**. See *Nitrocellulose*.
——, **trimethyl-**, 818^{7}.
Cellulose acetates. (See also *Dopes; Varnish*.) 3805^{9}.
  acetic acid recovery from, P 111^{4}, P 503^{9}, P 988^{8}.
  acetone-sol., P 111^{2}.
  acetylated soln. of, P 2412^{1}.
  acetylating bath for making, P 3236^{6}.
  in airplane fabric tautening and proofing, 2755^{9}.
  colloidal, dispersibility of, 3113^{1}.
  com. utilization of, 3565^{2}.
  compn. of, for sheets or films, P 111^{4}.
  cryoscopic behavior of cryst., 2663^{6}.
  cryst. structure of, 3348^{4}.
  crystd., 664^{1}.
  directly spinnable from reaction mixts., P 3567^{9}.

dyeing of, P 823[1], P 992[9], P 993[1], P 1528[6], 1720[3], P 1910[5], P 2079[4], P 2253[1,2], P 3578[1], P 3822[6,7].
dyeing or printing, P 1722[1].
elec. insulators, etc., from, P 822[9].
filaments from, app. for "dry-spinning" of, P 1328[5].
films of, P 1324[1], P 1522[9], P 3567[2].
films of, *vs.* nitrocellulose films, 284[1].
fireproofing, P 1904[7].
hollow artificial threads or filaments of, P 2253[6].
jellies of, elasticity of, 1546[4].
lacquer, P 3242[8]
manuf. of, 1522[7,8], P 2248[5], P 2411[8,9], P 2584[2].
manuf. of, lab. tests on, 2070[2].
marking process for, P 3578[9].
mixed fabrics contg., dyeing of, 113[5]
molded articles from, P 3349[3].
particles, size of, 3078[7].
prepn. and properties of, 3565[3]
printing mixed fabrics contg., P 2588[6]
properties and analysis of, 3565[4]
sepn. from reaction mixt., P 111[3]
solvent recovery in manuf. of, P 3568[1]
solvents for, 3089[6], P 3568[2]
spectrum (Röntgen) of, 3079[6]
structure of, 2068[2], 3078[1]
threads from—see *Thread*.
varnishes, etc., of, P 3826[8]

Cellulose esters. (See also *Varnishes.*) P 2167[4].
carboxylates, P 666[1]
colored, P 3084[3].
composite sheets of casein and, P 988[7]
compns. of, for films or varnishes, P 3567[4]
distinguishing from ethers, 3805[8]
dyeing, P 2588[2,3].
dyeing and printing, P 3822[9].
of fatty acids, 3079[3].
films of, P 3084[6].
films, thread, etc., from, P 3579[1].
fire-resistant compns., P 823[2].
lacquers—see *Lacquers*.
manuf. of, P 503[8], P 1522[7].
of naphthenic acid, 3079[7].
plasticity of, 529[9].
plastic, manuf. of, 2910[4].
sol., of higher fatty acids, 3806[5]
solns. of, P 3567[5,6].
solvent power of solvents for, effect of addn of 2nd substance on, 1741[5].
solvents for, 687[9].
  ether derivs. of alkyl glycols as, 2910[1].
  methylene chloride as, P 3757[6].
  toxicity of, 311[9].
thread from—see *Thread*.
yield value of, time factor and, 821[5].

Cellulose ethers, alkali celluloses for making, P 1904[7].
composite sheets of casein and, P 988[7].
compns. of, P 503[8].
distinguishing from esters, 3805[9].
dyeing, P 2588[2,3].
filaments, films, etc., from, P 3579[1].
films, P 2073[4], P 3567[2].
fire-resistant compns., P 823[2].
manuf. of, P 3084[3], P 3567[3].
nitrobenzyl, in dyeing of cotton, 1325[7].
solvent for, P 3567[4].
threads—see *Thread*.

Cellulose nitrates. See *Nitrocellulose*.

Cellulose nitrites, 2411[4].

Cellulose sulfate, 3805[8].
properties of, 1719[9].

Cellulose xanthates. (See also *Viscose.*) 1515[7], 3805[8].
filaments and films from, P 1324[2].

Cellumonas folia, culture media for, accessory and stimulating factors in, 3481[1].

Celta, 507[1]

Celtium. See *Hafnium*.

Celtrobiose, from cellobiose, 2484[2].
—, chloro-*, heptaacetate, 2484[2].

Cement (See also *Adhesives; Binding materials; Cement, hydraulic; Sealing compositions.*) P 805[1], P 3338[1].
abrasive, P 3548[6]
acetylene-phenol aldehyde, P 3580[7].
asphalt, methods of A.S.T.M. for detg. d. of, 951[8]
asphalt, specifications of A.S.T.M. for, 951[6]
filler, P 805[2]
film, P 3338[1].
from phenolic formaldehyde condensation products, etc., P 267[8].
for photographic films, P 25[2].
refractory and heat-insulating, P 3221[8].
resinous, P 1696[8]
review, 2230[7]
for rubber, P 520[1].
for rubber tires, P 98[4]
strength of, predetermining, 977[5].
tar, specifications of A.S.T.M. for, 954[6], 1121[5]

Cement, dental. See *Dental fillings*.

Cement, hydraulic (See also *Concrete; Mortar.*) P 168[1], P 272[1], P 489[1], P 810[5], P 896[8], P 3223[9].
action of Na_2SO_4 and $MgSO_4$ on, 3069[4].
alcement Lafarge, 651[2].
alite in, 3791[3]
alkali waters and, 2236[5]
aluminous, 271[1], P 652[3], P 978[1], 2400[7,8], 2902[9], P 3551[8].
  action of water and salt solns. on, 3792[7].
  compn. with rubber, P 3589[8].
  effect of quantity of water in mixt. on heat of setting of, 271[3].
  manuf. of, P 272[2].
  resistance to sulfate water, 2237[2].
  temps. and methods of curing, 2237[1]
amorphous $Al(OH)_3$ and $Ca(OH)_2$ in, 1703[1].
analysis of, 488[2], 3546[5].
anhydrite and gypsum, 1506[1].
anhydrite, production of, 3222[3].
-asbestos pipe, tests of, 2903[2].
binding materials for, 3223[6]
books: 3070[2]; Praktische Winke fur Zement und Beton, 1310[8], Cement Mortars, 1507[1]; Laboratoriumsbuch für die Portlandzementfabrik, 1897[6]; Cement, Concrete and Bricks, 3070[2].
breakdown of gallery due to water infiltration, 2737[3].
bricks, P 3548[4].
burning, P 1507[4].
burning, gas fired shaft furnace for, P 1153[2].
burning synthetic mixts., reactions during, 1702[2].
buttons from mixt. contg., P 2402[2].
calcining and clinkering, P 3224[2].
  app. for, P 3250[6].
  plant for, P 483[9].
calcium chloride effect on, 2237[4].
carbonates for, calcination of, 1201[8].

casein in admixt. with, 2737[1]
casting hollow ware in sections from, P 3224[2].
casting pipe, etc., from, P 3224[3].
clinker, constitution of, 2737[1].
  discoloration of, 2238[1,2].
  petrography of, 1702[6].
  H_2SO_4 and $CaSiO_3$ from gypsum for, 2628[3].
coloring of, P 1703[3], 3340[7].
compn. of asphalt and, P 3070[4].
constitution of, 3068[9].
contg. colloidal H_2SiO_3, 1135[9].
contg. iron and Al compds., P 2570[8].
detn. in mortars, 3791[6].
drain tile of, durability in alkali soils, 1897[2]
dust in mills, arrestors and precipitators for, 2236[7].
dust in plants, elec. pptn of, 2237[5].
ferric oxide in, structure of, 1962[9].
ferrous and aluminous, 3548[7].
fibrous material for use with, impregnating with metallic salts, P 978[4].
fibrous material in mixts. of, P 2057[8].
fineness and strength of, 1895[9].
flexible compn. of, P 489[4].
for flooring and wainscoting, 2737[4].
as flooring material, endurance of, 1701[5].
flue dust, iodine in, 100[4].
glaze (cold) for, P 810[7].
from gypsum, plant for manuf of, 970[9]
hardening, $CaCl_2$ for promoting, P 1507[4].
high-temp., P 1507[4]
high temp. effect on, 2737[1].
humic acid-contg., 2236[3]
industrial hygiene of, 635[3].
industry, 3340[6], 3790[8].
industry in the South, 1307[8]
initial set and time of hardening of diff., at low temps. with and without $CaCl_2$, 3791[1].
for insulation, P 249[7].
from iron ore, etc., P 3223[9].
kiln and assocd. app., P 3341[1]
kiln gases, removing solids from, P 3202[1].
kilns, P 100[9], P 1897[6], P 2057[9], P 2058[1], 2237[6], P 2238[8].
  boiler app. for utilizing waste gases from, P 2238[8].
  calcn. of coal expenses in rotary, 809[6].
  lining for, 2056[3], P 2058[1].
lead corrosion by, 1896[5].
lime detn. in, 2737[2].
Lumnite, 2236[8].
magnesia, P 3793[5].
magnesia detn. in, 1896[2].
magnesium, constitution of, 651[5].
magnesium oxychloride, P 3793[6].
  compn. of, 3222[4].
  jointless floors of, 651[6].
manuf. of, 2236[5], 3790[8].
  app. for, P 100[9].
  in Crown Colonies and protectorates, 809[5].
  in metallurgical process, P 574[4].
  since the war, 1135[2].
materials for, P 810[5].
  development of, 3790[8].
  estn. of quantities of, 976[8].
  from Ysassaland, 3549[4].
mixts., P 1310[8], P 3224[1].
  with diatomaceous earth, P 2057[7].
  with fibrous materials, P 3224[1].
  with kieselguhr, effect of heat on strength of calcined, 807[3].
moisture absorption by, during storage, 1703[1].
moldable powders from fibrous, P 1897[8].
mold for, of celluloid, P 483[9].
molding, P 483[8].
painting of, prepn. for, P 1330[6].
pipes of cast Fe lined with, 3053[9].
pipes of, manuf. of, 809[6].
plant at Harbury, Leamington, England, 2902[8].
plant of Sulphide Corp., Ltd., 3539[8].
with polished surfaces, P 3551[6].
in powd. fuel manuf., 2376[3].
prehydration of, in concrete mixing, 3792[9].
proportioning raw materials for, 3222[9], 3223[1].
quality of, CaO-SiO_2 index as measure of, 2056[4].
quick-hardening, 651[2].
raw batch and clinker analyses, 3790[9].
raw batch mix for, calcn. of, 2737[5].
reactions between powders and gas in manuf. of, P 1876[2].
reaction with Na_2SO_4 and $MgSO_4$ solns., 488[5].
refractory, P 489[1], P 1310[9], P 1700[9], 1701[7].
research in, 2236[4].
resources of U. S. in 1924, 3340[6].
retarder, calcium sulfate as, 100[5], 3222[3].
for road-making, 488[6].
Röntgen rays in research on, 3791[2].
as rust preventive, review on, 995[5].
set of, detn. of, 1896[1].
setting of, 3221[9].
setting of, theory of, 1135[2], 3222[7].
setting time of, app. for indicating, 3791[1].
setting time of, detn. of, 1895[9].
silica detn. in, 3069[2].
slag, 891[9], 892[1], P 1586[6], P 2057[6], 3223[2,7].
  detn. of ignition loss in, 488[3].
  detn. of SiO_2 and CaO in raw mixt. for, 1895[6].
  quick hardening, 488[4].
  utilization of freshly made hot, 3223[1].
slag in wet process of mfg., 271[4].
from slags (Cu), 1895[4].
from slurry, manuf. in rotary kilns, P 3793[5].
slurry treatment, P 3070[3].
soil alkalies and, 256[8], 2382[5].
sorel, setting and phys. properties of, 2236[7].
specifications and tests of A.S.T.M. for, 1122[3].
specifications of A.S.T.M. for, revision of, 955[2].
specifications of Missouri Highway Commission for, 3791[2].
sucrose effect on, 976[9].
sulfur-impregnated tile of, effect of alkali on, 1310[5].
testing, 3790[9].
tiles, etc., of, P 810[4].
underburned, effect on disintegration of concrete, 977[7].
from Vassy limestone, 270[8].
volcanic ash and, 1895[6].
waterproof, P 489[2,3,4].
waterproofing, mixts. with rubber latex, P 3793[6].
waterproofing paste for, P 3544[6].
-water ratio method theory in field control of concrete, 977[5].
by wet method, P 3551[7].
from zonolite, 728[3].

Cementation. See *Iron; Iron alloys; Metals; Steel.*
Cement concrete. See *Concrete.*
Cementite, Brinell hardness of, 3434[1].
carbon from, soly. in austenite, 2639[3].

Ceratitis capitata, insecticides for, As compds. as, 89[5].
Ceratonia siliqua. See *Carob beans*.
Cereals. (See also *Grains; Wheat;* etc.)
analysis of, 3317[5].
cooked, preventing rancidity of, P 2377[8].
effect on calcification of bones, 3489[1].
fumigant for, chloropicrin as, 1474[3].
moisture detn. in, P 3200[9].
nutritive value of Philippine, 1285[2].
physiol. and biochem. studies on, 221[8].
plasticity in research on, 3751[8].
rusts, control by dusting, 259[6].
spray desiccation of, app. for, P 3103[2].
starch formation in, 2348[9].
tryptophan in, 1252[4].
Cerebellum. See *Brain*.
Cerebrin, effect on anaerobic respiration of yeast, 929[9].
Cerebron, antirachitic activity of, 2006[8].
cleavage products of, 3170[6].
Cerebrosides, metabolism of central nervous system, 940[2].
Cerebrospinal fluid. (See also *Colloidal benzoin reaction; Lange's colloidal gold test.*)
antibody formation by, 2014[4].
arsenic penetration into, effect of dyes on, 2202[7].
blood and, 1439[6].
calcium content of, 2012[4].
calcium content of, normally and in lues and in meningitis, 2198[1].
calcium phosphate soly. in, 609[7].
chloride equil. between plasma and, effect of protein concn. on, 3030[8].
chlorides in, 232[8].
cholesterol in, 948[3].
cholesterol in, during pregnancy and delivery, 942[7].
colloid reactions in, 1268[1].
compn. of, after death, 231[3].
compn. of, relation to blood compn., 231[4].
in detection of inflammatory changes, 2173[7].
from different loci, 1104[9].
in diseases, 232[8].
effect on electrolyte flocculation of positive and negative sols, 2537[6].
effect on mastic, 3492[2].
in epilepsy, 3185[8].
globulin detn. in, 928[6], 1823[2].
glucose in, 440[7].
hydrogen-ion concn. of, detn. of, 1092[8].
iodine content of, 2706[9].
ion passage from blood to, 3491[7].
lactic acid content of, 2011[6], 3502[4].
in lead poisoning, 232[8].
in meningitis, 2534[3].
in meningitis, effect of uranin on, 949[5].
muscle stimulation by, 1468[4].
in otitic meningitis, 3731[9].
ovaries and, 3183[1].
oxytocic substance in, 1656[3].
pressure, effect of histamine and NaCl on, 1273[7].
effect of histamine on, 1273[6].
effect of $MgSO_4$ on, 1114[3].
protein detn. in, and protein increase in typhus fever, 3305[9].
reaction in meningitis, encephalitis and postencephalitic lesions, 1641[2].
refractometric and viscometric indexes of, 1450[8].
salicylic acid detn. in, 3476[2].
in sleep, glucose, protein and Cl of, 2357[9].
sugar and Ca content of, 1667[6].
sugar content of, 3730[8].
sugar content of, glucemia and, 1845[6].
sugar detn. in, 772[9], 3471[9].
sugar in, 232[8].
urea detn. in, 1823[1].
uremia pathogenesis and, 2014[8].
uric acid in, 948[4].
urobilin in, 65[7].
Cerebrum. See *Brain*.
Ceresin, sepn. from paraffin wax, 1901[9].
Cereus. See *Cactus*.
Cerium, ionization potential of, 2945[8].
manuf. of, 165[3].
review of mining and trade information, 888[1].
Röntgen-ray energy level of, detn. of outer, 2787[3].
spectrum of, 2943[9], 3641[9].
system: Al–Fe–, 3416[8].
Cerium, analysis, detection, 1041[9].
detn., 27[2], 1770[5], 2963[3].
detn. in alloy steel, 1367[2].
Cerium alloys. (See also "system" under *Cerium*.)
amalgam, resistivity and cond. of, 3119[2].
book: Die Herstellung des Cereisens und die Gewinnung der Chloride der seltenen Erden, 1213[3].
for igniting purposes, P 3683[2].
iron-, prepn. of, 165[3].
Cerium ammonium sulfate, 2960[8].
Cerium borates, $Ce_2B_2O_6$, 3658[2].
$Ce_2B_4O_9$, 3658[1].
$Ce_2B_6O_{12}$, 3658[1].
Cerium chlorides, solid soln. with NH_4Cl, 2925[8].
$CeCl_3$, osmotic pressure of solns. of, 859[4].
prepn. of, 3393[9].
Cerium cuprosulfite, 558[7].
Cerium cuprothiosulfate, 558[8].
Cerium group, electrolysis of, 3393[8].
Cerium hydride, formula of, 717[4].
Cerium hydroxide, precipitation of, 27[2].
reaction with "aluminon," 2963[6].
Cerium ions, effect on concn. in intestine, 1860[9].
Cerium molybdate, solid soln. of $CaMoO_4$ and, 1157[5].
Cerium nitrate, magnetic susceptibility of, 2112[4].
nitration with, P 917[1].
Cerium oxides, Ce_2O_3, crystal structure of, 3597[7].
CeO_2, reactions of WO_3 and MoO_3 on SiO_2 and, 324[7].
reactions with solids, 3374[6].
reactions with WO_3 and MoO_3, 324[7].
Cerium phosphate, 3658[2].
Cerium potassium sulfates, 3401[8].
Cerium salts, tuberculosis therapy with, 2879[7].
Cerium sulfate, system: $(NH_4)_2SO_4$–H_2O–, 2960[8].
system: K_2SO_4–H_2O–, 3401[7].
Cerium uranyl sulfite, 558[6].
Cerosin, 3356[3].
Cerotic acid, in *Aspidium filix mas* spores, 220[7].
thallium salt, 2818[2].
Ceryl alcohol, 3444[6].
Cesium, beryl contg., 1044[4].
diamagnetism of, 1557[8].
displacement by Fe, 3404[6].
low-voltage arc in vapor of, 2116[8].

photo-elec. properties of thin films of, 3639[5].
photo-ionization and absorption probabilities of vapor of, 1351[7]
under pressure, phys. properties of, 698[4]
purification of, 698[7]
Röntgen-ray energy level of, detn of outer, 2787[3].
spectrum of, 18[1], 2284[7], 2913[9], 3640[7]
Cesium, analysis, detection, 1191[1], 2801[7]
sepn. from rubidium, 1366[1]
Cesium chloride, effect on bacterial growth, 3712[1].
photoelec effect in, 2785[8]
system: $TlCl_3$-H_2O, 1767[1].
Cesium chloroaurate, thermal dissocn of, 2110[6]
Cesium compounds, with iodine, 1570[9]
in products of Vesuvius, 2969[1]
rubidium, detn of soly of, 1191[1]
Cesium copper selenate, dissoc pressure of hydrated, 317[5]
Cesium eosinate, 3001[1]
Cesium fluoborate, in products of contemporary activity of Vesuvius, 327[6]
Cesium fluoride, heat of formation of, 2111[1]
Cesium halides, crit temps and pressures of, 3255[7]
Cesium iodide, magnetic susceptibility of, 328[1]
photoelec effect in, 2785[8]
Cesium ion, coagulation of Au sols by, 3613[7]
size of, 1925[1]
Cesium nickel selenate, dissoc pressure of hydrated, 317[5]
Cesium nitrate, activity coeffs calcd from f.-p data, 1317[9]
Cesium salts, effect on germination of barley, 2182[3]
pharmacol action of, 1867[1]
therapy with, 1269[1,4]
Cesium silver gold halides, 3139[9], 3273[6]
Cesium thallium chlorides, 1767[1]
Cesium tin iodides, 315[5]
Cesium triselenocyanate, 316[7]
Cetacea See *Porpoises*, *Whales*
Cetyl alcohol, effect on double refraction of Al_2O_3 fibers, 1350[8]
palmitate and stearate, phys consts. of, 2818[7,8].
soly. in liquid SO_2, 2607[1]
Cetyl ether, 361[8]
Cetyl iodide. See *Hexadecane*, *1-iodo-*
Cetylxanthic acid, 3158[8]
Cevadine. See *Veratrine*
Chains, anchor, specifications of A S T M. for elec cast steel, 951[1]
iron and steel for, impact resistance at low temps, effect of treatment on, 3137[6]
Chains (chemical), alternating effect in C, 2839[7], 2840[1,5], 3290[1]
effect of rings on reactions involving their side, 1056[2]
oxidation of branched, 2178[3]
Röntgen-ray crystal analysis and constitution of C, 1054[8]
Röntgen-ray examn. of long-chain mols, review, 1977[2]
sulfur-contg, 3687[3]
tautomerism in 3 C, 2823[7]
Chalcedony, pseudomorph after apophyllite, 884[5].
Chalcocite, flotability of, effect of C_2N_2 compds. on, 1376[1].
at Magna Mine, Superior, Arizona, 3670[3].
Chalcone (*benzalacetophenone; β-phenylacrylophenone*),

prepn of, 180[4]
reaction with Br and with Cl in MeOH, 2997[1,7]
reduction of, 1593[9]
stereochemistry of derivs, 2156[3].
——, *m* (and *p*) - **acetamido-†**, and salts, 2156[7,8,9].
——, *p* - **acetamido** - *p'* - **methoxy-†**, salts, 2156[8]
——, **4 - acetamido - 4' - methoxy-†**, 758[7].

——, *p* - **benzamido** - *p'* - **methoxy-†**, perchlorate, 2156[9].
——, *α,β*-**dihydro-** See *Propiophenone, β-phenyl*
——, **2',4' - dihydroxy - 4,6' - dimethoxy-**, 375[8]
——, **4,4' - dihydroxy - 3 - methoxy-**, glucoside, 593[7]
——, **4,4' - dimethoxy-**, addn compds., 403[1,4]
dimethyl acetal, 103[2]
——, *α*-**ethoxy-**, 2156[6]
——, *p*-**formamido-†**, and salts, 2156[8].
——, *p* - **formamido** - *p'* - **methoxy-†**, perchlorate, 2156[9]
——, **4'-hydroxy-**, glucoside, 593[2].
——, **2 - hydroxy - 3',4' - dimethoxy-**, 3456[6]
——, **4' - hydroxy - 4 - methoxy-**, glucoside, 593[2]
——, **4' - hydroxy - 3,4 - methylenedioxy-**, glucoside, 593[2]
——, **2 - hydroxy - 4,6,3',4',5' - pentamethoxy-**, 3157[3]
——, *α*-**methoxy-**, 2156[5]
——, *β*-**methyl-** See *Dypnone*.
——, **3,4,3',4' - tetramethoxy-**, 2326[4].
Chalcopyrite, etch expts on, from Botes, 881[2]
flotability of, effect of C_2N_2 compds. on, 1376[1]
at Magna Mine, Superior, Arizona, 3670[3].
Chalk, bacteria, 1423[2]
effect on fermentation, 964[4].
flint formation in, 1046[6].
French, ash of, 2562[9]
lake, formation of, 887[3].
petroleum sepn and extn. from, app for, P 662[4]
Chalmersite. See *Cubanite*
Chalybite See *Siderite*
Chamaecyparis lawsoniana, oil of, 2718[8].
Chamazulene, and derivs, 1227[1].
——, **hexahydro-**, 1227[1].
——, **octahydro-**, 1227[1].
Chamber process See "manuf. of" under *Sulfuric acid*
Chamois See *Leather*.
Chamotte, bricks of, P 270[6].
Chandler, biography, 129[2]
Charcoal (See also *Carbon*.)
absorption of cyanogen by, 3100[6].
absorption of gases by, app. for, P 1924[4].
active, P 97[9], 1132[7], P 2567[1].
adsorption by, 1009[5], 3527[6].
adsorption of gases at very low pressures by, 1346[4]

adsorption of gases by, 2604^5.
adsorptive power of, 855^9.
combination of Cl and Br with, and their removal, 1931^4.
cracking of paraffin wax by, 3155^1.
drying and revivifying, app. for, P 2233^1.
in gasoline recovery, 493^3.
heat of wetting by liquids, 3630^2.
reduction of cresols with, 1064^6, 2841^8.
review, 2230^3.
as adsorbent, 2104^1.
as adsorbent for gases, 3111^6, 3368^9.
adsorbent, revivifying, P 2232^9, 3232^5.
adsorption by, 531^8, 2609^2.
adsorption by, effect on poisoning and detoxication, 3744^7.
adsorption by medicinal, 91^7.
adsorption by prepns. of, 1009^3.
adsorption capacity of diff. prepns. of, 3615^7.
adsorption of alkali and alk. earth ions on, heat of, 3609^6.
of CO_2-H mixts. on wood, 2104^4.
of CO_2 on, heat of, 2104^7.
of gases and vapors by, 1931^5.
of gases by, 856^4, 3368^7, 3615^3.
of gases by, heat of, 1167^9.
of glucose by, 925^2, 1611^9
of hemolysins by, 1446^9.
of pepsin on, 3706^2.
of poisons on, 3509^8.
adsorptive, 3615^4.
adsorptive, bonding of, P 3786^1.
adsorptive (medicinal), P 3061^8.
ash-free wood, prepn. of, 1694^2.
birch, action on aldehydes in EtOH soln., 2816^8.
blood, alanine oxidation in presence of, 1419^3.
blood, effect on hydrolysis of esters, 367^5.
from blood, serum and tissue as colloidal diagnostic, 2173^6.
boneblack, activation of, P 483^6.
as adsorbent, 2104^1.
adsorption of lime from sugar solns. by, 306^5.
for coatings, specifications of A.S T M. for, 1121^5.
decolorizing efficiency of, effect of absorption spectra of tech sugar products on, 3094^3.
prepn. of, 972^3.
specifications of A.S.T M. for, 954^6, 1329^4.
case-hardening with, 3428^2.
as catalyst for chlorination of C_2H_4, 359^6.
coconut (activated), adsorption of CO_2 by, 2105^2.
coconut, adsorption from alc.-C_6H_6 and acetone C_6H_6 mixts., 530^9.
coconut, adsorption of satd. vapors of pure liquids by, 1545^4.
combination of H and Br in presence of, 2050^2.
combination of H and Cl in presence of, 2049^9.
decolorizing, P 1499^4.
effect on fermentation, 964^8.
effect on growth of pigs, 618^9.
as fuel for gas producers, 1902^7.
identification of, 282^1.
impermeable, P 2552^4.
kilns, sectional retort for, P 3787^2.
manuf. of, 1319^9.
manuf. of, app. for, P 3077^9.
ovens in Sénart Forest, 282^3.
oxidation at surface of, 3375^5.
oxidations on, 2442^1.
from peat briquets, 276^3.
purified adsorbent, properties of, 3615^1.
Chardonnet, Count, work on rayon, 3818^1.
Charging apparatus. (See also *Cupolas; Feeding devices; Furnace;* "producers" under *Gas, illuminating and fuel.*)
for brass-smelting furnaces, etc., P 34^9.
for cyanide plant, 1048^6.
for paper pulp grinding app., P 2249^2.
for phosphate furnaces, 1^3.
Charlock, destruction of, with kainite, 88^8.
seed, differentiation from black mustard seed, 1887^7
Chaulmoogramide, dihydro-, 1599^1.
Chaulmoogra oil, analysis of, 3210^2.
bibliography of, 1493^6.
ethyl esters from, prepn. and use of, 1493^5.
for leprosy treatment, 2723^8.
origin, compn. and uses of, 2389^7.
sapon of, 91^3, 3331^3.
Chaulmoogric acid, constitution of, 172^2.
in leprosy therapy, 1275^2.
oxidation of, 2315^2.
synthesis of a homolog of, 3160^9.
——, **bromodihydro-**, 172^3.
——, **dihydro-**, Me ester, 172^2.
synthesis of, and homolog, 1598^8, 1599^2.
——, **dihydrodihydroxy-**, α- and β-, and derivs , 2315^{3,4}.
——, **dihydro-μ-hydroxy-**, and Me ester, 1598^9.

metallic, contg. water of crystn., P 3214^{5}.
mol. vols. of cryst., 2924^{1}.
mol. vol. variations in formation of solid, 1343^{3}.
potentiometric titration of, 2469^{2}.
prepn. from oxides, $COCl_2$ for, 1187^{1}.
reactions with O, 3402^{6}.
retention in pneumonia, 2366^{4}.
of tissues, concn. as function of age, 3496^{8}.
transference nos. of Na and H in mixed solns. of, 1169^{7}.
in urine after exercise, 230^{4}.
of urine, effect of sleep on, 2359^{4}.
vapor pressure and heat of vaporization of, 2603^{6}.
vapor pressure of Cl in metallic, 1928^{5}.
Chloridization. See *Chlorination; Metallurgy;* etc.
Chlorimide, disinfecting sputum with, 3773^{3}.
Chlorination. (See also *Metallurgy; Paper; Water, purification of.*)
of cellulosic materials, P 110^{9}, P 1904^{9}.
of *p*-cymene, 293^{2}.
electrochem., of C_6H_6, 3396^{3}.
of metals, 1693^{4}.
of naphthalene, app. for, P 425^{4}.
photo-, of toluene, 1602^{7}, 2990^{7}.
selenium as Cl carrier in, 860^{5}.

of sewage—see *Sewage.*
of sulfite liquor, P 666^2.
of tetramethylenic polymers, 747^9.
of wool, 2586^6.

Chlorine. (See also *Antiseptics; Bleaching; Chlorine water; Halogens; Sterilization; Water, purification of.*)
adsorption of, by charcoal, 856^4.
atom, effect on affinitive capacity of aromatic radicals, 3684^2.
effect on firmness of union of CO_2H groups in aromatic acids, 1613^1.
effect on reactivity of Br, 1066^2.
reactivity of, in acridyl radicals, 1991^8.
atomic wt. of, 1006^6.
atomic wt. of, in meteorites and in rocks of non-marine origin, 8^6.
atoms of, energy values of $L_{II}L_{III}$ levels of, 709^1.
in bleaching liquor production, 284^7.
for bleaching of flour, control of, P 248^2.
in blood, 1098^5.
effect of alkaloids on, 1114^7.
effect of bleeding on, 3035^6.
effect of insulin on, 446^9.
in blood serum and corpuscles, effect of hemorrhage on, 2538^9.
carrier for, Se as, 860^5.
catalytic decompn. of H_2O_2 in acid soln. of chlorides and, 1163^5.
in cellulose manuf.—see *Cellulose.*
in cerebrospinal fluid in sleep, 2358^1.
chem. const. of, 1928^6.
collecting mixts. of air and, app. for, 1732^2.
combination with wood charcoal and its removal, 1931^4.
container, leak in, 1152^3.
dielec. const. and optical properties of, 1342^5.
as disinfectant, 1301^6.
disinfection with NH_3 and, 2713^6.
dissocn. and sp. heat of, 1167^6.
effect on absorption of dissolved O by polluted waters, 3763^9.
effect on colors of azo dyes, 2752^4.
electrolytic, 1180^4.
electron affinity of, 2446^2.
excretion of, 3028^9.
excretion of, effect of K on, 1259^7.
expansion coeff. and free space, 3595^6.
flames of H-, mobility of negative ions in, 700^7.
flour treatment with, 951^9, P 2213^8.
from gas mixts., P 3543^7.
in gastric juice, 927^3.
in gastric juice, diagnostic importance of, 1843^8.
industry, economics of, 1358^8, 2565^1.
industry, in Japan, 1358^9.
ionization potential of, 2118^7.
isotopes of, spectrum of, 2791^4.
isotopes, sepn. of, 8^7, 1755^5.
isotopic compn. of, in meteorites, 8^8.
light filter, transmission of Oldenberg, 2789^8.
light scattering in gaseous and liquid, 1752^7.
liquid, evapn. of, P 2566^4.
filling receptacles with, P 2052^2.
manuf. of, 801^1.
transportation of, 2230^2.
manuf. of, P 483^8.
anode for, 1956^2.
electricity in, 2620^9.
electrodes for, 339^5, 1955^4.
by electrolysis, P 341^4, 1904^2, 2288^2, P 3398^1.
by electrolysis with diaphragm cells, 3269^5.
electrolytic app. for, P 22^5, P 341^2, P 1957^8, 2460^9, 3762^1.
metabolism in gastric secretion disturbances, 946^6, 3034^7.
from meteorites and from minerals of non-marine origin, isotopic compn. and at. wt. of, 1755^6.
in meteorites, isotopic compn. and at. wt. of, 2783^5.
in org. chem. industry, 1587^8.
in oyster treatment, 1292^6.
in paper manuf.—see *Paper; Paper pulp.*
in petroleum industry, 1512^4.
photoactivation of, 18^9, 1754^6.
photoactivity of, phys. antecedents of, 550^5.
photochem. union with H, 710^7.
photoelec. effect (compound) in, 705^6.
physiol. relations of, 949^7.
poisoning by, and its treatment, 2552^4.
in rain and snow, 2379^3.
reaction: $Cl_2 + 2KOH = KCl + KClO + H_2O$, 720^8.
reactions $Cl + Cl_2 = Cl_3$ and $Cl_3 + CO = COCl_2 + Cl$, velocity of, 3621^2.
reactions with Ag and with Cu, measurement of thickness of layers formed by, 1753^1.
reaction with C_2H_4, rate of, 2271^6.
with C_2H_4, surface polarity and, 1744^8.
with H, 3646^6.
with H (active), 3645^1.
with H, catalysis of, 3625^4.
with H, effect of complex light on, 2951^4.
with H, effect of ultra-violet light on, 2122^7.
with H in light, 338^2, 870^9.
with H in presence of charcoal, 2049^9.
with H, mechanism of, 2951^8.
with H, photochemistry of, 2620^3.
with NO, speed in a magnetic field, 3621^1.
with O_3, 549^6.
with K, spectrum of K in, 148^4.
removal from gases, P 1696^3.
residual, of swimming pools, 2889^3.
in respiratory disease treatment, 2204^3.
in sewage purification—see *Sewage.*
spectrum of, 19^2, 2613^1, 3641^7.
spectrum of reaction with Na, 1947^6.
in sugar manuf.—see *Sugar manufacture.*
supplying in small quantities as medicinal agent, app. for, P 3539^7.
system: I–HCl–H_2O–, oxidation potentials and equil. in, 692^9.
therapeutic use of, 451^1.
in urine, effect of posture on content of, 3495^2.
vapor pressure in metallic chlorides, 1928^5.
in warfare, 955^8.
waste, uses of, 2230^1.

Chlorine, analysis. (See also *Chlorides.*)
detection, P 1371^3.
detection and detn. in water, 2380^3.
detection in milk, 75^9.
detn. in air, 2800^2.
in blood and tissues, 3473^2.
in chlorinated sewage-tank effluents, 2888^6.
in com. magnesium, 1366^4.

in fertilizers, 2220^{9}.
in flour, 74^{4}, 75^{3}.
in Javel soln., 1303^{2,3}.
in milk, 2027^{8}.
in mixts., app. for, 1732^{2}
in sodium hydroxide and KOH, 3406^{6}.
in tissue, 1250^{8}.
in urine, 622^{1}
in water, 466^{9}, 3524^{5}
detn. of available Cl in hypochlorite solns. and Cl bleach baths, 3809^{8}
detn. of chlorine no., 2887^{5}
detn. of residual, in chlorinated water, 2887^{3}.
Chlorine compounds (See also "chloro-," under *Hydrocarbons*.)
absorption spectra of, 2119^{9}
with sulfo acids, disinfection with, 1861
Chlorine ion. See *Chloride ion*
Chlorine number, detn. in water, 2887^{5}.
lignin detn. in paper pulp and, 3083^{4}.
Chlorine oxides, Cl_2O, decompn. of, energy distribution in, 119^{8}.
ClO_2, thermal decompn. of, 547
ClO_2, light effect on, 1029^{2}
valency problem in, 1550^{7}.
vapor pressures of, 2926^{8}.
Chlorine water, effect on germination of rice, 2184^{5}.
prepn. of, 2912^{2}
reaction with aromatic amines, heat of, 1552^{3}.
Chloris petraea, HCN in, 645^{8}.
Chlorite (the mineral), analysis of, 3409^{1}.
classification of, 3409^{4}.
of marundites of the Transvaal, 563^{6}.
-muscovite, compn. of, 2968^{5}.
as polycomponent system, 2131^{0}
-quartz-amphibole garnet rock rich in Fe, 2968^{7}.
-quartz veins near Providence, R. I., 1371^{5}.
Chloritoid, compn. of, 2968^{5}.
-schist in Krivoy-Rog ore-bearing dist., 3673^{2}.
Chloroacetic acid. See *Acetic acid, chloro-*.
Chloroamine. See *Chloramine*.
Chloroaurates, thermal dissocn. of, 2110^{6}.
Chloroauric acid, extn. from aq. solns., 859.
reaction with $HgNO_3$, 1964^{1}.
Chlorobenzene. See *Benzene, chloro-*.
Chlorocarbonic acid. See *Formic acid, chloro-*.
Chlorocodon whiteii, constituents of, and their pharmacol. actions, 2024^{5}.
oil of, 2024^{6}.
Chlorocruorin, 1247^{4}.
Chlorocruorochromogen, spectrum of, 1247^{7}.
Chlorocruorohematin, spectrum of, 1247^{7}.
Chloroform, addn. compds. of, 1609^{1,4}, 1786^{1}.
adsorption by alumina gel, 320^{4}.
anesthesia, effect on adrenaline content of adrenals, 1856^{9}.
anesthesia with, dosage for, 1468^{7}.
antihemolytic action of, 1443^{7}.
binary mixts. with Et_2O, Me_2CO, CS_2 and C_6H_6, 3120^{4}.
compd. with Et_2O and with paraldehyde, 3122^{8}.
compressibility of mixts. with CS_2, 1014^{1}.
depolarization of diffuse light by, 2113^{1}.
detection of, P 1371^{3}.
detn. in drug products, 3210^{4}.
detn. in liniment, 92^{6}.
dielec. const. of, 864^{5}.
effect on catalase content and sugar metabolism of paracemia, 3316^{4}.
on cerebrum compn., 1861^{4}.
on eggs of *Petromyzon fluviatilis*, 2025^{8}.
on elec. polarity of *Obelia* and frog skin, 3467^{4}.
on electrocardiogram, 1271^{2}.
on heart, 2367^{2}.
on irritability of frog heart, 452^{7}, 453^{1}.
on living material, 3303^{9}.
on luminescence of P, 3391^{6}.
on muscles, 3511^{2}.
on muscular activity of gastrointestinal tract, 1869^{8}.
on nerves and skeletal muscles, 1865^{9}.
on phosphoric acid in brain tissue, 2023^{2}.
effect with hypnotics on general excitability, 1168.
ethyl alc. and Et chloride in, detn. of, 1775^{2}.
heat of vaporization of, 1551^{4}.
iodine soly. in, 3599^{6}.
ion mobility in air mixed with vapor of, 3383^{9}.
light-scattering coeff. of, 1024^{8}.
luminescence of, subjected to gamma radiation, 3381^{3}.
manuf. of, P 1243^{7}, P 3015^{7}.
manuf. of, electrolytic app. for, 551^{9}.
narcotizing and toxic effects of, 455^{4}.
poisoning from, liver metabolism in, 1110^{3}.
reaction with alkali metals, 537^{4}.
salicylic and *o*-nitrobenzoic acid soly. in, effect of water on, 1164^{7}.
soly. in water, 352^{5}.
as solvent for alkaloids, 3208^{9}.
as solvent in the catalytic reduction of BzCl, 1396^{1}.
spectrum of, 11^{3}, 14^{8}, 544^{1}.
syncope, hexetone action on, 2206^{4}.
system: Me_2O–, magnetic susceptibility of, 2612^{2}.
system: $PhNH_2$–, 1548^{3}.
system: butyric acid–, vapor tension of, 2935^{9}.
system: CO–air–, 1549^{5}.
system: α-chlorotetrahydronaphthalene–, vapor tension of, 2935^{7}.
system: decalin–, vapor pressure of, 2851^{8}.
systems: Me_2O–, and Et_2O–, refractometry of, 2612^{1}.
system: toluene–, 2712^{1}.
as urine preservative, 2476^{6}.
vapor-pressure curves for mixts. with tetrahydronaphthalene, with cyclohexanone and with anethole, 1013^{4}.
vapor pressure depression on mixt. with phenol and cyclohexanol or tetrahydronaphthalene, 788^{5}.
viscosity and vapor pressure of mixts. with acetone, 1012^{9}.
viscosity of, as function of d., 1929^{8}.
Chloroform, nitro-. See *Chloropicrin*.
Chloroformic acid. See *Formic acid, chloro-*.
Chlorogenic acid, effect on metamorphosis of proteins in germinating seeds, 2871^{8}.
α-Chlorohydrin, prepn. of, 43^{1}. 2311^{7}.
Chlorohydrins, solns. of, P 917^{3}.
Chlorophane, tribo-luminescent, photographic spectra of, 1562^{1}.
Chloropheite, analysis of, 1197^{5}.
in dolerites of Dalmahoy and Kaimes Hills, Edinburgh, 161^{7}.
Chlorophyll, complex metal compds. of, 414^{7}.
diuretic action of, 1275^{8}.
effect on assimilation of CO_2 in plants, 2184^{9}.

effect on nerve-muscle prepns., 949[8].
formation of, light effect on, 3177[4].
hydrogen peroxide formation in photo-oxidation of, 435[1].
photochem. actions of, 2521[6].
photographic reaction of, 1960[6].
photosynthesis by, law of photochem. equiv. in, 3484[8].
physico-chem. actions of, 3178[8].
from porphyrins, 608[7].
radiations and, 3178[4].
in seedling cotton, heritable deficiencies of, 932[4].
structure of, 606[4], 2682[9].
synthesis, energetic yield of, 1831[1].
synthesis in plant growth, effect of Mn on, 962[7].
Chlorophyllase, 3714[8].
Chloropicrin (*trichloronitromethane*), antiseptic power of, 2689[9].
bibliography, 2979[2].
as danger indicator in zyklon C, 3765[7].
diffusion of mixt. with HCN through building materials, 2926[5].
as fumigant, 2230[6].
as fumigant for cereal products, 1474[2].
as larvicide for screw worm and other flies, 2555[3].
poisoning by, and its treatment, 2552[4].
from polynitrophenols, 363[2].
suffocation of silkworms by, 2753[6].
Chloroplatinates, heat of formation of, 695[1].
Chloroplatinic acid, as catalyst for HCHO decompn., 38[1].
Chlororutheniates, isomeric, 3139[3,5].
Chlorosis (of plants), iron substitute in, 1646[9].
from oxygen deficiency, 3483[4].
pear trees with, Fe distribution in, 2183[9].
Chlorosulfonic acid, as catalyst for polymerization of cyclopentadiene, 2148[7].
reaction with phenols, 1395[5], 2841[6].
Chloryl. See *Ethane chloro-*.
Chocolate. (See also *Cacao, Cocoa.*)
bleaching of, P 463[6].
book: The Manuf. of, 3050[7].
cacao shells in, detection and detn. of, 3199[8].
coconut oil detection in, 2883[8].
coconut oil detn. in, 2028[5].
fat detn. in, 2374[9].
fat from milk, detection of coconut and palm-kernel oil in, 118[9].
manuf. of, app. for, P 2034[5].
sucrose in, detn. of, 785[7].
Choke damp, firedamp inflammability in atms. contg., 2075[6].
Cholam, as barley substitute in malting, 2044[9].
silage of, 3755[2].
Cholanic acid, constitution of, 2167[1].
silver salt, reaction with I, 409[3].
Cholazyl, effect on blood pressure after adrenalectomy, 1280[4].
Cholecystitis, cholelithiasis with, diagnosis by examn. of duodenal juice, 3035[2].
liver detoxication in, 1661[1].
Cholecystography, 432[2], 1251[4].
sodium tetraiodophenolphthalein in, 2369[3].
Choleic acid. (See also *Desoxycholic acid.*)
from bile of sheep, 54[7].
effect on protein metabolism of sex glands, 3727[9].
Cholelithiasis. See *Caculi*.
Cholemia, stalagmometry and, 628[3].
Cholera, toxin, prepn. of, 3472[9].
Cholera vibriones, anaerobic cultivation of, 3021[8].
virulence in relation to age of cultures, 432[7].
Choleresis, 2013[3].
Cholesterase, in nerves, 2333[9].
Cholesteremia, in mental derangement, 2200[5].
in tuberculosis, arterial pressure and, 1847[6].
Cholesterin. See *Cholesterol*.
Cholesterinemia. See *Cholesterolemia*.
Cholesterol (*cholesterin*). (See also *Cholesterolemia.*)
accumulation in palate, 3723[2].
activated, effect of butyl nitrite on, 1654[2].
activation of, ultra-violet irradiation in, 1437[4].
antirachitic activation of, by ultraviolet irradiation, 2187[3].
antirachitic acitivity of, 2006[8].
antirachitic deriv. of, 2354[5].
antirachitic value of irradiated, 221[9], 222[2], 618[2], 1834[5], 3718[8].
atherosclerosis from feeding, 2015[7].
avitaminosis C and, of blood and of the suprarenals, 437[1].
balance with cholesterol esters in blood and serum, relation to liver function, 1448[4].
in bile and blood serum, clinical significance of, 2533[1].
in bile in pregnancy, 1845[6].
in blood and duodenal fluid during pregnancy, 1453[5].
in blood, in Basedow's disease, 444[6].
distribution of, 1449[1].
effect of bile acid injection on, 938[7].
effect of bile acids and snake venom on, 3466[7].
effect of x-rays on, 1416[2].
during ether anesthesia, 3315[1].
in nephritis, 3503[3].
in pregnancy in tuberculosis, prognostic value of, 1847[6].
in thyroidectomized horses, 444[7].
in blood of children, 65[8].
in blood of cretins, 444[6].
in blood plasma and blood in anaphylaxis, 1848[4].
of blood serum, effect of saponin of *Primula elatior* on, 3509[2].
in hypertonia, lipolytic power and, 3729[2].
in hypertonicity, relation to its power to hydrolyze fats, 3736[8].
in Pb poisoning, 950[6].
in lues, 3504[7].
in pernicious anemia, 1667[5], 3730[1].
relation to proteins, 624[1].
state of, 624[2].
in cells, arteriosclerosis treatment in relation to, 943[8].
of cerebral cortex, 925[1].
in cerbrospinal fluid, 948[3].
in cerbrospinal fluid during pregnancy and delivery, 942[7].
constitution of, 2167[1].
detection and detn. of, 2341[3].
detection of, 1642[9], 1994[3].
detection of, in tissue, 3470[9].
detn. of, 883[6].
app. for, 1823[7].
in blood, 2686[5], 3710[9].
in blood serum, 613[1].
detoxication of saponins by, 2202[8].
in diabetes with arteritis, 67[6].
in diet, glucemia from, 67[7].

in duodenal contents in health and disease of the liver or its ducts, 445^{6}.
effect of feeding, on tissues and lipoids, 1448^{6}.
effect on adsorption of saponin by charcoal, 3744^{7}.
on complement fixation of sera, 3036^{4}.
on double refraction of Al_2O_3 fibers, 1350^{8}.
on insulin action, 3512^{2}.
on Kottmann reaction of serum, 3036^{3}.
on muscle of intestine and uterus, 3507^{7}.
on nervous system, 2201^{6}.
on ovaries, 1452^{7}.
on reproductive potency, 3027^{4}.
on sympathetic ganglia in arteriosclerosis, 949^{4}.
on uterine muscle, 1452^{6}.
in epithelium, 3030^{7}.
fat-, in blood of adipose and myxedematous patients, 1846^{6}.
in food, blood and bile, 3179^{6}.
formation of, effect of spleen on, 1410^{9}.
formula for, 2341^{5}.
growth-promoting power of irradiated solns. of, 1431^{3}.
in health and disease, 238^{9}.
heat action on, 1211^{8}.
irradiated, effect on photographic plate, 1635^{6}.
irradiated, in rickets treatment, 2522^{1}
irradiation with ultra violet light, 1137^{7}.
metabolism, 1656^{2}.
effect of absence of kidney function on, 947^{8}.
effect on hair growth, 2008^{2}.
harderian gland in, 1261^{9}.
in pregnancy, 1831^{9}.
in rats growing in presence or absence of vitamin A, 1097^{2}.
1-naphthalenecarbamate, 1232^{9}.
nervous vegetative system and endocrine glands, 1845^{1}.
oil with, tuberculosis treatment with, 2200^{9}.
in organs and blood during vitamin B-free diet, 934^{4}.
in organs of normal pigeons, in HCN poisoning and in beriberi, 67^{1}.
in organs with scorbutic diet, 1654^{6}.
osmosis in cells and, 1517^{4}.
in ovarian follicular fluid, 2194^{1}.
photoactivation by ultra-violet light, 1653^{9}
photoactivation by x-rays, 3303^{2}.
polymerization of, 2522^{9}.
as prosthetic group in serum globulin, 3017^{5}, 3701^{5}.
reaction with $Hg(OAc)_2$, 3299^{5}.
serol. differentiation from lecithin, 1106^{7}.
in snails, 2024^{9}.
spectrum of, 3301^{9}.
suspension of, 3303^{6}.
synthesis in animal body, 1131^{2}.
in tissues of pregnant and non pregnant rabbits, 1839^{2}.
p-toluenesulfonate, 2816^{7}.
transformation by x-rays, 1998^{7}.
ultra-violet light effect on, 3720^{6}.
from wool wash-waters, 827^{6}.

——, **7,8-dimethoxy-**, 606[2].
——, **7-hydroxy-**, and derivs., 605[7], 606[1].
——, **6 (and 8)-methoxy-**, and derivs., 606[1,2].
3,5,7-Chromantriol, 4-(3,4-dihydroxyphenyl)-. See *Acacatechol*.
Chromates, 2625[9].
from chrome iron ore, 2564[9].
as iron substitute in chlorosis of plants, 1646[9].
photochemistry of, 2459[2], 3389[9].
precipitation of basic, H-ion concn. and, 1163[1].
spectral light sensitivity with org. substances, 2624[5].
standards for, 3824[7].
Chromatiums, *kenii*, pigments of, 3307[2].
Chromatolysis, model for, 2685[9].
Chrome alum. See *Alums*.
Chrome dyes. See *Dyes*.
Chrome green. See *Pigments*.
Chromene. See *Benzopyran*.
Chromenyl. See *Benzopyranyl*.
Chrome-ocher, in Brit. Malaya, 3667[2].
Chrome tanning. See *Tanning*.
Chrome yellow. See *Lead chromate*.
Chromic acid. (See also *Dichromic acid*.)
absorption by hides, 2090[1].
detection of, 158[6].
detn. of, 1040[4], 2442[6], 2470[1,4].
electrolytic sepn. of Cr from aq., theory of, 3395[4].
poisoning, treatment of, 2215[1].
potentiometric titration of, 2471[2].
reaction velocity with $H_2C_2O_4 + MnSO_4 + H_2SO_4$ +, velocity of, 1953[9].
Chromiphosphites, alkali, 2793[8].
Chromite, brick, elec. resistance of, 3220[5].
chromium detn. in, 1574[1], 2473[2].
from Mont Djeti, near Atakpame, Togo, 29[5].
reactions with alk. earth oxides, 3405[3].
review of mining and trade information, 888[1].
Chromium, allotropy of, 2600[6].
atom, configuration of, 2781[8].
catalytic febrile biperiodic reactions, 1019[8].
cementation of ferrous alloys by, 567[7], 2139[3].
coating castings with, 3063[2].
coating ferrous metals with, to prevent corrosion, P 1587[6].
coating Fe and Fe alloys with, P 2956[2].
combination with hide protein, 2090[4].
const. paramagnetism of solns. of, 1170[6].
coördination no. of, in fluorochromates, 719[4].
crystal structure of, 2601[3].
displacement of perlite point by, 1973[9].
effect on carbide soly. in ferrite, 3436[1].
effect on corrosion of Fe and steel, 573[4].
elec. circuit maker and breaker electroplated with, P 715[6].
electrochem. behavior of, 1750[4], 2447[8].
electrochemistry of, 2779[2].
electrodeposited printing surfaces of, P 2126[8].
electrodeposition of, P 1360[5], P 1762[2], P 1958[1], P 3397[9], P 3650[8,9].
electrodeposition of, patent situation in, 2461[4,5].
electrolytic sepn. from aq. chromic acid, theory of, 3395[4].
electroplating Al with, 2461[2].
electroplating printing plates with, 1565[4].
electroplating with, 552[6], 679[4], 1761[6], 2461[3], P 2956[2,3], 3278[1].
on automobiles and metal goods, 2461[4].
protection of workers in plants for, 2461[3].
equil. with Fe in carbides, 571[4].
extn. from leather, 1535[9], 3834[4].
heat-treating, elec. furnace for, P 3271[3].
industry in 1925, 3674[3].
manuf. from CrO_3, P 1781[5].
nitrogen effect on, 3426[1].
passivity of, 165[7].
quinquevalent, 3106[7].
removal from amalgams, 3376[8].
Röntgen-ray absorption limits of, 1176[4].
spectrum of, 7[4], 15[5], 18[4], 330[8], 337[1], 1354[1], 1356[1], 2943[7], 2949[3], 3266[1], 3385[2].
system: Fe-C-, 1584[6], 2810[6].
system: Fe-Si-, 2970[7].
tools and dies of, P 37[4].
welding cuprous metals with, P 1976[3].
wires coated with, as elec. leading-in connections, P 1360[9].
Zeeman components of multiple lines, intensities of, 1175[6].
Chromium, analysis, detection in fats, 118[5].
detn., 26[8], 1772[4], 2630[6].
detn. in chrome liquors, 2919[8].
in chromite, 1574[1], 2473[2].
in fats, 118[5].
in steel, 1573[7].

in tungsten steels, 1365^{3}.

Chromium, metallurgy of, oxide reduction in, P $2055^{8,9}$.

Chromium alloys. (See also *Stellite* and "system" under *Chromium;* and "chromium" under *Steel.*)
alkali-resistant, P 1214^{5}
alloying compn. for, P 3412^{7}
aluminum-, coating metals with, P 898^{1}.
aluminum-Fe-, P 35^{4}.
in app. construction, 2097^{3}
chem. treatment of articles of, P 575^{7}
copper-, for carbonizing boxes, P 575^{6}.
copper-Fe-, P 3412^{9}
copper-Fe-Mn-Ni-W-, P 2479^{8}
copper-Au-Ag-Zn-, P 1782^{1}
copper-Au-Zn-, P 1782^{1}.
copper-Fe-Mn-Ni-Si-, non-rusting, P 36^{1}.
copper-Ni-, P 35^{8}
copper-Ag-Sn-, for dental amalgams with Hg, P 1381^{7}
corrosion of, 1202^{1}, 3425^{9}
electrodeposited printing surfaces of, P 2126^{8}.
iron-, P 551^{4}, P 1383^{1}, 2141^{1}, P 2307^{1}, P 3136^{9}, P 3279^{4}
etching with aqua regia in glycerol, 2639^{8}
low-C, P 35^{9}
nitrogen effect on, 3426^{1}
purifying mixts. for, P 1384^{1}.
resistant to HNO_3, 2814^{1}.
rustless, P 575^{1}
specifications of A. S. T. M. for, 954^{4}, 1121^{4}.
tubing, etc., of, P 2971^{7}
iron-Mn-Ni-, P 168^{1}.
iron-Mn-Ni-Si-W-, P 2480^{1}.
iron-Ni-, P 357^{8}, P 2115^{6}.
iron-Ni-, viscosity of hot, 568^{4}.
iron-Si-, P 3154^{6}, P 3279^{4}.
iron-Si-, corrosion-resistant, P 35^{6}.
manuf. directly from oxide ores, P 2115^{5}
melting in acid furnace, 1581^{7}.
nickel-, 1585^{1}.
for expansion pyrometers, 2477^{9}.
in glass industry, 2398^{7}
mech. tests at high temps. on, 732^{3}.
Röntgen-ray analysis of, 2601^{2}.
thermal anomaly of, 3120^{3}.
nickel-Mn-W-, oxidation-resisting, P 1214^{9}
nickel-Ta-, P 2179^{9}
nickel-W-, for cutting tools, P 1214^{9}.
welding of, 3439^{5}.

Chromium borate, precipitation of, H-ion concn. and, 1163^{1}.

Chromium carbide, reactions with alk. earth oxides, 3405^{2}.

Chromium carbonate, precipitation of, H-ion concn. and, 1163^{1}

Chromium carbonyl, prepn. of, 3404^{6}.

Chromium chlorides, isomers of hydrates of, mol. vols. of, 851^{3}
$CrCl_2$, for prepn. of free Me radicals, 3167^{6}.
as reducing agent, 1593^{8}.
$CrCl_3$, as catalyst for reaction of CO and PhMgBr, 2999^{9}.
fixation by hide substance, concn. factor in, 2919^{6}.
isomeric, hexahydrates of, 2296^{5}.
magnetization of, at low temps., 6^{8}.

Chromium chromate, precipitation of, H-ion concn. and, 1163^{1}.

Chromium compounds, ammino-, 716^{7}, 851^{4}.
ammino- and guanidinium-, 2625^{9}.
bis(*p*-bromophenylphenylphenylphenyl)-hydroxide, and CS_2 addn. compd., $2668^{4,5}$.
cryst. oxide formation from, by H under pressure and at high temp., 2959^{6}.
dermatosis industrialis from, in blue prints, 219^{1}
with fluorine, 719^{3}
guanidine alum, 879^{4}.
org., 3156^{2}.
org., $(Ph_3Cr)_n$, 1795^{1}
oxide complex, 2959^{8}.
pentakis(*p*-bromophenylphenylphenyl)-bromide, 2668^{3}.
reduction by H, 3658^{5}.
tetrakis(*p*-bromophenyl)-bromide, 2668^{3}.
vapor tension of hydrates of some, 1344^{8}.

Chromium dichromates, 717^{9}.

Chromium ferrate, $Cr_2(FeO_4)_3$, 157^{2}.

Chromium ferrite, thermomagnetic study of, 1939^{9}

Chromium hydride, prepn. of, 1363^{9}.

Chromium hydroxides, formation from aq. soln., observed by measuring their magnetism, 2611^{8}
$Cr(OH)_3$, colloidal, freezing of, 2266^{4}
colloidal, stability of, effect of H ions on, 2437^{8}
colloidal, sulfide adsorption by, 1346^{3}.
complexes with proteins, 1249^{7}.
magnetism of, decrease in decompn. of H_2O_2, 3625^{3}.
precipitation of, 26^{8}.

Chromium ions, equil. potential of, 2447^{8}

Chromium nitrate, hydrates of, 2791^{7}

Chromium ores, from Etchison, Md., 1371^{9}.
iron-, equil. in, 2810^{9}.

Chromium oxides, luminescence of, $3268^{2,3}$.
stability of, 3400^{5}.
structure of, 1569^{7}.
Cr_2O_3, adsorption of NH_3 by, 3615^{4}.
adsorption of dyes by hydrated, 2751^{9}.
as catalyzer in oxidation of HCN, 3625^{9}.
colloidal, elec. charge of, 1740^{8}.
detn. in chrome leather, 2427^{3}.
effect on silica bricks, 1699^{7}.
expansion by heat, 807^{9}.
glowing of, on heating, 527^{6}.
prepn. of, 2959^{7}
reaction with PbO_2, 1766^{9}.
reduction with C, 2776^{2}.
Cr_5O_9, formation from Cr_2O_3, 1570^{6}.
magnetic, 2941^{4}.

Chromium salts, basic, P 3214^{4}.
effect on permutite, 1919^{9}.
hydrolysis and H-ion concn. of, detn. of, 3095^{6}.
magnetic properties of, valence theories and, 2612^{3}.
oxidation by peroxysulfuric acid, catalysis by Ag ion in, 1744^{9}.
oxidation of, Pt metals as catalyzers for, 1017^{5}
reactions with acetate, oxalate and tartrate of Na, H electrode studies of, 2447^{6}.

Chromium steel. See *Steel.*

Chromium sulfide, reaction of Cr_2S_3 with SO_2, 2294^{1}.

Chromium sulfite, absorption by hides, 2090^{1}.

Chromium uranate, prepn. of, 3657^{8}.

Chromogens, in blood serum and in urine in kidney disease, 1665^{9}.

Chromone (*1,4-benzopyrone; γ-benzopyrone*).
derivs., coumarin derivs. and, 296[9].
derivs., reaction with hydroxylamine, 1410[4], 1411[9].
——, **3-acetyl-6-chloro-2-methyl-**, 1237[9].
——, **3-acetyl-2,6-dimethyl-**, and oximes, 1237[1,2].
oximes, and stereoisomerism of, 1410[5].
——, **3-acetyl-2,7-dimethyl-**, 1237[1].

dissocn. const. for, 2108[8]
double fluorides of Zr with, 1039[2].
indicator for, 1493[9]
salt of β-sulfobutyric acid, 2482[5].
salts of α-1(and 2)-naphthoxypropionic acid, 1617[9].
salt with hydrogen methylcyclohexylcarbinyl phthalate, 3287[1].
Cinchoninic acid (*4-quinolinecarboxylic acid*).
——, **2,6-dihydroxy-**, constitution of, 2329[1].
from oryzanin, 2329[1].
——, **?-phenyl-**, for arthritis treatment, P 479[5].
——, **2-phenyl-**. See *Cinchophen.*
Cinchoninyl azide, 2-phenyl-, 3010[8].
Cinchoninyl chloride, and hydrochloride, 3294[6].
——, **2-phenyl-**, -HCl, 2857[4].
Cinchophen, hydrazides, and -HCl, 3010[8]
pharmacol. action of, 3193[8].
phenylhydrazide, 2857[4].
——, **6-amino-**, 397[1].
——, **6,6′-arsenobis-**, 397[2].
——, **6-arsono-**, 397[2].
——, **3-hydroxy-**, and barium salt, 205[2].
——, **3-methoxy-**, 205[1].
——, **6-methyl-**, and esters, hydrohalides, P 424[6,7].
ethyl ester—see *Neocinchophen.*
——, **6-nitro-**, 397[1].
Cinchophen anhydride, and dimethiodide, 2857[4].
Cinematograph, in study of laws of fall of particles in still water, 3369[2].
Cinematographic films, P 2959[2].
built-up multi-color, P 716[4].
coloring, P 2465[8].
color, printing of, P 343[9].
copying intensity of, compensating, P 556[3].
intensifying process for, 152[3].
preservative for, P 556[8].
regeneration of, 2958[9].
sensitizing for positive copies, P 343[9].
washing, 1038[3].
waste, recovering values from, P 1961[3].
waterproofing, P 877[8].
Cinematography. (See also *Phonocinematography.*)
color, P 1764[9], P 1961[2].
color, filter system for, P 155[8], P 3656[4].
color, review on, 715[8].
projection screens, P 154[9].
screens for, coating for, P 3216[2].
two-color, by metallic toning, 555[9].
Cinematomicrographs, of Brownian movement in rubber latex, 3840[8].
Cineole, as fungicide, 3021[5].
in oil of eucalyptus, 3774[4].
from pine oil, 1799[8].
reaction with H_3PO_4, 1070[6].
Cinnabar, crystal structure of, 317[9], 2804[5].
Cinnamaldehyde, heat action on, 1611[1].
α- and β-oximes, and their Na salts, phys. consts. of, 3450[4].
oximes, derivs. of, 179[6].
photochemistry of, 1612[8].
reaction with AcH, 738[5].
with Cu in pyridine soln., 1074[4].
with Grignard reagents, 180[2].
with rhodanine, 600[6].
reduction of, 376[8], 1594[2].
systems of, with phenols, 1224[6].
thiocarbohydrazone, 1811[1].
——, **α-bromo-**, derivs., ring closure in, 759[6], 760[3].
——, **α-ethoxy-**, derivs., 759[7].
——, **α-methyl-**, phenylhydrazone, 759[7].
——, ***m*-nitro-**, α-oxime, and its Na salt, phys. consts. of, 3450[4].
Cinnamamide, *trans-*, photochemistry of, 1612[6].
——, **o-hydroxy-**. See *o-Coumaramide.*
——, ***m* - nitro - α - (*p* - nitrophenyl)-**, isomers, 2844[8].
——, ***N*-vanillyl-**, 404[9].
Cinnamanilide, *trans-*, photochemistry of, 1612[7].
Cinnamene. See *Styrene.*
Cinnamic acid, *allo-*, α- and β-*trans-*, polymerization and depolymerization of, by light, 1066[7], 1067[2].
bromination in light, 3647[1].
cis-, isomerism of, 1396[7].
depression of f. p. of nitrobenzene by, 2107[9].
γ-diethylaminopropyl ester hydrochloride—see *Apothesine.*
as disinfectant, effect of esterification on, 3060[9].
ester of di-Et *l*-malate, 1056[7].
ester of 3-(hydroxymethyl)camphor, 1228[1].
and esters, synthesis of, 403[9].
ethyl ester, reaction with liquid NH_3, 1066[9].
mandelic acid esters, 378[7].
methyl ester, as preservative, 3712[6].
methyl ester, photochemistry of, 1612[6].

and methyl ester, reaction with Br and with Cl in MeOH, 2997[1,2,3].
nitration of, 594[1].
photoactivation by ultra-violet light, 1654[1].
potassium salt, oxidation-reduction potentials of, 328[3].
reaction with Br, photochemistry of, 2620[3].
reaction with Br, velocity of, 1953[2].
reaction with sulfite, 1165[6].
silver salt, reaction with I, 409[3].
soly. in Na salt solns. of succinic, fumaric, malic and tartaric acids, ionization consts. from, 3372[3].
styrene from, P 424[5].
system: azobenzene–, 1224[5].
systems of, with amines, 1224[5].
1,2,2,3 - tetramethylcyclopentanecarbinol ester, † 1399[2].
Cinnamic acid, **α-acetamido-*p*-hydroxy-**, and azlactone*, 2682[4].
——, **α-acetyl-**, esters, condensation with N_2H_4 derivs., 3006[2].
phenylhydrazone, and its Et ester, 2495[5].
——, *m* (*o* and *p*)**-amino-**, ethyl ester, bromination of, 594[1].
——, **3 - amino - 2,4,6 - tribromo-(?)**, ethyl ester, 594[3].
——, **α-bromo-**, photochemistry of, 1612[8].
——, **2 - bromo - α - cyano - 4,5 - methylenedioxy-**, 2679[8].
——, **α-bromo-*p*-methoxy-**, and isomer, 3164[7].
——, **2 - bromo - 4,5 - methylenedioxy-**, and methyl ester, 3292[4].
——, ***o*-carboxy-**, 2331[4].
——, ***p*-chloro-**, oxidation of, P 1631[4].
——, ***o*-cyano-**, isomers, 2331[3,4].
——, **α,3-dibromo-4-methoxy-**, and methyl ester, 3164[8].
——, **2,3-diethoxy-**, 1793[1].
——, **2,3-diethoxy-5-nitro-**, 1793[1].
——, **3,4-dihydroxy-**. See *Caffeic acid.*
——, **2,3-dimethoxy-5-nitro-**, and ethyl ester, 1792[9].
——, **2,3-dimethoxy-6-nitro-**, and ethyl ester, 1792[9].
——, **2-ethoxy-3-methoxy-**, 1793[1].
——, **2-ethoxy-3-methoxy-5-nitro-**, 1793[1].
——, ***m*-hydroxy-**. See *m-Coumaric acid.*
——, **imido-**. See *Cinnamamidic acid.*
——, ***m*-nitro-**, 182[4].
——, *m* (*o* and *p*)**-nitro-**, ethyl ester, reduction of, 594[1].
——, ***p*-nitro-**, oxidation of, P 1631[4].
——, ***m*-nitro-α-(*p*-nitrophenyl)-**, isomers, 2844[8,9].
——, **3** (and **4**) **- nitro - α - [*m*(** and ***p*) - nitrophenyl]-**, and piperidine salts, 1801[4].
——, **β-styryl-**. See *α,γ-Pentadienic acid, β,δ-diphenyl-.*
——, **α,α′-thiobis-**, 1796[9].
anhydride—see *2,6-p-Thioxanedione,3,5-dibenzal-.*
allo-**Cinnamic acid**. See *Cinnamic acid.*
Cinnamic alcohol, from cinnamaldehyde, 376[8].
cis-, and carbanilate, 2978[1].
1-naphthalenecarbamate, 1232[9].
oxidation of, 2996[2].
prepn. of, 2321[8].
prepn. of, and derivs., 738[2,3].
reaction with *N*-methylcarbanilyl chloride, 1798[4].
Cinnamic anhydride, *allo*- and *trans*-, photochemistry of, 1612[7].
***p,p′*-dimethoxy-**, 196[4].
3,4,3′,4′-tetramethoxy-, 196[4].
Cinnamic mercaptan, 2991[4].
Cinnamimidic acid, ethyl ester-HCl, 3291[1].
Cinnamomum, *camphora*, oil of, 2718[8,9].
glanduliferum, oil of, 2718[9].
Massoia, oil of, 797[5].
parthenoxylon, oil from, 797[7], 2893[9].
Cinnamonitrile, 760[3].
hydrochloride, 3291[1].
——, **α - (*o* - anisylsulfonyl) - 3 - hydroxy - 4-nitro-**, and acetate, 402[7].
——, **α - (*o* - anisylsulfonyl) - 5 - hydroxy-2-nitro-**, acetate, 402[8].
——, **α - (*o* - anisylsulfonyl) - 3 - methoxy-2-nitro-**, 402[9].
——, **α-bromo-**, 760[3].
——, **α - (*p* - bromophenylsulfonyl) - 3-hydroxy-4-nitro-**, 402[7].
——, **α - (*p* - bromophenylsulfonyl) - 3-methoxy-2** (and **4**)**-nitro-**, 402[8,9].
——, ***o*-carboxy-***, 2331[4].
——, **α - (*p* - chlorophenylsulfonyl) - 3-hydroxy-4-nitro-**, 402[7].
——, **α - (*p* - chlorophenylsulfonyl) - 5-hydroxy-2-nitro-**, and acetate, 402[8].
——, **α - (*p* - chlorophenylsulfonyl) - 3-methoxy-2** (and **4**)**-nitro-**, 402[8,9].
——, ***o*-hydroxy-**. See *o-Coumaronitrile.*
——, **3 - hydroxy - α - (2 - naphthylsulfonyl)-4-nitro-**, 402[7].
——, **3 - hydroxy - 4 - nitro - α - (*p* - phenetylsulfonyl)-**, 402[7].
——, **3 - hydroxy - 4 - nitro - α - (phenylsulfonyl)-**, 402[7].
——, **3** (and **5**) **- hydroxy - 4** (and **2**) **- nitro-α-*p*-tolylsulfonyl-**, 402[7].
——, ***o*-methoxy-**, and di-HCl, 3291[1].
——, ***p*-methoxy-**, di-HCl, 3291[1].
——, **3 - methoxy - 2** (and **4**) **- nitro - α-*p*-tolylsulfonyl-**, 402[8,9].
Cinnamon oil. See *Oils.*
Cinnamyl alcohol. See *Cinnamic alcohol.*
Cinnamyl cyanide, reaction with resorcinol and with phloroglucinol, 2324[3].
allo-**Cinnamylideneacetic acid***, rearrangement of, 1799[6].
Ciona, intestinal secretion, digestion and assimilation in, 1282[1].
photosensory process in, effect of exposure period and temp. on, 1637[9].
Circulation, anoxemia effect on, 1106[8], 3464[8].
atropine effect on, 3044[7].
benzylamine effect on, 1852[5].
cerebral, effect of phenobarbital and other barbituric acid derivs. on, 2209[2].
changes in, effect on carbohydrate utilization, 621[6].
coronary, effect of Na phenobarbital and other barbituric acid derivs. on, 2209[1].
diseases affecting, O capacity and reaction of arterial blood in, effect of exercise on, 3186[9].
diseases of, phenolsulfonephthalein excretion in, 2199[1,2].
diseases, K and Ca content of blood in, 3732[5].
disturbances of, effect on reticuloendothelial app., 1664[2].
ephedrine effect on, 3044[8].
ethyl alc. effect on, 3506[9].
hot air baths and, 230[7].
oxygen exchange, blood and the, 1263[4].
peripheral, 239[9].
portal, secretin and, 3494[9].

posture effect on, 3495[2].
potassium iodide effect on, 1856[9].
pulmonary, effect of nitrites on, 1851[7].
sodium citrate effect on, 1856[4].
stimulant effect on, 2206[1].
***k*-strophanthidin effect on,** 3043[6].
tropine effect on, 1278[6].
Circulation apparatus, for gases or liquids, 1005[4].
Cirrhosis, ascites in liver, treatment with novasurol, 2369[4].
ascitic fluid of atrophic, and of syphilitic, 3735[1].
autohemagglutination in, of liver, 2698[1]
bilirubin distribution in vascular areas in, 1453[2].
diagnosis of, of liver by examn. of duodenal juice, 3035[2].
diagnosis of, of liver with quant. urobilin test, 2015[6]
liver detoxication in, 1661[1].
of liver from coal tar, 627[6]
melanoderma from, S in, 3188[9]
urobilinuria of hepatic, 1152[4]
Cirsium, seeds as feeding stuffs, 3200[1].
Cistus creticus, oil of, 2717[7]
"Citarin," as quant. reagent, 1966[2]
Citraconic acid (*methylmaleic acid*), diethyl ester, reaction with $CHNa(CO_2Et)_2$, 3446[4].
diethyl ester, reaction with liquid NH_3, 1056[3].
diethyl ester, reaction with Na di-Et malonate, 2823[8].
photolysis of, 369[2].
reaction with sulfite, 1165[6]
Citral (*geranial*), 6 - methyl - Δ^5 - 2 - heptenone from, 3686[9].
reduction of, 1054[5]
Citrate ion, effect on viscosity of colloidal Hg derivs. of sulfosalicylate, 3611[5].
Citrates, effect on arteries, 1868[1]
effect on barium sulfate pptn., 1190[5]
Citric acid, adsorption by activated C, 2929[1].
book: Die Herstellung von Zitronensaure, 2332[8].
caffeine salt, hydrolysis of, detn. of, 3776[8].
and calcium salt, manuf. from limes, 582[1].
corrosion of steel by H_2SO_4 **in,** 3277[2]
coumarin derivs. from, and phenols, 908[8].
detection and detn. in wine, 2893[1].
detn. in milk, 244[9].
detn. of, 2299[9].
extn. from lemon juice, 3062[2]
as intermediate stage in oxidation of sugars by fungi, 3713[7].
magnesium salt—see *Magnesium citrate.*
manuf. by fermentation, P 476[7].
in milk, 3318[9].
in must (Greek), 2892[6].
reaction velocity with Br, 1953[9].
sodium salt—see *Sodium citrate.*
soly. of metals and alloys in sugar and, 689[9].
specific rotatory power of, effect of viscosity on, 2941[8].
in tomatoes, 952[2].
Citromolybdic acid, 3406[1].
Citromyces, growth of, effect of Ca on, 613[4].

iron-, P 35^{5}.
iron-, magnetic properties of, 1209^{5}.
nickel-, and Mn-, 1927^{1}.
silicon-, P 35^{6}.
Cobaltammines. See *Cobalt compounds.*
Cobalt ammonium selenate, dissoc. pressure of hydrated, 347^{5}
Cobalt ammonium sulfate, 2960^{7}.
adsorption of, 531^{4}
Cobalt carbonate, thermal decompn. of, velocity of, 2109^{5}.
Cobalt chlorides, as catalyst in decompn. of $PhNHNH_2$ and its derivs , 598^{4}.
complex salt with quinoline-HCl, 601^{5}
heat of vaporization and b. p. of, 2603^{8}.
luteo-, const. paramagnetism of, 2781^{9}.
magnetic states of, 1941^{3}.
magnetization of, at low temps , 6^{8}.
reaction with oxygen, 3402^{8}.
Cobalt chromate, precipitation of, H-ion concn. and, 1163^{1}.
Cobalt compounds, ammino-, 139^{4}, 716^{6,7}, 2128^{4}, 2128^{6}, 2626^{4}, 3138^{2}, 3690^{4}
ammino-, adsorption of, 531^{4}.
aquotization of, 3622^{5}.
mol. vols. of, 2924^{1}.
mol. vol. variations in formation of solid, 1343^{6}.
molybdates of, 1962^{2}.
nitrites of, prepn. of, 2794^{5}.
soly. in dil. NaCl solns , 3117^{7}.
stereochem. configuration of, with anomalous coördination nos., 877^{9}.
complex, 3403^{6}.
complex, with univalent ions, 1961^{8}.
diaquocobaltous ethylenediaminobisacetylacetone, 716^{5}.
double sulfate with guanidine, 878^{9}.
with nitrophenols, 2296^{2}.
oxidation products of complex sulfites, 155^{8}.
phenolates, 399^{1}.
with phenylenediamine, 2627^{4}.
vapor tension of hydrates of some, 1344^{8}.
vol. proportions of, 3273^{4}.
Cobalt ferrate, 157^{2}.
Cobalt ferrocyanide, compds. with ferrocyanides of K, Na, NH_4, Sr and Ba, 2797^{6}.
Cobalt fluoride, crystal structure of, 2925^{1}, 3414^{9}.
heat of formation of, 2111^{1}.
mol. vol. of, 2924^{2}.
Cobalt guanidine molybdates, 1185^{3}.
Cobalt hexamethylenetetramine molybdates, 1185^{2}.
Cobalt hydride, prepn. of, 1363^{9}.
Cobalt hydroxides, colloidal, 4^{4}.
color of pptd., influence of adsorption on, 686^{6}.
crystal structure of $Co(OH)_2$, 3399^{9}.
magnetochem. reactions in presence of H_2O_2, 2611^{9}.
precipitation of, 26^{8}.
Cobalt ion, magnetic state of, 2112^{5}.
magnetism and electronic configuration of, 866^{7}.
reaction with HBr and HI, 2962^{7}.
Cobaltite, compressibility of, 525^{4}.
Cobalt neodymium nitrate, soly. of, 3258^{1}.
Cobalt nitrate, elec. cond. of cryst., 2276^{1}.
nitration with, P 917^{1}.
Cobalt nitrite, prepn. of, 2794^{5}.
pyridine compd. of, 1962^{5}.
Cobalto phosphites, alkali, 2794^{1}.
Cobalt ores, Mechnernich, 3410^{9}.
Cobalt oxalate, mol. vol. of, 2924^{3}.
Cobalt oxides, CoO, as catalyst for reduction of rubber, 3165^{5}.
CoO, crystal structure of, 3399^{9}.
reactions with acidic oxides, 1016^{6}.
reaction with PbO_2, 1766^{9}.
Co_3O_4, as catalyzer in oxidation of HCN, 3625^{9}.
CoO_2, catalytic decompn. of NaClO by, 3375^{3}
Cobalt phosphate, mol. vol of, 2924^{3}.
Cobalt potassium carbonyl cyanide, prepn. of, 2467^{4}.
Cobalt potassium selenate, dissoc. pressure of hydrated, 347^{5}.
Cobalt praseodymium nitrate, soly. of, 3258^{1}.
Cobalt pyridine molybdates, 1185^{1}.
Cobalt salts, effect on insulin action, 3315^{6,8}.
magnetic properties of, valence theories and, 2612^{3}.
magnetism of solns. of, thermal study of, 863^{4}.
as promoters in catalytic decompn. of H_2O_2 by $K_2Cr_2O_7$, 3260^{6}.
reaction with P, 2796^{7}.
Cobalt sulfate, $CoSO_4 . H_2SO_4 . 6H_2O$, 1767^{7}.
mol. vol. of, 2924^{3}.
Cobalt sulfide, reaction with SO_2, 2294^{1}.
Cobalt telluride, 882^{1}.
Cobalt thiocyanate, mol. vol. of, 2924^{3}.
Cobalt uranate, prepn. of, 3657^{3}.
Cobalt uranyl carbonate, 1962^{7}.
Cobalt uranyl phosphate, vapor tension of hydrates of, 1344^{8}.
Cobalt vanadate, 1185^{5}.
as catalyst for oxidation of aromatic nitro compds , P 1631^{4}.
Cobra venom. See *Venoms.*
Cocaine, anesthesia with, 2207^{9}.
antagonism of tyramine and, 3739^{6}.
arsenical emetic of, 1131^{5}.
book: Kokainismus, 1471^{5}.
convulsions, nervous symptoms of insulin hypoglucemia as contrasted with, 2703^{1}.
detection and detn. of, 2722^{2}.

smoldering as first step to, 2575[9].
softening of coal during, 3227[6].
in United States in 1923, 2406[8].

Cola. See *Kola.*

Colamine*, salts, 3014[6].

Colchicine, 2561[3].
detn of, 1302[3].
dissocn const. for, 2108[5].
effect on heart, 1863[7].
effect on intestine and uterus, 1863[8].
reaction with furfural-H_2SO_4, 1687[7].

Colchicum autumnale, alkaloid of, 2561[3]

Cold. (See also *Refrigeration.*)
effect on sugar metabolism of paramecia, 3316[4].
effect on tissue respiration, 2363[1].
inhibition of muscle strength by, and resuscitation by salicylic acid and EtOH, 2703[2].

Cold storage See *Refrigeration.*

Collagen, 3833[7].
deaminized, behavior of, 1148[6].
double refraction of, reversal by vegetable tannins, 1337[1].
fibers, fine structure of, 2919[9].
fibrils, 425[6].
gelatin from, by action of pepsin, 122[8].
isoelec. point of, chrome tanning at, 3359[7].
isoelec. prepn and use of, 3587[2].
pancreatin effect on, 1149[1].
pancreatin effect on, detn. of, 676[4].
reaction with acids, effect of vegetable tanning on, 517[9].
Röntgen-ray examn. of, 5281[1,8].
stretched, prepn. and spectrum of, 3608[4].
structure of, x-rays in study of, 3837[8].

Collargol. (See also *Silver.*)
anemia produced by, 1669[6].
bile pigment formation in surviving spleen treated with, 1276[2].
silver in, state of, 1495[9].

s-**Collidine** (*2,4,6-trimethylpyridine*).
nitration of, 2328[9].
——, **3-nitro-**, and salts, 2328[9], 2329[1].

Collidinedialdehyde, bisphenylhydrazone, 1226[4].

Collidinedicarboxanilide, 1226[4].

Collidinedicarboxylyl chloride, reduction of, and the $POCl_3$ compd., 1226[3,4].

Collidinium compounds, 3-nitro-*s*— iodide, 2329[1].

Collinsonia anisata, oil of, 2895[5].

Collodion, concd. solns. of, prepn. of, 3708[1].
membranes of, in case of NaCl and Congo red, potential difference and equil. across, 864[1].
permeability for nonelectrolytes, 3619[8].
potential differences and permeability of, 1015[7].
protein films on, 321[2].
size of pores in, 3611[7].
standardization and calibration of, 2342[4].
ultrafiltration through, 3611[8].
for painting vulcanizing molds for glossy rubber products, 3589[5].
permeability for ampholytes, 2513[3].
tubes for blood serum dialysis, 2009[9].

water diffusion through, effect of surface-active substances on, 3605[1].
Collodion cotton. See *Nitrocellulose*
Colloidal benzoin reaction, 67[6].
blood serum in, 779[7]
diagnosis of cerebral tumors with, 1849[1].
Colloidal state, books. Introduction à l'étude des colloides, etat colloidal et ses applications, 329[9], Die Allgemeinheit des Kolloidzustandes, 866[3]
characteristics of, 3607[2].
theory of, 2607[2]
as universal property of matter, 3369[1]
Colloid chemistry, 1010[6]
adsorption in, 1932[4]
of alk. earth soaps, 2930[7].
books: 1171[7], 1351[3], 1754[3], 1941[6], 2113[5], Die Grundlagen der Dispersoidchemie, 329[7], An Introduction to the Physics and Chemistry of Colloids, 329[8], Lab Manual of Elementary, 329[8], The Foundations of, 330[3], ein Lehrbuch, 330[4], for Students of Medicine and Biology, 611[5], Leitfaden der, fur Biologen und Mediziner, 771[6] A Manual of, 1351[1], Klinische, 1420[4], Manual de técnicas de fisicoquímica y en especial de, 1555[1], Einfuhrung in die, 1753[9], Manuel de technique de physico chimie et spéc de, 1941[9], Das Polarisationsmikroskop und seine Anwendung in der, 2263[9], Kleines Praktikum der, 2277[7]
of froths or foams, 634[5]
general, 3610[3]
geology and, 3410[1]
of gold, 1740[5]
of homeopathy, 3189[1]
of humus and peat, 1546[5]
in lubrication, 3802[6]
micellar theory, 3369[8]
numerical data of dispersoidology, 1738[7]
painting technic and, 297[4]
phys. chem analysis of colloids, interpretation on basis of electrolyte theory, 2930[1]
printing and, 3579[7]
of protoplasm, 1997[2]
of rennet coagulation, 1997[3]
of soils, 3766[6]
in tanning, 517[4], 1002[7].
of urine, 3172[2].
Colloids (See also *Adsorption, Brownian movement; Disperse systems, Dispersion, Gelatin; Liesgang rings, Micelles, Particles, Turgoids, Ultrafilters, Ultrafiltration*, and the substances commonly occurring in colloidal form or that have been made in that form)
absorption of gases by, 1739[1]
adsorbent, reactivating, P 3785[9]
adsorption of ions of same kind of charge by, 3608[9].
adsorption of ions on, detn of, 1346[5]
aerosols in industry, 3349[5].
of air in industry, explosions from, 112[1].
alumina, 533[3].
ammonium oleate solns , hydrodynamic behavior of, 3606[2]
viscosity of, 3605[9]
viscosity of, increase at higher velocities, 3606[4].
analysis of, 2214[1].
anisotropy in, optical investigation of, 2106[4].
from benzoic acetal of sorbitol, 3611[2].
in blood serum, 3183[4].
in cancer, 3735[3].
in kidney disease, absorption of dyes by, 3187[3].
stability of, 1661[9]
books 1555[2], An Introduction to the Physics and Chemistry of, 329[8], Introduction à l'étude des colloides, état colloidal et ses applications, 329[9]; The Effects of Ions in Colloidal Systems, 866[1], Grundzuge der Kolloidphysik vom Standpunkte des Gleichgewichts, 1171[6], L'état colloidal et l'industrie. I. Industrie des colloides, 1289[9], The Theory and Application of Colloidal Behavior, 1555[4], Chem Reaktionen in Gallerten, 1941[8], Pyrosole, 2277[6]. La théorie des phénomènes colloidaux, 3125[8].
catalytic, P 1696[5]
catalytic and adsorbent, P 1696[6].
of cell surface, 3463[1]
of cellulose, 3078[6].
of clay, absorption and liberation of K ion in, 2890[1]
in clays, relation to plasticity, 1134[5].
in clays, relation to sol Fe, 1293[8]
coagulating action of ions of equal valencies and the radii, 3609[5]
coagulating power of ions for, in relation to adsorption, 3614[1]
coagulation of alkali blue-tannin, with electrolytes, 3115[4]
coagulation of, antagonism of ions in, 3370[2].
effect of electrolytes on, 1741[8]
following the course of, 3613[5].
by H ions, 534[1]
of negative complexes, by electrolytes, 2107[1]
valency of ions and, 2268[3]
coagulation of hydrophobic, Traube's rule in, 3370[7]
coagulation of polydispersed systems, 2270[3,4].
coagulation of positive and negative, by electrolytes, effect of cerebrospinal fluid on, 2537[5]
coagulation velocity of negative, effect of H-ion concn on, 1010[4]
color of, influence of adsorption on, 686[5]
condensation products of Me_2CO and RNCO, 3165[4]
constitution of, chem. complex idea of, 2269[7].
decompn of H_2O_2 by, 2772[5].
detn in soils, 2219[7].
detn in sugar house liquors, basic dyes as flocculating agents for, 2424[3].
dispersibility of org , 3113[1].
dispersion degree of, app for detg., 3698[9].
with double refraction, 3634[9].
double refraction of streaming, contg. nonspherical particles, change with time of, 1545[9]
in dough, 74[6]
effect of acids, bases and salts on, 2772[1].
effect on drug action, 1463[9].
on fermentation, 964[5], 3207[5].
on flocculation of sols and suspensions, 534[2], 2438[6].
on formation of mineral and metalliferous deposits, 886[3].
on mineral oils, 496[6].
on stimulation of tissues, 1814[8].
elasticity and flow double refraction in, having non-spherical particles, 3612[5].
elec. charge of, 3256[4].

elec. double layer of, 2772[1].
elec. potential of cell and tissue, effect on staining capacity, 1817[5].
elec. transport of, rectifier for detn. of, 127[5].
electrolytes, 532[8].
electrophoretic migration of particles of, effect of electrolytes on, 1638[9].
in electrotechnology and radiotechnology, 688[1].
freezing effect on physiol., 2168[6].
freezing of inorg. hydrogels, 2266[4].
fuel—see *Fuels*.
gel structure, 1742[1,3].
in granular form, P 2036[2].
from graphite, C black, clays or other solids by deflocculation, P 3201[9].
grinding dry gels, effect of, 3607[2].
hydration of, dilatometer for, 2598[8].
hydration of, effect of electrolytic ions on, 2107[2].
hydration of plant, measurement of changes due to, 2181[5].
hydrogels, hydrates and, 2266[2].
hydrogen-ion concn. detn. in, 2930[9].
hydrogen-ion concn. of, app. for detn. of, 847[6].
hydrophile, concn. and purification of solns. of, 3369[5].
  electrolytic concn. of, 3612[3].
  ion fixation to, physico-chem. conditions for, 3497[9].
  pptn. by ions, 1681[4].
hydrophobe and hydrophile, 320[9].
ideal, 2770[3].
in industry, 1476[5].
interaction between, 3114[9].
intratracheal injections of inorg., 2206[7].
jellies of cellulose acetate, elasticity of, 1546[4].
life period of, effect of added substances on, 856[9].
lyophilic, effect on pptn. of insol. salts, gelatin and Ag chromate, 2772[2].
lyophilic, effect on reaction velocity, 3370[2].
mastic, swelling value of coagulation concn. of electrolytes for pptn. of, 3114[7].
mercury derivs. of sulfosalicylic acid as, 3611[3].
metallic—see *Metals*.
mills, P 848[5].
  evolution of, 1005[7].
  in tanning material prepn., 3095[4], 3834[8].
of muscle, in rigor mortis, 227[1].
muscle proteins as, 211[1].
neutralization of, antagonistic action of ions in, 1160[3].
in nitrobenzene, 320[8].
in nitromethane, 3609[7].
nomenclature of, 1342[3].
in oil and fat industry, 672[9].
org., as indicators, 1188[9].
org., properties of, 2438[8].
organophile, 687[8].
-osmotic pressure of serum, membrane equil. and, 2170[3].
oxidizing action of, 2606[4,7].
particles, movement in alternating field, 1159[2], 1933[4].
peptization of, 687[6].
peptization of, theory of, 1158[8].
in petroleum and in petroleum industry, 1139[9].
phys. chem. analysis of, interpretation on basis of electrolyte theory, 2930[5].
physiol. action of, 3033[9].
in plants, protective action of, 1534[2].
plasma, relation to pasteurization effects, 2212[1].
precipitation by multivalent ions, 1934[7].
precipitation of, concns. of electrolytes necessary for, 3609[3].
prepn. of, 532[9], P 3757[7].
protection of suspensoids, 1933[8].
protective, action of, 135[4,6].
  characterization of, 2439[2], 3612[1].
  in coating for paper, 1519[3].
  effect on mercuric iodide, 2930[7].
  effect on size of coagulated particles, 3115[5].
protein, coagulation with org. acids in relation to structure, 3115[9].
protein, effect of Donnan equil. on, 1819[4].
of protoplasm, effect of Ra on, 213[3].
reactions in, effect of radiations on, 3390[9].
reactions of, periodicity of, 2606[3].
reactions on boundary between solns. of electrolytes in water and in gel, 1010[1].
reactions with dissolved substances, 2105[5].
relaxation and modulus of shearing of sols, 3607[3].
reversible gel formation and fixation, 3699[1].
Röntgenoscopy for systems of, 2281[7].
in rubber, elastic hysteresis and, 1536[5].
rubber latex treatment with protective, 518[7].
in *Salmonidae*, effect of light on, 3196[3].
salves and cosmetics, 796[9].
sepn. from crystalloids, 532[7], 1547[3].
smoke as aerial, 2606[3].
Smoluchowski coeff. of, variation in, 3608[5].
soap, water in, 1550[8].
sodium mercurisulfosalicylate sols, optical anisotropicity of colored, 3611[5].
of soil, 85[6], 3766[5].
  base exchange capacity of, electrokinetic behavior and, 3203[3].
  base exchange in, 2553[2].
  clay as, 639[1].
  effect of hydration on stability, 1293[9].
  electrodialysis of, exchangeable bases and, 3766[2].
  heat of wetting of, 639[1].
  heat of wetting of, effect of replaceable base on, 1294[1].
  properties of, 3528[3].
  sepn. by centrifugation, 3055[4].

soil alky. and, 3530[4].
soils, 1294[3].
of soils and soil fertility, 639[7].
from solids, P 1678[3].
solids reduced to, reactions between, 2930[6].
solid, structure of, 3606[9].
sorption phenomena on, chem. processes and, 3614[1].
stability of, 857[4].
  effect of H ions on, 2437[8].
  under influence of electrolyte mixts., 3367[6].
surface equil. of, 2[9].
surface tension of solns. of, detn. of mol. dimensions by, 1738[8].
swelling and dehydration of, kinetics of, 1933[3], 3607[8].
swelling and dispersion in ether-alc. mixts., 1159[6].

of gas, flame flicker as index of efficiency of, 1900^5.
of gas in blast furnace, 1580^8.
of gas in secondary air, $276^{8,9}$.
in heating ducts, 2407^1.
heating value of gas, combustion air and combustion products, 3797^4
Landmann system of, 3796^2.
in open-hearth furnace and its automatic control, 1579^9
of powdered coal, 274^1, 654^8
of powdered coal, thermodynamic and industrial bases of, 274^1.
products of, decompn of, 2904^1
radiating chamber for, from carborundum refractories, 1309^3
range of, variation of, 3553^6
spontaneous—see *Ignition*
surface, effect on economies of heat and power, 3313^1.
temp and its graphical detn, 2738^5
temp., calcns. of, 2749^7.
temp, detn. of, 3796^3
theory, history of, 2922^9
unburned material in industrial, effect of excess air on proportion of, 2211^8
of volatile matter on mech stokers, 2241^7
of volatile substances, 3122^1
Comets, sodium spectrum in, 2284^9
Comminuting apparatus See *Crushers, Grinding apparatus, Pulverizing apparatus*
Commutator, colloidal, 688^1.
Commutator cones, mica, P 3065^8
Complement, of amylases, 923^2
anti-, pancreatic exts as, 2697^1
artificial, 1267^9
in blood serum, 1844^4
dry, in Wassermann reaction, 1268^7
effect of anaphylatoxin and anaphylactic blood serum on, 2197^1
in health and diseases, 2534^7.
insulin, 2864^8
insulin effect on, of blood serum, 3314^6
of insulin in muscles of cold and warm blooded animals, 2337^1.
secretin effect on blood, 1146^8
splitting of, 1267^6
Complement fixation, with bilharzia, 627^5
of blood serum after injections of cholesterol and lecithin, 3036^4
with blood serum against bacteriophages and bacterial exts, 1104^7
organ ext effect on, 1269^6
potency of watery ext of saprophytic acid-fast bacilli as tuberculins and as antigens in, 1444^1.
by pregnant women's serum and ultrafiltrates of placental autolyzates, 3736^1
in tuberculosis, 1443^9, 1444^5, 3501^1.
Complement-fixation test. (See also *Wassermann reaction*.)
antigen for, 3186^6.
for bilharziosis, lipoidal nature of cercarial antigen as used in, 627^5.
with tebeprotin, 3187^1
in urotuberculosis, 3188^4.
Complex compounds. See *Chemical compounds*
Complex salts. See *Salts*.
Compositae, leaves of, anatomy of, 799^2.

quantum influence in, 133[2].
reciprocal theorem and, 2768[7].
of solids, 1736[9].
of solids in relation to general expression of energy, 2603[8], 3367[5].
specific heat variations in relation to, 863[6].
thermodynamics and, 140[9].
validity of, 1007[6].
Conduction, electric. (See also "electrometric" under *Titration.*)
by colloidal metals, 20[9].
electronic, in crystals, 10[6], 333[6].
at low temp., effect of elastic deformation on, 141[3].
by metals, theories of, 698[6,8], 1353[1], 2436[9].
in molten metallic alloys, 2938[5].
unipolar, through crystals, 2938[3].
Conduction, thermal, heat losses from water surfaces by, ratio to losses by evapn., 3122[3].
Conductivity, electric. (See also *Electric resistance; Ionization, electrolytic; Ions, electrolytic;* and "electrometric" under *Titration.*)
of acids in MeOH, 536[1].
of addn. compd. of $C_6H_5CONH_2$ and Br, 3377[6].
of alkali cyanates and azides, 2440[1].
of alkali metals, effect of pressure on, 1542[8]
of alkali metals in NH_3 and in methylamine, 1168[9].
of alloys, 2811[5].
of aluminum alloys and Cu conductors as affected by atm. exposure, 3679[7].
of aluminum alloys, effect of aging on, 2478[4].
of aluminum, effect of torsion on, 2436[6].
of amalgams, 3119[2].
of amyl alc. in equil. with solns. of KCl, $CaCl_2$ and HCl, 141[5].
analysis by, 2630[2].
ash detn. in sugar manuf. by measuring, of water solns., 2086[4].
in bacterial metabolism study, 2179[9].
in benzene solns., 322[3].
of beryllium salt solns., 3141[1].
of binary salts, effect of temp. on, 3254[6].
of blood, 3463[1].
of blood to direct currents, 2684[5].
of cadmium iodide, effect of I on, 1015[3].
calcn. of, of strong electrolytes at infinite diln., 323[2].
of chromammines, 716[7].
of clouds dispersed from an arc, 2785[4].
of cobaltammines, 878[2].
of colloids, as periodic function of age, 2606[4].
of copper, effect of Pb and Sn with O on, 2640[9].
of cyanogen bromide, 3620[2].
detn. of, in cylinder gases, 1510[3].
at high temps., 3365[3].
at infinite diln. of ions of KCl, LiCl, NaCl, NaBr and KI, 3618[5].
in iron and C steels, 3436[2].
in mixts. of methanol and EtOH, 1553[7].
in submaxillary gland, 3475[1].
with vacuum electrometer, 865[4].
of wires and cables, 875[1].
of dielec. compds. (single) and metalloid elements, 1751[7].
of dielectrics, x-ray effect on, 3124[4].
of electrolytes in electrolytic sepn. of Ag and Au, 1564[9].
of glass, relation to compn., 975[1].
of halogens, 1752[2]
of hydrated crystals, 2276[1].
of hydrocarbons, org acids and systems of two sparingly conducting components, 1751[9].
of hydrochloric acid, KCl and NaCl and of their binary and ternary mixts., 2270[9]
of hydrogen chloride and KCl in water and in acetone-water mixts., 1743[6].
of hydrogen halides in BuOH, 3376[4].
intermetallic compds. and, 1747[5].
of iodine trichloride in AcOH, 322[4].
of lactates of rare earths, 2797[3].
of leaf tissue fluids of phanerogamic epiphytes, 2181[2].
of liquids and soln., measurements of, 2447[2].
of lithium chloride and KCl, 3119[1].
of magnesia refractories at high temps., 270[2].
of mercury, magnetic disturbance of, 1752[4].
of mesitylenephosphinous acid, 3617[1].
of metal plates, comparing, 3277[9].
of metals and alloys, cold working effect on, 2970[2].
of metals, theory of, 1750[8].
of methyl acetate, effect of sugars and alcs. on, 3258[6].
of milk and its detn., 3517[4].
of nitrous oxide solns., 2468[4].
of ore veins at Kongsberg Ag works, 728[2].
of phosphorus pentachloride, 697[3].
photo., at low temps., 869[7].
in rock-salt, 3129[5].
in selenium, 1947[3].
photo-elec. primary cond. of crystals, 1757[2].
post-arc, and metastable He, 143[4].
of potassium iodide, effect of I on, 1015[3].
of realgar, effect of light on, 3268[7].
of rock-salt crystals, effect of electrostatic charge on surface-, 1022[9].
of salt mixts., 2276[5].
of salts, 2939[2].
of salts in single crystals and in cryst. aggregates, 3377[6].
of silumin, 3423[2].
of silver thallium nitrate, 1553[1].

of silver-Zn alloys in quenched condition, 1023[1].
in single crystals and crystal aggregates, 1553[8], 2436[5].
of sodium behenate solns., 1160[9].
of sodium hydroxide solns., 3118[8].

of sodium stearate solns., 1550[9].
of soils, 469[8].
of solid salts, variation with temp. and relation to spectrum of metal of the salt, 13[2].
of solns. of GeO_2 and of As_2O_3, 1547[8].
of submaxillary glands, alteration during functional activity, 2873[8].
temp.-, curves of solid salts, 2102[2].
of toluene, 2608[1].
of uni-univalent salts in methanol, 136[3].
of univalent salts of higher fatty acids in molten state, 3117[6].
in waste disposal control, 467[6].
of wood in relation to its water content, 2737[8].

Conductivity, thermal, of air and H, 3601[8].
of alloys, 2811[5], 3679[9].
of alumina, MgO and fireclay, 3392[9].
of aluminum, effect of torsion on, 2436[6].
of binary mixts , 3606[7].
of carborundum, 1309[3].
coeff. of, effect of sp heat, sp. gr. and av mol. wt. on, 1677[3].
in crystals (non-metallic), quantum theory of, 699[9].
of crystals of non-cubic metals, 1939[8].
detn. in gases, 1166[9].
detn. in iron and C steels, 3436[2].
of gases, variation with pressure, 2111[4].
of mercury, coeff. of interior, 3121[7].
of metals, electron theory and, 1750[9].
of molten glass, 2733[2].
of selenium, effect of light on, 146[3].
of silica bricks, 1309[2].
of single metal crystals, 326[2].
of steel, anomalies of, 3436[2].
of surfaces, theory of, 687[2].
of wires and rods, 1021[7]

Conductors, electric. (See also *Cables.*)
cadmium, 1359[8].
chromium-coated wires as, P 1360[9].
coatings for, P 3271[6].
copper, cond. of, as affected by atm. exposure, 3679[7].
dielec. const. of, measuring, 3262[3].
electrostatic synchronizer on high-tension lines, 1359[9].
insulated, P 3052[4].
iron alloy for, P 1976[8].
leading-in wires for glass elec. app., P 2463[1].
loading, with magnetic material, P 2290[3].
resistance of super-, effect of magnetic field on, 1170[3].
semi-, surface between metals and, 2778[7].
single, 1181[6].
super-, 2778[9].
titanium oxide, P 267[2,3].
varnish for, P 2082[4].

Conductors, thermal, titanium oxide, P 267[2,3].

Conessine, and derivs., 3458[4,5,6].

Confectionery, P 2213[7], P 3755[9].
coconut oil detn. in chocolate fondants, 2883[8].
explosion in chocolate-coated, from yeast contamination, 633[5].
fat sepn. in, from milk and cream, 1119[9].
figs (candied), 787[2].
grained, P 787[9].
milk and cream bonbons, analysis of, 3517[2].

Conglomerates, crystallites in, detn. of orientation of, 132[3].

Congo paper, prepn. of very sensitive, 1966[8].
sensitive, 722[7].

Congo red, adsorption by charcoal prepns., 1009[4].
color change in acidified acetone-water solns., 3620[4].
differentiation of tissue components by combining capacities for, 3477[7].
diffusion phenomena in solns of, 1013[7].
manuf. of, 2076[5].
potential difference and equil. across semipermeable collodion membrane in NaCl and, 864[1].

Conhydrinone, methyl-, *dl* , 1811[3].

Conicine, effect on adrenaline secretion, 1862[4]

Conifers. (See also *Wood*)
book: Ueber das Harz der Nadelholzer und die Entharzung von Zellstoffen, 1323[5].
resin formation in, 1426[4].

Coniine. See *Conine.*

Conine, dissocn const. for, 2108[5].
reaction with $C_2H_2Br_4$, 1086[6].
——, **1-(ε-aminoamyl)-**, 417[9]

Conium maculatum. See "poison" under *Hemlock.*

Conjugation, accumulated, course of addn. to compds with an, 1592[2].
reactions of compds. with extended, 2832[2].
and reactivity, 207[2].

Conserves (See also *Jelly; Marmalades.*)
book, 462[6].
containers of glazed earthenware for, 1874[2].
fermentation in, 3199[2].
fruit acids in, detn. of, 77[9].
hydrogen-ion concn. in, 1168[8].
mixing and steam-treating app. for, P 79[8].
pectin detn. in, 77[6].
pectin prepns. in manuf. of, 78[4].
water-sol. solid content of fruit, 952[3].

Consistometer, viscometer as, 529[6].

Constantan. See *Copper alloys.*

Constants, books: Intern. Crit. Tables of Numerical Data of Physics, Chemistry and Technology, 539[9], 3263[2]; Phys. and Chem., and Some Mathematical Fractions, 3263[3].
metastability of matter and phys., 524[8].
phys., of *cis*- and *trans*-compds., 576[4], 2975[3].

Constipation, hydrogen-ion concn. of feces in, 1841[1].
intestinal putrefaction in chronic, measurement of, 1104[4].

Constitution. See *Chemical constitution.*

Contacts. See *Electric contacts.*

Containers. (See also *Ampoules; Bags; Bottles; Cans; Cylinders; Flasks; Kiers; Vacuum containers.*)
for accumulators, P 22[1].
for acetylene, P 2433[8].
acid, alloys for linings of, P 358[6].
acid-proof tank, P 3784[1].
for acids, 679[4].
autogenous and electrically welded, 1585[9].
book: Handbuch zum Dampffass und Apparatebau, 847[9].
for bromine, 647[9].

carboys for HNO_3 shipment, 1716[2].
carboys, handling of, 3102[1]
catalytic decompn. in closed, 2776[6]
in chem. industry, 2263[2]
chlorine, leak in, 1152[3]
for chlorine (liquefied), P 2052[2].
coagulating, for rubber, 2131[9].
compn. for, P 267[8].
for compressed air, sealing compn. for, P 268[4].
for compressed gases, 2719[1]
for corrosive liquids, P 341[1], P 2009[3].
cylinders, calcn. of contents of partly filled horizontal, 521[7]
cylindrical tanks, design of, 3102[4]
drying app. for glass, 1732[1]
for elec. batteries, P 1360[4]
for explosive gases, filling mass for, P 3216[9]
for gas at low pressures, 1539[7]
for gases, 1737[2].
for gases, absorbent-material in, P 1153[1].
for gas impregnated with radioactive emanations, P 3250[9]
for gas masks, etc., P 3322[8]
of glazed earthenware for jam and marmalade, 1874[2].
gradnating, for density detns., 1733[9].
of hard rubber covered with wood impregnated with a phenolic condensation product, P 520[1]
impervious material for, P 2567[8].
iron, coating with an alloy, P 1976[8].
for liquid O, P 2[2], P 483[4], P 3513[8]
material calcn. for, 523[3]
for melting glass, P 3221[4].
for nitrates (fused), corrosions of, 573[6].
packing for air-tight, P 189[4].
paper-pulp digesters, calcns. relating to strength of plane container walls, 3813[9].
paper, treatment with H_2SO_4, P 1523[2]
for primer, 3815[8]
for purification of Zn solns., P 3785[4].
of rubber, P 1338[2]
rubber jars for batteries, P 1568[2]
rubber lined acid, P 1198[3,4], P 3103[2].
rubber-lined, for acids, etc., P 2051[2].
tank-car construction, 523[3]
of titanium oxide, P 267[1]
for vanilla-flavoring, of Monel metal, 3049[9].
welded pressure, tests on, 2655[9]
wooden, specifications of A. S. T. M. for, 954[6].
Continuity, theory of, 3683[8]
Contraction, in salt soln., relation to light refraction and light absorption, 699[5].
Contrapolarization, 2767[6]
Convallamarin, effect on heart, 155[1].
Converters, for calcination of low grade calamines, 1201[7].
for ferrous metals, P 1214[1].
preheated Fe in, 3147[8].
steel, supplying air blasts to, P 3142[4].
Conveyors, for alum in water purification, 3761[5].
Convolvulinolic acid*, constitution of, 365[7]
Convulsions, arresting action of *Adonis vernalis* and digitalis, 1470[1].
blood changes in, 2878[9].
after insulin, hypoglucemia and, 1463[8].
in insulin treatment, relation of diet to, 1274[1].
muscular contraction in, O deficiency theory of, 1109[8].
oxygen tension of tissue in, 783[2].
Cooking, of fish offal, app. for, P 2034[8].
Cooking utensils. (See also *Ceramic ware.*)
enameled Fe, prepn. with white enamels contg. Sb compds., 2711[4].
Cooling (See also *Refrigeration.*)
air, Raschig rings in, 2214[3].
baths from org. materials and liquid air, 1716[9].
baths, hazard of prepn. from inflammable compds. with aid of liquid air, 824[6].
baths of inflammable compds. and liquid air, explosions of, 1324[9].
of coal gas for removal of $C_{10}H_8$, etc., 3556[9].
of coke, 2741[4].
plant for, P 984[6].
Sulzer system of dry, 3798[7].
curve for systems of 3 components, 1020[4].
electrodes of ozonizers, P 1361[3].
by evapn., 1676[8,9].
of gas constituents, P 1478[8].
of glass, 2055[6], P 3221[4], 3545[9], P 3548[2].
of glass by gas currents, P 976[4].
of isomer mixts., theory of curves for, 136[2].
Cooling apparatus, for beet wort, P 1885[6].
for coke, P 3229[4].
distn. and, 1152[7].
for gases, P 681[5].
of gas liquefiers, phenomena in counter-current, 2778[4].
for hot test solns., 2098[1].
for hydrocarbon vapors, P 1514[8].
liquid air, P 1732[7].
for milk and cream, P 634[3].
for producer gas and air for internal-combustion engines, P 1316[9].
for satd. solns., 3363[3].
for sugar manuf., 3357[5].
for Wagner reaction, 2979[7].
Coördination. (See also *Valency.*) 326[4].
in chloroferrates of substituted NH_4 bases, 25[1].
covalency and, 524[6].
quadrivalent complex salts, *cis-trans* isomerism of, 1961[8].
residual affinity and, 716[5], 2465[9], 3400[9], 3401[4].
valency of 2 hydroxyl groups in *o*-position, 3656[2].
Werner's theory of, nomenclature in, 1165[1].
Coördination compounds. See *Chemical compounds.*
Coördination numbers, 1165[1].
atomic structure and, 8[5].
of fluoro salts of Al, tervalent Fe and Cr, 719[1].
of ruthenium in K chlororuthenites, 878[8].
stereochem. configuration of Co complexes with anomalous, 877[9].
Copal, detection of, 2755[8].
improving, 672[4]
melting of, 2756[5], 2909[9].
melting, with exclusion of air with CO_2, 299[4].
Sambas, 2255[3].
substitutes for, P 2082[8].
Copepodes, phototropism of marine pelagic, effect of ambient H ion concn. on, 1471[7].
Copper. (See also *Fungicides; Insecticides; Sprays.*)
absorption during digestion of vegetables colored with Cu salts, 775[4].
active, production of, 1550[2].
adsorption of NH_4Cl on, 347[9].
adsorption of ethylene and H by, 1545[2].
affinity for S, 3420[8].
alpha-ray retardation by, 3128[5], 3638[2].
amorphous, with occluded H, 3596[7].

in animal organism in P poisoning, 3191[6].
annealing of, 2142[4].
anodes of, periodic phenomena at, 3377[3].
anodes of, electrodeposition of, P 2462[6].
anticathodes, radiations from, 2948[3].
in app. manuf., 127[3].
in Arizona in 1924, 1779[4].
arsenical tubes, season-cracking in, 3420[1].
atom, configuration of, 2781[6].
atomic nucleus of, reflection of α-particles from, 9[4].
atomic wt. of, 1006[6].
atom, stereochemistry of, 370[5].
bismuth-contg., 2813[8].
books 355[9]; Copper and Alloys (chart), 356[1], Das Kupferschweissverfahren ins besondere bei Lokomotiv-Feuerbuchsen, 1213[2], The English, Industries to 1800, 3152[7], The Story of, 3440[7].

on metabolism, 3488[4].
on photographic fixing baths, 1037[8].
on respiration, 2512[5].
on white metals in preventing segregation, 3679[1].
elasticity modulus of, relation to temp., and m. p., 132[8].
elec cond. and ductility of, effect of Pb and Sn with O on, 2640[9].
elec. cond. of, as affected by atm. exposure, 3679[7].
elec cond. tests of wires and cables of, 875[2].
elec. resistance of, effect of tension on the transverse and longitudinal, 698[8].
electrochem pptn. of, from solns. of its salts by Zn, 3261[7].
electrodeposited, orientations of crystals in, 131[5].
electrodeposition of, 551[8], P 3398[3], 3648[4], P 3651[1].
app. for, P 2290[2].
cell for, P 3136[7].
effect of gelatin and $Al_2(SO_4)_3$ on, 1955[7].
properties of addition agents in, 2793[2].
on roofing, etc., P 1762[4], P 3136[7].
from solns. contg. CuCl, 1564[6].
on wire or strip, app. for, P 1958[2]
electrodeposition of sheets of, app. for, P 554[6].
electrodes of Cu-Zn and, potential between, 2780[2].
electrolytic formation of thin sheets of, P 1762[4].
electroplating with, P 554[7], P 2956[2].
defects in, 553[1].
measuring polarization and resistivity in, 1359[3].
electroplating with Ni and, P 554[6].
embrittlement of, by hot reducing gases, 2142[7].
emission of electrons and positive ions by, at m. p., 3383[7].
endurance properties of, 31[9].
equil. between cupric ion, cuprous ion and, 1745[9].
etching with chromic acid reagent, 2640[3].
expansion coeffs. at low temps., detn. of, 3376[7].
fluorescence in, 2115[2].
fluorescent energy transformation coeff. of, 2943[2].
in foods and excreta, 2508[3].
in forage crops and foods, 247[9].
gaseous ions of, energies of soln. of, 2446[1].

grating in study of Millikan region of ultra-violet, 2454^{3}.
hardening of, P 735^{4}.
hardness of cold-rolled, 2641^{5}.
heat of formation of brass from, 2655^{8}.
heat-treating Fe internal combustion cylinders with fins of, P 35^{1}.
at high temps., effect of gases on, 3419^{1}.
hot-rolled rods for wire drawing, specifications of A. S. T. M. for, 954^{5}
hydrogen diffusion through cathodes of, 2446^{5}
hydrogen effect on, 3419^{5}
impact resistance of, 1210^{2}.
industry in 1925, 3674^{2}.
ionization of, 1915^{6}.
ionization potential of, 331^{7}.
isomorphism with Hg, 1963^{7}
in legumes, 616^{1}.
linings of, in vacuum vessels, etc., P 184^{6}
mat, compn. of, 3416^{4}.
mats, Fe removal from, 2808^{2}.
melting, P 36^{5}.
melting, furnace for, 888^{4}.
melts, cond. of, 2635^{7}.
microscopic structure of, 2640^{5}.
"migration" in carburizing, 2139^{2}
in milk, effect on vitamin potency, 1286^{1}
miscibility with Fe in fused state, 2812^{5}
mol. wt. of, effect of temp. on, 850^{8}
notched bar impact test of, effect of temp. on, 567^{3}.
oxidation at low temp., 2934^{2}
oxidation in water by electrolysis, 3262^{1}
oxide films on, production at ordinary temps., 1212^{1}.

Keweenawan deposits, 1372[3].
of Lake Huron north shore, 1970[3]
of Manitoba (Oiseau River map-area), 1970[4]
molybdenum-, treatment of, P 574[1]
of Mt. Stewart, Leadville, N. S. W., 886[6]
of Prince William Sound, 353[8].
sepn from Au and Ag ores, etc., app for, P 1383[1].
sulfide, Au recovery from, 2636[1].
of Tennessee (Ducktown dist), 3411[5,6].
at Tsumeb, S. W. Africa, 1777[7].
Copper oxides, Cu_2O, in copper, 3152[1].
Cu_2O, detn. in sugar titrations, 1774[5].
effect of, in absorption of C_2H_4 by meta-, ortho-, and pyrophosphoric acids, 1782[6].
reaction with PbO_2, 1766[8].
CuO, absorption in glasses, 3066[9].
auto-oxidation of glycerol or mannitol in amine or amino acid solns. of, 1017[7].
capillary condensation and adsorption of water vapor on, 3110[7].
as catalyst for borneol oxidation, 408[1].
as catalyst for oxidation of HCN, 3625[9].
as catalyst for prepn. of esters from BuOH, P 1813[6].
as catalyst for reduction of rubber, 3165[6].
catalytic action on union of CO and O, 2443[1].
catalytic oxidation of CO with mixts. of MnO_2 and, 3260[6].
electrochem. reduction of, 150[4].
electrodes, Becquerel effect on, 550[8].
electromotive behavior of, 1023[2].
reactions with solids, 3374[5].
reactions with WO_3 and MoO_3, 324[7].
reaction with arsenic acid, 2604[4].
reaction with ZnS, 324[9].
system: WO_3-, 3374[3].
weighing in air of powdered, reduction to vacuum in 2600[1].
Cu_2O_3, absorption of CO_2, CO and O by, and by its mixts. with MnO_2, 2443[7].
Copper phosphite, 2794[1].
Copper potassium selenate, dissoc. pressure of hydrated, 347[5].
Copper potassium thiosulfate, 1767[4].
Copper preparations. See *Elektrocuprol*.
Copper rubidium selenate, dissoc. pressure of hydrated, 347[5].
Copper salts, adsorption by normal and pathol. tissue, 1844[6].
as catalysts in decompn. of diazonium compds., 1053[9].
as catalysts in decompn. of Hg acetate, 2459[4].
complex, 1767[3].
cupric, reaction with iodides, 1766[4].
electrometric and phase rule study of, 1184[4].
isomeric forms of coordinative complex, 1961[6].
magnetic properties of, valence theories and, 2612[5].
reaction with P, 2796[7].
reducing solns. of, P 3214[8].
in tuberculosis treatment, 147[1].
Copper sodium sulfide, 886[1].
Copper sodium thiosulfate, 1767[3].
Copper sprays. See *Sprays*.
Copper sulfate. (See also *Water, purification of*.)
activity coeffs. calcd. from f.-p. data, 1347[9].
additive compds. with HCl, 2292[9].
adsorption by kaolin, 1158[5].
basic, 2294[9], 3101[5].
blood and symptomatic changes following intravenous injection of, 1855[7].
catalysis of oxidation of cysteine, leucine and fructose by, 3705[1].
as catalyst for reaction of *p*-bromobenzenesulfonic acid with KOH, 1018[7].
color of, effect of heat on, 3644[4].
compd. with HCl, 345[8].
$CuSO_4.H_2SO_4.6H_2O$, 1767[7].
effect on germination of barley and cress, 2182[4].
on growth of rye roots, 1647[3].
on yeast, 3308[1].
electrolysis of acid solns. of, 1350[2], 2447[3].
electromotive force (concn.) in, 327[9].
pigment formation by, 1663[3].
from pyrite, 3062[1].
reaction with basic oxides, 324[8].
standardization of $TiCl_3$ with, 1966[4].
system: $Al_2(SO_4)_3$-H_2O-, 719[2].
tropical ulcer treatment with neoarsphenamine and, 1274[6].
vomiting from, 2206[1].
Copper sulfides, reaction with heavy metal salts in presence of alc., 2797[1].
Cu_2S, ionic mobilities in solid, 697[8].
reactions with alk. earth oxides, 3405[1].
reaction with BaO, 720[4].
CuS, elec. cond. of mixt. with S, 2276[5].
electrochem. reduction of, 150[4].
precipitation of, hypothesis of, 1935[4].
reaction with BaO, 720[4].
reaction with SO_2, 2294[1].
Copper telluride, Cu_2Te, 882[1].

Copper thallium selenate, dissoc. pressure of hydrated, 347^{5}.
Copper thiocarbonate, properties of, 3402^{4}.
Copper thiocyanates, red, 1964^{4}.
Copper uranate, prepn. of, 3657^{3}.
Copper uranyl carbonate, 1962^{7}.
Copper uranyl phosphate, vapor tension of hydrates of, 1344^{8}.
Copper vanadate, 1185^{5}.
Copra, from Dominica, 80^{9}.
effect of tapping coconut palms for toddy on, of subsequent fruiting, 773^{5}.
meal, toxicity of, 1675^{7}.
Copra oil, consts. of, 2989^{5}.
Copratin, in feces after ingestion of cooked blood or *α* hematin, 3018^{4}.
formation from *α* hematin, 56^{8}
occurrence and identification of, 3708^{1}.
occurrence of, 1250^{8}.
Copratoporphyrin, 56^{9}.
in feces after ingestion of cooked blood or *α*-hematin, 3018^{4}
occurrence and identification of, 3708^{1}.
spectrochem. identification of, 1246^{1}.
Coproporphyrin, in blood, spleen and bile in porphyrinuria, $426^{7,8}$
in feces, 2878^{6}.
formation from uroporphyrin, 57^{6}.
hemin and, 608^{6}.
spectrochem. identification of, 1245^{8}.
synthesis by yeast, 769^{9}, 1118^{5}, 3179^{4}, 3700^{8}
in urine, bile and feces, $3018^{1,4}$.
Coprosterol, constitution of, 2167^{1}.
"Coralin," 2178^{4}.
Corallin, fluorescence of, ultra-violet light effect on, 1562^{7}.
Corallina, metabolism of, 3482^{2}.
Coral polyp. See *Astrangia danae*.
Corchorus capsularis and **olitorius** See *Jute*.
Cord, impregnation with phenolic condensation product, P 268^{2}.
"sol. oils" for treating, P 2067^{5}.
waterproofing, P 3241^{1}.
Cordials, benzoic acid in, estn of, 95^{2}.
Cordin, effect on anaerobic respiration of yeast, 929^{9}.
Cordite, explosion of, 3237^{3}.
stability of, 1524^{7}.
stability of mixts of, as additive property, 1523^{7}.
testing, 667^{2}.
Coreductase, of yeast, isolation of, 3175^{3}.
Cores. See *Molds (1)*.
Coriander, fertilizers for, 3535^{9}.
Coriandrol. See *Linalool*.
Coriandrum sativum, oil content of, effect of row spacing on, 3772^{4}.
oil in, 3772^{4}.
Cork, artificial, manuf. of, 265^{6}.
for billiard-cue tips, P 485^{1}.
board, P 3544^{9}.
compn., P 1697^{3}.
compn. with rubber for shoe soles, etc., P 3247^{7}.
as flooring material, endurance of, 1701^{6}.
Corn (*maize*). (See also *Grains; Silage*.)
ammonia fertilizers for, 2890^{6}.
artificial manure from stalks of, 1683^{1}.
ashing, 3318^{9}.
ashing smut spores of, 3318^{9}.
Bacillus botulinus in, 1287^{1}.
canning of, H-ion concn. changes during, 2710^{6}.
carbohydrate metabolism in, 1648^{8}.
catalase activity during germination, 2520^{4}.
compn. and maturity of, 2185^{1}.
compn. of kernel, effect of irrigation water and manure on, 1488^{2}.
diet of, effect on N, creatinine and creatine excretion and on wt. curve, 933^{5}.
diet of, loss of wt. from, 63^{9}.
endosperm in *Zea mays*, depletion of, $1427^{8,9}$.
energy accumulation by, 2186^{1}.
fertilization with potash, 642^{6}.
fertilizer expts. on, 962^{3}.
fertilizing, 3324^{8}.
fertilizing, effect of method on yield, 1488^{7}.
freezing of, prevention with fertilizers, 1682^{6}.
for growing animals, effect of NaCl on rations of, 2005^{5}.
growth and compn. of, effect of varying moisture supply on, 2352^{4}.
hydrogen formation by action of microorganisms on, 1616^{5}.
iron assimilation by, 3309^{5}.
nitrogen metabolism in etiolated seedlings of, 2184^{7}.
pellagra production by, 1655^{6}.
protein content of, variation of, 62^{6}.
protein detn. in, 2029^{5}.
protein value of layers of, 2524^{9}.
resistance to NaCl, age of seedlings as factor in, 1429^{8}.
as silage crop in Central Alberto, 1475^{4}.
stalks, concn. gradient in, 2352^{1}.
starch—see *Starch*.
vitamin B in kernel of, 933^{4}.
vitamins in, 3312^{5}.
wall board, etc., from waterproofing substances and stalks of, app. for making, P 3552^{6}.
waste from cannery, 3765^{3}.
waste, treatment of, 3525^{8}, 3765^{6}.
wood substitute from, P 1508^{3}.
Corncobs, bituminous expansion joints (for concrete, etc.) contg. fiber from, P 1311^{1}.
creosote from distn. of, P 1307^{1}.
feeding stuff from, P 953^{9}.
2 furaldehyde from, 192^{9}.
oxalic acid from, 2312^{1}.
sweet-, utilization of, 836^{9}.
Corn cockle. See *Agrostemma githago*
Cornea See *Eyes*.
Cornein, occurrence and detection of, 1419^{8}.
Cornflakes, toasted, 3754^{2}.
Corn meal, adulteration of wheat flour with, detection of, 1252^{3}.
Corn oil, consts. of, 2989^{5}.
effect on fertility and lactation, 3025^{9}.
in soap stocks, 119^{4}.
stain removal from wool and silk, 2251^{2}.
Corn starch. See *Starch*.
Corn sugar. See *d-Glucose*.
"Cornuit," 2106^{2}.
Cornus florida. See *Dogwood*.
Corona, carbon-monoxide decompn. in, due to alternating elec. fields, 861^{3}.
discharge, equil. of CO_2 with CO and O in, 700^{2}.
discharge, ion mobility in, 2946^{9}.
effects on rubber, measuring, 678^{2}.
of sun—see *Sun*.
Corpuscles. See *Blood corpuscles; Blood corpuscles, red; Electrons; Leucocytes*.
Corpus luteum, acetone-sol. fat of, 1100^{1}.
amino acids in acetone ext. of, 1496^{6}.

effect on sympathetic system, 779[9].
hormone of, effect on nitrogen and gaseous metabolism, 65[5,6].
lipoids of, 65[3], 1262[4], 2009[4].
as source of follicular hormone, 1656[7].
Corpus luteum extracts, effect on coagulation time of blood, 3498[3].
Correspondence principle, 3128[9].
in Compton effect, 2613[3].
doublet spectra and, 1555[8].
quant. statement of, 1555[9].
in relative intensities in series spectra, 2618[8]
testing, by prediction of abs. intensities of spectrum, 1755[9], 2613[3].
Corresponding states, law of, and the behavior of H, 133[2].
law of, behavior of N according to, 864[3]
behavior of O according to, 864[4].
internal latent heat of vaporization and mol. superficial energy in, 1168[1]
mol assocn and, 3603[1].
superficial phenomena and, 1737[9].
theory of, 1927[7]
Corrosion (See also *Coating(s); Concrete; Electrolysis; Paint; Tarnishing.*)
of aluminum and its alloys, 3680[4].
of aluminum and its alloys, protection by anodic oxidation, 3648[1].
of aluminum, prevention by coating with Cd, P 3154[5].
by NaCl, 3438[9].
by water, 2972[6]
of amalgams, 2649[9]
of ammunition for small arms, 1206[9]
anodic, in electrolysis of brine, 1956[4].
by anti-freeze compns., app for detn of, 3541[1].
of battery terminals, preventive for, P 340[6], P 341[1].
boiler, 1585[6], 2216[1], 2973[1,5], 3151[5 6 7 8 9].
prevention by deaeration of feed water, 638[5].
prevention of, 467[3], 3762[3].
in boilers, evaporators, etc, elec. current system for preventing, P 1877[7].
of boiler tubes, 1585[6].
of boiler tubes and sheets, 2886[2].
of boiler tubes and superheaters, effect of segregation on, 2649[1].
books: und Rostschutz, 734[7]; Causes and Prevention, 2306[8].
of brass condenser tubes, 355[1], 2973[1].
of brass, Zn loss in, 2973[4].
of cans by marine products, 3753[3]
carbon dioxide in, 573[3].
of chromium alloys, 3425[9].
compn. producing, P 36[6].
of condenser parts, electrodes for preventing, P 1181[9].
of copper and brass by S in C_6H_6, 1137[9].
of copper, prevention of, P 576[3].
of copper tubes by petroleum, 3439[1].
from cotton dyeing and finishing, 1325[9].
differential aeration effect on, 2648[7].
of duralumin, 3425[1].
of elec. batteries or other metal surfaces, compn. for preventing, P 3154[6].
from elec. currents, 2143[7].
by electrolytic water, 2446[9].
fatigue of metals, 3680[8].
fringes in metallography, 2648[9].
of gas barrels, 1137[4].
of gas holders, preventive for, 981[1].
of gas pipes, 1708[4], 2905[4].
by hydrochloric acid and the NH_4 halides, 347[1].
hydrogen-ion concn. of natural water and, 573[2].
of iron, 2647[8], 3150[8].
effect of a. cs. on, 3438[7].
electrochem. theory of, 1585[6], 2648[2].
passivity and, 3438[6].
prevention with Cd electrodeposition, 3395[2].
testing, 2814[2].
theory of, 995[6].
iron alloys resistant to, P 2145[6].
of iron and steel, 3151[3].
of iron and steel by salts in sea water, 3151[4].
of iron, brass and bronze by saline waters, 1584[6].
of iron, brass and bronze in waste liquors from potash manuf., 1211[9].
of iron castings, 3430[7]
of iron (cast) in H_2SO_4, 729[9].
of iron in presence of CO_2 and air, measuring rates of, 2648[4].
of iron pipes, 1381[1].
of iron pipes by water in economizers, 3363[7].
of lead, app. for, P 2145[2].
of lead cable sheaths, 2649[6].
liquid-line, 2927[7].
by magnesium and Ca salts, 1876[9].
mechanism of, 355[7].
metallic elements in relation to, of Fe and steel, 573[3].
of metals and alloys, 1202[1].
of metals and alloys by plastilin and free S, 2638[9].
of metals by acids within capillaries, 2648[5,8].
metals resistant to, working of, 3152[1].
of nickel-alloy singe rolls, 3680[4].
nitric acid action on metals, 3619[7].
in oil refining plants, 166[9].
in paper and pulp industry and wood grinders, 3680[9].
by phosphoric acid, 647[5].
in pipe lines carrying sugar condensates, 2916[4].
of pipe lines of iron, 467[5].
of pipes, 2477[6].
of pipes by salt brines, 3438[8].
porosity and, 2648[8].
prevention of, P 358[4], 895[9], P 1587[5], P 3683[6].
with coating of Na silicate, 896[3].
coatings for, 2035[4].
of ferrous metals, P 1214[3], P 1587[6], P 1781[6].
by lime treatment of water, 637[5].
with paint, 1144[2,3].
with paint pigments and varnish, 1722[9].
with phosphate, P 3154[5].
in steam digesters, P 358[3].
of steel, P 3442[6].
of stored machinery, 3439[2].
water treatment for, 1291[9].
principles of, 3150[8].
punctiform, origin of, 2649[3].
in red lead furnace, 2589[2].
-resisting materials for chem. plant construction, 2765[6].
in sea water, 3792[6].
in sodium chloride solns., 573[9].
of steel by acids, 3277[2].
of steel by acids, effect of cementation on, 3426[6].
of steel in atm., 2648[1].

by sulfur in petroleum refining, 2579^{2}.
of tanks contg. fused nitrate baths, 573^{6}.
tests, evaluation of, 1893^{1}.
theories of, 731^{5}, 3680^{7}.
of tin (ancient), 1381^{2}
of voltaic cell terminals, coating preventing, P 714^{6}.
of water conduits of pipes of 2 diff. metals, reducing, 2649^{2}.
of water pipes, 1124^{3}
of water pipes and boiler plates from water contg. NH_3, 1211^{8}
in water pipes, prevention of, 2888^{3}, 3439^{1}
of water pumps and piping, 166^{8}
in water systems, 2216^{6}
of water tubes, effect of "hot wall" in, 1211^{5}
wood impregnation and, 3439^{5}
of zinc, 731^{9}
of zinc, effect of Cd on, 3420^{9}.
Corrosive sublimate See *Mercury chlorides*.
Corrosive substances, container for liquid, P 341^{1}, P 2099^{3}.
heating, P 2215^{7}.
liquids, storage and transportation of, 2749^{1}
transportation of, accidents from, 1715^{3}
Corson alloys. See *Copper alloys*
Corundum, amorphous, non-existence of, 3254^{4}.
crystal structure of, 3408^{7}.
formed on bricks in glass-furnace regenerators, 3788^{1}.
Corybulbine, constitution of, 765^{2}.
Corycavamine, constitution of, 764^{8}
Corycavidine, constitution of, 764^{8}
Corydalis cava, alkaloids of, 765^{2}, 915^{9}, 3295^{5}
Corylus. See *Hazelnut*
Corypalmine, constitution of, 915^{9}
Cosalite, analyses of, 3409^{8}
Coscinium, structure of, 264^{5}
Cosmetics, P 265^{1}.
books: 647^{1}, 2048^{9}, 2215^{1}.
colloidal, 796^{9}.
creams, P 2228^{7}, P 2564^{5}
denaturants for, 2389^{8}
dyes in, 2226^{6}
German, 1130^{1}.
ingredients in, 2722^{7}.
manuf. of, chemist in, 2225^{7}
paste, P 1890^{6}.
Turkish, 2389^{8}
vanishing creams, perfumes for, 795^{9}
Cosmic chemistry, book: Conférences sur quelques problèmes actuels de la chimie physique et cosmique, 1171^{3}.
Cosmos bipinnatus, oil from seeds of, 302^{9}
Costs. See *Chemical industry*
Cotarnine, crystallographic consts of derivs of, 3597^{5}.
detection and detn. of, 2722^{2}
hydrochloride of, 969^{1}.
indicator for, 1493^{9}.
Cotarnomethine, methiodide, 1795^{7}.
Cotoin, spectrum of, 1030^{8}.
Cotton. (See also *Dyeing; Linters; Mercerization; Threads; Textiles; Yarn.*)
absorption of methylene blue from buffered solns by, 1909^{2}.
absorption of $NaNO_3$ by, 1681^{7}.
adsorption of dyes by, effect of NaCl on, 2928^{7}.
affinity for azo dyes, 1525^{7}.
amidation of, 3819^{9}.
analysis of, 669^{6}, 1326^{2}.
assay method for absorbent, 1303^{5}.
bleaching of, cold *vs*. boiling, 1720^{6}.
bleaching warps of, 506^{7}.
book: Solutions and Plasticizers for Lacquers, 464^{9}.
cellulose see *Cellulose*
chloride accumulation in leaf tissue fluids of Egyptian, 3308^{9}
chlorophyll in seedling, heritable deficiencies of, 932^{4}
classification by microscopy, 2077^{2}.
differentiation from linen, 2586^{4}.
dyeing of, of different growths in same bath, different shades in, 508^{1}.
fertilizers for, 2384^{6}, 2890^{5}.
fiber, nature of, 3087^{5}.
fiber testing, time factor in, 1527^{1}.
grading by measurement, 3575^{4}.
hydrogen peroxide effect on, dyed with halogen derivs of indigo, 1908^{7}
impurity removal from fibers, effect of naphthenesulfonic acids on, 990^{6}.
industry, sci method in, 826^{9}
leaf-tissue fluids of, concn. of soil soln. and physico-chem. properties of, 2714^{4}.
leaf-tissue fluids of Egyptian, 3179^{1}.
manuf of, 826^{9}, P 3578^{5}.
mercerized, test for, 2753^{1}, 3820^{1}.
methylation of, 3080^{7}.
moisture in, 293^{6}.
moisture relations of, 1326^{8}
nitration of—see *Nitrocellulose*.
oil treatment of, P 116^{3}, P 3824^{1}
oxidation effects on, before and after mercerization, 1326^{8}
oxycellulose in dyed, detection of, 293^{7}.
processing of, 114^{1}
rendering indifferent to substantive dyes, P 3579^{2}.
researches of Brit. Cotton Industry Research Assocn on, 826^{9}.
research on raw, 3239^{9}
root rot disease, effect of limestone nodules on, 1485^{5}.
"rustling" dressing for, 507^{7}.
scouring losses, 2752^{7}.
sepn in mixts. with silk, P 3089^{1}.
spinning of, oiling before, 827^{1}.
sulfate content of leaf tissue fluids of, 1429^{9}.
swelling and adsorption of, 284^{2}.
swelling of, by cuprammonium soln., 2251^{7}.
testing of, methods of A. S. T. M. for, 954^{9}.
treatment with oil, etc , app. for, P 297^{2}.
turgescence of, 1933^{5}.
wilt, 2348^{3}
wool effects on, 507^{8}.
yellowing of bleached, 3575^{4}.
Cottonizing. See *Textiles*.
Cotton seed, analysis of, 1914^{2}.
products from, 3355^{9}.
of Punjab, 1483^{6}
Cottonseed meal, gasoline ext. and NH_3 in, detns. of, 119^{2}.
gossypol and *d*-gossypol content of, 3050^{2}.
moisture detn in, 2211^{1}.
as protein source in milk production, 2373^{9}.
raffinose from, 171^{1}.
Cottonseed oil, alcs and esters in solns. of, detn. of, 1742^{8}.
antioxygens for, 2819^{9}.
bleaching of, 1914^{6}.
compn. of, effect of "blowing" on, 2758^{2}.
constituents of crude, 1724^{1}.
detection of, 2911^{8}.

detn. in seed, 1914[2].
effect on fertility and lactation, 3025[9].
emulsions of, effect of H-ion concn. on, 3256[6].
emulsions, resolving, P 956[1].
hydrogenation of, effect of rate of stirring on velocity of, 1937[2].
hydrogenation of, Pt as catalyst for, 2271[7].
industry, future trade as insurance in, 2084[2].
keeping quality of crude, 1915[1].
nutritive value and physiol. effect of, 776[4].
plant for Dixie Cotton Oil Co , 2911[8].
from Punjab, 1483[7].
review on, 3355[9].
stain removal from wool and silk, 2251[2].
Cotton yellow, modulus of shearing of sols of, 3607[3].
Cottrell process. See "elec." under *Precipitation*
Cotunnite, lead from Vesuvian, at. wt. of, 2613[9].
Cotyledons, of pumpkins, growth of etiolated and green, light effect on, 3177[4].
Coulomb's law See *Laws*.

elec. cond. in single, and in aggregates, 2436^{5}.
elec. cond. of hydrated, 2276^{1}.
elec. cond. of salts in single, and in cryst. aggregates, 3377^{9}.
elec. cond. on surface of rock salt, effect of electrostatic charge on, 1022^{9}.
in electrodeposited metals, orientations of, 131^{5}.
electron conduction in, 10^{5}, 333^{6}.
electron currents through, 332^{4}.
etch forms on, 132^{6}.
of fats, behavior on surface of water of, 133^{9}.
flow of, 132^{5}.
of fluorite, spectrum of, 2453^{8}.
forces between atoms and ions in, 861^{6}.
frictional electricity of, effect of using diff. faces, 2779^{3}.
fusion of, 2602^{8}.
of galena and pyrite, relation of shape to detecting power, 1155^{8}.
galena, synthesis of, 2768^{4}.
of germanium, 3404^{9}.
grating energy of, evaluation of, 1022^{7}.
growing of bigger, at expense of smaller, 855^{1}.
growth and soln. of, 1547^{9}, 1736^{4}.
growth of, 1156^{4}, 1927^{2}, 2602^{3}, 3598^{5}.
laws of, 2102^{6}.
in recrystd. cold-worked metals, 1581^{9}.
retardation of, 2266^{5}.
theory of, 1928^{5}.
variation of angles during, 2602^{4}.
habits, modifications of, 3107^{1}.
heat capacity of solid aliphatic, 2777^{4}.
hexagonal, in devitrified glass, 2899^{3}.
hygroscopic, condensation of water from air on, 2103^{9}.
of ice, light absorption by, 18^{9}.
interat. distances in, 3103^{6}.
of iron in steel, effect of stress on, 2137^{4}.
iron, magnetic properties of single, 1170^{8}.
iron, magnetostriction in, 865^{4}.
large, of metals, oxides or salts, P 803^{6}.
large, producing, 2602^{6}.
lattice dimensions of cubic metals of the Pt group, effect of the lanthanide contraction on, 131^{8}.
lattice energy of, of ammoniates, 692^{5}.
lattice energy of, relation to heat of sublimation and heat of soln. of gaseous ions, 3601^{2}.
lattice pores, 2266^{6}
lattice, relation between at. nos. and properties of ions in, 2265^{8}, 3127^{5}.
lattice spaces, influence on mol. mobility and solidity, 683^{5}
Lorentz factor and intensity distribution in Debye-Scherrer rings, 3596^{3}.
magnetism in, 146^{5}
metallic, interatomic forces and strength of metals, 3678^{6}.
plastic deformation of, 2601^{8}.
prepn. for hammering, rolling or drawing single, P 3683^{5}.
prepn. of single, 1542^{8}.
production and properties of single, 3419^{1}.
rearrangement of, 527^{4}.
thermal cond. and thermoelectromotive force of single, 326^{2}.
thermoelec. properties of, 2778^{6}.
of metals (non cubic), thermal cond. and thermal e. m f. of, 1939^{8}.
mica, departures from Bragg's law for, 706^{4}.
mica, refraction and dispersion of x-rays by reflection in, 1948^{9}.
mutual orientation of 2, 1736^{2}.
nitrogen, 3599^{4}.
optical anomalies of, fine structure and x-ray methods with regard to, 3130^{4}.
of org. compds., 15^{9}, 3597^{3,8}
orientation app. for x-ray photographs, 681^{2}.
paracryst. substances, 683^{6}.
paramorphic, differentiation of perfect and pseudo-, 1949^{2}.
photoelec. current from, effect of recombination on primary, 2947^{3}.
photoelec. effect in, 2785^{8}.
photoelec. primary cond. of, 1757^{2}.
plasticity of, 3254^{6}.
plasticity of single, 529^{3}.
in platinum plate, arrangement of, 131^{3}.
prepn. of, for microscopy, 3597^{1}.
primary and secondary tension of, 3598^{6}.
quasi limiting state of, 1736^{8}.
of rare earths, absorption spectra and their modification in magnetic field at temp. of liquid He, 707^{5}.
reactions in powd. mixts. of 2 kinds of, 324^{5}.
reflection of their own characteristic radiations, 1759^{1}.

of rock salt and calcite, variations of reticular distances on application of a force, 2435[6].
rock salt, bending in air and water, 3253[5].
of rock salt, photoelec. and optical measurements on blue and yellow, 1948[5]
rock salt, strength increase in, 3253[7].
Röntgen-ray absorption in, 3639[8]
Röntgen-ray diffraction by, model gratings to illustrate, 1558[5].
Röntgen-ray distribution at small angles, 2453[5].
Röntgen-ray polarization by reflection from, 1949[5].
Röntgen-ray reflection and refraction by, 706[1].
Röntgen-ray reflection by, 2453[6, 7], 3266[1].
Röntgen ray reflection by, effect of size on intensity of, 2786[9]
Röntgen-ray reflection from fluorite, 2925[9]
Röntgen-ray reflection from KBr, 116[6], 1758[8].
Röntgen-ray scattering by, 2280[3].
for Röntgen ray (soft) wave length measurements, 1029[8].
Röntgen-ray spectrography of, 2105[7]
Röntgen-ray spreading in, continuity theory of, 2281[5].
sepn. from evapd. solns , etc , app for, P 1340[7].
sodium chloride-type, distances in, 319[5]
in sugars, 2087[7].
surface tension of $BaSO_4$ and gypsum, 3598[7]

    treatment of, 2115^{1}.
  prepn. from Ca cyanamide and dicyanodiamide, 3334^{5}.
  reaction with Se, Te, As and S in liquid NH_3, 3373^{6}
  recovery from gases, P 3543^{6}.
  structure of, 1734^{5}, 2797^{2}
Cyanidin, chloride, catechol from, 382^{7}.
Cyanidine See *s-Triazine*.
Cyanine dyes See *Dyes*
Cyanite, elec resistivity at high temps., 2568^{5}.
  mullite formation from, 650^{3}, 2235^{2,3}.
Cyanogen, absorption by charcoal and by muscle pulp, 3190^{8}
  chem behavior in mixt. with Rn, 1031^{6}.
  detection in potash, 2298^{7}.
  fumigants, P 1496^{9}
  hydrogenation of, effect of gaseous ions on, 2459^{7}
  mols., law of force and size of, 2783^{1}
  oxidation of, effect of gaseous ions on, 2459^{7}.
  poisoning of stock by, 3769^{1}.
  polymerization of, catalysis of, 702^{4}.
    effect of gaseous ions on, 2459^{7,9}.
    ions of inert gases as catalysts for, 1760^{1}
  prepn of, 1964^{1}
  preservation in gaseous state, 1965^{1}
  spectrum of, 118^{7}, 337^{6}, 2617^{4}.
  structure of, 1734^{5}
  vapor pressures of solid and liquid, 133^{6}
Cyanogen bromide, elec cond. of liquid, 3620^{2}
  reaction of, and pyridine with pyrroles, 1621^{2}.
  reaction with methylphenyl pyrazolone derivs., 2857^{2}
  reaction with quinoline, 2680^{2}.
Cyanogen chloride, fumigant contg HCN and, P 2556^{9}
  manuf of, P 2565^{8}
  poisoning by, and its treatment, 2552^{4}
Cyanogen compounds, effect on flotability of pure sulfide minerals, 1376^{4}
Cyanogen halides, structure of, 1734^{5}.
Cyano group, effect on optical rotation of *l* menthyl acetate, 43^{4}
Cyanohydrins, reaction of ketonic, with organomagnesium compds., 3448^{9}.
  reaction with Grignard reagents, 409^{7}.
Cyanomethemoglobin, 2342^{7}
Cyanosis, blood in, H-ion concn. of, 2878^{1}.
Cyanuric acids, ammonium copper salts of, 1767^{5}.
Cyanuric chloride, aromatic derivs. of, P 510^{7}
Cyanuric halides, dye intermediates from, P 510^{4}
Cycas, *revoluta*, nitrification in, 2348^{2}.
Cyclic bases See *Bases*.
Cyclic compounds. (See also *Heterocyclic compounds*.)
  from halogenated open-chain derivs., 2830^{6}, 3284^{2}
  magnetochemistry of, 1170^{9}.
  poly-, and homocyclic unsatd. isomerides, 1390^{6}, 1784^{3}.
  poly-, hydrogenation of, 1791^{2}.
  poly-, structure in relation to their homocyclic unsatd. isomerides, 3286^{5}.
  prepn of, effect of substituents on, 1233^{1}.
  spectrum of, 2949^{2}.
  theory of unsatd., and the periodic law, 369^{6}.

ultra-violet absorption spectra of, effect of H-ion concn. on, 708[3].
valency problems in, 1550[7].
Cyclic ketones. See *Ketones*.
Cyclic structure. See *Ring*.
Cyclic sulfides. See *Sulfides*.
Cyclization. See *Ring*.
Cyclobutane, (bromomethyl)-, 390[4].
——, **1,3-dicinnamyl-2,4-diphenyl-**, photochemistry of, 180[5].
——, **diphenyl-**, so-called, 1400[8].
Cyclobutanecarboxylic acid, 3-amino-2,4-diphenyl-, and derivs., 1391[5], 1392[1].
——, **2,4-diphenyl-**, 1392[1].

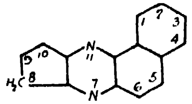
Cyclohexyl ether, supposed formation of, 744[5].
Cyclohexyl group, aliphatic acids contg., 3159[8].
effect on dissocn. of substituted bixanthyl, 392[4].
Cyclononanone, and semicarbazone, 2150[7,8], 2151[2].
Cyclooctadecanone, 1792[5].
consts of, 2151[6].
Cyclooctanecarboxamide, 2151[3].
Cyclooctanecarboxylic acid, 2151[3].
Cyclooctanemethylamine, 2151[1].
——, ***N*-benzoyl-**, 2151[1].
Cyclooctanone, 1792[6].
consts. of, 2151[6].
Cyclooctene, 1-methyl-, 2151[1].
Cyclooctenenitrile, 2151[1].

Cyclopentabenzoquinoxaline,

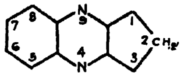


3-Cyclopentabenzoquinoxalinesulfonic acid, 9,10 - dihydro - 1 - hydroxy - 9 - keto-8,10-diphenyl-, 207^7
5-Cyclopentabenzoquinoxalinesulfonic acid, 9,10 - dihydro - 9 - keto - 8,10 - diphenyl-, 207^7
Cyclopentabenzoquinoxalinium compounds, 9,10 - dihydro - 9 - keto - 7,8,10 triphenyl— salts, 207^8
9(10)-Cyclopentabenzoquinoxalinone, 8,10-diphenyl-, 207^7
Cyclopentacyclobutene,

1-Cyclopentacyclobuteneacetic acid, 2-carboxy-2,2$_1$,3,4,5,5$_1$-hexahydro-, *cis* (?) and *trans*-(?), 381^{6,6}
Cyclopentadecane, 2151^6
Cyclopentadecanone, consts. of, 2151^6 and semicarbazone, 1792^5
Cyclopentadiene, polymerization of, 2118^{6,7} rubber, 2091^8
——, **5-bromopentaphenyl-,** 383^9
——, **5-chloropentaphenyl-,** 383^9
——, **5 - (*p*-dimethylaminophenylimino)-1,2,3,4-tetraphenyl-,** 383^8
——, **1,2,3,4,5-pentaphenyl-,** 384^1
1,3-Cyclopentadiene, 5-methylene- See *Fulvene*
$\Delta^{1,3}$-Cyclopentadiene, 5-phenyl-(?), 1392^9
$\Delta^{2,4}$ - Cyclopentadienol, 1-benzyl - 2,3,4,5-tetraphenyl-, 1407^8
——, **pentaphenyl-,** 383^9
Cyclopentadienone, tetraphenyl-, 383^8
$\Delta^{2,4}$ - Cyclopentadienone, 2,3,4,5 - tetraphenyl-, 1407^8
$\Delta^{2,4}$-Cyclopentadienyl, pentaphenyl-, 384^1.
Cyclopentadioxole,

Cyclopentadioxole-4-tridecoic acid, 4,5,6,6$_1$-tetrahydro-2,2-dimethyl-, α- and β-, and methyl esters, 2315^{1,1}.
Cyclopentane, from petroleum, 2742^7
phys consts. of, 171^2
reaction with $AlCl_3$, 899^1
——, **bromo-,** phys consts of, 1598^9
——, **(bromomethyl)-,** 3012^5
——, **1 - (bromomethyl) - 1,2,2,3 - tetramethyl-,** 1398^9.
——, **1,3-dimethyl-,** optically inactive, 2664^1
——, **ethyl-,** phys consts of, 171^2
——, **isobutyl-,** phys consts of, 171^3.
——, **isopropyl-,** phys. consts. of, 171^3.
——, **methyl-,** phys consts of, 171^2.
——, **phenyl-,** dehydrogenation of, 1393^1.
——, **propyl-,** phys consts of, 171^3.
Cyclopentanecarbinol, phys. consts. of, 1598^9.
——, **1,2,2,3-tetramethyl-,** and derivs., 1398^9, 1399^{6,7}.
Cyclopentanecarboxamide, 1-anilino-, 171^9.
——, **3-benzoyl-1,2,2-trimethyl-,** 2158^3.
——, **1-*N*-nitrosoanilino-,** 171^9.
——, **1-(*N*-nitroso-*p*-toluino)-,** 2831^3.
——, **1-*p*-toluino-,** 2831^3.
Cyclopentanecarboxylic acid, 1-*N*-acetylanilino)-, 172^1.
——, **1-anilino-,** 171^9.
cyclic lactone lactam with 1-hydroxycyclopentanecarboxylic acid, 172^1.
——, **3-cyano-1,2,2-trimethyl-,** methyl ester, reaction with PhMgBr, 2158^1.
——, **4-(β,γ-dicarboxypropyl)-3-keto-,** and derivs., 3446^4
——, **1-hydroxy-,** cyclic lactone lactam with 1-aminocyclopentanecarboxylic acid, 172^1.
——, **3-keto-,** derivs., 2823^8
——, **1-*N*-nitrosoanilino-,** 171^9.
——, **1-(*N*-nitroso-*p*-toluino)-,** 2831^3.
——, **1-*p*-toluino-,** 2831^3.
1,1-Cyclopentanediacetic acid, α-keto-, tautomerism of, 3155^1.
1,2-Cyclopentanedicarboxylic acid, 2,3-dibromo-, 2830^8
——, **1-hydroxy-,** and derivs., 2830^8
——, **3-keto-(?),** diethyl ester, 2823^8
1,3 - Cyclopentanedicarboxylic acid, 4-keto-(?), diethyl ester, 2823^8.
——, **1,2,2-trimethyl-** See *Camphoric acid*.
1,2 - Cyclopentanediol, 1,2,3,4,5 - pentaphenyl-, 384^1
1,2-Cyclopentanedione, 3-methyl-, hydrazones, 2484^8, 2485^1.
Cyclopentaneglyoxal, 1,2,2,3-tetramethyl-, derivs., 1399^1.
$\Delta^{1,\alpha}$-Cyclopentanemalonic acid, 2,3(or 2,4)-dicarboxy-(?), tetraethyl ester, 2823^9
Cyclopentanemethylamine, 1,2,2,3-tetramethyl-*N*-nitroso-*N*-phenyl-, 1399^1.
——, **α 1,2,2,3 - tetramethyl - *N* - phenyl-,** -HCl, 1399^1.
Cyclopentanenitrile, 1-anilino-, 171^9.
——, **3-benzoyl-1,2,2-trimethyl-,** 2158^1.
——, **1-(*N*-nitroso-*p*-toluino)-,** 2831^3.
——, **1-*p*-toluino-,** 2831^3.
——, **2,2,3-trimethyl-.** See *Camphoceanonitrile*.
——, **2,2,3-trimethyl-3-phenyl-,** 2158^1.
Cyclopentanepropanol, and carbanilate, 1598^9.
1,2,4-Cyclopentanetricarboxylic acid, 4-(α,β-dicarboxypropyl)-3-keto-, pentaethyl ester, 3146^6.
——, **4 - (β,γ - dicarboxypropyl) - 3 - keto-,** pentaethyl ester, 3446^4.
Cyclopentanetridecoic acid. See *Chaulmoogric acid, dihydro-*.
1,2,4-Cyclopentanetrione, 3,5-diphenyl-, dyes from, 207^6.
Cyclopentaneundecylic acid. See *Hydnocarpic acid, dihydro-*.
Cyclopentanol, phys. consts., 1598^9.
——, **2-methyl-,** *cis-* and *trans-*, and derivs., 1790^{8,9}
——, **phenyl-,** 1393^3.
Cyclopentanone, from adipic acid, 2151^5.
phys. consts. of, 1598^9.
prepn. of, 172^1.
——, **3,4-di-2-furyl-(?),** 413^2.
——, **2-hydroxy-3-methyl-,** and derivs., 2484^9, 2485^1.
——, **2-methoxy-3-methyl-,** semicarbazone, 2484^9.

Cyclopentaquinoxaline,



2-

2-Cyclopentaquinoxaline-1-sulfonic acid, 1,3 - dihydro -2- keto -1,3- diphenyl-, 207[7].
2-Cyclopentaquinoxalin-2-one, 8-bromo-1,2 - dihydro - 6 - methyl - 1,3 - diphenyl-, dye, 207[7].
——, **6-chloro-1,3-dihydro-7-methyl-1,3-diphenyl-,** 207[7].
——, **1,3-dihydro-1,3-diphenyl-,** dye, 207[6].
——, **1,2-dihydro-6-methyl-1,3-diphenyl-,** dye, 207[7].
Cyclopentene, depolarization of diffuse light by, 2113[1]
——, **3 - (guanidoimino) - 2 - methoxy - 1 - methyl-†,** nitrate, 2484[9].
Δ²-Cyclopenteneacetic acid, synthesis of, and Et ester, 3160[9], 3161[1].
Δ²-1,2-Cyclopentenedicarboxylic acid, 2830[8]
Δ²-Cyclopenteneëthanol, 3161[1].
Cyclopentenemalonic acid, 2,3(or **2,4**)-**dicarboxy-(?),** tetraethyl ester, 2823[8]
Δ²-Cyclopentenemalonic acid, and diethyl ester, 3160[9]
Δ²-Cyclopentenetridecoic acid See *Chaulmoogric acid.*
Δ²-Cyclopenteneundecylic acid. See *Hydnocarpic acid.*
Δ¹-Cyclopentenol, 5 - (guanidoimino) - 2 - methyl-†, derivs., 2484[9]
Cyclopentenolone. See *Cyclopentenone, hydroxy-*
Δ² Cyclopentenone, 2-bromo-3-hydroxy-4,4-dimethyl-, 3693[5].
——, **4,5-dianisal-2-hydroxy-3-methyl-,** 2484[8].
——, **4,5-dibenzal-2-hydroxy-3-methyl-,** 2484[8].
——, **2-hydroxy-3-methyl-,** and derivs, 2484[6,8,9]
——, **2-methoxy-3-methyl-,** and semicarbazone, 2484[9].
Cyclopoesis, by bacteria, 2515[9]
Cyclopropane, (β-bromoethyl)-, 3012[4].
Cyclopropaneacetonitrile, 3012[4].
1,1-Cyclopropanedicarboxylic acid, diethyl ester, hydrolysis of, 1056[2].
1,2-Cyclopropanedicarboxylic acid, 1-bromo-, dimethyl ester, 49[1].
——, **1-iodo-,** 48[9].
1,2,3-Cyclopropanetriamine, N^1, N^2, N^3-**trinitro-,** crystallography of, 3597[6].
Cyclopropene, prepn. of, 2988[9].
Cyclo-rubber. See *Rubber, synthetic.*
Cyclotelluropentane-3,5-dione. See *1,2-Telluropyran-3,5(4,6)-dione.*
——, **4-ethyl-*,** and 1,1-dichloride, 193[1].
Cyclotetradecanone, and semicarbazone, 1792[5].
Cyclotridecanone, and semicarbazone, 1792[5].
Cylinder oils See *Lubricants*
Cylinders. (See also *Containers; Measuring apparatus.*)
strength of hollow, effect of cold working on, 2139[6].
thermal stress in wall of a long hollow cylinder, periodic flow of heat and, 862[9].
Cymarin, 208[2].
effect on irritability of frog heart, 452[7].
——, **acetyl-,** 1812[4]
Cymene (*isopropyltoluene*), as by-product in sulfite pulp manuf , 288[6].
detn. in terpenes, 2721[4].
p-Cymene, derivs. of, as dyes, 293[2].
reaction with CON_6, 2500[5].
synthesis and phys consts. of, 1793[1,3].
——, **7-chloro-,** 2487[7].
——, **2-hydroxy-.** See *Carvacrol.*
——, **3-hydroxy-.** See *Thymol.*

7-p-Cymenealdehyde, 2488[7]
7-p-Cymenecarboxylic acid, and esters, 2488[3,4,5]
3-p-Cymenol. See *Thymol.*
Cynara scolymus See *Artichoke*
Cyperus, poisoning seed of, 2042[5].
Cypress, oil of several species of, 2717[9], 2718[1,3,5,9].
paper pulp from bald, 287[5].
Cypress pine. See *Callitris*
Cysteine, detection of, 2686[6].
optical rotation of, 3158[3]
oxidation of, effect of Et ester of HCN, propionitrile and valeronitrile on rate of, 3705[1]
oxidation reduction system· cystine-, 3446[1].
Cystine, in blood serum, spectrum of, 1090[5]
deposition in organs in nephritis, etc., 2014[2].
detection of, 2686[7]
detn of, 1094[8], 1370[8]
by feeding expts , 617[6]
in protein, 1252[6], 3306[2].
in urine, 2865[4]
effect on kidneys, 1431[7], 3508[7]
in hair, 937[5]
l-, configuration of, 2982[6]
l-, from human hair and from sheep's wool, 44[8]
nephrosis and nephritis through, 1104[6].
in nutrition, 2353[9].
oxidation-reduction system: cysteine-, 3446[1].
pharmacol action of, antagonism of cyanides to, 2708[3].
protein-like substances from asparagine and, 918[9].
reduction of, 3158[3]
soly of, effect of H-ion concn. on, 1820[7].
spectrum of, 2147[5].
sulfur, effect on growth of white mouse, 1835[3].
Cystine, N, N′-dibenzal-, barium salt, 1815[3].
——, **N, N′-dileucyl-,** dianhydride—see *2,5-Piperazinedione, 3,3′-dithiodimethylenebis-[6-isobutyl-.*
——, **N, N′-disalicylal-,** barium salt, 1815[3].
Cystine dianhydride, dialanyl-*, 1787[9].
Cystinuria, in children, 1109[2].
Cystitis, incrusted, with alk. urine, 68[2].
Cystosine, in plastin from *Plasmodium*, 3303[6].
Cysts, for hypotricha study, 2371[9].
in protozoa, 2683[9].
in spermatic duct of whales, content of, 1671[6]
Cytisine, dissocn. const. for, 2108[5].
effect on adrenaline secretion, 1862[4].
hypertension from, effect of yohimbine on, 1863[9].
Cytochrome, 58[1], 1632[9].
porphyratin from, 3174[2].
of tissues in malignant tumor cases, 3731[6].
turacin and hematin in relation to, 3702[6].

Cytology. See *Cells; Cells, animal, Cells, plant.*
Cytolysis. See *Cells; Cells, animal.*
Cytoplasm. See *Protoplasm.*
Cytosine, *B. coli* effect on, 1257^{3}.
effect on adrenaline secretion, 2703^{5}
picrate, crystal structure of, 206^{3}
——, **5-methyl-**, in tuberculinic acid, 206^{3}
Cytosylic acid*, brucine and strychnine salts, 767^{9}.

Dachiardite, 1372^{4}.
Dacite, from Rhobell Fawr dist., 1197^{4}.
Dacrydium elatum, oil of, 798^{2}.
Dactylis glomerata, effect of superphosphate and $NaNO_3$ on, 2383^{8}, 2384^{1}.
Dacus oleae, insecticides for, 613^{2,3}

Duodenum, bacteria in, pathol. development of, 2198¹.
bacteriology of, 1421⁹.
secretin of, hypoglucemic action of, 1656⁷.
ulcer of, Cl and H_2O metabolism in, 946⁷.
Durain, 1704⁹, 2239⁶.
compn. of, 1312⁶, 1703⁹.
decompn. of, 2573¹.
Duralumin. (See also *Kolchoog-alumin*.) 2972⁴.
age-hardening of, 2653⁷.
aging of, 2136⁷, 2141⁹.
for aircraft, 732².
compn. and treatment of, 3424⁹.
crystal structure of, 1735⁶.
elec. spot-welding of, 1212⁷.
endurance properties of, 31⁹, 2639⁷.
mech. properties as affected by heat treatment, 2641⁸.
notched-bar impact test of, effect of temp. on, 567³.
phys. properties of, effect of cold-working and annealing on, 732⁵.
structure of, 2972⁹.
tensile strength and hardness of, 3678³.
transformations in, effect of deformation on, 355⁵.
transformations under effects of deformations, 1209⁷.
Durene (*s-Tetramethylbenzene*).
prepn. of, 1984¹.
——, **chloro-**, oxidation of, P 1631⁴.
——, **diacetamid-o**, 1984³.
——, **dinitro-**, 1984³.
——, **hexahydro-**. See *Cyclohexane, 1,2,4,5-tetramethyl-*.
——, **nitro-**, oxidation of, P 1631⁴.
Duriron, corrosion of, in $(NH_4)_3PO_4$ manuf., 647⁵.
Durohydroquinol, and diacetate, 1984³.
Durometer, 2642³.
Duroquinone, prepn. of, and dibromide, 1984²˒³.
reaction with sodium malonic esters, 2320⁶˒⁷.
Durylaldehyde, 3,6-dimethoxy-, and oxime, 2320⁸.
Dust. (See also *Filters; Flue dust; Fungicides; Insecticides;* and "elec." under *Precipitation*.)
absorption of, 2712⁴.
in air, app. for measurement of, 3526³.
blast-furnace, recovery of, 2636⁵.
book: Staub-Explosionen, 667⁷.
calcium chloride for prevention of, specifications of A. S. T. M. for, 954⁶.
in cement mills, arresters and precipitators for, 2236⁷.
coal—see *Coal*.
collector, P 1341¹.
collectors for recovering ZnO, 565⁹.
counting in ceramic industry, 1134³.
detn. in air, 635⁴, 2217⁹, 2885².
detn. in air and industrial gases, 160².
explosibility of, 291³.
explosions of, 112³, 3349⁵.
explosions of, aerosols and, 3349⁵.
in lignite briquet manuf., 811⁸.
in mines, prevention by dusting with coal-measure shales, 2751⁴.
of sugar, 290⁶.
of sulfide, 2075¹.
in fuels, allaying, P 3228¹.
grain, as fuel for engines, 3796².
laying compn., P 1307⁵, P 2233⁷.
lignite, explosibility of, 667⁶.
in mines, sampling and treatment of, 290⁶.
oil-shale, explosibility of, 3571².
particles, catalytic activity of, 3374⁶.
particles, mechanism of charging, 1946¹.
particles, photophoresis of, 3132⁹.
removal from air, etc., scrubber for, P 848³.
removal from air, metal filter for, 1923⁶.
removal from $CaCN_2$, P 3542⁶.
respirators, 2378⁷.

rock, in preventing coal-dust explosions, 3238^{3}.
rock-dusting materials analysis of, 2074^{7} 2799^{2}.
sepn. from flue gases, etc , P 3800^{2}
suspensions of, methods for studying and estg., 726^{6}.
Dvi-manganese. See *Rhenium*.
Dyeing. (See also *Coloring*.) P 992^{9}.
acid dyes on cotton, 3817^{1}.
adsorption theory of, 293^{5}.
Aktivin in printing, 2251^{8}.
alkali for, prepn. from waste, 3816^{9}
alloys for use in, 2814^{1}.
aniline poisoning in, 3351^{3}.
aniline steam black, 3351^{7}.
of animal fibers, P 1328^{3}.
artificial silk, 113^{3,5}, P 296^{7}, 506^{9}, 507^{2}, 669^{9}, 1325^{6}, 1718^{9}, 1719^{1,3}, 1908^{3,5}, 2076^{5,6}, 2251^{4}, P 2252^{9}, 2586^{1}, 2752^{3}, 2908^{3}, 3087^{1}, 3239^{4}, 3817^{6}.
of artificial silk with acid and mordant dyes, 2908^{1,2}.
assistants for, 1325^{9}.
with developed colors, 3817^{6}.
with developed or azo colors, 3817^{5}
in hosiery, 2908^{6}.
in hosiery and in skeins, 294^{1}.
with ionamine dyes, 3817^{5}.
in mixt. with cotton, 2908^{3}.
with mordant dyes, 826^{6}.
by sapon., 3817^{7}.
swelling agents in, 3817^{6}.
theory of, 1719^{3}.
three-color effects in, 3087^{3}.
uneven, 1142^{8}.
with vat colors, P 826^{7}, 1525^{6}.
bone, P 3240^{8}.
books: Praktikum der, 828^{6}, Die Schwefelfarbstoffe, Ihre Herstellung und Verwendung, 991^{3}, The Bleaching and Chem. Technology of Textile Fibers, 1327^{8}, Wool Fabrics, 1527^{4}, Manuel de blanchiment-teinture, 2078^{5}, with Coal tar Dyestuffs, 2417^{1}, Manuel du teinturier, 2753^{8}, Hilfsapparate fur den Farber und Koloristen, 3088^{4}, Maschinen zum Bedrucken von Textilstoffen, Garndruck, Zeugdruck, Tapetendruck, 3088^{5}; Farberei und Zeugdruck, 3240^{4}, L'examen de chimie de l'élève teinturier, 3240^{4}.
bright colors on textiles, 1718^{8}.
calico printing, 1325^{6}.
catalytic reactions utilized in, 3816^{9}.
cellulose acetate, (*Patents*.) 823^{1}, 992^{9}, 993^{1}, 1722^{1}, 1910^{5}, 2079^{4}, 2253^{1,2}, 3578^{1}, 3822^{6,7}.

disazo, cotton, violet and blue, P 509^{1}.
disazo, red to blue, P 115^{3}.
disazo, with diphenylurea nucleus, yellow, P 115^{3}.
for dry colors, 1718^{3}.
effect of electrically charged, on agglutination and on formation of agglutinins, 627^{9}.
effect on arsenic penetration into central nervous system and spinal fluid, 2202^{7}.
on crystn. of $CaCO_3$, 685^{2}.
on growth of normal and neoplastic tissue, 2357^{6}.
on proteins in wool and silk, 3352^{4}.
elec. charge of, detn. of, 865^{1}.
electro-capillary analysis of, 1717^{6}.
emulsions of, P 3577^{3}.
fastness of, app. for testing, P 511^{2}.
constitution and, 3349^{9}.
on cotton and wool, 505^{8}.
to ironing, 3086^{4}.
to light, 1325^{3}.
to light, detn. of, 113^{7}, 668^{7,9}, 990^{8}.
to perspiration, detn. of, 668^{9}.
tests for, 293^{8}.
to washing, detn. of, 668^{8}.
fastness of cotton, to washing agents, 294^{6}.
filterability of, effect of reversing elec. charge on, 3181^{4}.
filterability of, effect on their excretion and behavior in animal body, 1817^{3}.
in fine subdivision, P 2252^{6}.
flavone, absorption spectra of, 1990^{8}.
fluorescence of, rate of decay of, 3268^{1}.
fluorescence of solns. of, polarization of, 7^{3}, 871^{7}, 1952^{6}.
fluorescent, effect on shock and anaphylaxis, 3506^{8}.
fungi, 406^{1,4}, 1225^{9}.
for furs, 1527^{1}.
fusion pot for alkalies in prepn. of, 1152^{2}.
germicidal action of, 3742^{4}.
in gingivitis therapy, 2205^{3}.
group names, classification and manufr.'s addresses, 3086^{2}.
hair, in Turkey, 2389^{6}.
from haloalkyl or haloalkylaryl carboxylic acid, P 3576^{4}.
halogenated anthraquinone, vat, cotton, yellow to red, P 3352^{9}.
halogenated indigoid, vat, P 3577^{4}.
Hansa Yellow G (MLB), constitution of, 1718^{1}.
houses, ventilation in, 1325^{8}.
hydrogen-ion concn. and, 827^{1}.
indanthrene, analysis of vat liquors, 3350^{4}.
indanthrene blue, 293^{1}.
indigo-blue, P 829^{2}.
indigo halogen derivs., effect of H_2O_2 on cotton dyed with, 1908^{7}.
indigoid, cotton, P 670^{3}.
indigoid, vat, cotton, brown to olive, P 1527^{5}.
indigoid, with a hydrogenated six-ring, nonexistence of, 200^{8}.
indophenol, sulfur, cotton, blue, P 510^{2}.
industry, forerunner of what? 3816^{6}.
industry in 1925, 990^{7}.
industry of synthetic, 668^{2}.
International Union of Chemists and Colorists, 11th Congress of, 3349^{7}.
iorfamine, on acetate silk, 3817^{6}.
isodibenzanthrone, P 3821^{1}.
for lake making, 1907^{9}.
for latex, 3099^{1}.
laundering and, 119^{6}.
for lipoids, 2000^{7}.
of malachite green series, P 2587^{7}.
manuf., coördination of lab. and purchasing dept. in, 1526^{9}.
manuf. of, 668^{2}.
manuf. of, review, 3349^{7}.
mauve, 825^{5}.
mercury, bacterial chemotherapy with, 1868^{9}.
metal-contg., P 3088^{8}.
mordant, 1325^{3}.
mordanting on Ag, intensification of photographic images by, 877^{3}.
mordant, silk, red, 292^{5}.

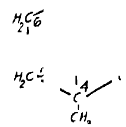
fluorescence of, ultra-violet light effect on, 1562[7].
spectrum of, 2953[9].
toxic action of light with, 243[6].
——, **iodo-**, as indicator in alkaloidal estns., 2563[3].
Ephedra, *vulgaris*, ephedrine content of, 3780[3].
Ephedrine [*α - (α - methylamino)benzyl alcohol*], 3779[9].
albuminuria by renal vasoconstriction from, 628[6].
asthma treatment with, 2701[9],
effect of repeated administration of, 1870[2].
effect on circulation, 3044[2,4].
on digestive secretions, 1870[4].
on shock and hemorrhage, 1111[9].
in *Ephedra vulgaris*, 3780[3].
pharmacology of, 1866[5].
synthesis of, 750[1].
toxicity of, 1869[9]
in treatment of vascular hypotension and bronchial asthma, 3041[3].
Ephedrine group, ethers of, 1604[8].
Epicamphor,



Epicamphor, 5-chloro-, and derivs., 2675[1].
5 - Epicamphorcarboxylic acid, and derivs., 2674[8,9]
Epicatechol, *dl*, synthesis of, 382[8].
——, **bromopentamethyl-***, *dl-*, 382[8].
——, **pentamethyl-***, *dl-*, *d-*, and *l-*, 382[8].
Epichlorohydrin. (For derivs. see under *Ethylene oxide*.)
prepn. of, 43[2].
"**Epidermol C**," in dyeing of hides, 1148[8].
Epidiorite, of Perthshire, 3414[2].
Epidote, analysis of, 1045[6], 3409[4].
from Jugoslavia, 3667[4].
from Monte Rosso di Verra, 563[5].
Epihydric alcohol. See *Glycidol*.
Epilepsy, alkalosis of, 3187[4].
attack from forced respiration, 235[1].
blood changes in, 2878[9].
blood in, NH_3 in, 1664[4].
calcium in body fluids in, 3182[8].
cerebrospinal fluid in, 1667[6], 3185[8].
pathogenesis of, 2537[2].
peptidase balance in, effect of hyperventilation on, 3186[5].
phenobarbital treatment of, 2209[3].
Epinephrine. See *Adrenaline*.
Epinine, effect on blood sugar, 457[8].
hyperglucemic action of, 457[8].
Epipactis palustris, loroglossin in, 1646[8].
Epithelium, cholesterol and phospholipic content of, 3030[2].
in immunization, role of, 239[3].
Epsomite, from Idria, 353[4].
structure of, 2301[7].
Epsom salt (s). See *Magnesium sulfate*.
Equation of state. See *Condition equation*.
Equations, chem., value of tests in writing, 3594[8].
kinetic chem., expression as time function, 3623[4].
Equilibrium, acid-base—see *Acids* or *Bases*.
in additive reactions, 3279[8].
binary soln., effect of substitutions on, 1224[5].
of binary systems, effect of pressure on, 1021[1], 1164[8].
books: Wissenschaftliche Forschungsberichte, 539[8]; Grundzüge der Kolloidphysik vom Standpunkte des Gleichgewichts, 1171[6].
of calcium chromosphere, 1025[9].
in capillary layer, 2109[7].
in colloid systems, 1158[7],

const. of ionization of atoms, 331^8.
consts. for reactions, calcn. of, 1745^9.
detn. in quasi-ideal solns. from thermal data, 3122^9.
diagrams for alloys with formation of a single compd., 33^3.
Donnan—see *Donnan equilibrium*.
of heterogeneous systems including electrolytes, 3628^3.
of liquid and its vapor, mol. distance and temp. of, 1345^7.
between matter and radiation, 8^3, 1754^7.
between metals and salts in fusion, 1937^7, 3261^3.
in non-isothermal systems, 2445^9.
phase, of sulfates, 1938^9.
in physicochem. systems, 1745^8, 2609^4.
pressure and, of binary systems, 3627^3.
pressure of, of fats on surface of water, 134^{1,3,4}.
principle of G. N. Lewis, 1749^7.
radiation, mass law and, 3633^4.
of solutions, effect of traces of water on, 1160^8.
in systems of 3 components, graphic methods of representing, 1020^9.
in systems of type $Al_2(SO_4)_3$–$M''SO_4$–H_2O, 692^4.
in systems with phases sepd. by semipermeable membrane, 137^2, 1020^9, 1550^4, 2109^7, 2444^1, 2935^8, 3120^9, 3374^6.
thermal chem., from kinetic and photochem. viewpoints, 2934^7.
between two liquid phases, 1348^8
Equisetum arvense, oxidation reduction potential in spores of, 2521^6
Erbium, spectrum of, 2791^6, 3641^9.
spectrum (Röntgen) of, 2943^9, 3266^1.
Erbium hydroxide, reaction with "aluminon," 2963^6.
Erbium salts, tuberculosis therapy with, 2879^7.
Erbium sulfate, magnetic susceptibility of, 2112^4.
Erdmann, Ernst, obituary, 317^6.
Erepsin, pancreatic, sp. action of, 212^1.
in plant proteases, 1633^3.
prepn. of, 1419^2
specificity of intestinal, 921^7.
of yeast, 3018^7.
Ereptase. See *Erepsin*.
Ergamine. See *Histamine*.
Ergosterol, anti-rachitic properties of irradiated, 3179^7.
Ergot, derivs. of, effect in peripheral vasomotor exhaustion, 2016^4.
effect on uterus, 1868^8, 2204^9.
ergotamine detn. in prepns. of, 3188^7.
evaluation of, 478^9, 2706^2, 2046^9, 3188^7.
ext., British Pharm. process for prepn. of, 969^1.
physiol. titration of prepns. of, 2560^7.
testing lab. for, 3777^3.
Ergotamine, detn. in ergot prepns., 3188^7.
effect on blood sugar normally and in splanchnectomy, 3509^3.
on intestine, 1468^9.
on intra-ocular pressure, 3038^9.
on muscle, 3047^4.
on muscular response to stimulation of sympathetic nerves, 2208^7.
affinity in, 213xidation, 3511^5.
amylolytic—see 38^9.
amylophosphate by sympathetic innervation 278^8.
-ergotoxin titer of ergot, detn. of, 3188^7.
Ergotinine, effect on uterus, 2022^4.
effect on vasomotor sympathetic innervation of kidney, 1278^8.
Ergotoxin, effect on isolated vein ring, 457^4.
effect on vasomotor sympathetic innervation of kidney, 1278^8.
-ergotamine titer of ergot, detn. of, 3188^7.
susceptibility to, effect of vitamin-deficient diet on, 2371^3.
Ergot substitutes, from basic phenol alkyl ethers, P 2392^8.
Eriostemon myoporoides, oil of, 2720^9.
Erucic acid, methyl ester, ozonization of, 1590^2.
rapeseed oil detection by isolation of, 1724^3.
reaction with BrI and with HOI, 1591^9.
stereoisomerism of, 2310^9.
thallium salt, 2818^2.
Eryngium campestre, misnaming of, 2391^3.
Erysimum crepidifolium, substances in, 2690^9.
Erysimupicron, 2690^9.
Erysipelas, with paralysis, peptidase content of blood serum in, 1265^5.
treatment with mercurochrome-220 sol., 1114^3.
Erythrene. See *Bivinyl*.
Erythritol, heat capacity, entropy and free energy of, 2444^9.
Röntgen-ray examn. of, 1542^1.
——, **di-*o*-nitrobenzylidene-***, photochemistry of, 749^4.
——, α-**methyl-†**, *dl*-, 3156^1.
Erythrocellulose, fermentation by yeast amylase, 3018^1.
Erythrocytes. See *Blood corpuscles, red*.
Erythrophores, coloring in minnows, production in female by treatment with infundin, 1472^6
Erythroporphyrin, 414^8.
Erythrosin, fluorescence of, ultra-violet light effect on, 1562^7.
life period of activated, detn. of, 1563^1.
Escales, Richard, obituary, 290^6.
Eschwegite, from Minas Geraes, Brazil, 3668^5.
Escigenin, 2332^4.
Escin, saponin of wild chestnut, 2332^4.
Esculetin, 4-methyl-, 184^8.
Esculin, fluorescence of, ultra-violet light effect on, 1562^7.
Eserine. See *Physostigmine*.—
Esophagus, muscles of, effect of cations on, 3744^6
Esparto, chlorine gas process for, 1518^7.
as paper-making material, 3083^2, 3806^8.
Essential oils. See *Oils*.
Ester gum, manuf. of, 117^4.
resin, P 2589^6.
in varnish manuf., 2254^6.
Esterification, of aliphatic acids in glycerol, 1051^7.
anticatalytic action of H_2O in, 536^3.
catalysis in, 463^9.
effect on disinfecting action of carbocyclic acid, 3060^9.
of glycerides, 303^5.
inter-, on heating of fatty acid glycerides with resin acids, 672^3.
mechanism of, 38^1, 3621^1.
of rosin, app. for, 832^4.
Esters (*Esters of inorganic acids have their own vocabulary headings; as* **Ethyl nitrite**. *Those of organic acids are indexed under*

the names of the acids with the following exceptions; (1) Ethyl acetate *has its own heading.* (2) *Acetates, benzoates and formates of complex radicals are indexed under the names of the corresponding alcohols or phenols.*
absorption by skin, 2370^{5}.
addn. compds. with alkali alcoholates, 737^{5}.
aliphatic, effect of feeding on thyroid, 1653^{2}.
amino acid, reaction of acyl derivs. with P_2S_5, 2679^{6}.
carbohydrate, of unsatd. aliphatic acids, P 2167^{4}
cleavage by liver lipase, kinetics of, 1418^{4}.
crystal structure of, 3597^{3}.
decompn. of, of sec alcs., 580^{1}.
detn. in aq. and in cottonseed oil solns, 1742^{8}.
detn. in oil of peppermint, 1688^{5}.
diazo, alicyclic, 3165^{6}.
glyceryl—see *Glycerides.*
hydrolysis of, P 3461^{3}.
by castor bean enzymes, 2339^{1}.
effect of emulsifiers on, 367^{1}
by enzymes, effect of temp. on, 1999^{6}
hydrolysis of asym, by lipase, 3175^{9}.
hydrolysis of sparingly sol., detn. of rate of, 3622^{1}.
imido, aryl, rearrangement of, 181^{6}.
infra-red absorption in, 3641^{6}.
β-ketonic, ethoxymethylene derivs. of, condensation with amidines, 206^{4}.
lactonic, prepn. of, 404^{5}
manuf. of, P 768^{9}, P 2167^{5}, P 2504^{8}.
of phosphoric acid, 1588^{8}, 2307^{9}.
poisoning by, 2712^{5}.
prepn. of, from thallium org. compds, 2310^{6}.
prepn. of mono-, of satd. aliphatic di-basic acids by azeotropic methods, 3689^{4}.
of procaine type, 3168^{7}.
reaction with *o*-aminophenyl mercaptan and with *o,o'*-dithiobisaniline, 600^{1}.
reduction of, 1593^{8}.
salt formation by, 3120^{2}.
sapon. of, of higher aliphatic β-keto acids, 2660^{5}.
spectrum (Röntgen) of, 15^{9}.
of sulfur acids, reactions with Grignard reagents, 3693^{9}.
of vinyl alc., polymerization of, P 2333^{6}.
Estragole, β-bromo-, 899^{5}.
"Estrin." See *Menformone.*
Estrus. (See also *Menformone.*)
by body fluids, 2193^{2}.
effect of thyroid feeding on, 2001^{5}.
effect on compn. of milk, 632^{4}.
hormone of, 1089^{7}.
hormone of, prepn. and properties of, 3016^{3}.
from menoform injections, 2530^{1}.
of white mice as test object for demonstration of ovarian hormone, 3020^{8}.
Etching, of alloys steels, reagents for, 2651^{5}.
of aluminum and its alloys, 1381^{5}, 2640^{2}.
of copper alloys with chromic acid reagent, 2639^{9}.
glass, P 99^{7}, 2899^{3}.
of glass, etc., P 484^{7}.
of iron-Cr alloys, with aqua regia in glycerol, 2639^{8}.
iron, Oberhoffer's reagent for, 2808^{8}.
medallion, P 1976^{4}.
in metallography, mode of action of reagents in, 2134^{9}.
of metals, protective additions in baths, 2970^{8}.
photo-, on glass, 24^{8}.
of quartz with HF, protective coating for, 538^{7}.
in refractory-material testing, 99^{2}.
of rubber, P 3590^{6}.
of silver, 892^{6}.
of steel, 1208^{1}.
of steels, reagent for, 2650^{6}.
on tungsten, 2102^{8}.
of Wollaston wires, 2098^{3}.
Ethane, action of radon radiation on, 3391^{2}.
cracking of, 280^{3}.
crystal lattice of 130^{9}.
crystal structure of, 526^{1}.
hexasubstituted, stability of, 190^{1}.
prepn. of, 3155^{5}.
spectrum of, 14^{8}
vapor pressure and sp. vols. of, 3109^{1}.
vapor pressure of, 3108^{9}.
——, **1 - asaryl - 1,1** (and **1,2**) **- diphenyl-**, 2849^{9}.
——, *s*-**bis** (*o*-**amidophenyl**)-*, 1230^{8}.
——, *s* - **bis**(*o* - **cyanophenyl**)-. See *α,α'-Bi-o-tolunitrile.*
——, **1,2 - bis(methylmercapto)-**, reaction with metallic halides, 326^{4}.
——, **bromo-**, absorption in the infra-red by, 709^{9}.
addn. compds. with quinoline, 3695^{7,8,9}, 3696^{1}.
narcotizing and toxic effects of, 455^{4}.
prepn. of, 39^{4}, 1795^{8}.
system: NH_3–O–N–, explosion space of, 2907^{6}.
——, **chloro-**, addn. compds. with quinoline, 3695^{7,8,9}, 3696^{1}.
depolarization of diffuse light by, 2113^{1}.
detn. in chloroform, 1775^{2}.
grain treated with, effect on domestic animals, 2550^{5}.
manuf. of, P 918^{2}.
in refrigeration, 789^{1}.
——, *s* - **dibromo-**, absorption in the infra-red by, 709^{9}.
heat of vaporization of, 1551^{3}.
reaction with $SiCl_4$, 2309^{6}.
systems: PhCl–, and CCl_4–, 1548^{3}.

Etherates, of magnesium halides, 3687[9].
Ethereal oils. See "essential" under *Oils*.
Ethereal sulfuric acids, splitting by sulfatase, 1089[6].
Ethers (*Organic compounds which are primarily ethers are, if simple, indexed under such names as* Ethyl ether, Phenyl ether; *if complex, under* Ether. *But common names such as* Anisole *and* Phenetole *are used, and ethers of very complex ring compounds may be treated as ethoxy, methoxy, etc., derivatives. Ethers of hydroxy compounds are always independently treated (not indexed under the hydroxy compound).*)
alkyl aryl, reaction with $TeCl_4$, 907[1], 2669[9].
benzyl, rearrangements of, 748[1].
chloro, prepn of, 3688[1]
halo, reactivity of, 3155[6]
from hydrated ketones, 362[7], 1232[4], 1798[4], 2157[1], 2673[5]
imido—see *Esters*
infra-red absorption in, 3641[6]
manuf of alkyl, of nitrophenols, P 1996[2]
manuf of, alum as a catalyst for, 2816[4].
prepn. and reactions of, effect of substituents on, 3694[2].
prepn. and reactions of mixed, effect of substituents on, 2319[6]
prepn. of, 361[7], 1985[4].
reaction with Al_2Se_3, Al_2Te_3, Al_2As_2 and Mg_3As_2, 3273[7]
sepn. of mono-, of diphenols, from monophenols, 3694[1].
Ethine. See *Acetylene*.
Ethoxy group, effect on optical rotation of *l*-menthyl acetate, 43[4].
orienting influence in aldehyde synthesis, 382[5].
orienting influence of, in aromatic substitution, 1607[9].
Ethyl acetate, absorption by decalin, tetralin and hydroterpinol, 788[6].
addn. compds. of, 1609[1,2], 1785[7].
azeotropic mixts. of, with EtOH and H_2O, 2657[9].
binary mixts. with MeOAc, C_6H_6, AmOAc and Et_2O, 3120[4].
effect on nitrogen excretion in normal and in partly thyroidectomized dogs and on growth, 1653[2].
effect on nitrogen excretion normally and with greatly reduced thyroid glands, 1849[9].
elec. cond. of, 1751[8].
heat of vaporization of, 1551[5]
hydrolysis of, effect of emulsifiers on, 367[6].
hydrolysis of, effect of gelatin and gum arabic on, 3370[2].
manuf. of, P 769[1].
reaction velocity with NH_3 and influence of neutral salts, 2608[9].
reaction with C_6H_6 and $AlCl_3$, 408[4].
sapon. of, secondary salt effect in, 325[3].
sapon. velocity of, relation to H-ion concn., 690[6].
soly. of, effect of salts, sugars and temp. on, 858[7],
system: decalin–, vapor pressure of, 2851[6].
system: $SnCl_4$–, magnetic susceptibility of, 2612[2].
vapor-pressure curve for mixts. with cyclohexanol, 1013[2].
vapor pressure depression on mixt. with phenol and cyclohexanol or tetrahydronaphthalene, 788[5].
vapor pressures of mixt. of EtI and, 139[1].
viscosities of mixts. with water and with MeOAc, 3116[4].
viscosity and vapor pressure of mixts. with CCl_4 and with EtI, 1012[9].
Ethyl alcohol. (See also *Fermentation; Spirits;* etc.: for derivatives, see *Ethanol*.)
abs , manuf of, 473[4], P 3461[4].
absorption and distribution in cold-blooded animals, 1864[7].
from acetaldehyde, 2623[1].
addn compds of, 1609[2]
adsorption by coconut charcoal from mixt. of C_6H_6 and, 530[9].
by decalin, tetralin and hydroterpinol, 788[6].
by kaolin, 1158[5].
adsorption of mixts. of vapor of benzene and, by coconut charcoal, 1545[5].
from agaves, 473[8], 3058[7].
in alc -water vapors, increasing, 3367[4].
alcoholysis of salts of weak bases with weak acids in, 3622[2].
analysis of, 2893[1].
anesthetic action of $MgSO_4$ with, 1868[4].
anomalous dispersion and absorption of elec. waves by, 2940[6]
atomic heat of, 2777[6].
auto-ignition of, 3341[6].
azeotropic mixts. of, with its acetate and H_2O, 2657[9]
from bagasse, 3831[5]
binary mixts. with MeOH, 3120[4].
boiling point (equil.) of, 653[8].
from brushwood and from waste cellulosic matter, 1684[4].
from cacao shell, 964[7].
from cacti, P 795[6].
as carbureting agent, 2224[3].
from cellulose of wood, 260[6].
from cellulosic materials, P 3771[9].
chronic intoxication, 3512[9].
from coal gas, 1706[5].
from coke-oven gas, 2243[2].
colloid swelling and dispersion in mixts. of ether and, 1159[8].
compds. of, 1786[2].
with $CaBr_2$ and LiBr, 1746[4].
with $CaCl_2$ and with $CaBr_2$, dissocn. pressures of, 1746[2].
cryoscopy in mixt. of C_6H_6 and, 535[6].
decompn. of, 1050[9], P 1243[2].
dehydration and dehydrogenation of, 2308[8].
dehydration of, 473[4,5], P 3771[9].
catalytic action of Th oxide in, 1018[8].
by purification in presence of C_6H_6, 686[4].
dehydration of glycogen sols by, effect of electrolytes on, 2106[8].
dehydrogenation by Cu, 2776[6].
denaturants, 2816[8].
denatured, P 1492[9], P 3208[3].
denatured, diethyl phthalate detn. in, 3779[7].
denaturing, app. for, P 1492[9].
density of mixts. with water, app. for detg., 846[3],

detection of, 1612[5].
detn. of, 1370[9], 2633[4], 2802[6].
app. for, 847[7].
in aqueous and cottonseed oil solns., 1742[9].
in blood, 1253[9], 1254[3], 2174[8], 2176[2].
in blood, urine, etc., 1254[3].
in chloroform, 1775[2].
in distd. spirits, 3059[4].
in drug products, 3209[7].
in exts. of lemons, oranges, peppermint, anise and nutmeg, 247[7,8].
in mixts. with acetone and H_2O, 1370[8].
in presence of Et_2O, 1577[5].
in tinctures, 3535[5].
in wines, 2557[7].
in wines and fermented liquors, 475[7].
dibasic acids in, chem. constitution and alc. sensitivity for, 2608[3].
dielec. const. of, 864[5].
diffusion coeffs. of AcOH and $PhNH_2$ in, 3116[6].
distn. app. for, P 2387[4], P 3593[2].
distn. of, P 2045[3].
drying small quantities of, 1929[3].
effect on acid-base balance of blood, 3314[9].
on blood vessels of brain, 3514[8]
on circulation, 3506[9]
on conduction in auricle, 2511[1].
on egg production in *Lecane inermis*, 3515[6]
on enzyme activating power of urine, 1265[2].
on growth, 3511[7].
on human efficiency, 7[7].
on hydrolysis of MeOAc, 3258[6].
on inhibition of muscle strength by cold, 2703[2].
on intestine, 3511[2].
on irritability of frog heart, 452[7].
on isolated vein ring, 457[6].
on muscles in relation to temp., 2018[2].
on nerves and skeletal muscles, 1865[9].
on respiration, 446[9].
on respiratory quotient during work, 450[8].
on seedling growth, 1649[6].
on testicles, 1277[9].
elec. cond. measurements in mixts. of MeOH and, 1553[7].
enemata of, effect on metabolism, 3313[2].
equil. with alkali and alk.-earth salts, 1746[3].
essential oil solns. in, pharmacol. action of, 451[2].
from ethylene and H_2O with Al_2O_3 as catalyst, 691[8].
ethyl phthalate detection in, 3533[4].
evaporative loss in alc.-water mixt., 2386[2].
excretion by organism of dogs accustomed to ingestion of alc., 1277[8].
excretion in urine as guide to alc. intoxication, 1850[6].
expansion coeff. and free space, 3595[7].
flames of, ultra-violet spectroscopy of, 2059[1].
formation of, in animal organism, 3746[2].
by plant cells in relation to concn. of O and CO_2, 1830[4].
from sucrose, valency problem in, 1550[7].
as fuel, 656[8], 1311[4], 1705[5], 1706[3], 1898[3], 3555[5,6].
fuel mixts. of Et_2O and, manuf. from waste molasses, 2558[6].
habituation to, 1271[6].
heat of fusion of, 3379[2].
heat of vaporization of, 1551[4].
heat of wetting of active charcoal with, 3630[2].
heats of soln. of HgI_2 and $HgBr_2$ in, 326[7].
history of, 1884[5].
ignition of mixt. of air and, 1706[3].
improving low-grade gasoline with, 3341[8].
impurities in, from wines and beverages, 2224[5].
industrial uses of, 3207[4].
intoxication, chem. test for, 3474[1].
ionization of LiCl and NaBr in abs., 3618[2].
ion mobility in air mixed with vapor of, 3383[9].
light-scattering coeff. of, 1024[8].
luminescence of, subjected to gamma radiation, 3381[3].
manuf. of, P 476[2], 899[7], P 1885[5], 2045[3], P 2387[3].
manuf. of, for use as fuel, 653[4].
manuf. of, with sugar-inverting bacteria, 3713[8]
metabolism of, rate of, 2194[3].
methanol detection in beverages contg., 1128[5].
mixt. with C_6H_6, molal vol. and molal refraction in, 683[1].
mixt with water and BuOH, 3[8].
mol assoc. of, in EtOH-Et_2O mixt., 139[1].
mol contraction of aq. solns. of, 3118[7].
from nipa palm, 836[5].
osmotic behavior of solns. in, effect of ionic charge on, 3619[7].
oxidation of, by H_2O_2, catalysis by ferric ions in, 3375[7].
by $K_2Cr_2O_7$, under influence of light, 1216[9]
in reversible systems, 2611[4].
oxidation-reduction potentials of AcOH +, and of EtOH + AcOH + MeCHO, 328[3].
from peanut hulls, 2230[6].
physiol. effect of, 223[9], 1274[2].
poisoning, 2021[5], 2712[5].
precipitation of metals in, 3619[6].
purification of, 2816[8].
reaction with Al_2O_3, 691[6].
with NH_3, catalysis by Al_2O_3 in, 538[4].
with fused caustic alkalies, 1588[2].
with *N*-methylcarbanilyl chloride, 1798[3].
with P_2S_5, 2816[6].
with Tl and with Na, 2111[2], 3123[2].
recovery from fermentation residues, P 3534[8].
recovery in bread baking, 2548[9], 2549[3].
removal from beverages, P 3534[8].
replacement of water in H_2SiO_3 hydrogels by, 2438[9].
from rice straw, 1492[7].
"salting in," 3116[7].
"satn. oils" for manuf. of, compn. of, 2045[6]
sepn from acetaldehyde and from acetone, 1050[8].
shrinkage in brandies, 1684[5].
sodium iodide soly. in, 1160[5].
soly. of K halides in mixts. of water and, 2772[9], 2773[1].
soly. of Ag oxide in mixts. of water and, 3616[3].
spectrum of, 1951[8].
from sugar beet molasses, 2593[3].
from sulfite liquor, P 666[6], P 823[2], 3808[6].
surface tension of, detn. of, 1008[6].

surface tension of, relation to viscosity, 2267[4].
swelling and dehydration of gels by, 1933[3].
system: C_6H_6–, phys. properties in vicinity of crit. temp. of miscibility, 1544[3].
system: C_6H_6–H_2O–, 1938[8].
system: α - chlorotetrahydronaphthalene–, vapor pressure of, 2935[7].
systems: decalin–, and decalin–PhOH–, vapor pressures of, 2851[8]
systems: 1 (and 2) naphthol–, dehydration of, 385[3].
system: Na_2SO_4–H_2SO_4–, 3627[6].
systems: PhOH–, o-cresol–, Ph_2O–, phys properties in vicinity of crit. temp. of miscibility, 1544[3]

with Cl_2, surface polarity and, 1744[8].
with H_2SO_4, P 3460[3,4].
reduction of $KMnO_4$ with, prepn. of colloidal MnO_2 by, 3111[9].
spectrum of, 14[8], 2455[7].
systems: H–O–, and H–air–, 1549[5].
Ethylene, *as* - anisylphenyl-*, oxidation of, by BzO_2H, 2674[6].
——, **biphenylenebis(*p* - ethoxyphenyl)-***, 365[3].
——, **biphenylenedianisyl-***, 365[2].
——, **bromo-**, derivs., reaction with Na, 359[8].
——, **bromochloro-**, mol. moment for, 1734[7].
spectrum of, 3388[2].
——, **2 - bromo - 4 - methoxyphenyl-***, 3164[9].
——, **chloro-**, photopolymerization of, 2815[6].
——, **chloroiodo-**, spectrum of, 3388[2].
stereoisomers of, 1394[1].
——, **1 - chloro - 2 - iodo-**, *cis-* and *trans-*, 1050[6].
reaction with bromine, 1787[3].
spectrum of, 545[3].
——, **chloro-*m*-xylyl-***, 1783[1].
——, **cresyltriiodo-***, 1783[7].

——, *as*-**dianisyl-***, oxidation of, by BzO_2H, 2674[7].
——, **dibromo-**, as germicide, 3307[5].
mol. moment for, 1734[7].
spectrum of, 3388[2].
——, **1,2 - dibromo - 1 - cyclohexyl - 2-iodo-**†, 1783[7].
——, **dichloro-**, absorption in the infra-red, 709[9].
extinction of CH_4 flames by, 3573[6].
mol. moment for, 1734[7].
narcotizing and toxic effects of, 455[4].
prepn. of, 2609[2].
as refrigerating agent, P 1876[3], P 2036[4].
spectrum of, 3388[2].
system: CH_4–air–, 1549[5].
——, *s*-**dichloro-**, *cis-* and *trans-*, reaction with Br, 2480[8].
spectrum of, 545[3].
——, **diiodo-**, mol. moment for, 1734[7].
spectrum of, 3388[2].
——, *as*-**diphenyl-**, 3451[8], 3292[7].
oxidation of, by BzO_2H, 2674[6].
——, *s*-**diphenyl-**. See *Stilbene*.
——, **nitrodibromo-***, so-called, of Merz and Zetter, 363[2].
phenyl-. See *Styrene*.
——, **1 - phenyl - 2 - naphthyl - 2 - chloro-***, 1401[9], 1402[1].
——, **tetrachloro-**, absorption in the infra-red by, 709[9].
as anthelmintic, 1274[9], 2019[8], 2702[8].
extinction of CH_4 flames by, 3573[6].
as germicide, 3307[5].
heat of vaporization of, 1551[4].
manuf. of, P 3015[7].
system: CH_4–air–, 1549[5].
——, **trichloro-**, absorption in the infra-red by, 709[9].
extinction of CH_4 flames by, 3573[6].
heat of vaporization of, 1551[4].
as paint remover, cleaning compn., etc., 674[8].
system: CH_4–air–, 1549[5].
——, **1,1,2 - trichloro-**, system: decalin–, vapor pressure of, 2851[8].
Ethylene bromide. See *Ethane, s-dibromo-*.
Ethylene bromohydrin. See *Ethanol, 2-bromo-*.
Ethylene chlorohydrin. See *Ethanol, 2-chloro-*.
Ethylene compounds, *cis-*, formation of, 2977[9].
iodine affinity for, 302[1].
oxidation of, cooling system for, 2979[7].
reaction with Br and with Cl in MeOH, 2997[1].
with bromonitroform and with *N*-bromoacetamide, 2979[3,4].
with mercury salts, 1986[7].
reduction of, 1593[8].
Ethylene cyanohydrin. See *Hydracrylonitrile*.
Ethylenediamine, copper compds. with, residual affinity and coördination of, 3400[9], 3401[4].
fluoaluminates and fluoferrates, 719[8].
hydrochloride, crystallography of, 1926[5].
mol. vol. of, 2923[8].
monogallatomolybdates of, 3406[1].
prepn. of, 2658[3].
tripyrocatecholatostannate, 3404[8].
——, *N* - **benzyl** - *N'* - **phenyl-**, and salts, 1623[9], 1624[1].
Ethylene glycol. See *Glycol*.
Ethylene nitrate, effect on blood pressure, 3043[7].
Ethylene oxide, $(CH_2.CH_2.O)$
α β
and Friedel-Crafts reaction, 587[5].
heat action on, 1592[5].
hydrogenation of, 2146[8].
——, *o*-**amyl-β-chloro-**, 1592[9].
——, **β - *p* - anisyl - α,α - dimethyl-**, rearrangement of, 2850[8].
——, **α - anisyl - β - phenyl-**, rearrangement of, 1610[7].
——, **α - *p* - anisyl - β - phenyl-**, rearrangement of, 2850[5].
——, **α - (2 - bromo - 5,6 - dimethoxy-3,4 - methylenedioxyphenyl) - β-phenyl-**, 3450[2].
——, **α - *tert* - butyl - α - hydroxy - β,β - dimethyl-**, rearrangement, 1593[4].
——, **α-chloro-β-hexyl-**, 1592[9].
——, **(chloromethyl)-**. See *Epichlorohydrin*.
——, **α - (chloromethyl) - β - ethinyl-**, 576[9].
——, **α,α-dibenzyl-β-phenyl-**, 1610[8].
rearrangement of, 2850[7].
——, **α - (2,3 - dimethoxy - 3,4 - methylenedioxyphenyl)-β-methyl-**, 3450[1].
——, **(5,6-dimethoxypiperonyl)-**, 3450[1].
——, **α,α - dimethyl-**, reaction with $PhNH_2$, 2834[3].
——, **α,α - dimethyl - β - phenyl-**, rearrangement of, 2850[6].
——, **α,β - dimethyl - α - propoxy-**, 2665[6].
——, **α,β - diphenyl-**, rearrangement of, 2850[4].
——, **α-ethoxy-α,β-dimethyl-**, 2665[6].
——, **α - ethoxy - α - methyl-**, and iodine-KI complex salt, 2665[6].
——, **α-ethyl-β-propyl-**, 1386[3].
——, **methyl-**. See *Propene oxide*.
——, **3-methylcyclohexyl-**, isomers, 904[1].
——, **α-methyl-α-propoxy-**, 2665[6].
——, **trimethyl-**, reaction with Me_2NH and with Et_2NH, 2820[6,7].
Ethylene oxide - α - carboxylic acid, β - hydroxy - α,β - diphenethyl-, lactone, 2157[1].
and lactone, 1798[6].
Ethylene oxide - α,β - dicarboxylic acid. See *Succinic acid, α,β-epoxy-*.
Ethylene sulfide, tetra-*p*-anisyl-, 364[9].
Ethylenic linkage. See *Double bonds*.
Ethyl ether, aldehyde detn. in, 1692[2].
for anesthesia, 478[6], P 479[8,9]
for anesthesia, changes in, 478[9].
anesthesia with, 3193[2].
alkalosis from, 3743[8].
blood cholesterol during, 3315[1].
dosage for, 1468[7].
effect on kidneys, 1115[3].
effect on urea-N concn. of blood, 1441[4].
hyperglucemia and glucosuria in, 3193[4].
hypoglucemia after, 2704[1].
as anesthetic, 1870[5].
anesthetic, effects of AcH, diethyl peroxide, ethyl mercaptan, ethyl sulfide, and of ketones on, 3747[8].
binary mixts. with C_6H_6 and $CHCl_3$, 3120[4].
colloid swelling and dispersion in mixts. of alc. and, 1159[8].
compds. of, 1785[7,8].

compd. with $CHCl_3$, 3122^{8}.
detn. in presence of EtOH, 1577^{5}.
dielec. const. of, 864^{6}.
distribution of a mixt. between H_2O and, 1745^{4}.
effect on blood serum, 623^{9}.
on catalase content and sugar metabolism of paramecia, 3316^{4}.
on cerebrum compn., 1861^{4}.
on elec. polarity of *Obelia* and frog skin, 3467^{4}.
on electrocardiogram, 1271^{2}.
on germination of potatoes, 2350^{9}.
on irritability of frog heart, 452^{7}, 453^{1}.
on isolated vein ring, 457^{5}
on muscular activity of gastrointestinal tract, 1869^{8}
on nerves and skeletal muscles, 1865^{9}.
on protoplasm, 428^{4}.
explosion of, and O during surgical operation, 824^{4}.
explosions of cooling baths of liquid air and, 1324^{9}.
halo derivs., reaction with Zn, 3155^{6}.
heat of fusion of, 3379^{2}
heat of vaporization of, 1551^{4}.
heat of wetting of active charcoal with, 3630^{2}.
ignition at low temps., 3238^{7}.
inflammability of vapor, 824^{5}.
internal combustion fuel mixt. contg. EtOH and, manuf. from waste molasses, 2558^{6}
isotherms and crit. consts. of, of mixts. with air and with borneol, detn. of, 2111^{5}.
light-scattering coeff. of, 1024^{7}.
luminescence of, subjected to gamma radiation, 3381^{3}
manuf. of, P 1243^{2}.
app. for, P 2333^{7}.
catalysis in, 463^{9}.
mixts. with C_6H_6 and with diethylamine, molal vol. and molal refraction in, 683^{2}.
narcosis and intoxication by, death from, 2702^{5}.
oxidation of, in presence of $UO_2(NO_3)_2$, 736^{9}.
poisoning by, 2712^{5}.
prepn. of, 39^{7}, 361^{9}.
purity tests for, 798^{1}.
review, 2975^{7}.
synergism of $MgSO_4$ and, 240^{9}
synergistic analgesia and anesthesia with, 1851^{4}.
system: $CHCl_3$–, refractometry of, 2612^{4}
system: decalin–, vapor pressure of, 2851^{8}.
system: HCl–, 2975^{7}.
vapor-pressure curves for mixts. with *o*-, *m*-, or *p*-cresols, 1013^{2}.
vapor-pressure curves for mixts. with tetrahydronaphthalene, 1013^{4}.
vapor pressures of mixt. of Me_2CO and, 139^{1}.
viscosity of, as function of d., 1929^{8}.
viscosity of mixts. with water, 3116^{4}.
in whooping cough, injection of, 1115^{1}.
Ethyl group, effect on hydrogenation of azines, 3282^{9}.
β-trichloro-α-hydroxy deriv., reduction of, 40^{9}.
Ethyl hydrogen peroxide, 798^{5}.
Ethyl hydrogen sulfate. See *Ethylsulfuric acid*.
Ethyl hypochlorite, decompn. of, 129^{9}.
Ethylidene diacetate. See "diacetate" under *1,1-Ethanediol*.
Ethyl iodide. See *Ethane, iodo-*.
Ethyl ketone. See *3-Pentanone*.
Ethyl mercaptan, effect on anesthetic ether, 3747^{8}.
formation from EtI in aq. H_2S soln. and its relation to the mechanism of pptn. of metals by H_2S, 2481^{8}.
prepn. of, according to Kekulé, 2816^{5}.
reaction with alkyl nitrites, 2976^{8}.
——, β-ethoxy-, 737^{4}.
Ethyl nitrite, reaction with mercaptans, 2976^{8}.
spirits of, testing of, 800^{1}.
Ethyl peroxide, effect on anesthetic ether, 3747^{8}.
reaction with Grignard reagents, 177^{8}.
Ethyl selenomercaptan, prepn. of, 1051^{4}.
Ethyl sulfate, manuf. of, P 1415^{6}, P 3460^{9}.
mol. vols. of cryst., 2923^{9}.
Ethyl sulfide, effect on anesthetic ether, 3747^{8}.
in petroleum distillates, action of NaOCl on, 278^{8}.
Ethylsulfuric acid, acid nature of, 694^{5}.
manuf. of, P 1415^{6}, P 3015^{7}.
prepn. of, 2656^{8}.
Etiohemin, synthesis of, 2863^{3}.
Etiolin, nature of, 3714^{9}.
Etiophyllin, synthesis of, 2863^{3}.
Etioporphyrin, active H detn. in, 1815^{8}.
synthesis of, 2863^{3}.
Ettinghausen effect, measurement of, 2612^{3}.
β-Eucaine, borate, in urethral anesthesia, 1850^{2}.
borate, pharmacol. action of, 1850^{1}.
diffusion into gelatin contg. lecithin, 427^{3}.
as local anesthetic, 1851^{1}.
Eucalyptol. See *Cineole*.
Eucalyptus, *calophylla*, tannin in kino of, 774^{9}.
cellulose from, 2907^{4}.
diversicolor, paper pulp manuf. from, 2747^{2}.
Eucalyptus oils. See *Oils*.
Eucazulene, and derivs., 1227^{2}.
Eucharis multicornis, photolysis of luminescent granules of, 2511^{5}.
Eucolloid, 1337^{7}.
Eucrite, 564^{1}.
Eucupine, disinfection with, effect of H-ion concn. on, 2688^{8}.
effect on dehydrogenases of muscles, 3466^{1}.
effect on local anesthesia, 3192^{3}.
meningitis treatment with, 3713^{4}.
Eudesmol, identity with uncineol, 2720^{4}.
Eugenol, deterioration of, 1301^{2}.
detn. in oils of cloves, of pimento and of Ceylon cinnamon, 261^{8}.
as fungicide, 3021^{6}.
isomerization of, 2671^{1}.
1-naphthalenecarbamate, 2319^{6}.
in oil of cloves, direct inversion of, 2719^{4}.
oxidation of, by BzO_2H, 2674^{7}.
as preservative, 3712^{8}.
viscosity of, under pressure, 133^{8}.
Euglena, *gracilis*, mitochondria in, 2541^{6}.
spectrum of, 2542^{9}.
Euglobulin, from ascitic fluid, effect on Ca diffusibility, 1244^{1}.
Eunuchs, urine of, 1833^{6}.
Euphorbia, *helioscopia*, seeds of, and oil therefrom, 2420^{8}.
resin from latex, 3354^{8}.
Euphrasia, analysis of, 1691^{8}.
Euphyllin, diuresis, effect on water balance, 1464^{5}.
diuretic action of, 1658^{7}.
Europium, spectrum of, 2791^{6}, 2949^{9}, 3389^{7}.

Europium sulfate, magnetic susceptibility of, 2112[4].

Eutectics, freezing points, lowering in binary mixts., 2609[5].
as glazes, 2234[8].

Evaporation. (See also *Distillation; Heat of vaporization; Sugar manufacture.*) P 1290[7].
basic principles of, 1288[7].
of blood sera, etc., app. for, 3468[5].

hydrogen-ion concn. of, quinhydrone electrode in detn. of, 1094^2.
lead detn. in, 1420^6.
lipoid of, 2360^3.
trypsin in, of infants, 949^2.
unusual elements in, 2508^3.
urobilin detn. in, 1452^3, 1825^{6,7}.
urobilin in, in cirrhosis, 2015^6.
urobilin in, of new born, 3028^5.
vitamin-B in, of rats on vitamin-deficient diet, 224^4.

Feeding. (See also *Diet; Feeding experiments; Feeding stuffs; Food; Nutrition.*)
book: Füttering der Haustiere, 1874^9.

Feeding devices. (See also *Charging apparatus; Cupolas; Furnace; Water, purification of;* and "producers" under *Gas, illuminating and fuel.*) 847^8.
for glass, P 3221^2.
for paper-making materials, P 2584^9.
for saccharin manuf., 1540^5.
for solids or semisolids, P 316^{5,6}.
for steam boilers, etc., P 1541^4.

Feeding experiments. (See also *Nutrition.*)
with barley and waste meal, 3200^4.
with bean meals for milk production, 2545^4.
calcium and P balances in, with dairy cattle, 1432^9
with calcium carbonate, effect on feces of chickens, 3027^6.
with calcium phosphate, 1475^2.
corn ration for growing animals, effect of NaCl on, 2005^5.
effect of coconut oil cake on Polenski value of butter, 2212^8.
effect on fat of hogs, 3026^8
fat formation in pig on ration low in fat, 617^9.
with fish meals, value of minerals in, 934^1.
with lambs using linseed, olive and cod-liver oils and Ca salts in the ration, 776^3.
for milk production, 2189^6, 3180^3, 3489^2.
milk substitutes for calves, 3752^9.
mineral nutrients in the rations of dairy cows, 775^8.
mineral requirements for pigs, 618^5.
mineral salts in, 2032^1.
net energy requirement in, 3520^3.
with pigs, 2353^6.
with pigs, lactose residues from whey in, 952^6.
with pinto bean straw, 2033^9.
for poultry, 2353^5.
poultry nutritive requirements, 775^5.
protein in milk production, 2373^9.
proteins in, 775^6.
protein substitutes in, 1096^3.
relation of feed consumed to protein and energy retention, 2356^6.
with silage, 952^8.
silage *vs* swedes for milk production, 2545^5.
steamed bone flour as mineral supplement for milk cows, 462^5.
for vitamin A increase in butter, 3025^5.
vitamin B requirement of the calf, 3719^7.
vitamins in, 3025^4.

Feeding stuffs. (See also *Alfalfa; Grasses; Hay; Oil cakes.*) P 248^{7,8}, P 2034^8.
acid detn. in fodder, 3200^5.
analyses of Arizona, 2212^9.
apple pomace detection in, 2033^7.
Bacillus pasteurianus -contg., P 3756^5.
from blood, 632^5.
from butyl alc. waste, P 2378^1.
cacao meal (defatted) as, for dairy cows, 2353^4.
cooking and extg., P 463^1.
cooking of, review on, 933^2.
from corncobs, P 953^9.
digestibility and energy values of, 2711^5.
energy value of, detn. of, 1093^9.
fermenting, app. for, P 2213^8.
from fish for increasing I in milk, P 3321^9.

fluorine cachexia from, $1675^{7,8}$.
from garbage, P 791^{8}.
hydrolyzed sawdust as, 2550^{7}.
insect-infested coconut meal as, 1475^{6}.
lactose as, for dairy cows, 952^{8}.
manuf. at Karlshamn, 3092^{8}.
manuf. of com., 1874^{6}.
minerals in, 3321^{4}.
molasses, moisture detn. in, 2211^{1}.
net energy of, $3520^{2,3}$.
oats for horses, 3755^{3}.
preservation of, P 80^{2}.
preservation of green fodder, P 80^{2}, P 3756^{5}.
protein detn. in, 2029^{5}.
protein-rich, quality of protein of, 2550^{2}.
rye bran as, 1475^{2}.
saltbushes as, 1120^{8}.
salt detection in, 2212^{9}.
seaweed as, 1487^{6}, 3519^{9}.
from sharks, 80^{6}.
shevri as, 1675^{8}.
from soy beans, P 787^{9}.
starch detn. in, 2212^{9}.
sugar beet tops, pulp and molasses as, $2593^{2,3}$.
vine shoots as, 2377^{3}.
from wastes, P 259^{8}.
weed seeds as, 3200^{4}.
Feldspars. (See also *Albite; Perthite; Plagioclases.*)
alkali silicate and aluminate from, P 482^{2}.
book: Ueber die Synthese der Feldspatvertreter, 802^{8}.
brown, from Portland, Conn., 3667^{8}.
carbon-dioxide action on, 1044^{2}.
crushing and sifting, losses in, 2968^{3}.
crystal habit of, 2301^{5}.
decompn. of, P 973^{2}.
detn. in ceramic products, $3546^{4,5}$.
detn. in crushed rocks, 3672^{8}.
firing, heat required for, 2234^{2}.
heat effect on, 1578^{3}.
industry in 1925, 3789^{1}.
industry in Sweden, 269^{8}.
optical properties and compn. of, 562^{8}.
orthoclase, in Hercynian Mts. around Tiefenstein, Germany, 3672^{8}.
from Pisek, 3667^{2}.
potassium and Na, mixing of, 1578^{2}.
quartz soly. in, in porcelain fire, effect of grain size on, 1504^{8}.
resources of U. S. in 1924, 972^{1}.
review of mining and trade information, 888^{2}.
from syenite at Plauen, 3667^{7}.
system: albite–anorthite–, 3408^{9}.
tests for softening point, fusion point, chem. analysis and fineness of, 806^{9}.
viscosity of, at softening temps. and effect of, on the burning range, porosity, color and strength of vitreous and semi-vitreous bodies, 806^{9}.
Felt, from animal fibers, P 3824^{2}.
coating, P 988^{9}.
disinfecting, P 3324^{3}.
for drier portion of paper and pasteboard machines, P 1523^{4}.
drying app. for paper, P 3569^{7}.
for floor coverings, P 1507^{9}.
fur prepn. for manuf. of, P 3578^{7}.
hair, P 1722^{7}.
hats, carroting of hair for, 3576^{2}.
impregnating with bituminous substances, P 2571^{1}.
manuf. of, P 3578^{7}.
moth-proof, P 297^{2}.
roofing—see *Roofing*.
rubberized, P 1722^{6}.
for shoe toes, P 1499^{9}, P 1500^{1}.
Felting, of wool, 827^{4}.
2 - Fenchanecarboxamide, 2 - hydroxy-, and isomer, 596^{4}.
2 - Fenchanenitrile, 2- hydroxy-, and isomer, 596^{4}.
———, **2 - nitrosohydroxamino-**, and silver deriv., 596^{4}.
α-Fenchene, *l*-, oxidation of, by BzO_2H, 2674^{7}.
α-Fenchocamphorane*, 2846^{7}
β-Fenchocamphorane*, 2846^{7}.
α-Fenchocamphorone, hydrazones, 2846^{7}.
β-Fenchocamphorone, hydrazones, 2846^{7}.
α - Fenchocamphoryl chloride*, 2846^{8}.
Fennel, culture in Germany, 3536^{3}.
tincture of, pharmacol. action of, 451^{3}.
Fennel oil, *3773^{9}.
Fenugreek, seeds and oil, 2376^{9}.
Fergusonite, in Australia, age of, 2969^{2}.
from Iyo, Shikoku, 3409^{6}
from Japan, Hagata, 563^{2}
Fermentability, of galactose, influence of cultivation of yeast on galactose on the, 769^{3}.
Fermentation. (*Alcoholic unless stated to be otherwise. See also* Yeast *and "manuf. of" under* Ethyl alcohol.) P 476^{1}.
acetaldehyde and acetylmethylcarbinol formation during, by yeast, 3307^{9}
acetic acid, 929^{7}, 2867^{7}, 3308^{6}.
acetoin formation in, of sugar by yeast, 3307^{8}.
acetone-BuOH, P 260^{9}, P 261^{1}, P 1493^{1}, P 2045^{9}.
carbohydrate metabolism of, 3711^{8}.
effect of lactic acid bacteria on, 2868^{1}.
acetone formation in, theory of, 3307^{6}.
acetone manuf. by, P 476^{2}, 1884^{6}, 2386^{3}.
acid production during, in presence of $CaCO_3$, 474^{1}.
acids formed by, significance for pathogenesis of digestive disturbances of infants, 233^{9}.
aldehydes from cacti by, P 795^{6}.
of amino acids, 213^{8}, 367^{9}.
ammoniacal, effect of Th X on, 2690^{2}.
by anaerobes, index of, 930^{8}.
arresting, 3058^{9}.
bacterial, 218^{3}.
bacterial, variation in end-products of, 2866^{3}.
of bagasse, 3831^{5}
in baking, effect of water on, 3320^{2}.
in baking industries, 3199^{2}.
of beers, development of free acidity during, 1492^{3}.
of beer worts in closed tanks, 2043^{5}.
of bladder carcinoma, lactic acid formation by, 3314^{6}.
books: Industrial, 1129^{7}; Chemie der Hefe und der alkoholischen Gärung, 2387^{2}; Die Herstellung von Gärungsessig, 2332^{9}.
"bubbly," 3208^{2}.
"buffer substances" in, 1491^{7}.
butyl alc. manuf. by, P 476^{1}.
butyl alc. manuf. by, compn. of yellow oil from, 473^{9}.
of cacao, 2558^{5}.
of cacao shell, 964^{6}, 2558^{4}.
of cellobiose by coli-aërogenes group, 3480^{4}.
of cellulose, 3059^{5}.
of cellulose by thermophilic bacteria, 2687^{5}.

of cellulose in soil, effect of available N on, 1482^7.
of cellulosic materials, P 3771^9.
chem. engineer in, 2557^1.
colloid effect on, 964^5, 3207^5.
cozymases of various, 212^8.
decompn. products of, effect on antiketogenic action of yeast, 936^2.
disinfection in top, 2558^3.
of divi-divi liquor, 3586^7.
of dough for bread making, 631^2, 1285^4.
effect of fatty acids and their salts on, by yeast, 2866^8.
effect of H_2S and HCN on, of sugar, 2170^5.
effect of urine constituents and alc.-free exts of organs on, of sugar by yeast, 1265^1.
effect on dispersion of proteins of barley, 1491^9.
on N of beet sugar molasses, 3207^6.
on vitamin C content of orange and tomato juice, 1259^6.
elec. current and, 1256^7.
enzymes, nomenclature of, 1820^1.
of feeding stuffs, app. for, P 2213^8.
fumaric acid formation by, of carbohydrate, pyruvic acid as intermediate stage in, 1418^7.
of galactose by *Saccharomyces cerevisiae*, 2179^6.
by yeast, 1634^4.
by yeast after previous treatment with this sugar, 929^6.
of glucose, 59^7.
buffer action in, 2169^4.
catalysis of, 3625^4.
chem. processes in, 2716^5.
by hydrogenase, 1815^8.
neo-glucose in, 2337^6.
by yeast, effect of piperazine and its derivs. on, 3311^5.
of glycerol lyes, 3356^7.
of glycogen by maltase-free yeast, 1418^5.
of grapes, MeOH in products of, 2717^2.
of hexosediphosphoric acid, glucose, fructose, sucrose and invert sugar, 1820^4.
historical documents on, 2043^4.
hydrocyanic acid effect on, 2558^3.
hydrogen formation by, 964^4
hydrogen-ion concn. and, 1819^5, 3302^7, 3480^6.
hydrogen production by, 964^4.
inhibition by respiration, 3710^8.
inhibition substance of, 57^5.
ions in, 2557^4.
of α-ketoglutaric acid by *Bacterium xylinum*, 2179^1.
lactic acid, 1256^8, 3479^1.
lactic acid and alc., 212^9.
lactic acid manuf. by, P 795^5.
of leaves of *Opuntia vulgaris*, 260^4.
of maltose by yeast rich in maltase, 1632^7.
manganese effect on, 3770^7.
mannitol from, of sucrose, 2913^8.
mechanism of, 90^2, 429^4, 1593^5.
by meningococci agglutination behavior and, 2003^4.
nitrogen of nutrients in aerated, assimilation by yeast, 2689^6.
of org. matter for fertilizer prepn., P 3532^8.
of org. waste, app. for, P 3250^8.
of oxalacetic acid, 920^8.
oxygen effect on, by yeast, 1817^7, 1884^4.
phosphoric acid effect on, 1684^8.
physiology of, 1257^1.
of pickles, 1129^8, 1475^1.
"pitching" in top, 2224^4.
of plants, 2518^4.
of polysaccharides, yeast amylase and, 3018^1.
pyruvic acid in, 3059^2.
residues, alc., org. acids and fertilizer from, P 3534^8.
sarcina in, 90^4.
theory of, 770^6.
"thyreoidins" and, 1271^5.
of tobacco, 476^9, 2350^2.
in urine in children, periodic fluctuations of, 1111^8.
velocity of glucose, mannose, and fructose, 2000^3.
vessels for, 1492^6.
waste from beet-molasses, electrolytic treatment of, P 675^9.
of wines, effect of temp. on purity of, 2043^6.
of wines in casks, effect of pure yeast, pressed yeast, $(NH_4)_2SO_4$ and SO_2 on, 2043^7.
work of Celso Ulpiani, 317^4.
of yeast, effect of adrenaline on, 1829^4.
effect of H_2S on, 2170^2.
insulin as catalyst for, 1088^4.
zymase and, 2169^1.
of zymohexose in yeast, 218^9.
Ferments. (See *Enzymes;* and the individual ferments.)
Ferns, filicin detn. in ether ext. of male, 1302^3.
oil in spores of *Aspidium filix mas*, 220^8.
spores of male, 220^7.
toxicology and use in liver rot of male, 450^6.
Ferrase, in fungi, 1650^1.
Ferrates, thermal decompn. of, 157^3.
Ferratin, reaction with ammonium sulfide, 3330^8.
Ferric, Ferrous, etc. See *Iron*, etc.
Ferric acid, 156^9.
Ferricyanic acid, detection of, 158^6.
Ferricyanide ion, reaction with I, 2775^3.
Ferricyanides, constitution of, 1186^7.
detn. of, 2470^8, 3661^7.
reaction with oxyhemoglobin, 453^9.
Ferriphosphites, alkali, 2793^8.
Ferripyrophosphates, alkali, 2793^8.
Ferrite, carbide soly. in, effect of Ni, Mn, Cr, P and Mo on, 3436^1.
deformation lines in large and small crystals of, 2638^2.
formation of, 32^5.
in steel, 2810^6.
Ferrites, thermomagnetic study of, 1939^9.
Ferrochrome, Ferrochromium. See either *Iron alloys* or *Chromium alloys*.
Ferrocyanic acid, as reagent for terpenes in tar oils, 2323^2.
Ferrocyanide ion, reaction with halogens, potentiometer indication of, 348^7.
Ferrocyanides, constitution of, 1186^7.
detn. of, 3661^7.
surfaces, photoelec. effect of, 3129^2.
Ferromagnetism. See *Magnetism*.
Ferromanganese. See either *Iron alloys* or *Manganese alloys*.
Ferronickel. See either *Iron alloys* or *Nickel alloys*.
Ferropyrophosphates, alkali, 2794^2.
Ferrosilicon. See either *Iron alloys* or *Silicon alloys*.

Ferrotungsten. See either *Iron alloys* or *Tungsten alloys.*
Ferrovanadium. See either *Iron alloys* or *Vanadium alloys.*
Fertility. (See also *Soils.*)
book: The Relations between, and Nutrition, 1098^{1}.
Fertilization. (See also *Fertilizers.*)
expts. with trout, 1872^{2}.
of frog eggs, effect of certain metals on, 3749^{6}.
heat production of eggs of *Arbacia punctulata* during, 630^{2}.
hydrogen-ion concn. of sea urchin eggs during, 1282^{9}.
Fertilizers. (See also *Ammonium nitrate; Ammonium sulfate; Calcium cyanamide; Calcium nitrate; Guano; Lime; Limestone; Nitrates; Nitrogen fixation; Phosphates; Slags; Sodium nitrate; Tetraphosphate.*) P 643^{5}, P 964^{2}, P 2042^{9}, P 2223^{9}, P 3532^{5,6,7}, P 3770^{5}.
absorption by Ceylon soils, 3768^{4}.
alkali metal chlorides as, 1297^{5}.
ammoniacal N detn. in, 1486^{2}, 2221^{1}.
ammonia detn. in, 3057^{5}.
ammonia, for cotton and corn, 2890^{5}.
analysis of, 2220^{9}.
analysis of, standard methods of India, 2384^{6}.
of animal origin, effect of gypsum on, 3206^{6}.
application of, effect of method on crop yields, 1298^{9}, 1488^{7}.
availability of org., 2221^{7}.
for barley, 1126^{9}.
for barley and oats, 1485^{6}.
for black mustard, 2715^{9}.
from blood, 632^{5}.
books: The Science of Soils and Manures, 473^{2}; A. B. C. der Pflanzenernährungs- und Düngerlehre, 1884^{1}; Chem., 1884^{1}; Plant Products and Chem., 2042^{8}; Die Fabrikation des Superphosphates mit Berücksichtigung der anderen gebräuchlichen Düngemittel nach dem Handbuch von Ludwig Schucht, 2716^{3}; Methoden zur Bestimmung der Zusammensetzung der Nahrungsmittel der Pflanzen, 3058^{5}.
boron-contg., 2222^{1}.
from butyl alc. waste, P 2378^{1}.
cacao by-products as, 3519^{4}.
cacao shells as, P 1299^{8}.
calcareous, for "baraggian" soils, 2222^{8}.
calcium carbonate as, 3531^{2}.
calcium chloride as, 3057^{9}.
from calcium cyanamide, P 643^{6}.
from calcium nitrate, P 1683^{8}.
calcium phosphates as, 3768^{6,7,8}.
carbon dioxide, 1681^{9}.
carbon dioxide as—see *Carbon dioxide.*
chemistry and, 3324^{4}.
for citrus trees, 3206^{7}.
"Clumina," 1682^{7}.
"colloidal phosphorite" as, 1486^{9}.
concd., 1485^{7}.
for coriander, anise, chamomile and paprika, 3535^{9}.
for corn production, 3324^{8}.
for cotton, 2384^{5}.
cyanamide, its derivs., and hexamethylenetetramine as, 1485^{8}.
decompn. under tropical conditions, 3768^{8}.
dicyanodiamide and dicyanodiamidine as, 1682^{8}.
from Drachenhöhle in Austria, 1486^{8}.
effect on ash content of plants, 1488^{6}.
on colloidal properties of vegetables, 2040^{6}.
on compn. of forage in natural meadows, 2222^{4}.
on disease resistance of crops, 471^{8}.
on disease susceptibility in potatoes, 471^{8}.
on freezing of corn, 1682^{6}.
on humus in soils, 85^{2}.
on hydrogen-ion concn. of juice of ice plant, 2384^{3}.
on infestation of *Vicia faba* with *Aphis rumicis*, 2543^{1}.
on mineral content of pastures, 2032^{4}.
expts. in Java and Madura, mostly with rice, 792^{1}.
expts., rept. of Moscow collective, 1487^{7}.
expts. with, 962^{2}.
expts. with N, potash and phosphate, on diff. crops, 1683^{2}.
fermentation of org. matter to prepare, P 3532^{8}.
from fermentation residues, P 3534^{8}.
fire hazards in manuf. of, 3206^{8}.
from fish, 1882^{4}.
in France, 1881^{5}, 2384^{4}.
for fruit plants, 3324^{9}.
from garbage, P 791^{2}.
grape seed waste as, 2420^{6}.
for grapes, soil analysis as basis for detg., 3530^{9}.
green manures as, 2041^{8}.
green manuring in India, 3769^{2}.
gypsum as, 642^{3}, 2041^{5,7}.
in Hawaii, 1127^{5}.
for hay, 1487^{9}.
for hill soil, secondary effects of, 86^{3}.
history of, 3205^{6}
for hops, 2558^{9}.
industry in 1921–1924, 470^{4}.
insecticide and, P 964^{3}.
iodides as sugar-beet, 963^{1}.
in Java, 960^{9}.
leaching from soils, 1486^{1}.
leather detection in, from solubilized animal waste, 2042^{1}.
from leucite, P 3532^{9}.
magnesium antimonate as, P 89^{7}.
manure, aerobic fermentation of, N loss during, 1879^{1}.
artificial, 1299^{3}, 1683^{1}, 3324^{7}.
of dairy cows, 88^{2}.
decompn. in soil and use by plants, 3206^{8}.
decompn. of, 3056^{6}.
effect of decompn. products of, on soly. of soil K_2O, 2218^{3}.
effect on compn. of corn kernel, 1488^{2}.
maturation of, 259^{1}.
manure (artificial), expts. on mangolds, 792^{3}.
mellon as, 3687^{8}.
molasses as, 1917^{5}.
from molasses lees and bagasse, P 2043^{1}.
from molasses residue, 3357^{3}.
nitric N detn. in, 2221^{4}.
nitrogen availability in, effect of P_2O_5 and K_2O on, 642^{1}.
nitrogen availability in garbage tankage and in urea in comparison with standard materials, 1299^{1}.
nitrogen detn. in, 3275^{2}.
nitrogen org. compds. as, 1881^{9}.

nitrogenous, 258^{9}, P 259^{8}, 2221^{8}.
  effect on tobacco, 962^{6}.
  for flax, 792^{2}, 2383^{4}.
  for grapes, 3530^{9}
  manuf. of, 3062^{5}.
  nitrogen availability studies on crops harvested at diff. stages of growth, 2040^{2}.
  for poppy oil development, 2554^{5}.
  for potatoes, 3531^{1}.
  from rabbit-foot oil, 2912^{7}.
  rain water as, 1488^{2}.
  toxicity of, 3057^{5}
  urea-contg., and derived from cyanamide, 1882^{5}.
oil cake from *Johannesia princeps* as, 2083^{6}.
for opium, 2725^{6}.
opium poppy, expts., 797^{2}.
for oranges, 2384^{6}.
from ore leaches, P 973^{8}.
oxalic acid in testing, 2223^{2}.
for peach trees, 1882^{7}.
peat as, 1487^{6}.
from peat or sewage sludge, P 2042^{9}.
for peat soils, 1878^{5}.
"phosphate earth" deposits in Austria, 1486^{7}.
phosphatic, P 964^{2}, P 1683^{9}, P 3207^{2,8}.
phosphorites as, 1487^{2}.
physiol. reaction of certain salts, 791^{7}.
plant of Sulphide Corp., Ltd., 3530^{8}
potash as, 642^{5}.
potash, effect on muck soils, 1682^{9}.
  of high concn., 470^{8}.
  for potatoes and rye, 1683^{1}.
  soly. of, 793^{2}.
from potassiferous silicates, P 3785^{2}.
potassium Al nitrate as, P 1299^{8}.
potassium detn. in, 2221^{5,6}.
potassium sulfate *vs* KCl as, 3205^{9}.
for potatoes, 88^{1}, 1681^{9}, 3057^{7}.
production of, 791^{6}
radioactive, 961^{9}.
rape, expts., 792^{8}.
requirements of soils, detn. of, 1680^{5,6}, 3529^{5}.
residual effects of 40 years' continuous treatments with, 1298^{4}, 3324^{4}.
review for 1925, 955^{8}.
for rice, 3057^{9}.
for rubber, 1487^{7}.
for rubber gardens in Java, 3839^{7}.
for rutabagas, 2384^{6}.
seaweed as, 1487^{6}.
sericite as potash, 3205^{9}.
sewage as, 1877^{4}.
sewage as, in India, 86^{5}.
sewage irrigation, 1877^{4}.
from sewage sludge, 83^{4}, 255^{3}, 2223^{3}.
sewage sludge as, 958^{7}, 2218^{4}, 3763^{3}, 3764^{3}.
sewage H_2O, as in Punjab, 1483^{8}.
from sharks, 80^{6}.
sheep manure, drying, 2384^{8}.
sodium chloride in sylvinite as, 3206^{2}.
soil acidity and, 3767^{2}.
solid soln. of $NaNO_3$ and $CaCO_3$ as, P 2566^{3}.
for sugar beets, 2891^{5}, 3531^{8}.
for sugar beets, Chile salt peter and other nitrogenous fertilizers as, 1298^{2}.
sugar beet tops as, 2593^{3}.
for sugar cane, 835^{4,5}, 1919^{8}.
for sugar cane, S as, 3358^{7}.
sulfur and gypsum as, for legumes, 87^{6}.
sulfur as, 1881^{2}, 2222^{9}.
sulfur as, for alfalfa, 87^{4,5}.
sulfur, effect on microflora of soil, 2383^{5}.
  effect on sulfate production and use in humid and arid soils, 2039^{8}.
  oxidation in soils, effect of fineness of grinding on rate of, 3327^{9}.
sulfuric acid industry and, 3057^{4}.
sulfur in, 3556^{8}.
Sulfurophosphate as, 3206^{5}.
"Surophosphat" or "Dasagdünger" as, 1486^{9}.
for sweet potatoes, 2222^{7}.
for tea, 1486^{1}.
ternary mixts., geometrical calcn. of, 3205^{7}.
for tobacco, 968^{1}, 1127^{7}.
tobacco, expts., 792^{7}.
trade developments, 1299^{4}.
turf-compost as, 1487^{3}.
for turnips, 1127^{6}.
from urea, P 2224^{1}.
urea as, 962^{1}.
ureic, from cyanamide, manuf. and analysis of, 258^{3}.
urine as, superiority of human, 2182^{4}.
use of, 2554^{4}.
waste as, 1486^{4}.
from waste in manuf. of paper and pulp from beech wood, 503^{3}.
waste liquor from retting with urea as, 1143^{2}.
from waste liquor of cellulose industry, P 89^{7}.
world production and consumption in 1923 and 1924, 2715^{6}.
Ferula sumbul. See *Sumbul.*
Fetus. See *Embryo.*
Fever. (See also *Malaria; Typhoid fever.*)
  amino N of blood in, 3500^{3}.
  blackwater—see *Blackwater fever.*
  blood and plasma changes during, 3037^{9}.
  blood changes after, 1264^{8}.
  blood in, diazo compd. of, 2012^{6}.
  blood serum Ca in, 237^{2}.
  diuresis in, 1450^{6}.
  inanition, in newborn, 65^{6}.
  peptidase balance in, 2363^{9}.

cellulose acetate compn. for, P 111[4]
of cellulose acetate, plasticizing and fireproofing, P 1904[7].
cellulose compn. for, P 2584[1].
of cellulose derivs., P 3567[2].
cellulose derivs. for, P 3567[2].
cellulose ester compns. for, P 3567[4].
of cellulose esters, P 3084[6], P 3579[1].
from cellulose ethers, P 2073[4], P 3579[1].
from cellulose xanthates, P 1324[2,9]
compn. for forming, P 504[3].
of crystal violet adsorbed on plane surfaces, 2104[2].
between an electrolyte and a liquid dielec., function during passage of electricity, 1751[4]
of emulsions, 320[8]
energy of, 2770[2].
of fats, behavior on surface of water of, 133[9].
fine structure of surface layers and dependence on temp. of surface tension of pure dielec. liquids, 3603[8].
formed by reaction of gas and metal, measurement of thickness of, 1752[9].
gelatin, P 2091[3].
of hydrated cellulose, shrinkage prevention of, P 988[7].
kinetic theory of surface, 2923[1].
of liquids on liquids, spreading of, 1738[1].
mixed adsorption, method of investigating, 2438[1].
monomol., 2767[1].
in adsorption, 2268[4].
effect of equil. pressure on, 134[3].
elec. properties of, 2605[1].
monomol. soap, in emulsions, 4[9].
nitrocellulose and cellulose, structure of, 3607[1].
nitrocellulose compn. for, P 1904[8], P 3084[4].
oil, in bearings, charts for studying, 816[8].
oil, on water, spreading velocity of, 3604[7].
of org. compds. with long chains, formation of, 3365[8]
periodical effects of thin, from standpoint of limiting problem of electromagnetic theory, 3636[8].
polymol. and monomol., 134[5].
of proteins on collodion membranes, 321[1].
of rubidium on glass, elec. and photoelec. properties of, 1948[3].
soap, compn. of, 687[2],
structure of, 1542[3], 2604[8], 3604[2].
surface, effect on evapn. of water, 855[4].
kinetic theory of, 2605[9].
on liquids, 3367[5].
transfer, P 1697[6].
translucent, contg. asbestos, P 484[2].
from viscose, P 830[5,6], P 1722[3], P 2253[6].
of water on salt solns., structure of, 1738[6].
Filterability, of dyes, effect of reversing elec. charge on, 3481[4].
Filtering materials, P 1499[6,7].
from bone, P 483[7].
cotton, 1731[3].
for dust, 2378[7].
kieselguhr treatment for, P 804[5], P 3065[6].
nitrocellulose membranes as, 3368[6].
for oils, P 3563[5].
of paper-pulp felt, 2799[1].
recovery of, P 973[9], P 974[1].
revivifying, P 3544[1].
silica gel as, 1932[3].
silicate, for petroleum, 2578[9].
siliceous product for, P 3543[1].
sintered glass, 1531[1].
stone, detn. of diam. of pores and pore no. in, 1545[6].
stones, resistance to H_3PO_4 and H_2SO_4, 2885[3].
in sugar manuf., effect on quality of work of filter station, 1333[5].
Filter paper, 288[2].
acid adsorption by, 686[6].
adsorption of diastases and antidiastases by, 3707[2].
stained by neutral red, decolorization by acids and alkalies of, 3462[2].
Filter press. See *Filters.*
Filter pumps. See *Pumps.*
Filters. (See also *Filtering materials; Sugar manufacture; Ultrafilters; Water, purification of;* and "screens" under *Photography.*) P 2[1,2], 127[7], P 523[7], P 681[5], P 848[1], P 1152[8], P 3593[3,4].
for acids, etc., P 681[4].
for air, P 2[3].
operation with oil films, 2408[5].
washing and charging, P 1541[2].
for artificial silk industry, P 2588[8].
asbestos paper, P 3593[3].
bacterial, 3481[3].
bed for liquids, P 1152[9].
for beer, etc., P 2046[2], P 2225[3].
for benzine for dry cleaning, 2078[2].

 book: Die physik. Chemie in der gerichtlichen Medizin und der Toxikologie mit spezieller Berücksichtigung der Spektrographie und der Fluoreszenze methoden, 2002^3.
 of bromine, 3132^5.
 of cadmium vapor, $2619^{7,8}$, 2953^8.
 of cellulose dipped in solns. of tanning materials, 3835^1.
 in chemistry, pharmacy and biology, 545^4.
 of chlorophyll, 2521^6.
 color of, 871^9.
 in copper or Fe, 2115^2.
 diminution of, theory of, 1031^4.
 of dyes, rate of decay of, 3268^1.
 of dyestuff solns., polarization of, 1952^6.
 energy transformation coeff. of iron, Ni, Cu, Zn, Mo and Ag, 2943^2.
 of fluorescein, energy yield under excitation of anti-Stokes type, 3132^3.
 of fluorescein in acid solns., 1760^1.
 hydrogen-ion concn. and, 3644^8.
 of iodine vapor, 871^6.
 of Lenard window in path of cathode rays, 3265^2.
 of liquid and solid solns , 2619^9.
 malic acid, reaction, 3666^2.
 of mercury, 2286^4, 2613^6.
  duration of, 7^2.
  effect of elec. fields on polarization of resonance, 2117^2.
 of nitrogen, 337^1.
 of oils, effect of ultra-violet radiation on, 1836^6, 3827^7.
 phosphorescence and, 3132^6.
 polarization of, 7^7.
 polarized, in dye solns., 7^3, 871^7.
 quantum theory in relation to, 3645^3.
 in reactions and titrations, 3133^5.
 reaction velocity and, 3644^7.
 resonance, of mercury, quenching by addition of gas, 3126^9.
  of sodium, polarization of, 3133^2
  of sodium vapor, extinction of, 2119^1.
 in Röntgen-ray domain, 1948^7, 3129^9.
 in salt solns., 2113^3.
 in solid solns., concn. and, 2954^1.
 substances showing both phosphorescence and, prepn. of, 18^6.
 sulfited cellulose detection in tannin exts by, 2260^6.
 of sulfite cellulose exts , 3245^9
 of sulfite pulps, 2746^8, 3808^5.
 in tanning materials, 1535^7
 of thallium, 2788^9.
 by ultra-violet light, 2629^6, 3391^8
 of uranium salts (solid and dissolved), 2286^5.
 of uranyl salts, absorption spectrum and, 7^5.
 of vegetable dyes, 337^3.
Fluorescent substances, P 3647^5.
 absorption of light by, measurement of coeffs. of, 1562^4.
 activated state of mols. of, detn of life period of, 1562^9.
 detn. of, 722^9.
 effect on shock and anaphylaxis, 3506^6.
 liquid, permanent modifications in, 1562^5.
 photoactive cells contg., e. m f of, 1357^8
 photoelec. cell contg , origin of e m f. of, 2944^1, 3644^8.
 radiochemistry of, 3644^9.
 screens, P 154^8.
Fluoride ion, effect on sugar assimilation by oxygenated yeast, 1829^6.
 structure of, 318^3.
Fluorides. (See also *Halides*)
 analysis of bi-, 1966^6.
 complex, P 1498^9.
 decompn. potentials of molten, 141^7
 decompn. potentials of molten, F potential detn. by measurement of, 697^6, 1937^9
 detn. of, 159^6, 2801^3.
 detn. of, in baking powder, 3198^1.
 fluorine detn. in, 2129^3.
 as insecticides, 2385^6.
 manuf. of, P 972^9.
Fluorine. (See also *Halogens.*)
 atom, effect on reactivity of Br, 1066^2.
 atom, effect on substitution in aromatic compds., 2840^6.
 cachexia in herbiverous animals, $1675^{7,8}$.
 in enamel melting, 3339^5.
 oxidation of bisulfates and sulfates with, 2794^3.
 oxidation with, 2293^4.
 physiol. relations of, 949^7.
 potential of, 141^7, 697^6, 1937^9, 2938^5.
 prepn. of, 873^4.
 reaction with alkali acetates, 2794^4.
 reaction with $KHSO_4$ and with K_2SO_4, 2293^5.
 removal in manuf. of H_3PO_4, P 3541^6.
 scattering of x-rays by, 2453^8.
 spectrum of, 15^4, 1354^9, 2949^5, 3641^7.
 spectrum of, Zeeman effect for, 1950^9.
 thermochemistry of, 2110^9.
Fluorine, analysis, detection, 1042^2, 3275^2.
 detn., 2129^3, 2471^5.
 detn. in lithium minerals, 724^7.
 detn. in slag (basic), 724^4.
Fluorine compounds, coloring glass with, 2054^2.
 complex, P 3542^9.

poisoning by, 81^{2}.
Fluorine salts, chronic intoxication by, 2880^{9}.
Fluorite (*fluorspar*), coloration by radiation, 3146^{4}.
coloration of, 329^{5}.
compressibility of cubic, 525^{4}.
crystals, reflection of x-rays from, 2925^{9}.
effect on m. p. of enamel, 3789^{2}.
industry in Illinois and Kentucky, 3064^{4}.
industry in 1925, 3783^{2}.
radium effect on, 3127^{9}.
resources of U. S., 971^{8}, 3540^{9}.
review of mining and trade information, 888^{2}.
Rontgen rays from, 1354^{7}.
silicic acid detn. in, 723^{1}.
slag formation in cupola furnace and, 2476^{5}.
spectrum of, 2453^{8}.
thermal cond. in, quantum theory of, 700^{1}.
Fluoroscopes, 2097^{8}, 2599^{4}.
screen for, P 343^{8}.
Fluorosulfonates, prepn. of, 2293^{5}.
Fluorspar. See *Fluorite*.
9 - Fluorylamine, 9 - fluorenecarbamic acid salt, 2676^{1}.
isomerism of, and derivs., 188^{1}.
isomers, 1073^{8}.
———, *N*-**acetyl**-†, 1073^{8}.
isomers, 188^{9}, 189^{1}.
Fluosilicates, detection of, 3275^{1}.
as insecticides, 2385^{5}, 2556^{6}.
Fluosilicic acid, as disinfectant, 1301^{6}.
heat of formation of, 2111^{1}.
vitreous compn. resistant to, P 809^{1}.
Fluotaramite, 2805^{1}.
Fluxes. (See also *Soldering; Welding*.)
for ceramic materials, P 3789^{8}.
Fly paper, rosin for, 3090^{4}.
Foam, beating app. for soap boiling, 3356^{6}.
of beer, detn. of formation of, 2557^{4}.
of beer, mellowness and, 2557^{2}.
colloid chemistry of, 634^{5}
for fire extinguishers, P 98^{3}.
for fire prevention, P 3545^{2}.
formation of, surface tension and, 3110^{5}.
meter, 1339^{1}.
on paper machines, prevention of, P 504^{6}, P 1523^{5}.
stabilization of, P 484^{5}.
stabilizing compn. for, P 3786^{8}.
value of soaps, detn. of, 2913^{1}.
Foaming, in boilers, 2216^{1}, 3762^{3}.
of textile soaps, 2591^{6}.
Fodder. See *Feeding stuffs*.
Fogging. See *Photography*.
Fogs. (See also *Clouds; Mists*.)
black, 2102^{2}.
density of, turbidimeter for recording, P 1732^{7}.
formation of, atm. conditions for, 2104^{1}.
Foil. See *Metals*; etc.
Follicular fluid, compn. and biol. activity of, 1443^{1}.
injection of, 942^{5}.
protein from, hydrolysis of, 2896^{2}.
"**Folliculin.**" See *Menformone*.
Fontane, biography of, 3772^{9}.
Food. (See also *Canned goods; Canning; Condiments; Diet; Feedingstuffs; Milk substitutes; Nutrition; Refrigeration; Vitamins;* and the various kinds of food as *Cereals; Eggs; Fruit; Meat; Milk; Nuts;* etc.) P 462^{7}.
accessory factor P-P in, in relation to pellagra and black-tongue, 2693^{9}.
acid- and base-forming elements in, 459^{7}.
acid-contg., rubber equipment for handling of, 787^{4}.
activation of, ultra-violet irradiation in, 1437^{4}.
adulterations of, detection of, 3750^{4}
antirachitic activation of, by ultra-violet irradiation, 2187^{7}
antirachitic properties of, development of, P 953^{4}.
antirachitic properties of, irradiated with ultra-violet light, 222^{3}.
for aquatic animals, effect of O requirement on source of, 1281^{9}
artificial sugar as, 1833^{7}.
autoclaved, alimentation with, 2187^{7}
autoclaving, effect of alkali on antineuritic vitamin in, 1451^{7}.
beets as, 2355^{8}.
biol. tests of, 3488^{6}.
from blood and carbohydrate material, P 3520^{8}.
books: and Health, 437^{5}, 953^{1}; Applied Chemistry. A Practical Handbook for Students of Household Science and Public Health, 787^{6}, Food, Its Compn. and Prepn., 1120^{9}, Food, Nutrition and Health, 1260^{1}, Quand, pourquoi et comment malter les aliments, 1288^{2}, for the Diabetic, 1437^{8}; Chemistry of, and Nutrition, 1475^{7}, Vital Factors of, 1836^{8}, Lehrbuch der Nahrungsmittel-Chemie, 2213^{5}; Spezialitäten und Geheimmittel, 2215^{3}; Methoden der bacteriol Untersuchung von Nahrungsmitteln, 3021^{5}, Chem. Technologie der Nahrungs- und Genussmittel, 3050^{7}.
from bran, P 462^{7}
from bran, etc., P 787^{7}.
breakfast, P 634^{1}
calcium oxide content of Philippine, 631^{1}.
caloric values of, distribution to protein, fat and carbohydrates, 619^{3}.
from casein, P 3521^{6}.
from cheese and yeast, P 1288^{2}, P 3051^{1}.
chemistry of, 244^{3}
development of, 72^{4}.
importance of study of ions in, 1637^{9}.
limiting figures in, 244^{2}.
reviews, 1872^{9}, 3048^{7}.
chemists' assoc. in Germany, 72^{5}.
Chinese, analysis of, 3199^{9}.
cholesterol in, 3179^{6}.
compn. and nutritive value of, effect of temp. on, 2883^{2}.
compn. of, and need of vitamins, 62^{8}.
consumption, economy of, 2525^{9}.
contg. substances having sp. harmful effects under certain conditions, 3489^{1}.
control of raw, 72^{6}.
control of, unification in, 631^{2}.
cooking and extg., P 463^{1}.
copper in, 247^{9}.
corrosion-resistive Ni for, 2814^{1}.
for diabetes and acidosis treatments, esters of fatty acids as, P 462^{8}.
digestibility and utilization, method for study of, 3718^{2}.
dried potatoes, etc., P 1288^{3}.
drying and concn. of, 784^{7}.
drying and solidifying, P 3321^{6}.

dyes for, chemistry and analysis of permitted coal-tar, 2027[2].
effect on development and metabolism of larvae of *Tenelrio molitor*, 1871[9].
on energy metabolism of new-born babies, 1262[5].
on sodium chloride content of blood, 1652[9].
elec. conservation of, 1256[7].
examn. at frontiers, 787[1].
from fish, P 79[3].
from fish, etc., P 953[7,8].
fruit pomace ext., P 3756[1].
gelatin, P 2551[1].
hydrogen-ion concn. of, 3197[1].
indole in, 72[8].
for infants, P 79[1], 1873[2].
theoretical requirements of, 2186[8].
thick cereal formulas and butter flour mixts. as, 436[7].
inspection of, as vocation, 2026[9].
inulin and legumes contg. thioglucide as, 2522[4].
iodine content of, from goiterous region in Bavaria, 3743[5].
iodine content of, goiter and, 2217[9].
iron in, 951[3,4], 1118[2].
irradiation with ultra-violet and other rays, app. for, P 1924[6].
irradiation with ultra-violet light, 1437[4].
from kola ext. and lactose, P 633[9].
legislation, 2026[9].
lipoid-contg., growth of microörganisms on irradiated, 2689[7].
macaroni and noodles compn., P 787[7].
manganese in, 247[9].
manipulation of basic, 3318[1].
medicinal, P 3539[3].
medicinal, casein in, 972[2].
metallic compds. in, 72[9].
from milk, P 3200[8]
from milk (skimmed), P 3321[5].
minerals in, effect on health, 2523[8].
mineral value of, 72[5].
mixing and steam-treating app. for, P 79[6].
mucic acid as, 787[3].
nutritive value of, detn. of, 2004[5].
packing, P 2213[7].
paper receptacles for, treatment with H_2SO_4, P 1523[2].
perfuming and flavoring substances in, 1849[9].
phytin content of, 1286[7].
preservation of, P 2034[6,7], P 2215[6].
preservation of liquid, P 953[2].
preservatives for, P 1890[3].
in Batavia, 2027[1].
chem. constitution and, 3712[7].
proteins in Japanese, nutritive values of, 1835[4].
proteins in preserved, transformation of, 951[4].
proteins of, tryptophan detn. in, 1251[8].
from protein (waste), P 3756[2].
rept. of Food Investigation Board for 1924, 1282[9].
of rice and edible oils, P 79[2].
sex differences in requirements of, 1430[5].
shark's fins as, 3755[1].
specific dynamic action of, 436[1], 1246[2], 2525[4].
effect of thyroid hormone on, 1438[9].
relation of thyroid secretion to, 223[2].
sterilization of, P 953[6].
sulfur dioxide in, 3199[3].
ternary, effect on N retention during growth, 2355[9].
tryptophan detn. in protein, 3306[5].
unusual elements in, 2508[3].
vacuum treatment of, P 3050[8].
value, display for demonstration purposes, 951[3].
vitamin A in, storage effect on, 1430[8].
vitamin-contg., manuf. with addn. of liver oil, P 787[8].
vitamin content of, testing, 1432[8].
vitamin-rich, 2356[1], P 3755[7].
vitamin-rich, fish liver as, 2006[7].
vitamins A, B and C, effect of boric acid on, 3317[8].
vitamins in heat-sterilized, 2526[8].
vitamin X in, 2693[4].
from water hyacinth plants, P 633[9].
zinc in, 247[9].
Food, analysis. (See also *Butter; Crude fiber; Fats; Feeding stuffs; Milk, analysis; Sugar, analysis;* etc.)
books: 633[9]; Pharmaceutical and, 1889[9].
cereals, 75[2].
detection of dyes, 3317[7].
detn. of ash, 2883[8].
of ash in cereal products, 75[4].
of coloring matters, 73[1].
of energy values, 1093[8].
of ext., 1042[9].
of formic acid, 2211[2].
of hydrogen-ion concn., 3197[1].
of milk fat, 1119[8].
of raw fiber, bumping prevention in, 1872[9].
of unsaponifiable matter, 1118[3].
of water, app. for, 2433[6].
microchemistry and, 3196[9].
mold test in, 2883[1].
serol. examn., 3196[9].
Forces, atomic and ionic, 861[6], 2113[7].
book: A New View of Surface, 2113[5].
fields of, of polarized dielectrics, 8[2].
interat., and strength of metals, 3678[6].
inter-mol., relation of radiation pressure and gas pressure to, 143[7].
law of, and size of diat. mols., 2783[2].
law of, scattering of α-particles by at. nuclei and, 143[8].
Forestry, book: Einführung in das Studium der organische Chemie für Studierende der Chemie, Medizin, Pharmazie, Naturwissenschaft, Forstwissenschaft, u. s. w, 2332[9].
Forgings, annealing in elec. furnace, 2954[6].
carbon-steel and alloy-steel, specifications of A. S. T. M. for, 1122[1].
hard spots on steel, 1584[1].
manufg. large ring, 2140[1].
Formal. See *Methylal*.
Formaldehyde. (See also *Phenol condensation products; Photosynthesis; Trioxymethylene.*)
acetals of, velocity of hydrolysis of, 3621[5].
5 - chloro - 2,4 - dinitrophenylhydrazone, 750[5].
compds. with $NaHSO_3$ and with H_2SO_3, 2309[9].
concn. of, P 3697[1].
condensation product with urea, 3541[3].
condensation with urea, 265[9], P 268[3].
decompn. by heat, 2273[4].
decompn. of, mechanism of, 38[1].

dehydrogenation of, with Cu as catalyst, 860[7].
detection of, 160[6], 2803[5].
detn. of, 352[1], 727[1], 1774[8], 3145[7], 3684[9].
detn. of, in tablets, 2227[5].
detoxication of bacterial vaccines by, 1458[5].
dimethylacetal—see *Methylal*.
as disinfectant, 1301[6].
as disinfectant for textiles, 3240[3].
distn. of, 1589[9].
effect on alkaloid synthesis in *Lupinus luteus*, 2184[6].
on anaphylactic power of peptone from casein, 2179[3].
on carbon assimilation by plants, 3486[7].
on daboia venom, 240[7].
on germination of wheat seed, 472[3].
formation from CO_2, effect of Pb contg. Ra on, 331[9].
formation from CO and H, surface catalysis in, 2792[2].
as fungicide for wheat bunt, 2385[1].
as intermediate product in CO_2 assimilation in plants, 2519[9].
in marine products, 1119[3].
from methane oxidation, catalysts for, P 970[3].
monomol., and its polymerization, 2816[6].
N - nitrosophenylhydrazone, as indicator, 722[5].
photochem. synthesis of, 546[3].
from plant juice, 1649[9].
prepn. of, 3684[8].
reactions of, effect of U compds. on, 2952[3].
reaction with acids contg. labile hydrogen and secondary amines, 1413[8].
with *p*-aminophenol, 3452[6].
with ammonium chloride and acetone, 1808[7].
with glycine, 900[5].
with 5-methylacridine, 1239[1].
with methylamine and acetone, 1808[8].
with methylthiouracil, 2681[9].
with *p*-phenylenediamine and H_2O_2, 53[1].
with tryptophan, 3708[5].
reduction (electrolytic) of, 2622[9].
spectrum of, 870[6], 2948[6], 3641[4].
sterilizer and cabinet for storing sterile urological instruments, 2173[9].
surfaces, photoelec. effect of, 3129[2].
synthesis of, 2438[4].
synthesis of, from CO_2 and H_2O, 1385[5].
tanning—see *Tanning*.

in varnish fire control, 3353[8].
Fumigants. (See also *Disinfectants.*)
calcium cyanide compd. with HCN as, 971[3].
chloropicrin as, 2230[6].
cyanogen, P 1496[9].
cyanogen chloride-HCN, P 2556[9].
tricalcium cyanide, P 3214[2].
Fumigation. (See also *Disinfection.*)
with calcium cyanide, 642[9], 1490[7].
with carbon disulfide for land crabs, 1683[4].
for cereal products with chloropicrin, 1474[2].
with hydrocyanic acid, P 256[9], 1673[1], P 3526[8], 3770[2].
of buildings, 2552[9].
effect on foods, 244[4].

insect destruction by, P 794^{3}.
of ships, 3054^{8}.
of soil by HCN, 3769^{3}.
of soil, K xanthate in, 793^{6}.
of tomato houses with HCN, 3532^{2}
Fuming, of org. materials, 3602^{2}.
Functional groups, transposition of, 3284^{3}.
Fungi. (See also *Aspergillus*, *Mildew*; *Molds (II)*; *Microorganisms*, *Mushrooms*; *Oidium*; *Rhizopus*.)
of apples, relation to senescence and internal resistance of tissues to, $1283^{1,5}$
biochem. reactions of, 1257^{8}
of cadavera, 2687^{8}
cellulose decompn by filamentous, C and N transformations in, 615^{7}
of cellulose decompn. in soil, 3056^{6}
cell wall formation of, chitin in, 2867^{1}
chalk-pptg., 1423^{2}
chemistry of higher, 1386^{1}
of coal, 2344^{1}
dyes from, 406^{1}, 1225^{9}
ferrase in, 1650^{1}
moist chamber for study of, 1823^{6}.
oxidation of sugars by, 3713^{7}
pigment formation by, 1256^{6}
quinic acid utilization by, 929^{9}.
in soils of Louisiana, 3529^{6}.
tyrosinase in, 2169^{2}
urea excretion by, 2344^{7}
vitamins in, 3311^{9}
wood-destroying, growth in relation to H ion concn of media, 1647^{6}
in wood pulp, 2072^{6}
of wood, treatment of, 3070^{1}
yeast-like, multiplication in synthetic nutrient solns., 1423^{7}
Fungicides. (See also *Bordeaux mixture*; *Insecticides*; *Sprays*.) P 259^{8}, 472^{2}, P $643^{6,7}$, P 3058^{6}
analysis of, 2223^{1}.
calcium cresolate as, P 1299^{9}
casein in, 972^{3}.
for cereal rusts, 259^{5}
compn of, 2223^{5}.
copper-contg., P 3533^{2}.
copper hydroxide, P 2556^{8}
in dust form, application of, 963^{1}
2-furaldehyde as, for seeds, P 3207^{3}
government action respecting, 2551^{7}.
for grain diseases, 963^{5}
for grain smut, testing of, 963^{1}
for *Hevea*, 643^{2}.
and insecticide, P 1684^{1}.
for onion smut, 3058^{4}.
review, 3328^{7}.
for seed grain, P 1491^{5}.
for seed treating, P 3533^{3}.
selenium-contg., P 3770^{6}.
spray-fluids as, 2223^{6}.
sulfur as, 89^{1}, 3769^{6}.
sulfur-contg., P 89^{8}.
sulfur in, adherence to foliage, 3058^{2}.
tests on, in 1921–1924, 471^{9}.
for tree trunk injection, P 1491^{4}.
volatile oils as, 3021^{4}.
Funiculus. See *Umbilical cord*.
Funnels, Buchner, of porcelain, 1539^{3}.
filtering, P 2433^{8}.
separatory, defects in, 670^{3}.
Fural. See *2-Furaldehyde*.
2-Furaldehyde (*furfural*; *furole*).
condensation with aliphatic ketones, 3004^{9}.
condensation with 2,4,6 - trinitrotoluene, 3001^{9}.
crit. soln. consts. of, 525^{2}.
cyanohydrin—see *2-Furanglycolonitrile*.
detn. in duodenal contents, 2365^{1}.
detn in ethyl alc., 2893^{1}.
as fungicide for seeds, P 3207^{3}.
general article on, and its use, 3840^{1}.
heat of vaporization of, 1551^{1}.
(*m*-iodophenyl)hydrazone, 1794^{9}.
as larvicide for screw worm and other flies, 2555^{3}
manuf. from peanut hulls, 2230^{6}.
molded articles from nitrocellulose and, P 290^{1}.
prepn. from corncobs, 192^{9}.
reaction with $NaNH_2$, 2491^{7}.
residues, prepn of activated C from, 2230^{4}.
thiocarbohydrazone, 1811^{1}.
2-Furaldehyde, hydroxymethyl-, detn. of, 3753^{6}
prepn of, 214^{1}
——, **tetrahydro-**, phys. consts. of, 596^{7}.
Furan (*furfuran*),

(O CH CH.CH·CH)
1 2 3 4 5

derivs., 412^{9}.
derivs., catalytic hydrogenation of, 412^{6}.
graphite of, 736^{6}.
physiol. action of, 242^{7}.
——, **2 - (α - hydroxy - 3,4 - methylenedioxy-α-toluyl)-†**, benzoate, 1615^{9}.
——, **tetraiodo-**, heat action on, 736^{8}
——, **tetraphenyl-**, heat of combustion of, 327^{1}
——, **thio-**. See *Thiophene*.
——, **2-(2,4,6-trinitrostyryl)-**, 3001^{9}.
2 - Furanacrolein, prepn. of, and oxime, 1235^{6}.
2 - Furancarbinol, 1 - naphthalenecarbamate, 1232^{9}
oxidation of, 2996^{2}.
prepn. of, 2491^{7}, 3293^{6}
pyromucate, dimorphism of, 1235^{3}
3 - Furancarboxamide, 2,3 - dihydro - 2-keto-5-phenyl-, 404^{6}
2 - Furancarboxanilide, *o,o′* **- dithiobis-**, 600^{2}
2 - Furancarboxylic acid. See *Pyromucic acid*.
——, **tetrahydro-**, consts. of, 2493^{1}
3 - Furancarboxylic acid, 3 - acetyl - 2,3-dihydro - 2 - keto - 5 - phenyl-, ethyl ester, 404^{7}.
——, **3 - benzyl - 2,3 - dihydro - 2 - keto-5-phenyl-**, ethyl ester, 404^{7}.
——, **2,3 - dihydro - 3 - isopropyl - 2 - keto-5-phenyl-**, ethyl ester, 404^{7}.
——, **2,5 (and 4,5) - dihydro - 5 - keto-2,4-dimethyl-†**, and derivs., 2824^{3}.
——, **2,3 - dihydro - 2 - keto - 5 - phenyl-**, ethyl ester, 404^{6}.
——, **3 - ethyl - 2,3 - dihydro - 2 - keto-5-phenyl-**, ethyl ester, 404^{7}.
3,4 - Furandicarboximide, 2,5 - diphenyl-, 386^{8}.
——, ***N*,2,5-triphenyl-**, 386^{8}.
2,5-Furandione. See *Maleic anhydride*.
2-Furanglycolonitrile, benzoate, 1615^{6}.
2 - Furan - α,γ,ε - heptatrienaldehyde, and phenylhydrazone, $1235^{4,7}$.
2 - Furanmethylamine, *N* - benzyl - *N*-methyl-, 390^{7}.

——, *N* - **methyl** - *N* - **2 - thienyl-†**, and derivs., 390[7].
2-Furanol, 5-benzal-2,5-dihydro-2,3,4-triphenyl-, 1407[7].
2-Furanone. (*The lactones which might be classed as furanones are usually found under their respective acids.*)
2(3) - Furanone, 4,5 - dihydro - 5,5 - bis-(*p* - hydroxyphenyl)-. See *Phenol-succinein.*
3(2) - Furanone, 2,2,4,5 - tetraphenyl-, 391[1].
2 - Furan - α,γ - pentadienaldehyde, and derivs., 1235[4,7].
2-Furanpropylamine, α-methyl-, 413[2].
Furfural See *2-Furaldehyde.*
Furfuraldehyde. See *2-Furaldehyde.*
Furfuran See *Furan.*
Furfurole. See *2-Furaldehyde.*
Furfuryl alcohol. See *2-Furancarbinol.*
Furil, heat of combustion of, 327[1].
Furnace (See also *Kilns; Pyrite burners; Refractory materials; Regenerators; Retorts, Sulfur burners;* and "retorts" under *Gas, illuminating and fuel*)
for aluminum melting, 31[8].
annealing, 1200[2], P 1924[2]
for annealing centrifugally cast Fe pipe, P 3154[8].
for annealing glassware, P 650[6].
for annealing hoop Fe, wire, etc, P 1976[2].
for annealing metal plates and sheets, P 735[9].
for annealing metal sheets, etc, P 359[3], P 3154[4]
for annealing sheet steel, etc, P 735[9].
annealing (tunnel), 2305[9].
arches for, 1504[9].
atm., control of, 2572[8].
for bisulfites, 1[3].
for blast-furnace boilers, Cowper app., etc, P 735[3].
blowing-in methods with water-jacketed, 1378[4].
boiler, burning sawdust and powd coal, 3795[1].
books: Industrial, 1006[1]; Les fours à flames, 2144[2].
Bosshardt, steel production in, 3675[4].
brass-smelting, device for charging and discharging, P 34[9].
bricks for metallurgical, P 809[3].
for burning resin, ozocerite and pitch for making blacks for colors, 3064[4].
for calcining lithopone, etc, P 2082[2].
with carborundum muffles for oil refining, 1712[2].
charcoal, in Sénart Forest, 282[3].
charging device for, P 523[9].
circulation of gases in metallurgical, theory of, 3147[3,4].
coal-dust and air supply for metallurgical, P 897[3].
with coal dust as fuel, P 1214[1].
coke-fed, resistance to flow of gases in fuel bed of, 1708[3].
construction of, P 815[3].
crucible, P 848[6], P 1732[7].
design of, burners and, 3233[2].
detinning, using gas or oil, P 1214[2].
for drying fuller's earth, P 3786[8].
efficiency of industrial, 491[2].
for enameled articles, etc., P 681[7].
for enameling metal ware, P 3790[7].
enamel (sheet-iron), gas as fuel for, 3789[3].
for enamel ware, etc, fusion, P 3790[6].
for eutectic alloys by fractional solidification, P 3443[8].
gas, 103[9].
for gas and coke production, etc., P 3074[4].
gases, app. for detg. temps. of, P 1924[3].
gases, heat-exchange device for, P 3592[9].
gas-fired shaft, for burning lime, cement, dolomite, etc, P 1153[2].
gas-fired test, for ceramic ware, 1504[9].
glass—see *Glass*
hearth, for melting metals, P 3153[6].
heating, 273[1].
for heating gases for drying salt, sugar, starch, etc, P 848[3].
for heating metal plates, P 3442[2].
for heating metal plates, billets, etc., P 3279[6]
heat-resistant mortar and protecting coating for, 3220[6].
for heat-treating Fe internal-combustion cylinders with Cu fins, etc., P 35[1].
for heat treatment, P 3154[6].
for heat treatment of metals, P 168[7], P 1976[2], P 3682[8].
for heat treatment of metals, ceramic ware, etc, P 3103[2].
for heat-treatment of wire, P 897[3].
for heat-treatment of wire in coils, etc., P 3442[1].
incinerating—see *Incinerators.*
industrial, 491[2].
joining parts of, P 2056[2].
for lignite, 1509[3].
lignite, in ceramic industry, 3068[6].
linings for, P 976[6], P 3221[7].
fractional fusion of, 486[5].
refractory brick for, P 1505[7].
short life of, 2735[4].
lubrication in, P 2583[5].
for melting brass, type metal, etc., P 735[4].
for melting metals, control device for gas supply to, P 735[4]
for melting metals, etc., P 1587[2].
metallurgical, P 34[1,4], P 2479[3], P 3441[9].
metallurgical hearth, P 3681[7].
oil-fired, conversion to elec. heating, 338[9].
open-hearth, P 495[8], P 574[9], 892[1], P 897[2,3], P 1382[9], P 1383[1], P 3681[7].
carbon elimination in, 3147[6].
combustion in, and its automatic control, 1579[9].
dimensions and output of German, 31[4].
effect of operating conditions on life of refractories, 808[3].
effect of size on quality of steel, 2305[8]
oil-fired, in steel foundries, 3676[6].
operation of, 3147[8].
oxygen removal from steel in gutter of, 2637[1].
for refining steel, P 357[7]
refractories for, 976[1], 3415[9].
slag pocket for, P 897[3]
for steel making, P 1214[1].
tapping trough, slag sweeper and skimmer for, P 1214[2].
temp. in, optical measurements of, 3147[9].
oxy-C_2H_2 fusion, 808[6].
for petroleum refining, P 3563[9].
for phosphates, automatic chargers for, 1[8].

for treating gases, P 715[3].
for treatment of comminuted carbonaceous materials, P 3652[1].
vacuum, 551[3].
for wolframite smelting, 2954[6].
for zinc metallurgy, condenser for, P 553[8].
for zinc oxide manuf., P 3136[6].
Furniture polish. See *Polishing materials*.
Furoic acid. See *Pyromucic acid*.
Furoin (*1,2-di-(2-furyl)-2-hydroxyethanone*).
  benzoate, 1615[8].
  heat of combustion of, 327[1].
  oxime, Cu deriv., 1055[6].
α-**Furole**. See 2-*Furaldehyde*.
1,3(5) - Furopyrroledione, 4,6 - diphenyl-. See *3,4 - Pyrroledicarboxylic anhydride, 2,5-diphenyl-*.
2,1,3,5-Furotriazole,

2,1,3,5-

  spiro derivs., 1410[2,3].
Furs, bleached and dyed, P 511[8].
  cleaning, P 3353[1].
  dyeing, P 511[2], P 993[5], P 1328[3].
  dyeing of, app. for, P 2588[4].
  moth-proofing, P 511[7], P 2080[3].
  preparing for shrinking and felting, P 3578[7].
  processing of, 1526[9].
Furunculosis, stannoxyl treatment of, 1271[4].
Furyl alcohol. See *2 - Furancarbinol*.
Fusain, 2239[4].
Fusarium, enzymes of, action of, 1833[4].
  lycopersici and *oxysporum*, mycelium of, isoelec. pt. for, 2352[3].
Fusel oils, dehydration of, 2224[3].
  detn. in ethyl alc., 2893[1].
  origin and production of, 90[5].
  recovery of, 3208[2].
Fuses. (See also *Electric fuses*.)
  elec. time, for blasting, P 2076[3].
  for explosives, P 112[8].
  requirements and functions of, 3573[9].
  as solid-solid systems, 1549[6].
Fusibility, of coal ash, 1704[3].
Fusion. (See also *Heat of fusion; Melting*.)
  of crystals, 2602[8].
  pot for, 1152[2].

Gabbros, compn. of 2 German, 1046[3].
  from Virginian Piedmonts, 2635[2].
Gabriel, Siegmund, obituary, 1215[5].
Gadolinite, at Löuböle, Finland, 3667[9].
  spectrum of, 3385[6].
Gadolinium, spectrum of, 2943[9], 3266[1], 3388[1].
Gadolinium lactate, prepn. and properties of, 2797[8].

Gadolinium sulfate, magnetic susceptibility of, 2112[4].
Gages, pressure—see *Manometers*.
Gaize, Tertiary, from Russia, 1375[5,6].
Galactan, staining capacity of, 1830[7]
Galactonic acid, *d*-, lactone, semicarbazone, 1059[2].
d-, monoacetate, 1059[1].
d-, prepn. of, and Cd salt, 2986[2,1].
6-methyl ether*, and salts, 1597[1,1]
——, **tetramethyl-***, δ-lactone, optical rotation of, 1060[4].
Galactose, absorption by liver, 1836[1].
assimilation in fasting and on protein-fat diet, 2355[6].
derivs., 1794[8,9], 1795[1]
d-, oxidation of, 368[9].
d-, reaction with KOH, 3692[1]
effect on shivering reflex, 3194[1]
fermentability by yeast, effect of cultivation of yeast on, 769[1]
fermentation by *Saccharomyces cerevisiae*, 2179[6].
by yeast, 1634[1]
by yeast after previous treatment with this sugar, 929[6]
6-methyl ether*, and derivs., 1597[4]
methylglyoxal from, by action of alkali, 3722[3].
methyl[*p*-(*p*-α-methylhydrazinobenzyl)-phenyl]hydrazone, 904[7].
oxidation of, 169[6]
oxidation of, catalysis in, 2935[4].
reaction with dyes and with $K_3Fe(CN)_6$, 742[4].
specific dynamic action of, 3717[1].
in urine from liver-function tests, isolation and identification of, 3028[6].
in urine, isolation and identification of, 3501[8].
utilization by *Scenedesmus* cultures, 2180[8].
Galactose, acetyldiacetone-*, 1389[1]
——, **diacetone-***, constitution of, 1389[1], 1597[2]
Galactoside, tetraacetyl-α-methyl-*, 1790[4]
——, **tetraacetyl-β-methyl-***, phys. consts. of, 1790[4]
d-**Galactosido**-*d*-**altrose** See *Neolactose*.
Galactosyl-6-dimethylamine*, methiodide, 1597[6].
——, **diacetone-***, and methiodide, 1597[5].
Galacturonic acid, detn. of, in pectin, 581[3].
d-, and derivs., 1389[1,4,5].
l, lactone, semicarbazone, 1059[2].
——, **diacetone-***, *d*-, and potassium salt, 1389[3].
Galalith, manuf. of, 96[3].
stability at high temps., 3051[4].
Galangin, trimethyl ether—see *Flavone, 3,5,7-trimethoxy-*.
Galegine, 450[7].
synthesis of, 1057[5].
——, **dihydro-**, chloroaurate of, 450[7].
Galena. (See also *Lead sulfide*.)
compressibility of, 525[4].
crushing of, 1477[2].
crystals, synthesis of, 2768[4].
detecting power of, crystal habit and, 1155[8].
from Einstein Silver Mine, Madison Co., Md., 1372[2].
from Jugoslavia, 3667[4].
at Magna Mine, Superior, Arizona, 3670[3].
from Monteponi, cryst. form of S in, 1969[4].
from Mount Albert map-area, Quebec, 2302[7].
reaction with SO_2, 2294[1].
in Sullivan ore, 3276[4].
of Yukon, Mayo dist., 30[5].
Galenicals. See *Drugs; Pharmaceutical preparations*
Galium, *aparine*, asperuloside extn. from, 2182[5]
Gallacetophenone (*2,3,4-trihydroxyacetophenone*).
iron deriv., 405[9].
Gallamide, reaction with sodium antimonyl tartrate, 1987[3].
Gallatotungstic acid, salts of, 3405[6].
Gall bladder, bile expulsion from, effect of $MgSO_4$ on, 1853[4].
contractions of, 1855[5].
Röntgen examn. of, contrast material for, 3471[6].
sphincter muscle of, effect of novocaine and glycerol on, 2701[8].
Gallic acid (*3,4,5-trihydroxybenzoic acid*).
acetates, 1613[8].
aluminum deriv., 406[1].
compds. with molybdic and tungstic acids, 3405[9]
and derivs., prepn. of, and reaction with sodium antimonyl tartrate, 1986[9], 1987[1,3].
reaction with beryllium carbonate, 1396[8]
——, **trimethyl-***, prepn. of, 3290[8].
Gallium, elec. resistance of, 2779[1].
purification of, P 1382[6]
spectrum of, 543[1], 1356[6], 1560[3], 1951[1], 3640[2]
Gallium oxide, prepn. from germanite, 2294[2]
Gallium sulfate, thermal decompn. of, 1167[4].
Gallocarboxylic acid*, derivs., 1613[4].
Gallodehydrodesoxycholic acid, 3706[6].
Gallodesoxybilianic acid, 3706[6]
Gallodesoxycholic acid, from bile of chickens and its effect on pancreas lipase activity, 3706[4]
Gallotannins. See *Tannic acids*.
Gallstones See *Calculi*.
Galvanization. (See also *Sherardization*.) 167[1], P 3443[5].
app. for, P 359[1], P 1215[4], P 1782[3].
book, 1213[2].
in corrosion prevention, 2035[5].
flux for, P 36[7].
of impure iron, 1585[5].
of metals to be electroplated, 552[4].
syndrome among workers in, 1779[8].
of wire, app. for, P 1782[3].
Galvanometers, radiation measurements with, 3251[4].
sensibility of, natural limit for, 2113[6].
sensitivity and cond. of, 1752[6].
Galvanoplastics, book, 3136[3].
Gambier, extn. and valuation of, 2260[6].
Gamboge, colloidal, effect of H-ion concn. on flocculation velocity of, 1010[6].
effect on intestinal peristalsis, 454[8], 2706[5].
flocculation of, effect of colloids on, 534[2].
pharmacodynamic properties of, 1862[9].
suspensions, effect of electrolytes on, 3257[7].
Gamma rays. See *γ-Rays*.
Gangrene, intracutaneous salt test in, 3188[2].
lead, in guinea pigs, 3729[8].
Gansil. See *Chloramine-T*.
Garbage. (See also *Refuse; Waste*.)
fat and oil removal from, P 1725[5].
feeding stuff and fertilizer from, P 791[2].

fermentation of, in prepn. of fertilizer, P 3532[8].
as fuel, 2713[6].
nitrogen availability in, 1299[1].
treating, P 1482[3], P 3202[9].
Gardenia turgida, *d*-mannitol from, 43[3].
Garelli, Felice, biography, 2204[5].
Garnet, crystal structure of, 3106[8].
of Fichtelgebirge, 885[1]
from graphite deposits in Russia, 3670[9].
in Krivoy-Rog ore-bearing dist., 3673[2].
mineralogy of, 3412[6]
in pelitic contact-zones, 2968[6].
Gas, illuminating and fuel. (See also *Acetylene, Ammoniacal liquor; Ammonia, manufacture of, Ammonium sulfate, Burners, Carbonization; Coal; Coke, Coking, Destructive distillation; Firing, Furnaces; Gas, analysis; Gas liquor; Gas, natural; Lighting gas; Orsat apparatus.*) P 106[6,7], P 659[2,3], P 3798[8], P 2578[1], P 3558[3].
absorbing masses, regeneration of, 981[3].
air detn. in, 3796[7].
air gas, app. for making, P 3800[2].
for airship fuel, 3556[6].
ammonia scrubbers, scale prevention in, 1900[2].
app for making, hot valve for, P 3229[3]
appliances, testing for safety from producing CO, 2062[8]
ash constituents of coal in relation to, 490[4].
in automobile industry, 1899[4].
from bagasse, burning of limestone with, 2918[1].
bench and retort construction, P 984[1].
benzene adsorption from, by C and silica gel, 1138[1]
benzene and light oils from, app. for washing, P 278[5].
benzene recovery from, 276[7], 2905[2].
solid adsorbents for, 2740[3]
by vacuum process, 1900[4].
benzene wash-oil method for testing wash oil at coke oven, thickening process in, 3073[5].
from bituminous materials, app. for extg., P 3348[2].
blast-furnace, application to open-hearth furnace, 1972[2].
burner for, 2242[8].
burners for boilers, tests of, 3797[5].
combustion of, control of, 3313[3].
effect on motors, 492[9]
filter for, P 2974[1].
phosphorus compd. recovery from, P 3215[5].
purification of, P 34[8].
purifiers for, 1048[8]
sepg. solid particles from, app. for, P 1214[1].
washing with water, P 1976[2].
in blast furnace throat, temp. and analysis of, 1378[6].
books: Gas and Fuel Analysis for Engineers, 982[4]; Die Leuchtgasindustrie, 1310[1]; Etudes sur les combustibles solides, liquides et gazeux, 2243[3].
in by-product coke ovens, control system for, P 3345[7].
by-product recovery, 1510[4].
calorific value of, app. for testing, P 3880[9].
calorimetry, 492[7].
carbon dioxide removal from, by water under pressure, 813[5].
carbon monoxide disappearance from, incubated with soil, 2715[2].
carburetors, comm. rept. on, 492[5].
chemistry, review, 3343[7].
coal analysis and coal, 3072[8].
coal and coke handling in manuf. of, 2060[9].
coal conservation and, 2574[1]
in coal distn , path of, 3073[4].
coal gas, P 983[2], P 1316[5], P 1901[2], 3225[3], P 3799[8].
benzene production from, 2740[1].
for boiler firing, 1708[2]
by-product oven plants, 980[8].
carbureting, app. for, P 2243[9].
compn. and utilization of, 656[7].
condensation of, 3226[3]
cooling of, for removal of $C_{10}H_8$, etc., 3556[9]
enrichment of, 103[4], 1899[5].
explosions of mixts. with air, radiation in, 2750[7].
generator for, 1509[3]
hydrogen sulfide removal from, P 1710[7].
liquid purification of, 492[3].
liquid purification, S recovery and, 2242[3], 3556[7].
manuf. of, 2575[2], 2576[2].
oil and $C_{10}H_8$ removal with silicic acid gel, 2727[7]
plant for, 980[3]
poisoning by, 2205[2]
for recovering scrap Cu and brass, 1708[1].
sepn of constituents of, P 636[4]
smokeless fuel production in manuf. of, 1898[9].
vertical retort heating with, 980[9]
washing app for, P 1710[8]
coal gas manuf , benzene plant in, 1709[2].
coke for producing, in gas producers on motor vehicles, 1315[3]
coke from manuf of, as insulator in cold storage, 3796[9].
coke from manuf of, improvement of, 494[1].
coke-oven, behavior at low temps , 2242[9].
benzene detn in, 2905[9].
hydrogen for NH_3 synthesis from, 2906[4].
hydrogen recovery from, 2229[4].
liquefaction of, app. for, P 3757[7].
oxygen enrichment of air used with, in steel manuf., 890[7].
replacement of natural gas in Pittsburgh by, 3798[2].
coke ovens in manuf. of, 982[3].
coke ovens in, plants, 2577[3].
combustion devices for, 2403[4].
combustion of, in blast furnace, 1580[8].
characteristics of, 3797[5].
at high pressures, 2414[8].
rate of, 291[1].
in secondary air, 276[8,9].
condensation and wet purification of, 2904[9].
condensers, design of, 2406[6].
condensers, heat transfer in tubular, 2406[4].
cooling, treating tar water for, P 1710[9].
for cutting and welding metals, P 1901[1].
for cutting metals, P 495[6].
for cutting metals, etc , P 2064[1], P 3345[4].
density of, detn. of, 980[8].
developments in Europe, 3797[5].
down-run process of Chrisman, 492[9].
enrichment with natural gas, 2904[6].
ethylene-contg., from tar oils, P 1512[1].

in Europe, 1899^{8}.
exhausters in coke ovens, regulation of, 1511^{1}.
fires, aeration in, 2574^{7}.
flame burning in secondary air, length of, 276^{7}.
flow of, in long pipe lines, 277^{1}.
flow to gas-consuming appliances, app. for regulating, P 1512^{1}.
for forging and welding, 814^{2}.
as fuel, coke *vs.*, 2575^{6}.
as fuel for sheet iron enamel furnaces, 3789^{3}
furnace for production of, 3074^{4}
from gasoline, etc , app. for, P 2067^{2}.
generator and blast-furnace, current analyses of, 2574^{2}
generators, P 3526^{8}, P 3558^{6}
  chem and thermal reactions in, 980^{7}.
  coking fuels in, 2574^{4}.
  firing in Cu refining, 2636^{2}
  fuel, bituminous coal as, 980^{6}.
  fuel spreader for, P 495^{7}.
  linings, refractories for, 3797^{2}.
  non-clinkering, 105^{4}
  at Rotterdam gas works, 491^{7}.
  safety devices for, 813^{5}.
  of Strache, 3796^{8}.
  for "total gasification," P 106^{4}.
in glass manuf., 2396^{8}, 3217^{6}.
heating horizontal retort settings by coke breeze, 105^{7}.
eating value of, 980^{6}.
  effect of $C_{10}H_8$ removal on, 1899^{3}.
  flicker of flames as index to, 1900^{6}.
  increasing by decompn. of tar vapors, 3343^{9}.
  as measure of usefulness, 104^{1,2}.
  relation to required vol. of combustion air and the combustion products, 3797^{4}.
  usefulness and, 2574^{7}.
